NERVOUS DEBILITY CURED

Excess and indiscretions are the cause of more sorrow and suffering than all other diseases combined. We see the victims of vicious habits on every hand: the man, pimpled face, dark circled eyes, stooping form, stunted development, baneful melancholic countenance and timid hesitating pronouncements to all the world his folly and need to fight his existence. Our treatment positively cures all weak men by overcoming and removing the effects of former indiscretions and excesses. It stops all losses and drains and quickly restores the patient to what nature intended—a healthy and happy man with physical, mental and nerve powers complete.

For over 25 years Drs. K. & K. have treated with the greatest success all diseases of men and women. If you have any secret disease that is a worry and a menace to your health consult our established physicians who do not have to experiment on you.

We guarantee to cure Nervous Debility, Blood Diseases, Stricture, Varicocele, Kidney and Bladder Diseases, Constipation, Etc. If unable to call, write for a Question Blank for Home Treatment.

DRS. KENNEDY & KERGAN, 145 Shelby Street, Detroit, Mich.

Mr. and Mrs. W. J. Ostrander, Mr. and Mrs. Mark Joy, Mrs. James Joy, Sr., and family.

In talking about the mail order business the Adrian Press says pertinently: But how long will it take to educate the people up to the point that they can never get something for nothing? It has not as yet been demonstrated that on an average any one concern can do much better by a customer than another, and especially where the expenses of doing business are about on an equality. If every citizen of a community were inclined to patronize home dealers with the same cash payments they observe in buying of mail order houses they can get more for their money every time, and never run any risk of being done up as the result of such transaction.

STATE NEWS

HAD PERILOUS CAR RIDE AND A MIRACULOUS ESCAPE.

RUNNING FIFTY MILES AN HOUR MAN IS HURLED FROM CAR INTO SPACE.

SEARCH FOR MISSING GIRL BY SHERIFF'S FORCE AND ALL THE PEOPLE OF FAIRPLAIN.

Not Hurt.

Clinging to the handrail and standing on the lower step of a vestibule coach on the fast northbound express on the Grand Rapids & Indiana road, Charles Kellogg had a thrilling ride when he ran to catch the train in Plainwell early Tuesday morning. In the darkness he did not notice that he was on a vestibule coach. He hung on expecting to get safely off at Monticello. The train whizzed by Monticello. Finally just north of the station Kellogg's strength gave out and he went tumbling into the ditch, shot by the momentum of the train, which was running fully fifty miles an hour. His clothes were nearly torn from his body, but beyond a few cuts he didn't think he was hurt. He is not thought to be seriously injured.

Search for Missing Girl.

The entire sheriff's force and all the residents of Fairplain, a suburb of Benton Harbor, are searching for 9-year-old Anna McClelland, daughter of Mr. and Mrs. Frank McClelland, who mysteriously disappeared Monday morning when she left home to go to school.

Died in Prison.

William Brusseau, aged 35, sent to prison from Detroit July 15, 1895, for aiding Mrs. Nellie Pope in the murder of her husband, died last night of heart disease. Brusseau slew Dr. Horace E. Pope, dentist, with a hatchet while the doctor was asleep in his room in the family apartments on Feb. 2, 1895. Shortly after the crime was perpetrated Brusseau, who had been arrested with the doctor's wife on suspicion of knowing something about the tragedy, confessed that he killed Pope at the instigation of Pope's wife. For turning state's evidence he got off with a sentence of 25 years.

Hermit Suicide.

Thwarted in his childish plan to blow to eternity those who undertook to learn the cause of his mysterious disappearance, old Jim Thompson, the rich hermit, who has lived the life of a recluse for the past twenty years in the sand hills near Lake station, Indiana City, stole into his deserted barn, set fire to the building and then committed suicide by shooting himself.

Oren's Task.

The employment of Horace M. Oren to defend the Galbraith law under which the tax commission recently reduced railroad taxes is considered a good stroke on the part of the commission, as the ex-attorney-general has always favored the law providing for equalizing between the general properties and the railroads. Also, as he defended the state tax commission in the Detroit board of education case which resulted in setting aside the first assessment of railroad taxes because the board had attempted to equalize valuations. He is therefore well informed on the constitutional questions involved.

Hobo Bills.

Essesville, a northern suburb of Bay City, seems to be giving considerable care to the wandering hobo. Bills exceeding \$300 were presented by Justice Felker and Constable Votter for capturing and sentencing vagrants. The prosecuting attorney refuses to O. K. the bills, believing them too high, and the supervisors are making a great howl about the "vag industry."

J. W. McGraw has purchased 3,000 acres of timber land, mostly from the state, in the southeastern part of Oshtemo county and will cut the timber, estimated at between 6,000,000 and 8,000,000 feet. The land was bought principally for a sheep ranch and as McGraw will begin stocking.

The "tramp graft" was responsible for 444 arrests in Ingham county during the last six months of 1905—mostly hoboes in Lansing. Only one case reached the circuit court. Ionia county, with nearly the same population, had 55 arrests in the same period.

"Peter J. Wood," convicted Saturday of attempting to murder Lax Feathan, his father-in-law, in Alpena, was sentenced to not less than twenty-five, nor more than fifty years in Marquette prison. He took the sentence coolly and thanked the court and jail officers for their courtesy.

Lawrence K. Buck, popular church choir singer and young society man, was covered by burning gasoline by the explosion of a tank at the Traverse City Potato Implement works. He saved his life by jumping into a snow bank and rolling about and thus extinguishing the flames. His face and hands were badly burned.

Andrew Patterson, alleged wife deserter, who has been missing since November 27, apparently escapes punishment through novel technicalities. He was a former United States soldier in the Philippines, and in 1892 married Miss Dora Bradt in Port Huron. They recently moved to Sarnia, and there, it is alleged, the wife was deserted.

For Good Roads.

On the ground that good rural roads are better for the business men than proposed "trade excursions" by mail, the Business Men's association, of Battle Creek, is planning a unique good roads campaign. The plan is to lay eight miles of good road, the city to pay the laborers and the farmers to furnish the teams. If trade follows, a similar road will be built annually. As it is now rural trade often goes to small towns because of the bad roads, Battle Creek is completely isolated at times from some of the richest farm territory in Michigan.

He also arranged for the admission of his laboratory supplies into this country without duty.

LATE NEWS

TOWNSEND SPEAKS ON THE RATE BILL WITH VIGOR.

BELIEVES THE RAILROADS WOULD BE BENEFITED BY PROPOSED LEGISLATION.

DELAY WILL BE DANGEROUS AND TEMPORIZING WILL BRING ONLY DISASTER.

The Great Debate Opened.

