Protest Against Drainage. Canal Grows.

Grows.

Even Chicagoans are now projecting against the "absolute ruination of the great lakes contemplated by the promoters of a greater drainage canal" at that city.

The proposal to turn the whole chain of great lakes into a mere reservoir to convert the Chicago drainage canal—so-called—into a still greater mechanism for the creation of electric power is being resented by all the lake marine men of Chicago. The group headed by Gov Deneen clamoring for more water seems "willing to sacrifice the great lakes, levels, commerce, ships, everything, to their own desire to create cheap power right at their very door," is the charge.

to their own desire to cross to power right at their very door," is the charge.

United States army engineers are up in arms over this. Canada has slowly come to a realization of its full meaning to her—without the great lakes there will be no St. Lawrence river. And without that there will be no maritime commerce.

U. S. Factories Double Outfit.

Twenty billion dollars is the value of the present annual output of American factories, the total having just doubled during the past ten years, according to a commerce and labor department estimate.

Exports from the United States in 1911 amounted to over £2,013,500,000, of which only \$90,000,000 was in manufactures. This, the department points out, shows that the bulk of the export trade is acquired through no selling effort, but is due to the fact that foreign buyers come to America for cotton, corn and wheat that they must have.

PHYSICIAN SAID ECZEMA _ CAME FROM TEETHING

"When my little girl was about eight months old, she was taken with a very irritating breaking out, which came on her face, neck and back. When she first came down with it, it came in little watery-like festers under her eyes, and on her chin, then after a few days it would dry down in scaly, white scabs. In the daytime she was quite worrysome and would dig and scratch her face nearly all the time.

"I consulted our physician and found she was suffering from eczema, which he said came from her teething. I used the cintment he gave me and without any relief at all. Then wrote for a book on Cuticura, and pur chased some Cuticura Soap and Oint-ment at the drug store. I did as I found directions in the Cuticura Book-let, and when she was one year old, she was entirely cured. Now she is three years and four months, and she has never been troubled with eczema since she was cured by the Cuti-cura Soap and Cuticura Ointment. THE GIRL from f **HIS TOWN** By MARIE VAN VORST Mustration by M. G. KETTHER

SYNOPSIS.

Dan Biair, the 22-year-old son of the fifty-million-dollar copper king of Blair-town, Mont. Is a guest at the English town, Mont. Is a guest at the English been courteous to Lord Galorey during his visit to the United States and the courtesy is now being returned to the young man. The youth has an ideal girl in his mind. He meets Lily, Duchess of Breakwater, a beautiful widow, who is a firstead by his immense fortune and boy, a girl sang a sole at a church, and he had never forgotten her. The Calorrya, Lily and Dan attend a 'Loudon theater where one Letty Lane is the star. Dan recognizes her as the girl from his town, and going behind the scenes introduces himself and she remembers him. He learns that Prince Poniotowsky and the fortune hunters. Young Blair goes to see Lily; he can talk of nothing but Letty and this angars the Duchess. The westerner finds Letty ill from hard work, but she recovers and Kuggles and Dan invite her to supper. And the pleasure on his face repaid her over and over again. "Come, I want you to meet the Duchess of Breakwater, and some other friends of mine."

As he let her little cold hand fall and turned about, the room as by magic had cleared. The prime minis-ter had arrived late and was in the other room. The refreshments were also being served. There was no one to meet Letty Lane, except for several young men who came up eagerly and asked to be presented, Gordon Ga-

"Where's Lily?" Dan asked him; "I want her to meet Miss Lane."

"In the conserfatory with the prime minister," and Galorey looked meaningly at Dan, as much as to say, "Now don't be an utter fool."

But Letty Lane berself saved the structure. She shock hands with the

situation. She shook hands with the utmost cordiality and sweetness with the men who had been presented to her, and asked Dan to take her to her motor. He waited for her at the door and she came down wrapped around as usual in her filmy scarf.

"Are you better?" he asked eagerly.

in the drawing-room in leaving, and thought the boy's face was a study. The duchess held out her hand to Dan as he came across the room.

