Real Uniformity.

Colonel G— is a fine commander, but not a musician. He sent for the chief musician of his regimental band one day and delivered this scathing criticism:

Real Uniformity.

"I notice a lack of uniformity about the band which must be regulated. Yesterday morning they were out on parade, and the largest man in the band was playing a little bit of an instrument—fute or something of the kind—and you had the big drum played by a small man. That sort of thing doesn't look well, and must be attended to. I want the small men to play small instruments, and the big men the big instruments. And another thing—I want the trombone players to slide their instruments in and out in unison. It annoys me to see them all out of step with their hands."—Everybody's Magazine.

This Store has a pure food law of its own

It applies to everything, and everything must live up to the provisions of this law. You might think that some things (Canned Goods, for instance) would have to be taken on trust, but an observing grocer soon learns where each brand of these goods belongs, no matter what the labels may say, and acts accordingly.

The moral of all this is that this might be a good place to come when you want pure food eatables.