"Systematic efforts have been made to discredit the administration in various ways to direct attention from the regulation of railroad rates," said Rep. Charles E. Townsend, of Michigan, in opening the debate on the Hepburn railroad rate bill. "Temporizing will bring nothing but disaster. Already we hear the rumblings of discontent and our enemies smile with satisfaction at every delay. Regulation of a public servant is not a departure from the principles of popular government, but disregard of a righteous law and indifference to the people's rights is more than socialism. It is anarchy, and were I a railroad agent instead of a people's representative I would hail the proposed legislation as a salvation to my master from the fate which an indignant people is sure to visit upon the corporations who believe that they are above and beyond the law, and seek to become a law unto themselves.

"Let the law pass," said Mr. Townsend, "and let the railroads heed its provisions, and instead of retarding the execution aid in its operation, and then instead of being the objects of suspicion and hatred they will be regarded as the instruments of progress and prosperity."

Mr. Townsend protested that a greater prosperity would come to railroads under the proposed supervision of rates than otherwise. To substantiate this he called attention to the tremendous strides of a year in the transportation business and this in the face of the legislation which the last congress initiated, and which the present congress is taking up in somewhat more strenuous form.

In brief the bill attempts, he said, to place under the supervision of the interstate commerce commission every form of interstate and foreign commerce and all instrumentalities of commerce and transportation.

The most serious complaints on the part of shippers, he said, have been directed against special services, such as private cars, icing, elevator and terminal charges, and the like. Mr. Townsend believes the bill affords a complete remedy for all of these evils, as hereafter every such charge must be just and reasonable, and in case it is not, the commission has power to make it so.

The evil of the "midnight rate" was described and the remedy set forth—requiring thirty days' notice of a change of rate. Briefly the "midnight rate" is a device whereby a large shipper notifies a road that on a certain date a large shipment will be made. On that date the published tariff is changed for a day, the shipment made at the lower rate and the tariff immediately raised.

The main feature of the bill, bearing on the point about which the greatest controversy has been had and the one which Mr. Townsend believes lies at the foundation of the whole question is that which gives the commission power upon complaint, and after full hearing, to substitute a reasonable maximum rate in place of one found to be unjust or unreasonable.

Mr. Townsend went at length into this phase of the proposed legislation. It was the point against which the weight of the opposition had been directed, he explained, and this opposition had been based alike on the question of constitutionality, the impossibility for the commission to find a just rate and the injury such a finding would entail alike on business, the railroads, and the widowed and orphaned shareholder. In the broader view of the question and in the correct conclusion on any of these phases he saw but one answer—that to require the railroads to be just and reasonable could not harm any one while it would benefit all.

Lake Naval Station.

Estimates of improvements necessary at the naval training station on the great lakes have been received at the navy department in a report from Capt. Albert Ross, U. S. N., who is commandant of the new station. He suggests an appropriation of \$700,000 for the next fiscal year with authority to enter into contracts for works to cost \$2,000,000. The general scheme provides for an administration building, four dormitories, mess hall, drill hall, instruction building, guard house and power house. These will be the main buildings, and in addition there are to be smaller structures and considerable work in the improvement of the grounds.

Instead of creeds, let us have deeds.

Rep. Robert R. Hitt, of Illinois, has decided to retire from congress on account of his health.

"Uncle Joe" Cannon, speaker of the house of representatives, has been presented with a pair of white yarn socks by the "Courier force, of Marshall, S. C." They match the galluses and homespun suit, which were also presented to him by citizens of South Carolina.

Justice John M. Tierney, of New York municipal court, has abolished the use of the Bible in his court. Explaining his action he said it was a degradation to use the Bible in the courts, as the "lying words from the mouths of witnesses made its use a mockery."

GENERAL WHEELER.

Gen. Joseph Wheeler, the famous confederate cavalry leader, and a brigadier-general of the United States army since the war with Spain, died Thursday afternoon at the home of his sister, Mrs. Sterling Smith, in Brooklyn, N. Y. The veteran of two wars was 69 years old, but in spite of his age there was hope until yesterday of his recovery from the attack of pneumonia, which caused his death. Gen. Wheeler was taken ill six days previous to his sister's home, where he has been living recently. He contracted a severe cold, which developed into pleurisy and pneumonia. From the first his age told against him, but the family did not give up hope until last night, when the disease was found to have affected both lungs.

Gen. Wheeler's immediate relatives were all with him. His daughters, Mrs. W. J. Harris and the Misses Anne, Lucille and Carrie Wheeler, had been summoned from the south and arrived early in the week. His son, Maj. Joseph Wheeler, Jr., U. S. A., now stationed at West Point, was also present, as well as Gen. Wheeler's sister, Mrs. Sterling Smith, and her son.

The Wheeler Funeral.

With full military honors, the body of Gen. Joseph Wheeler, the veteran of two wars, a former representative in congress and a retired officer in the United States army, was laid at rest Monday in the national cemetery at Arlington. He was buried on the grass slope in front of the historic Lee mansion, one of the most beautiful sites in the home of the soldier dead overlooking the nation's capital across the Potomac.

Accuse Garfield.

Edward Morris, vice-president of the Fairbanks Canning Co., and of Nelson Morris & Co., testified in the packers' immunity plea case that he had been "required" by Commissioner of Corporations Garfield to produce for the inspection of the commissioner the secret profit and loss books of his company, after the commission had prepared a report on the beef industry. He made the examination, he said, with the understanding that the information he obtained was not to be given the department of justice, but the officers of the law obtained the data just the same.

He Ought to Know.

Among the passengers who arrived in New York Sunday on board the steamer Finance from Colon was Charles E. Magoon, governor of the Panama canal zone. When seen at quarantine this morning, he said there had not been a case of yellow fever in Panama in 74 days. The health of the canal zone was excellent, he said; work on the canal was progressing rapidly and satisfactorily. He said also that he would go at once to Washington.

General Chaffee Retired.

Lieut.-Gen. Chaffee was placed on the retired list of the army Thursday at his own request after about forty-five years' service. Gen. and Mrs. Chaffee and Miss Chaffee will leave here the end of the week for the City of Mexico, where they will remain until May 1st next. Later in the summer they will take up their permanent residence at Los Angeles, California.

Senate's Work.

The senate on Wednesday passed about forty bills, many of them of considerable importance. The list included a number of measures for lighthouses, fog signals, revenue cutter vessels and public buildings; and also the bill providing for the reorganization of the consular service, which passed practically without discussion. It makes many changes in the service.

CONDENSED NEWS.

The microbe of paralysis has been found by Dr. W. F. Robertson, of Edinburgh. It resembles the diphtheria bacillus, which is constantly present in alimentary or respiratory regions. It was also found in the blood and cerebro-spinal fluid.

The resolution providing for the payment of the funeral expenses of the late Senator Mitchell, of Oregon, amounting to \$547, was reported from the committee on contingent expenses by Mr. Keam and adopted. There was no comment on the resolution.

King Peter of Serbia is practically a prisoner of those who were responsible for the assassination of King Alexander and Queen Draga at Belgrade. The finances of the country are in a bad way and friends of the king are alarmed for his future safety.