"Come here," she called agreeably "Every one has gone, thank heaven! L've been waiting for you for an age. Let's talk it all over."

"Just what I've come back to do." .There had been royalty at the musicale, and the hostess spoke of her guests and their approval, mentioning one by one the names of the great. The duchess exclaimed in Borror:
"Then she did mind."

And he turned slowly: saten and drunk with Kings, the king hadn't gone so early you can bet he would have set the fashion differently. Let's drop the question. She sent you back your check, and I guess you're quits."

With a sharp note in her voice she said: "I hope it won't be in the papers that you drove bareheaded back to the hotel with her. Don't forget that we are dining with the Galorey's, and it's

After Dan had left her, the duchess glanced over the dismantled room which the servants were already re-storing to order. She was not at case and not at peace, but there was some-thing else besides her tiff with Dan that absorbed her, and that was Ga off. He was beginning to be imperi-ous in his demands on her; and, in spite of her capidity and her debts, in spite of the precarious position in which she found herself with Dan, she could not break with Galorey yet. She went upstairs humming under her breath the ballad Letty Lane had sung in the music room:

"And long may his lady look from the castle wall."

Dan Awakes.

The next night Dan, magnetically drawn down the Strand to the Galety, arrived just before the close of the last act, slipped in, and sat far back watching Letty Lane close her part. After hearing her sing as she had the afternoon before in the worldly group. it was curious to see her before the public in her flashing dress and to realize how much she was a thing of the people. Congress May Sit Lightil After Na tional Conventions.

SUPPLY BILLS ARE FOUGHT

Might Leave Departments of Government Without Any Visible Means of Support.

By GEORGE CLINTON.

Washington.—This year in congress
there has been a disposition to tack
"extraneous legislation" onto the appropriation bills. Under the Republican rule no legislation was put on the supply measures except that which the party members claimed had a rightful party members claimed had a rightful place there. Years ago there was adopted in congress what was called the Holman rule prepared by Repre-sentative Holman of Indiana, "the watchdog of the treasury." This rule allowed legislation to be put on the supply measures provided it was in-ferded to describe the provided in the supply measures provided it was intended to decrease government ex-penditures. The Republicans repudi-ated the Holman rule, but the Democrats have reinstated it.

The army appropriation bill carries

legislation reducing the cavalry of the army from 15 regiments to 10, and it contains some other legislation which contains some other jegislation which the Republicans say is "extraneous." The senate is Republican and it seems to be opposed to the action of the Dem-ocrats in attaching legislation to the oursis in attaching legislation to the supply measure. There are arguments for and against the course which the Democratic majority in the house has followed, but the right or the wrong of the thing aside, the fact remains that the senate is likely to get at loggerheads with the house over thes matters and as a result it may be that congress will sit until a time long after the national conventions have been held.

Produces New Situation.

If either house wishes to do it, it can hold up appropriation bills and by refusing to sanction them can leave de-partments and branches of govern-ment without visible means of support, provided, of course, that adjournment comes before the supply bills have been sanctioned. If the senate shall agree with the house and pass the ap-propriation measures with their riders it is possible, perhaps even probable in one or two instances that the presi-dent will veto the bills which he does not like. If he should veto the army bill, for instance, because of attached legislation of which he disapproves, the army officers and the 60,000 or 70,-000 enlisted men would be left without a cent of pay, and more than this, there would be no money for the pur-chase of supplies. This thing did hap-pen once away back in the time of President Hayes. He vetoed an army appropriation bill because it had a rider on it to which neither the presi dent nor his party could subscribe. The matter which was put onto the bill at that time, however, was to some extent political and controversial in its nature. Nothing has been put the appropriation bills this year is not either directly or indirectly con-nected with the service for which the money supplied by the bill is voted. It is said that there has been no situation just like this within the memory of the oldest member.

Indians Visit Taft.

President Taft was visited a day or two ago at the White House by three bands of Siock Indians from the San-teo, the Pine Ridge and the Rosebud teo, the Pine Ridge and the Rosebud Legencies. The braves of the Pine Ridge were led by Jack Red Cloud, son of Old Red Cloud, who died a year ago and who in his day was one of the great warriors of the Dakota nation. Jack was dressed in the clothes of civilization. In a way he looked well enough, but not altogether comfortable. This son of a warrior of many battles has seen some fighting himself. He was "out" with the bands of kicking Bear and Short Bull in the last uprising against the whites in the days of the Ghost Dance craze. The last time that one white man who was at the White House when the Indiana called naw Jack Red Cloud, the Indian was tearing down the frail leading past the trader's. store at Pine Ridge and sampting his Wischester with a giesful disregard of the terror that he was causing. gencies. His warpath days are over, but he was sealous for fight a score of years ago and with Kicking Rear he was declared to departure. Bear he was declared so dangerous that the two were led captives to Fort Sheridan near Chicago.

While the Sloux were still on the warpath early in the month of January, 1891, Red Cloud, Jack's father, who was too old to go on the war-path no matter what his yearnings were, was sent out by his military authorities to the hostile camp to use his best endeavors to induce the in-dians to surrender without further fighting. There had been a fight at Wounded Knee, where ninety of the Seventh cavairy were killed and wounded, and where Big Foot's band of Sloux virtually had been wiped out-of existence. The authorities did not want any more of it, it they could bring the thing to an end peaceably. Red Cloud went out on his mission and when he came back he said that his appeals had been of no avail.

Graft of the Redskin,

After the surrender one of the Sie warriors was asked what Red Cloud said to them when he was delivering the soldiers' message asking for peace. Did he deliver it? Not if the youths of his tribe tell the truth. They said that the chief came to them and that his bleary old eyes lighted and his voice was young when he told them that war was for men, and

peace was for cowards. An attempt was made after the surrender to get Red Cloud to tell the story of the Fetterman fight, in which he led the Sloux. Jack Red Cloud brought to ms father a granddaughter who spoke English, and she was asked to act as interpreter, but the old man refused to tell the story, saying that it was not for a warrior to boast, and then he added that some white man might tell the story. It was not long after the Civil war that Red Cloud met in battle the field-

tried soldiers of that conflict and they found him worthy to meet them. Min-eral wealth had been discovered in Montana and the rush of prospectors and settlers made it necessary for the government to erect a military post along the trail leading over the prairies to the mines. On the trail to the Powder River was built Fort Phil Kearney. While the troops or-dered to the new post were on the march a scout came riding into the column with his horse under spur. Later Red Cloud with his braves met Fetterman in battle and killed him and fifty followers.

Circles the Globe. One man in Washington is in touch, by wire and wireless, with every corner of the United States, even up to farthest Nome, Alaska. And this same man, by wire and wireless, is in touch with the whole world—with the six or seven hundred wireless telegraph shore stations scattered all over graph shore stations scattered all over the globe, not to speak of the op-erators on the ships sailing the seas of

the globe.

If he so desired, and if the government which pays him his salary in the department of war so ordered, this man could talk with the operator in Eastport, Maine; the Harvard University laboratory, the lightship "Skunk" off the English coast, with the Russian station at Vladivostok, Siberia; with Perim or Zanzibar, some miles to the Southward. If it was necessary to do so, words could be desired from Fort William McKinley across to Fukul, Japan, and no one sailing underneath the flying messages need be the wiser. And every day the number of these points in the gigantic forld-circling system of intercommuni cation increases—both in efficiency and certainty. The one man in the war department at Washington will have his hands full, and be can talk all he wants to.

ROM very early times the people of Holland have been famed for their horticultural achievements. Indeed, Holland have been famed for their horticultural achievements. Indeed, it will be no exaggeration to say that over a long period they practically kept the art of gardening alive in Europe. Today the Dutch people are well up in line with the wealthy and larger nations of the earth in this direction. But there is one point upon which the Netherlands may be said to stand alone—oned supremacy as the built-producing

lands may be said to stand alone—
tis unquestioned supremacy as the bulb-producing
country of the world. The reason for this may be
found in two circumstances. Firstly, the age of
the industry, which has given the growers such a
grasp of the whole subject as to give them a great
advantage over more recent competitors, and, in
the second place, the out and out suitability of the
soil in Holland for the culture of all kinds of bulbuous relapts. buous plants.