The Mongolian Prince Tashi Lao of Hii, in Turkestan, who proposes to go to America to travel and study for three years, was received in audience by the empress dowager, who approved his plan and presented him with money for his expenses.

It is now declared by King Alfonso's friends that his marriage to Princess Ena of Battenberg will take place early in June.

An official report to the Japanese government shows that the actual outlay for the war from the beginning of hostilities to their end in September last was, for the army, \$495,000,000, and for the navy \$90,000,000.

The prince and princess of Wales rode for the first time in their lives on elephants at Scinde, India. The elephants were covered with jeweled studs and the bowdashes were covered with plates of gold in which jewels were lavishly set. Palace servants held ladders against the flanks of the elephants up which the two distinguished guests mounted easily.

THE CZAR'S TOAST TO THE GERMAN EMPEROR SIGNIFICANT.

GERMAN-Russian ALLIANCE WILL RENDER TREATY WITH FRANCE USELESS.

ENGLISH ELECTIONS GIVE NEW PREMIER AN OVERWHELMING MAJORITY.

"More Than Ally."

A new grouping of the powers of Europe with Germany and Russia arrayed side by side in the closest friendship, and the mis-matched alliance of the empire with republican France lagging in the rear, was forecast by the words of Emperor Nicholas at a gala luncheon at Tsarakoe-Selo Saturday, in honor of Emperor William's birthday.

Rising to his feet before a brilliant company of Russian and German representatives to propose a toast to the German emperor, Emperor Nicholas lifted his glass and said slowly and distinctly as if weighing every word: "I drink to the health of the emperor of Germany and the king of Prussia, my brother and very dear friend."

The phrases chosen were significant enough in themselves, the emperor in previous years having proposed the health of the emperor-king without the qualifying expression of brotherhood and friendship, but turning to Herr von Schoen, the German ambassador, who was standing at his right, the emperor grasped him by the hand and it is reported to have said: "Frere c'est plus que alle." (Brother, that's more than ally.)

The Liberal Victory.

Except that the returns from numerous constituencies have not been received, the general elections in the United Kingdom are ended.

The government coalition will have approximately 510 votes in the next parliament, this estimate including on the side of Premier Sir Henry Campbell-Bannerman, the nationalists and labor votes, with the concrete unionist minority of 160 on the opposition side.

The issues in the campaign brought forth by the liberals included an expensive war for which the people are still paying, a threatened rising of food prices, an unpopular educational system, an unprecedented number of unemployed and many other matters. General dissatisfaction with the unionists' 10 years of power was manifested.

Sir Henry Campbell-Bannerman will enter the new parliament on Feb. 13 with the greatest majority ever given to an English premier.

Punishment of Castro.

The French cruisers Desails and Jurien de la Graviere are at Willemstad, Curacao. It is stated, however, that any action by France against Venezuela at present is unlikely, for news has been received that a party in Venezuela is preparing a revolution for the overthrow of President Castro. It is said that the revolutionists intend to seize Maracabo and release the political prisoners.

It was stated at the foreign office that France would choose her own time for punishing Castro, at whose disposal she did not consider herself as regards the choice of the time and place for acting.

King Christian Dead.

King Christian of Denmark, died Monday afternoon. He passed away quietly, surrounded by the crown prince and the crown princess and their children and the Dowager empress of Russia. The news of his majesty's death spread with great rapidity and signs of the greatest grief were to be seen everywhere. The news of the king's death was conveyed to the Danish lower house, which immediately suspended its sittings.

The New King.

The new king, Frederick the Eighth, now reigns over Denmark. His accession has been hailed with all appropriate enthusiasm and ceremony, but sorrow for the death of Christian the Ninth is the predominant sentiment. The overwhelming grief of the immediate members of this remarkable united family is reflected in only a slightly lesser degree in every home in Copenhagen, from the richest to the poorest, and only words of kindness are heard when the dead monarch is spoken of.

The Extreme Penalty.

Capt. William Van Schaick, who was master of the excursion steamer General Bloicum, was convicted Saturday by a jury in the United States circuit court of responsibility for the terrible catastrophe in which the vessel was burned and over a thousand persons were incinerated or drowned in the East river nearly 18 months ago. Fifteen minutes after the verdict was in, Judge Thomas had called Van Schaick to the bar and pronounced the extreme penalty provided by the federal statutes for the crime of which he stood convicted.

"Married: Cora Maynard, 20, to Marshall Ney, 72." Miss Maynard was a popular society girl. Ney is a hermit. Together they will live in seclusion. Friends of the bride are amazed. She has forbidden them to call.

Dr. Mary Walker, famous for her adoption of male attire, asserted before an Albany legislative committee that she knew of a case at Auburn prison where one negro was executed in place of another condemned for murder. The assertion was made at a hearing on a bill to abolish the death penalty in New York state.

A "Sun" Timer.

Plymouth, Mich., Jan'y 30 '06. Editor of Mail:

I was greatly pleased at the reply of C. G. Curtis to "Standard Timer," and "A Housewife," in last week's issue of your paper.

His Resignation Accepted.

Plymouth, January, 30, '06. To the Presbytery of Detroit, Mich.

Gentlemen: I address you in behalf of the Presbyterian Church Society of Plymouth, by the unanimous request of the society and audience at their regular morning service on Sunday last, January 28, '06, at the instance of Rev. T. B. Leith asking to be released from further duties as pastor.

Very truly yours, J. E. WILCOX, Secretary.

At the meeting next week, Feb. 8, the Washington letters will be continued and Mrs. Safford will have readings upon her department, Suffrage.

In Baraboo, Wis., and the adjoining county of Columbia there are two plants distilling wormwood, from which all absinthe is made.

It such papers are sounding, a note of warning, truly others should be looking into the matter.—Sept. Press.

A Healing Gospel.

The Rev. J. C. Warren, pastor of Sharon Baptist church, Belair, Ga., says of Electric Bitters: "It's a Godsend to mankind. It cured me of lame back, stiff joints, and complete physical collapse."

School Notes.

High school visitors for this week: Ada Pitcher and Lemuel Truesdel.

At the beginning of the second semester several of the students left: Murvale Houston, Clarence Patterson, Donald, Jim and Tom Leith.

Florence Durfee was absent Monday on account of sickness.

Congratulations are now being received by one of our Junior girls.

Tuesday morning a moving van was needed by the pupils of the high school to move their belongings to new quarters.

Watch these columns for dates of entertainments for the benefit of the Senior class.

Don't forget the lecture in the high school room Friday night by Prof. McKone of Albion College on the theme, "School Savings Bank."

Miss Dora Townsend gave a party for the Senior class last Friday night. All had a fine time. Dora previous to leaving school was president of the class.

Toot! toot! Never mind dear little mind concentrated students, it is not a steamboat coming up the river nor is it a steam engine coming down the street car track.

A new schedule of classes has been arranged in the high school which somewhat confuses the pupils until they get used to it.

Many of the students are complaining of the late hour in the afternoon that school now dismisses. However, they will soon become accustomed to it and then all will go smoothly.

The Physics class are about finishing the study of sound and will soon take up heat.

Standard Time.

Editor Plymouth Mail:

In a previous issue of The Mail, there was published an article "Apropos Standard Time." The article was in strict accord with the writer's views, why standard time should exist in Plymouth.

Just how to consider Mr. Curtis' criticism under the heading "Correction" in last week's Mail, is somewhat of a conundrum. The character of the criticism is quite complex to writers and publishers of experience who are not accustomed to the habit of dipping their pens into the ink of sarcasm when dealing with what may perhaps be called free, open, and common pleas.

A STANDARD TIMER.

Luckiest Man in Arkansas.

"I'm the luckiest man in Arkansas," writes H. L. Stanley, of Bruno, "since the restoration of my wife's health after five years of continuous coughing and bleeding from the lungs; and I owe my good fortune to the world's greatest medicine, Dr. King's New Discovery for Consumption, which I know from experience will cure consumption if taken in time."

Hello at Perrinsville.

The Plymouth Telephone Co. has
completed its line to Perrinsville, in-
stalling twenty 'phones and nearly as
many more in prospect. The efforts
of the company in establishing this
line is not only appreciated by the pa-
trons along the line, but by the busi-
ness people of Plymouth as it brings
in touch with this village a tract of
country the inhabitants of which have
been doing business elsewhere. Being
brought in communication with our
village will naturally tend to establish
business relations and Plymouth can-
not get any too much of that. The
Telephone Co. is doing good work for
the village as well as for itself, and ex-
pects to branch out its lines still
further in other directions.

Creamery Business.

The Plymouth Creamery Co. holds
its annual meeting next Monday. Sec-
retary P. W. Voorhies has prepared a
statement for the stockholders that
shows a most gratifying condition of
the business of the company and a
large increase in the totals over the
preceding year. For 1904 the total
amount received was \$37,615.55; for
1905, \$56,285.05 an increase of nearly
\$19,000. The total number of pound-
of milk received for 1905, was 5,633,497,
and the average price per pound of
butter received was 24.8 cents. This
large amount of money was all distrib-
uted among the farmers of the vicinity
and indicates plainly the extensiveness
of the dairy business.

Reception and Entertainment.

The ladies of the M. E. church will
hold a reception in the new parsonage
Friday evening, Feb. 9th, from 5 to 6
o'clock, to which all are invited to in-
spect the new parsonage.

A chicken-pie supper will be served
in the dining room of the church from
5:30 till 7:30 o'clock. It is hoped the
people of Plymouth and vicinity will
avail themselves of this opportunity to
take supper with the ladies of the
church and by so doing help them in
furnishing the new parsonage. Price
of supper 25c or more, if any one wish-
es to pay more.

After supper there will be a social in
the audience room of the church at
which there will be several speeches by
both foreign and local talent. A good
time is expected and everybody is in-
vited.—S.

NOTICE—Dr. F. S. Tillapaugh, of
Plymouth, expects to move to N. Y.

For Thin Babies

Fat is of great account
to a baby; that is why
babies are fat. If your
baby is scrawny, Scott's
Emulsion is what he
wants. The healthy baby
stores as fat what it does
not need immediately for
bone and muscle. Fat
babies are happy; they do
not cry; they are rich;
their fat is laid up for
time of need. They are
happy because they are
comfortable. The fat sur-
rounds their little nerves
and cushions them. When
they are scrawny those
nerves are hurt at every
ungentle touch. They
delight in Scott's Emul-
sion. It is as sweet as
wholesome to them.

The German American Mine is Approved
by Experienced Men who Visited and
Thoroughly Inspected the Mine. Each
Visitor Bought Shares in It.

Recently a number of people at Gar-
field, Washington, felt inclined to in-
vest in the German American mine, at
Osburn, in the famous Coeur d'Alene
district of Idaho. They could not all
go to see the mine, although living
within 100 miles of it. So they selected
a committee of representative men to
visit and inspect the property.

Following were members of the in-
vestigating committee to visit the
mine: Mr. A. H. Plummer, of Garfield,
who has had many years' experience
mining in Idaho. Mr. J. W. Garnette,
of Garfield, graduate of the School of
Mines, of Golden, Colorado, and who
followed mining as a business for five-
teen years. Mr. E. J. Byrne, of Gar-
field, a substantial farmer and a man
of well known and sound business
judgment.

These men reported that all the
claims of our prospectus are absolutely
true. They backed their judgment as
to the merit of the property by invest-
ing in shares of German-American
themselves and the people who sent
them took the stock they had subscrib-
ed for.

The gentlemen gave us the signed

statements which follow this announ-
cement.
E. N. PASSAGE,
Fiscal Agent, Plymouth.

Osburn, Idaho, Jan. 11, 1906.
We, the undersigned, by a careful ex-
amination of the property of the Ger-
man American Mining Co., find that
all of the claims they have made to us
in regard to their property, both ver-
bally and in their printed matter, are
absolutely correct as stated by them.

This is to certify that I have follow-
ed mining for 15 years in Colorado and
Montana, and being requested by
parties desiring to take stock in the
German-American mine, did examine
the property and found the same to be
as represented and also took 1000
shares of the stock.

Lou Burt is serving his third term as

was defeated for nomination by Milton
Oakman on a very close vote last sum-

and that his nomination is cinched.

YOU HAVE NO RIGHT TO SUFFER IN MIDST OF PLENTY

From Constipation, Bowel and Stomach Trouble.