As is well known the larger part of Holland con-uists of a flat sandy plain which has been wrested from the bed of the ocean. Nearly all Holland is below the level of the sea and would quickly be flooded with water were it not for the embank-ments which keep the waves in check on the ocean side and the busily numping windmills which draw up the accumulated inland moisture into elevated canais in the interior. The whole country therefore never knows the meaning of the word crought, while on account of the excessively light mature of the soil the drainage is perfect.

Undoubtedly the time of all others to pay a visit to a Dutch bulb farm is in the early spring. Then the whole district, of which the city of Harlem may be taken as a center, is simply aglow with loveli-bess. In such a flat land, extensive views are not casy to obtain. Let us therefore accept the invi-fation of a bulb grower and go over the farm with its owner. A closer examination of the patches of color which were seen just now from distance, reveals the fact that each is composed a distance, reveals the fact that each is composed of thousands of separate blossoms. These flowering bulbs are planted with a wonderful regularity, being drawn up in rigid lines like so many soldiers. All those bulbs of a like age are placed in sections together and this method of planting produces rather a singular effect. Starting at one and of this long row of hyacinths are the one-year-sold bulbs, these have produced nothing but tufts if green leaves. After a few yards one comes to off oulds, these have produced meaning out the sef green leaves. After a few yards one comes to the bulbs in the second year. Most of them have distinguished themselves, with a small blossom in the case of the threetyear-old plants the blossoms are much finer and so the flowers go on gradually increasing in fineness as we walk from section to section until at the end of the row one finds the bulbs which are in their sixth or seventh year. Thus it takes seven years to grow a marietable hyacinth bulb. The same manner of panting is followed in the case of both tuilps and harcissi, although in these instances the length of the time to produce a mature bulb is not so great. But one's curiosity is excited as to how the original bulbs are obtained and this question opens up one of the most interesting chapters in the history of bulb growing.

With tulips are narcissi the available methods gradually increasing in fineness as we walk from

of increase are decidedly slow. The grower is entirely dependent for fresh stock upon the off-shoots which the parent bulbs annually produce. In the case of byacinths a kindly provision of na-ture has made the propagation of bulbs in large numbers an extremely simple matter. Each season the grower selects a number of his largest byacinth bulbs and sets these aside for the purpose of increasing his stock. The bulbs are technically known as mothers and in dealing with them one of the two methods is adopted—cross-ing and scooping. In the case of the former the base of the bulb is cut across in four or five dif-ferent sections with a sharp knife. In the latter instance the whole of the root end of the bulb is secoped away thus leaving a circular cavity. Whichever process may be adopted the mother bulbs are carefully stored away in a perfectly dry place. When most of the moisture has passed away from the bulb a strange thing happens. At the base of each mother bulb a number of tiny within the process of the strange that the cave the strange than the strange that the strange than the buiblis begin to put in an appearance; as the weeks go by these increase very rapidly both in size and number. With the advent of the Manting season each mother, with her offsprings attached, is placed out into the ground and as soon as the warm weather sets in the buiblis commence. to grow on their own account, every one sending up a long green shoot. When the usual time for harvesting the bulbs arrives it will be found that narvesting the bulbs arrives it will be found that the mothers have well nigh rotted away, but in their place are to be found several dozen little hyacinth bulbs. These are dried off and stored away to await the autumn planting, when they will take their place at the bottom of the long row to be moved up into a fresh section every year until

they are fully matured bulbs.