Q. What is the beginning of sickness?
A. Constipation.
Q. What is Constipation?
A. Failure of the bowels to carry off the waste matter which lies in the alimentary canal where it decays and poisons the entire system. Eventually the results are death under the name of some other disease. Note the deaths from typhoid fever and appendicitis, stomach and bowel trouble at the present time.
Q. What causes Constipation?
A. Neglect to respond to the call of nature promptly. Lack of exercise. Excessive brain work. Mental emotion and improper diet.
Q. What are the results of neglected Constipation?
A. Constipation causes more suffering than any other disease. It causes rheumatism, colds, fevers, stomach, bowel, kidney, lung and heart troubles, etc. It is the one disease that starts all others. Indigestion, dyspepsia, diarrhoea, loss of sleep and strength are its symptoms—piles, appendicitis and fistula, are caused by Constipation. Its consequences are known to all physicians, but few sufferers realize their condition until it is too late. Women become confirmed invalids as a result of Constipation.
Q. Do physicians recognize this?
A. Yes. The first question your doctor asks you is "are you constipated?" That is the secret.
Q. Can it be cured?
A. Yes, with proper treatment. The common error is to resort to physics, such as pills, salts, mineral water, castor oil, injections, etc., every one of which is injurious. They weaken and increase the malady. You know this by your own experience.
Q. What then should be done to cure it?
A. Get a bottle of Mull's Grape Tonic at once. Mull's Grape Tonic will positively cure Constipation and Stomach Trouble in the shortest space of time. No other remedy has been known to cure Constipation positively and permanently.
Q. What is Mull's Grape Tonic?
A. It is a Compound with 40 per cent. of the juice of Concord Grapes. It exerts a peculiar strengthening, healing influence upon the intestines, so that they can do their work unaided. The process is gradual, but sure. It is not a physic, but a cure. Constipation, Dysentery, Stomach and Bowel Trouble, Having a rich, fruity grape flavor, it is pleasant to take. As a tonic, it is unequalled, insuring the system against disease. It strengthens and builds up waste tissue.
Q. Where can Mull's Grape Tonic be had?
A. Your druggist sells it. The dollar bottle contains nearly three times the 50-cent size.
Good for all children and nursing mothers.
A free bottle to all who have never used it because we know it will cure you.

Odd Bequests in Wills.
 Among the wills of early days are 'odd bequests' which are amusing. In 1648 the widow of John Granger of Scituate, Mass., in her will "gives to her son John a saw, a broad axe, and a narrow axe, when he is 21 years of age." To daughter Elizabeth a bed and bedding, one heifer, also one great mortar and pestle, and one great kettle."

Furnace Ventilation in Mines.
 The furnace as a means of ventilation is said to be more economical in deep mines than in shallow ones, as it acts by heating a column of air; the higher that column the greater will be the difference in the weight of air in the upcast and downcast shafts, and consequently the greater the motive power.

Africa's "Sneeze-Wood" Tree.
 One of the natural curiosities of South Africa is the "sneeze-wood" tree, which is so-called because one cannot cut it with a saw without sneezing, as the fine-dust has exactly the effect of snuff. No insect or worm will touch it; it is very bitter to the taste, and when placed in water it sinks.

Derivation of Word "Row."
 "Row" is one of the many words which are rising to respectability with advancing age. Todd's edition of Johnson's dictionary (1827) denounced it as "a very low expression." Since it appears to have been occasionally written "roue" about a century ago, some have wished to find its origin in the French "roue." Todd identifies it with the older "rouse," a drunken bout, big drinking glass, or big drink, in which sense that word several times occurs in Shakespeare. Hamlet observes that "the king doth walk to-night, and takes his rouse." "Row" is supposed to be a false singular formed from "rouse," mistaken for a plural, as "pea" for "pease," "cherry" from "cherries," "cherry" from "cherries." But it seems simpler to explain "row" as short for "row-boat," an excellent word for noise.

Happiness.
 I've drunk good wine,
 From Rhone and Rhine,
 And filled the glass
 To friend or lass
 With jest and song,
 And the gay night gone,
 And found the bowl
 Inspired the soul
 With neither wit nor wisdom neither
 Than comes from water in the pitcher.

I've dined long since
 With king and prince
 In solemn state,
 Stiff and sedate,
 And wished I might
 Fly sudden flight
 And dine alone
 Unseen, unknown.
 On a mutton chop and a hot potato,
 Reading my Homer or my Plato.

It comes to this:
 The truest bliss
 Is to eat or small
 In free to all;
 Like the fresh air,
 Like the sweet fruit,
 Like the night or day,
 Like work or play,
 And books that charm or make us wise,
 Are better comrades than a kaiser.
 —Charles Mackay.

Year 1905 Sales.
 The total distributive sales for 1905 exceeded \$200,000,000.

This total is realized from the sale of fresh meats (beef, mutton and pork), provisions, produce (poultry, butter and eggs), soaps, glues, oils, bones, fertilizers, feathers, casings, hides, wools, pelts and other by-products derived from cattle, sheep, hogs and poultry.

Margin of Profit.
 The industry is operated on a margin of less than 2 cents to each dollar of sales. Swift & Co. do not sell at retail. Their entire output is sold at wholesale to many thousands of dealers in various parts of the world. There are hundreds of local slaughterers throughout the United States, who buy their live stock in competition with the packer doing an interstate and international business. Likewise the packer must sell in competition with the local slaughterers. There are no secret processes in the industry; no complicated and expensive factories, and as live stock can be purchased in almost every hamlet and city, and the preparation of meats is simple in the extreme, local slaughtering will long remain a factor in the production of fresh meats and provisions.

Economic Advantages.
 The large packing houses will, however, always have these advantages: Locations at the chief live stock centers, with the opportunity to buy the best live stock; manufacturing in large quantities, at the minimum of expense; utilization of all waste material; refrigeration; mechanical appliances; highly efficient business management. These advantages are reflected in the quality of the packer's output, a quality that has reached its highest development in the products bearing the name and brand of "Swift."

Purchasing Live Stock.
 The principal live stock centers are Chicago, Kansas City, Omaha, St. Louis, St. Joseph, St. Paul and Fort Worth. The same methods of purchasing cattle, sheep and hogs prevail at all cities. At Chicago, which is the largest market, there are about two hundred and fifty buyers, representing packers, local slaughterers in various cities and exporters. Of this number, less than a score are employed by Swift & Company.

The farmer ships his live stock to Chicago, consigns them to a commission firm at the Union Stock Yards, who sees that they are unloaded and put in pens. Then the buyers inspect them, make their offers to the commission dealer, who accepts or rejects as his judgment dictates. All buying must be finished at 3 o'clock each day, and the buyer must pay spot cash. If the commission man has no satisfactory offers, he can hold his stock over to the next day. He gets his commission from the farmer, and naturally strives to get the highest possible price for his client.

SAILORS, SUFFERED AGONIES FROM THIRST.

All Had Forgotten Simple Fact Which They Had Learned from Geographers in Their School Days—Saved By Madness of Captain.

"It pays to know things," said the old sea captain as he sat on a New Bedford wharf. "I remember a time when ignorance nearly held me down and drowned me—or, I should say, nearly killed me for the want of a swallow of fresh water. 'I'd shipped in a brig from New York going down to Brazil and southward, carrying a cargo of air and linen collars and such stuff and hoping to come back loaded with coffee. There weren't anybody on board had been in those waters afore, except the captain, and he'd forgotten most of what he'd learned there. Everything went all right till we started to work north to a port just a couple of inches on the chart beyond the mouth of the Amazon river. 'We hadn't stowed any water for a week or two, but the winds were fair enough to suit, and there didn't seem to be any reason to get suspicious. But one morning the captain, who'd been studying the chart, says to me, pointing to a shadow of land, 'There's the mouth of the Amazon.' He'd hardly got the words out of his mouth when the canvas flapped with a quick change of wind, and all the afternoon it got weaker and weaker as we approached shore. By the time night came you could drop a cannon ball overboard and drop a feather after it, and they'd both hit the water in the same place. The next day the weather was thick, and you couldn't begin to see land. About eight bells the captain called me and says: 'Have you noticed the tide? Something's carrying us out to sea, and it's a dead calm!'"

"What of it?" says I, careless. "Haven't we got time enough to wait for a wind?" "Time enough, all right," he says, "but not water enough. What's left in 'quarts, and not gallons," he says. "I won't have to tell you how we tried to make the water last, or how tantalizing the ocean looked to us, or how our tongues swelled up after four days and got rough like leather, and how the weather kept thick and hazy, and we never sighted a sail or a steam vessel. We all could see death perched up on the bowsprit. And the sun dried out our skins as it dries starched clothes on Monday mornings. 'Finally, one afternoon, the captain crawled up on deck and began to rave. He was crazy. After a while he grinned at me and said, 'I won't stand it any longer. If I don't get some moisture on me I'll crack open,' and although he couldn't swim a stroke, over the rail he went like a thing with wings. We all went to look over the side. 'He came up after his bubbles. My stars, you should have seen the look on his face!' I never saw such a sheepish expression in all my life. 'Scissors to grind!' he yells. 'This ocean ain't salt at all! The water's as fresh as hot doughnuts,' and he gulps down another quart of it, smacking his lips. 'Throw me a rope and lower a bucket. I've been made a fool of this week,' he says. 'Sure enough, it was just as he said—the water was fresh. The delta of the Amazon pours such a big stream that even out of sight of land the water is sweet as dew on clover blossoms.'—Youth's Companion.

Deafness Cannot Be Cured
 by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or a perfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular free.

FALL WHEAT RAISING IN ALBERTA.

The Spring Wheat Areas Are Rapidly Increasing.
 It is only a few short years since the impression prevailed that a large portion of the Canadian West was unfitted for agriculture. To such an extent did this impression prevail that districts larger than European principalities were devoted solely to ranching purposes, and flocks and herds roamed the ranges. But the agriculturist was doing some hard thinking, and gradually experiments were made, slowly at first, but surely later on. As a result, to-day in Southern Alberta, which was looked upon as the "arid belt," large quantities of the finest winter wheat in the world are now grown, and so satisfied are the farmers and buyers that the industry has passed the experimental stage that elevators for the score have been erected in the past two years and others in course of erection, to satisfy the demands that will be made upon them in the near future.

Manitoba, "No. 1, Hard" spring wheat has achieved a world-wide reputation, and there can be no question that ere long "No. 1, Hard" winter wheat from Alberta will attain similar repute. The great market for this production will undoubtedly be the Orient, and, with increased railway facilities and the erection of additional elevators and flouring mills, a largely increased acreage will be broken to winter wheat. The increase of population in Southern Alberta in the past year has been largely due to settlers from the United States who have brought in capital and enterprise, and who have been uniformly successful in their undertakings. A few more such years of growth and "Turkey Red" winter wheat will wave from Moose Jaw to the foothills. Information regarding lands in the Fall and Spring wheat belts may be obtained of any Canadian Government Agent.

TESTIMONIALS HARD TO GIVE.

Some Subterfuges Employed by Kind-Hearted Parsons.
 The giving of a "character" to domestic servants is one of the severest tests of the employers' character. An Irish master, being called upon to write a testimonial for a groom whom he was discharging for drunkenness, gave him a good character, but omitted to mention one trait. The groom returned the letter, objecting that it did not say he was sober. The master added "sometimes sober," and the man was content. The woman who had to recommend the inefficient cook she had kept for seven years only because she was afraid to give her notice went one better. She had covered three pages with undeserved commendations; she had placed it in an envelope and addressed it, and her conscience pricked her badly. Then she had a happy idea, and broke open the seal, adding to her letter, as a postscript, "God forgive me!" It satisfied her conscience, but history does not relate if it satisfied the other woman.—New York Tribune.

Rode on Turtle's Back.
 In the North Borneo Herald it is recorded that two English women, Mrs. McEnroe and Mrs. Darby, recently paid a visit to the lonely island of Tanganac. Among other adventures there the two sat up one night to watch for turtles, and at midnight saw a large one come out of the sea on to the sands. When it was returning to the water Mrs. Darby and then Mrs. McEnroe mounted on its back and rode for some distance.

Tumors Conquered Without Operations

Unqualified Success of Lydia E. Pinkham's Vegetable Compound in Cases of Mrs. Fox and Miss Adams.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy, tumor.

So-called "wandering pains" may come from its early stages, or the presence of danger may be made manifest by excessive monthly periods accompanied by unusual pain extending from the abdomen, through the groin and thighs.

If you have mysterious pains, if there are indications of inflammation, ulceration or displacement, don't wait for time to confirm your fears and go through the horrors of a hospital operation; secure Lydia E. Pinkham's Vegetable Compound at once and begin its use, and write Mrs. Pinkham of Lynn, Mass., for advice.

Read these strong letters from grateful women who have been cured:

Dear Mrs. Pinkham:— (First Letter.)
 "In looking over your book I see that your medicine cures Tumors. I have been to doctor and he tells me I have a tumor. I will be more than grateful if you can help me, as I do so dread an operation."—Fannie D. Fox, Bradford, Pa.

Dear Mrs. Pinkham:— (Second Letter.)
 "I take the liberty to congratulate you on the success I have had with your wonderful medicine. 'Eighteen months ago my periods stopped. Shortly after I felt so badly I submitted to a thorough examination by a physician, and was told that I had a tumor and would have to undergo an operation. I soon after read one of your advertisements and decided to give Lydia E. Pinkham's Vegetable Compound a trial. After taking five bottles as directed, the tumor is entirely gone. I have again been examined by a physician and he says I have no signs of a tumor now. It has also brought my periods around once more, and I am entirely well. I shall never be without a bottle of Lydia E. Pinkham's Vegetable Compound in the house."—Fannie D. Fox, Bradford, Pa.

Another Case of Tumor Cured by Lydia E. Pinkham's Vegetable Compound.
Dear Mrs. Pinkham:—
 "About three years ago I had intense pain in my stomach, with cramps and raging headaches. The doctor prescribed for me, but finding that I did not get any better he examined me and, to my surprise, declared I had a tumor. 'I felt sure that it meant my death warrant, and was very disheartened. I spent hundreds of dollars in doctoring, but the tumor kept growing, till the doctor said that nothing but an operation would save me. Fortunately I corresponded with my aunt in one of the New England States, who advised me to try Lydia E. Pinkham's Vegetable Compound before submitting to an operation, and I at once started taking a regular treatment. Finding to my great relief that my general health began to improve, and after three months I noticed that the tumor had reduced in size. I kept on taking the Compound, and in ten months it had entirely disappeared without an operation, and using no medicine but Lydia E. Pinkham's Vegetable Compound, and words fail to express how grateful I am for the good it has done me.'—Miss Luella Adams, Colman's Hotel, Seattle, Wash.