The most arduous duties of the bulb farmer consist in the annual lifting and planting of the crop. sist in the annual fitting and planting of the crop. Every bulb is taken from the soil and replaced once in each year. After blooming time the first few days of really warm weather soon cause the green sap in the leaves of the bulbe to begin its return journey to its underground storehouse. When the crop is judged to be in a ripe condition small armies of workers picturesquely clad, attired in long smocks and wooden shees, sally forth to

fields. One struck by the complete absence of digging utensils among the lit-tle companies. As a matter of fact, spades and forks are used in the bulb rais ing operations, the whole business being carried out entirely by hand. In order to pre vent damage by frost the surface of the field is buried to a depth of five or six inches with straw and other litter. When the warm weather sets in this cover is removed, and some bulbs are found already

to be sending up pale green shoots.

The desire for novelties in the horticultural world has of course affected the Dutch bulb growers. In all large establishments a certain portion of the ground is devoted to experiments incident to the search of new varieties. Apart from the fact that all the bulbs will at times produce off-shoots which exhibit a certain difference from the parent, the only way in which new varieties may be obtained is through the agency of seed. The interesting process of artificial cross fertilization is resorted to, but from the beginning to the end the whole process of raising bulbs from seed is one requiring an immense amount of patience. By the transference of the pollen from one blosom to another the experimenter hopes to influ world has of course affected the Dutch bulb grow som to another the experimenter hopes to influ ence the resulting seeds in a certain manner. But he can be by no means sure of this.

The prices for novel varieties change, but for new specimens of narcissi from \$50 to \$250 per bulb have been obtained and the fact '9-remarkable that many of the varieties have commanded these high prices for several years and still show but small signs of reduction.

Such sums as are mentioned above are small in comparison with prices which were paid for fullp bulbs during the historic "tullpomania" which swept over the Dutch people in the early part of swept over the Dutch people in the early part of the seventeenth century. A single bulb of a variety known as. Semper Augustus realized the immense sum of \$2,500. All kinds of bulb plants are largely grown, the smaller bulbs, such as snowdrops, crocuses and scillas are produced in huge quantities, while later on in the year the landscape in the bulb country is brilliant with ranunculi, irises, and gladioli. On some of the larger establishments a great variety of greenhouse roots and bulbs are under glass.

The growing of tulips is a splendid example of an industry not devoid of esthetic charm. Not without reason may it be urged, however, that the cultivation of any flower is a vocation of interest. In the case of the tulip there is the added intellectual quality of a history that forms a most striking chapter in the chronicle of modern finance.

The young man could have gone after, running behind the motor, but their was a takicab at hand; he jumped in it, ordering the man to follow the car to the Savoy. There the boy had the pleasure of seeing Miss Lane enter the hotel, Ponictow-sky with her—had the anyth of see sky with her-had the anguish of see ing them both go up in the lift to her

When Dan came to himself he heard the chimes of St. Martin's ring out eleven. He then remembered for the first time that he had promised to dine alone at home with the Duchess of Breakwater. "Gosh, Lily will be wild!"

"Goah, Lily will be wild!"
In spite of the lateness of the hour
he hurried to Park lane. The familiar
face of the man servant who let him

Blair raised himself up on the softs without malting any noise, and he saw Galorey take the woman in his arms. The sight didn't make the fiance angry. He realised instantly that he wanted to believe that it was true, and as there was nothing theatrical in the young westerner, he sprang up, slang so much a part of his nature that the first words that came to his lips was a phrase in vogue.

The duchess of Breakwater shrugged.
"I don't know what you dreamed," she said acidly, "If you were asleep."

"Well, it was a very pretty dream," the boy returned, "and showed what a stupid ass I've been to think I couldn't have dreamed it when I was awake."

"I think you are clasy," the duchess exclaimed.

But Blair repeated: "That's all right. mean to say as far as I am cerned--"

His candor, his simplicity, were so charming, he stood before the two so young, so clear, so clean, that a sense of what she had lost, what she never had had, made her exclaim:
"Dan, I really don't care a pin for the money—I don't"—but the hand she held out was seized by the other man and held fast. Gelorey said:

He made her meet his eyes this time: stronger than she, Galorey forced her to be sincere. She set Dan free and he turned and left them standing there facing each other. When shown positive and reliable proof that a certain remedy had cured many cases of female ills, wouldn't any sensible woman conclude that the same remedy would also benefit her if suffering with the same trouble?