Such unquestionable testimony proves the value of Lydia E. Pinkham's Vegetable Compound, and should give confidence and hope to every sick woman. Mrs. Pinkham invites all ailing women to write to her at Lynn, Mass., for advice.

Wholesale Distributing Houses.
 A wholesale distributing house is a giant refrigerator, but instead of shelves there are trolley rails, from which are suspended hooks to hang the carcasses. Some of the houses cost as much as a hundred thousand dollars to build and equip. As a rule they are of pressed brick, the insides being lined—floor, walls and ceiling—with highly polished hardwood. The floors are covered daily with fresh sawdust, and all are kept spotlessly clean. There are over three hundred of these wholesale houses in various cities of the United States, and the public is always welcome to visit them.

Packing-Plants.
 All the Swift & Company plants are located at the great live stock markets, in the heart of the great agricultural sections, where can be purchased the finest grades of cattle, sheep and hogs. We have seven packing plants, employing at each from two to eight thousand persons.

The following gives the locations and size of the different plants:

Packing Plants.

	Buildings, Acres.	Floor Space, Acres.	Land, Acres.
Chicago	44 1/2	87 1/2	47
Kansas City	7 1/2	30	19 1/2
Omaha	6	26	23
St. Louis	7 1/2	19 1/2	31 1/2
St. Joseph	6 1/2	25 1/2	19 1/2
St. Paul	5	12	16
Fort Worth	3	15	22

Employee.
 The total number of persons employed in all the Swift packing plants and branch houses aggregate over 26,000 persons. Conditions for employees in the various manufacturing and operating departments is continually improving with the construction of new buildings and the installation of new and up-to-date equipment.

Sanitation and Hygiene.
 The housewife makes no greater effort to keep her kitchen clean than we do to keep in sanitary and hygienic condition our abattoirs. They are thoroughly scrubbed at the close of each day's operations, and automatic appliances are used wherever possible in order to eliminate the personal handling of meats. Rigid rules governing these points are strictly enforced; laxity means dismissal.

Visitors Always Welcome.
 No other industry in the world gives such a cordial welcome to visitors as Swift & Co. We keep open house the year around, and maintain a corps of specially trained guides, with special elevators and rest rooms. In one year we have entertained over a quarter of a million of men and women; in one day—Grand Army Day, 1901—we entertained 23,000. Among our visitors have been ambassadors from foreign governments, princes, noblemen and distinguished citizens from all lands and eminent folks from every state in the Union. We wish to familiarize the public with our methods, and the best way to do that is to let the public see for itself. We have no secret processes or methods in any department.

Swift's Premium Hams and Bacon.
 Swift's Premium Hams and Bacon are more widely and favorably known than any other brand. Their popularity is due to the uniform quality and flavor of the meat, and to their fine appearance when received from the dealer. Each piece is branded on the rind, "Swift's Premium U. S. Inspected," and wrapped in cheegeth cloth and white parchment paper.

Look for the brand, "Swift's Premium," when buying hams and bacon.

Swift's Silver Leaf Lard
 Is a strictly pure lard, kettle rendered, and put up in 3.5 and 10-pound sealed pails. It is America's Standard Lard, and enjoys a high reputation and an enormous sale.

Swift's Soaps.
 An interesting feature of a trip through the Chicago plant is a visit to the soap factory, one of the largest and most complete in this country. There we manufacture numerous toilet and laundry soaps, and washing powders.

Among which are:
 Wool Soap, widely and favorably known; for toilet and bath, and washing fine fabrics.
 Crown Princess Toilet Soap, highly perfumed.
 Swift's Pride Soap, for laundry and household use.
 Swift's Pride Washing Powder, unsurpassed for all cleaning purposes.

DR. WILLIAMS' KIDNEY PILLS
 FOR KIDNEY DISORDERS

Small text at the bottom left corner, likely a printer's mark or additional address information.

A DESPAIRING WOMAN.

Weak, Nervous and Wretched From Wasting Kidney Troubles.

Mrs. Henry A. Reamer, Main and Garret Sts., South Bend, Ind., says:

"When I began using Doan's Kidney Pills I was so weak I could hardly drag myself across the room. I was wretched and nervous, and had headache, bearing-down pain, headache, dizziness and weak eyes. Dropsy set in and bloating of the chest choked me and threatened the heart. I had little hope, but to my untold surprise Doan's Kidney Pills brought me relief and saved my life. I shall never forget it."

Melancholy Millionaires.
Are not millionaires notoriously unhappy men? They fly for refuge from melancholy either to the reckless dissipation of their fortunes or to the frantic scramble after billions.—*London Church Times*

When "Vapors" Were.
In the middle ages hysterical subjects were regarded sometimes as saints, but more often as possessed of devils. It then occurred frequently, later on they were supposed to be affected by "vapors," which gave rise to these various conditions.

FACIAL PARALYSIS

Nervous Distortion of Face Cured by Dr. Williams' Pink Pills.

What appears to be a slight nervous attack may be the forerunner of a severe disorder. No nervous sufferer should neglect the warning symptoms, but should see that the starved nerves are nourished before the injury to the delicate organism has gone to an extent that renders a cure a difficult matter. The nerves receive their nourishment through the blood, the same as every other part of the body, and the best nerve tonic and food is Dr. Williams' Pink Pills. The experience of Mr. Harry Bemis, of Truthville, Washington county, N. Y., substantiates this.

"I had been feeling badly for a long time," said Mr. Bemis, "and in the early part of September, 1902, I was compelled to quit work on account of my ill health. My trouble was at first extreme nervousness, then my sight became affected and I consulted an oculist who said I was suffering from paralysis. He treated me for some time, but I got no benefit. I tried another doctor and again failed to obtain any relief. My nervousness increased. Slight noises would almost make me wild. My mouth was drawn so I could scarcely eat and one eye was affected so I could hardly see. I had very little use of my limbs, in fact I was almost a complete wreck."

"I am all right now and am at work. That is because I followed my wife's advice and took Dr. Williams' Pink Pills. She had used the same remedy herself with the most gratifying results and she persuaded me to try them when it appeared that the doctors were unable to help me. They acted very surely in my case; my face came back into shape and in time I was entirely well."

Dr. Williams' Pink Pills are sold by all druggists or by mail by the Dr. Williams' Medicine Co., Schenectady, N. Y. A booklet on Nervous Disorders sent free on request.

CURES SICK-HEADACHE

Tablets and powders advertised as cures for sick-headache are generally harmful and they do not cure, but only deaden the pain by putting the nerves to sleep for a short time through the use of morphine or cocaine.

Lane's Family Medicine

the tonic-laxative, cures sick-headache, not merely stops it for an hour or two. It removes the cause of headache and keeps it away.

Sold by all dealers at 25c. and 50c.

Faith

You cannot be expected to have faith in **Shiloh's Consumption Cure, the Lung Tonic**, as a cure for Coughs, Colds and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day.

Proof

is found in the many testimonials of those who have tried **Shiloh's Consumption Cure** and found it very beneficial. I have written many testimonials, but I have not space to give you more than a few. I have had a testimonial of success for thirty years. I have stood every possible test without flinching. Further

HORTICULTURE

Mushrooms in the Cellar.

The winter is a good time for the farmer to try growing some mushrooms. He doubtless has his furnace going and the temperature of his cellar will vary from 50 to 70 degrees. This temperature is well suited to the growing of mushrooms. Spawn will cost about 25c per pound, but a single pound will go a long way. The material used for foundation is horse manure. This should be thrown into a heap, first raking out the loose straw. Make a pile of this in the stable in some corner and tramp it firm. After ten days this mass will be found to be heating. When it should be forked over and again packed tight. In a few days this mass will again be heating, but need not be disturbed unless the heating reaches the point of "fire-fanging."

At this time this can be put into boxes in the cellar, putting about 18 inches in each box. It should be watched for a few days, and if it be found that the temperature is dropping the spawn may be put into it. The spawn should be broken up into pieces perhaps an inch through and inserted for an inch or two under the surface. No water should be applied at this time, but the bed should be packed firmly. At the end of a week the bed may be opened a little to see if the spawn is spreading. This will be indicated by white threads running all through the mass. These threads are the body of the mushroom plant and each thread is known as a mycelium. Masses of these combine to form one plant, and when they have permeated the soil thoroughly, they draw nourishment from all parts to develop fruit. This fruit is pushed out towards the surface and is the part that we call the mushroom. It in turn produces seeds which are known as spores, and in the case of *Agaricus campestris*, which is the ordinary mushroom of commerce, these spores are pink in color, and for that reason people say that these mushrooms have pink gills. The most delicious mushrooms are those that are gathered when they are in the button stage, which is the mushroom before the cap is expanded. This is not, however, the most economical time at which to gather the mushrooms. It is better to wait until they have attained the diameter of two or three inches, at which time the cap will be fully expanded and the stem well developed. The stem of this variety is more valuable than the stems of most varieties, and it is almost solid. Many varieties of mushrooms have hollow stems. The mushroom should be more widely cultivated for home use than it has been. To a certain extent it takes the place of meat, as in its habits it leans more towards the animal kingdom than the vegetable kingdom. Most vegetables throw off oxygen and take in carbon. The mushroom throws off carbon, as do the animals, and takes in oxygen. It is very rich in nitrogen and in many localities of Europe takes the place of meat.

DOCTOR CURED OF ECZEMA.

Maryland Physician Cures Himself—**Dr. Fisher Says: "Cuticura Remedies Possess True Merit."**

"My face was afflicted with eczema in the year 1897. I used the Cuticura Remedies, and was entirely cured. I am a practicing physician, and very often prescribe Cuticura Resolvent and Cuticura Soap in cases of eczema, and they have cured where other formulas have failed. I am not in the habit of endorsing patent medicines, but when I find remedies possessing true merit, such as the Cuticura Remedies do, I am broad-minded enough to proclaim their virtues to the world. I have been practicing medicine for sixteen years, and must say I find your Remedies A No. 1. You are at liberty to publish this letter. G. M. Fisher, M. D., Big Pool, Md., May 24, 1905."

Burglar Was Too Fat.

Guests in a well-known hotel in Paris heard pitiful cries for help coming from the cellar at 1 o'clock in the morning, and the waiters and manager rushed downstairs. The door was locked, but they battered it down, and discovered a very fat burglar held fast in the ventilator, through which he had tried to escape. The brickwork had to be knocked down before he could be extricated.

To Orchard a Hilltop.

A reader of the Farmers' Review asks if it will be safe for him to plant an orchard on a grassy hillside. It is difficult to give reliable advice on a question of this kind without being "on the ground," so much depends on location, condition of land, object in planting and, above all, the man behind the venture. If the land has been growing good grass for many years, the soil is pretty well filled with roots and it would be safe to plow all the ground as the sod and roots would prevent washing for a season or two.

I would plow lengthwise of the hill, also plant trees and do all cultivation same way—never up and down. Ground should be kept loose and clean for at least four feet around the trees all season. I would plant some kind of hoed crop, as potatoes, beans, or even corn the first year, after which cow peas make an ideal orchard crop. They may be cut for hay, or better yet, be left on the ground as a winter covering, to prevent erosion and provide an abundance of plant food for future use of trees.

In four or five years the trees ought to begin to bear, and I would then sow grass again, which would be cut and piled under the trees or left unranked on the ground, to decay. With this treatment I believe a good orchard can be grown on hillside, and made to produce profitable crops without the use of fertilizers, for many years at least.

If for any reason the planter feels certain that the above treatment will not hold the soil, my plan would be to dig a place for each tree. Then spade up the ground for a few feet around them and mulch heavily with the cut grass as soon as possible in the season. While I am not an advocate of this method of growing trees in sod ground by mulching, I am convinced there are certain conditions under which it might succeed.—*Jno. A. Gage, Jefferson Co., Ill., in Farmers' Review.*

REMINDED HER OF HENRY CLAY

Bibulous Husband Suggests an Idea to His Amiable Spouse.

When he got home in a night liner at 3 o'clock the other morning he found his wife propped up in bed reading a recent American historical novel. She was quite amiable.

"Oh, good morning," she said, sweetly. Has the milkman come?"

He steeled himself against the chaffron and struck an attitude of extreme dignity.

"Whaz zhat you're readin', my dear?" he inquired of her.

"Oh, one of these historical novels," she replied. "It's time to get up, isn't it, so what's the use of your coming to bed?"

"I didn't know you were inshreshted in hish'ry, my dear," said he, with profound solemnity.

"No?" said she. "Well, it is not to be expected that you could be really very familiar with my tastes. By the way, there is a story here of how the eminent Henry Clay happened to say he'd rather be right than president. Do you know I've been thinking over that remark in connection with you."

"Shash sho?" he inquired, wonderingly. "Shink I'm anuzzer Clay, eh?" "Well," she replied, soft and low, "I think you'd rather be drunk than president," and then the servant girl's alarm clock could have been heard ferociously ticking in the attic-room.

Bark Salad Palatable Food.

When Admiral Sigsbee's squadron was cruising in the Caribbean sea, in 1904 and the spring of 1905, the officers of his flagship, the Newark, found that bark salad was not only edible but was quite palatable. This remarkable food was made from the bark of a tropical tree, and much enjoyed by the natives along the coast. The rough or outer part is chopped off, and the inner portion chopped into fine slices and made into a salad dressed with oils, spices, &c.