Here are five letters from southern women which prove the efficiency of Lydia E. Pinkham's Vegetable Compound.

LETTER FROM VIRGINIA.

Elliston, Va.—"I feel it my duty to express my thanks to you and your great medicine. I was a sufferer from female troubles and had been confined in bed over one third of my time for ten months. I could not do my housework and had faisting spells so that my husband could not leave me alone for five minutes at a time.
"Now I owe my health to Lydis E. Pinkham's Vegetable Compound and Blood Purifier. Whenever I see a suffering woman I want to tell her what these medicines have done for me and I will always goak a good word for them." Also ROBERT BLAKKERSHIP, Elliston, Montgomery Co., Va.

LETTER FROM LOUISIANA

New Orleans, La.—"I was passing through the Change of Life and before I took Lydia E. Pinkhama Vegetable Compound I was troubled with hot flashes, weak and dizzy feelings, backache and irregularities. I would get up in the morning feeling tired out and not fit to de saything.
"Since I have been taking your Compound and Blood Purifier I feel all right. Your medicines are worth their weight in gold."—Mrs. Gastos-BLONDEAU, 1541 Polymnia St., New Orleans, La.

LETTER FROM FLORIDA.

Wauchula, Fla.—"Some time ago I wrote to you giving you my sympos, headache, backache, bearing-down, and discomfort in walking, caused

toms, headache, backache, bearing down, and discomfort in walking, causet by female troubles.

"I got two bottles of Lydis E Pinkham's Vegetable Compound and a package of Sanative Wash and that was all I used to make me a well woman.

"I am satisfied that if I had done like a good many women, and had not taken your remedies, I would have been arrest sufferer. But I started in time with the right medicine and got well. It did not cost very much either. I feel that you are a friend to all women and I would rather use your remedies than have a doctor."—Mrs. MATTIE Hodnor, Box 406, Wauchula, Florida.

LETTER FROM WEST VIRGINIA.

Martinsburg, W. Va.—"I am glad to say that Lydia E. Pinkham's Vegetable Compound has done wonders for my mother, daughter and myself.
"I have told dozens of people about it and my daughter says that when she hears a girl complaining with cramps, she tells her to take your Compound."—Mrs. MARY A. HOCKENBERRY, 712 N. 3rd St., Martinsburg, W. Va.

ANOTHER LETTER FROM VIRGINIA.

ANOTHER LETTER FROM VIRGINIA.

Newport News, Va.—"About five years ago I was troubled with such pains and bloating every month that I would have to go to bed.

"A friend told me to take Lydis E. Pinkham's Vegetable Compound and I soon found relief. The medicine strengthened me in every way and my doctor approved of my taking it.

"I will be glad if my testimony will help some one who is suffering from female weakness."—Mrs. W. J. BLAYTON, 1029 Hampton Ave., Newport. News, Vs.

Great System Perfected by M. Soyer, Famous London Chef.

SETS THE GOOD OUT OF FOOD

By Martha McCulloch Williams.

Bating serves a double purpose—
the giving of pleasure, the keeping
up of strength. Ill-cooked food reduces both to a minimum—hence the
groverb: "God sends meat and the
devil sends cooks." Possibly his satante majesty now and again nods. It must have been in such a somno-lent interval that he let M. Soyer's

lent interval that he let M. Soyer's system of paper bag cooking get by him. For unquestionably it is in the way of reducing ill-cooking at least one-half. Thereby it will help to feed fat all the nations of the earth. The use of cooking is to change the nature of food substances, making them at once better tasting and more digestible. Heat works by developing flavors and transforming substances. Its most important office is, however, to break down fiber, animal and vegetable, to such a degree as to and vegetable, to such a degree as to render it easily digestible. If it is

render, it easily digestible. If it is to do this it must be properly applied. That is to say, gently, regularly. Simple food, well cooked, is the foundation of happiness—and paper bag cooking means good cooking. It follows naturally that the paper bag is especially useful in preparing food for delicate persons, and growroot for defeate persons, and grow-ing children. Here follow some dishes that have helped build up weak and wasted people. That they will be likewise good for children, especially delicate ones, admits of no dcubt.

Pigcon Rosst.—Take a squab, a squab-chicken as small as possible, or a quall, dross it whole, stuff lightly with toasted bread crumba, adding a raisin or two, or shreds of tart apple. Season very lightly inside beapple. Season very lightly inside before stuffing. Rub a little more salt
outside, but only a little. Rub also
with soft butter, not melted, and
dredge very lightly with flour. Then
wrap in becon, silced as thin as possible, and put into a buttered bag
with a half teaspoonful of water. Seal
and cosk in a hot oven twenty to
thirty minutes, depending on the size.
The aconsh-chicken may require thir-

thirty minutes, depending on the size. The squab-chicken may require thirty-five minutes.

Shredded Wheat and Tomatoes.—Four upon each ahredded wheat bisoult required a teaspoonful of melted butter. Lay the buttered biscuit in a well-buttered bag and pile upon them thick slices of peeled tomatoes, well seasoned with sugar, salt, black and red pepper. Seal and cook for ten minutes. Serve on hot plates. A pleasing variant for children is to use instead of tomatoes, havangs pealed, out in cubes, covered with sugar and lemon juice, and cooked for eight minutes. This can be served with cream.

Sweethread Mackenzie.—Blanch and
trim a good-sized sweethread, make
a little mirepoir of vegetables, paying
attention to the color of the vegetables, and seeing that they do not brown. Cut the sweetbread across the center, but do not halve it. Pound one conce of pistachios and lay them in the alit of the sweethread. Cover the sweethread with the prepared vegetables and place in a well-but-tered bag. Cook in a slow oven for thirty minutes. Dish the sweetbread, place the other ingredients in a fine sieve and lightly press the gravy through, on to the sweetbread.

through, on to the sweethread.

Chloken Quenciles.—Take the breast of one fowl, add a pint of white sauce, and a piece-of butter the size of a wainut. Pseud well; mix in one egg, pass through a hair sieve. Place in a heath, add a quarter pint of cream-and stir well. Form into small quenciles with a spoon, place in a buttered bag, by carefully on the broiler, and cook for six minutes in a hot oven.

Chicken and Rice Tes.—Chop up half a raw chicken, wash a tablespoonant of rice in cold water, and mix with the chicken. Wash a tesspoonant of peart barley, and add with a guarter-pint of cold water. Put all together into a small paper bag, and cook ferty to ferty-five minutes in a slow oven.

You cannot be over-careful in the lection of medicine for children. Only the very gentlest bowel medicine should ever be given, except in emergency ses. Where She Would Be Taught Where She World Be Taught.
Women, writes Marion Harland,
should emulate the sagacity of their
spouses in selecting wisely the foodstuffs and whatever else goes to making up the comfort and comeliness of
the home. Expenses should be regulated by the sum their husbands can
afford to hand to them for the defrayment of domestic expenses. But who
is to instruct the raw sirl just out of is to instruct the raw girl just out of school, in the principles and details of applied household economics? The al-most universal fashion of sending the daughter to boarding school at the age of 12 or 14 and from boarding school to college for four years more, vacato college for four years more, vacations being passed at watering places, the seaside, or abroad, effectually precludes the possibility of learning housewifery from her mother. Admirable as may be-and in many cases are—the department of domestic science established in our leading institutions of learning for girls, one year of a home weere economy is a present and practical consideration would make a better business partner for the prospective husband than a four years course in the model offices and demonstration halls of the best equipped college in the country.

The Englishman.

An English actor was traveling with an American company and won his way into the heart of every member by his kindly courtesy and quiet consideration. One of the indies, wishing to find out if a sense of humor was also use of his qualities, propounded to him his his delications. "Which dies the harder, a sculptor

or a barber?"

The Englishman gave it up, and sho replied:

"A sculptor, because the barber curls up and dies, but the sculptor makes faces and busta."

The Englishman laughed, not boisterously, but that she attributed to his well-bred reserve, and decided in his favor. Later in the evening he came to her and said:
