The Bible and the Newspaper

There are people who think the Bible is an old fashioned book; as a matter of fact, it is more modern than the morning newspaper. The newspaper, if intelligently edited, is up to date; the Bible is, and always has been, centuries ahead of date. The newspaper tells us what happened yesterday; the Bible tells us what is going to happen a thousand years hence. The newspaper gives us the incidents of the hour; in surface movements over the whole earth; the Bible opens the depths of life and tells what the outcome of those events will be. To the thoughtful reader the deepest interest of the newspaper is its confirmation of the Bible. No sermons preached in pulpits are so convincing as the facts recited day after day by the newspapers. These words come from a thoughtful man and a little quiet contemplation will convince us that he is right. Read your Bible and then see how its truths are thrown upon the screen of life by the daily newspaper and then turn to your Bible to see how it tells the same story in a different language, perhaps, but with the same truth. Next Sunday evening the pastor will point out some of these illustrations.

FIRST PRESBYTERIAN CHURCH

Themes for November 15th:

10 a. m.—"Human Mirrors."

7 p. m.—"How the newspaper confirms the Bible."

WELCOME

Only Six Weeks Until Xmas.

"Take it from Us" and do your Christmas Buying Early.

We are now showing our Holiday Line and earnestly invite your inspection. Buy while the assortment is complete. We have a fine line of

TOYS, DOLLS, BOOKS

including, Children's Books, Toilet Sets, Ivory Pieces, Cut Glass, Perfumes, Toilet Waters, Box Stationery, Fancy Calendars, Leather Goods, Fancy Novelties, Etc.

Our Holiday Goods were ordered in the early summer before the advance in prices and our customers will be given this advantage, even on the imported articles.

Second Number on Lecture Course

The second number on the Citizens' Entertainment Course takes place at the opera house this evening, when Hon. W. I. Nolan will be the entertainer. Mr. Nolan's lecture last season was highly appreciated by all who heard him. There are a few seats left for those who desire single admission tickets.

W. I. NOLAN, LECTURER, HUMORIST.

W. I. Nolan has been before the public for twenty years as an entertainer and lecturer, also as a student of public affairs. He is widely known and most successful. The newspapers have commented enthusiastically both upon his work upon the Lyceum platform and as a legislator.

Mr. Nolan has served five terms as a member of the Minnesota state legislature and has taken an active part in many movements for civic reform. Mr. Nolan is noted as a speaker along many lines and holds a unique position upon the lecture platform due to an original and refreshing fund of

W. I. NOLAN, LECTURER, HUMORIST.

humor combined with a common sense and philosophical point of view. His lectures entertain and at the same time give his hearers something worth while.

Mr. Nolan is called on widely for after dinner speeches. In March, 1912, he was a speaker at the banquet of the Irish-American Sons of Erin in celebration of St. Patrick's day. It was the first banquet since the Irish-American society and the American Sons of Erin were united, making it an unusually important occasion. The St. Louis Globe-Democrat the next day said that Mr. Nolan proved witty, eloquent and versatile. This is but one of scores of comments from well known newspapers.

A masquerade ball will be given by the Billiken Club at Penniman hall, Tuesday evening, Nov. 17. Heaney's five-piece orchestra will furnish the music. *DMI, 7c.* Everybody invited.

C. C. Ravler has sold his farm, greenhouse and cannery factory to L. A. Thomas of the Thomas Normal Training school of Detroit. Mr. Thomas recently purchased the two Henry farms on the Plymouth road. Mr. Ravler will continue to manage the farm and cannery business for Mr. Thomas.

The Men Lift the Mortgage
Statistics show that the hen is the best paying investment on the farm when given proper care and attention. If you want to see the best results feed your chickens a little of **HARVELL'S CONDITION POWDERS** occasionally, it makes the hens lay. No feed stuff mixed with it to make a large package; nothing but pure medicine. Price 25c per package. Sold by J. W. Blickenstaff & Co. and Beyer's Pharmacy.

Offer Prize for Name of Street

A petition of residents on Main street was presented to the council some time ago asking that the name of Main street be changed. It was suggested that the street be named Plymouth avenue. This name did not seem to appeal to the council and they are desirous of having a number of names suggested, and the person who suggests the one selected by the council will be given a prize of \$2.00. Names should be sent to E. H. Tighe, chairman of the street committee.

SCHOOL FUND

The Primary School Fund is Very Necessary to the Schools of the State

The improvement of rural schools is a pressing problem in Michigan. Most parts of the State have passed the pioneer stage for which the old time district school was well fitted. Besides reading, writing and arithmetic, the country now needs instruction in agriculture, home making and those things which modern development demands. Never before was money needed for rural schools as it is now. The greatest help in building up the rural schools is the primary school fund. This fund was needed in pioneer days to lay the foundations of our school system; it is needed now, even more, to adjust the school system to the new conditions.

Local News

A special sale at J. W. Blickenstaff & Co.'s Saturday, November 14.

George Davis of Toledo, is visiting his sister, Mrs. Paul, in north village.

The Mail is desirous of securing a correspondent in Canton township. Write or phone this office.

Miss Ethel Proctor and Clinton Johnson of Detroit, were quietly married at the Presbyterian manse yesterday afternoon by Rev. B. F. Farber. They were attended by Mr. and Mrs. W. Wright of Wayne. Mr. and Mrs. Johnson will reside on a farm near Wyandotte. Mrs. Johnson formerly attended Plymouth High school and is favorably known here. The best wishes of her friends go with her to her new home.

Michigan Crop Report

The estimated yield of wheat per acre is 19.27, according to the crop report issued today by Secretary of State Marindaie. The total yield of the principal crops, according to Marindaie's statistics, follows:

Wheat, 14,015,280 bushels; corn, 60,090,296 bushels; oats, 62,598,717 bushels; barley, 2,214,708 bushels; rye, 5,633,659 bushels; buckwheat, 903,623 bushels; potatoes, 41,159,473 bushels; beans, 4,669,514 bushels; peas, 1,109,758 bushels; cloverseed, 194,000 bushels; apples, 23,643,000 bushels; peaches, 1,664,000 bushels; pears, 967,200 bushels; plums, 378,500 bushels; cherries, 1,326,000 bushels; strawberries, 531,000 bushels; sugar beets, 626,877 tons; hay, 2,789,026 tons.

Grange Notes

The Plymouth Grange met Thursday, November 5th, with Worthy Master Howard Brown in the chair. After the business meeting a short program was given.

A special meeting was held last evening (Thursday) to initiate a class in the 1st and 2nd degrees. The date set for the banquet is December 12. Every member get busy. The program for November 15th is as follows: Initiation in the 3rd and 4th degrees. "Agricultural Education," Worthy Master, Howard Brown. "The Country Life Movement," Mrs. James Esnard. Music.

The Great Chicago Stock Show

It should be understood that the purpose of the International Live Stock Exposition, which will this year be held from Nov. 28 to Dec. 5, is the improvement of the live stock of the nation. It is educational in its nature, aims, methods and results. It brings together annually from 6,000 to 10,000 of the world's choicest animals, to be judged in upwards of 800 classes, in competition for over 2,000 cash premiums aggregating more than \$75,000, besides other numerous valuable prizes, trophies, medals of honor, etc., and holds constant business sessions during the week composed of the foremost live stock representatives of the world, also a series of brilliant evening horse fairs and displays of premium live stock in the arena, with music and special features, all for the purpose of instructing the eye and the mind of the producer of live stock to the importance and necessity of better methods and the greater profits to be derived from raising the better kinds of farm animals, thus expanding and improving the industry throughout the nation, and increasing greatly its agricultural prosperity. In short, it is a vast object lesson intended for the improvement of the live stock of the United States, the upbuilding of public confidence in the health and excellence of American animals and meats, and the creation of a better demand for them at home and abroad.

A New Feature

In the Mail this week we are running a two-column department printed in German, pertaining to the great war in Europe. We believe that many of our German readers, even although they can read English, will appreciate our efforts in giving them a little space in the Mail in the language of the Fatherland. We would be pleased to have our German readers let us know what they think of this feature, that we may know whether it would be worth while to continue it or not.

Foley's Honey and Tar Compound for Croup

Croup scares you. The loud hoarse croupy cough, choking and gasping for breath, labored breathing, call for immediate relief. The very first doses of Foley's Honey and Tar Compound will master the croup. It cuts the thick mucus, clears away the phlegm and opens up and eases the air passages. Sold by J. W. Blickenstaff & Co. —Advt.

THE LIONESS KNEW

By JOHN BREWSTER.

Rita, the big lioness, had been acting in an ugly manner. They say that lions can detect the character of their trainers; that a drunken trainer is in imminent danger of destruction should he enter the cage. They say, too, that a good woman can tame the wildest beast. Perhaps that is a legend, though.

Mademoiselle Charmeuse had been born Lily Leigh. Her parents were honest farmer folks who back in Shawnee county. But there had been a maternal grandfather who ran away to sea. It is not boys only that inherit the roving disposition. When she was seventeen Lily had shaken the dust off her shoes at the (back) entrance to the farm and departed in the wake of a traveling show, to graduate as Mademoiselle Charmeuse, the world-famous equestrienne. Afterward, when business prospered and the show increased in size and aspirations, she became Mademoiselle Charmeuse, the renowned lion-tamer.

Some folks think circus people are almost as bad as gypsies. That is not the case. There are no more moral and respectable people alive. Nobody had ever breathed a word against Mademoiselle Charmeuse's reputation. Goldini, the proprietor, and the motherly Madame Goldini, treated her like a daughter, even if they had picked her up in an illegal manner, struck by her pretty face and daring. But when Madame Goldini grew too stout to continue to tame the lions, and resigned herself to looking after the welfare of the circus troupe, in comfortable middle life, Mademoiselle Charmeuse was thrown much more in touch with Goldini.

It was her task, together with Nero, the big Dalmatian, to put the lions through their paces at every country place where they exhibited. Goldini himself seldom entered the lions' cage nowadays. He was growing fat, like his wife, besides, the lions had begun

Began to Growl in Sympathy.

to appear restless under his lash. Goldini knew what was the trouble. He knew it in his own soul. He loved Mademoiselle Charmeuse. "Now, Miss Ma'y, I don't. You see, de ain't like some of de s'cieties; dee acts liberal, and don't skimp on nothin'. Dee gives you de finest kind of coffin, en makes a way for ev'rybody to git to your burial. En den, 'sides dat, dee gives you thirty dollars at the grave, en you know thirty dollars comes in mighty handy."

Likes Sensible Women. Montague Glass, the author of "Perlmutter and Potash," says that he would not marry a woman who did not have sense enough to want equal rights for her sex. He has a wife who, needless to say, comes up to his expectations of what a sensible woman should be.

Real-Life Romance. In real life one sometimes gets the whole of a romance and sees it result in the leading lady thereof cooking for boarders.—Athlon Globe.

Few men are wise enough to render one little word sufficient. In Abyssinia he had learned to handle lions; he had shot them at 20 paces without a tremor of fear. It is easy to be a lion-tamer. On his arrival in America he had promptly stepped into a position with no other applicants, and graduated to a show of his own by marrying the proprietress. A good man, Goldini, a worthy citizen—but he had never lived, since his arrival in America, or loved, till now.

The girl's innocence, her beauty, appealed to him strongly. A little, half-starved thing when he met her, a wild mountain girl with aspirations above her station, he had taken her in part in pity, part on account of a business sense of her value. Now that he and she were thrown so much together, he knew that he loved her.

Then he had kissed her. Marvelous, perhaps, but it was the girl's first kiss of love. Her whole being thrilled to it. She did not know what she had answered. But afterward she had not slept. She thought of the motherly woman who had befriended her, of the rank and base ingratitude of such a course; and yet she loved him. Suddenly a wild desire came to her to leave everything and go home. Her parents were hard country folks, but they would welcome her with her little money, and give her such affection as they had to bestow. They would even be proud of her in a way. There was none of that Puritanism in Shawnee county which prevails in the New England states. It was a hard land where money alone counted.

The following afternoon her mind was not yet made up. It must be one course or the other, she knew. Either go off with her lover or go home. She could not endure the delay of a decision longer.

She stepped into the cage and at once Rita began to act strangely. Perhaps she knew; or perhaps the unrest in the girl's soul communicated itself to hers. The lioness lashed her tail and retreated, growling, to the opposite end of the cage. The other three lions began to growl in sympathy, and crouched beside her, snarling at each flick of the girl's whip and uttering ignoring the stands on which they were supposed to stand in a pyramid.

Nero was uneasy, too. Nero, at his mistress' heels, growled back at Rita, and crouched also, motionless, watching her. The girl kept her eyes on Rita; she knew that the other lions would follow her example.

She saw dimly, the crowd of sight-seers outside the cage, seated upon their wooden benches. But she saw them [blank], for her mind was set on dominating the lioness, and, though it was easy to escape, she knew that she would never be able to do anything with Rita again.

She advanced, flicking her whip, and Rita, growling, poised herself to spring. This was the crucial moment. Suddenly the girl heard Goldini's voice. "Come out!" he screamed, half opening the cage. "It is no good! Come!"

At that moment, just as the girl's attention was distracted, though it was but a momentary wavering of an eyelid, Rita leaped. At the same instant the other lions sprang into the air. Rita's tawny body flew across the cage. But at the same moment Nero sprang to meet her. He could not stop the momentum of that bulk, but he turned it. Lioness and dog rolled in a tussle upon the floor.

At the same instant Goldini screamed and slammed the door of the cage. The girl heard shrieks of panic among the audience. She was conscious of the circus employes pulling frantically at the door of the cage. Before her she saw the dead body of the faithful hound, and the lioness and lions worrying it. She retreated toward the door. Rita sprang for her again, but the lash of the whip caught her across the nose, and, averting, she flung herself against the bars. They quivered, but stood fast, and before she could turn again the girl had stepped backward to safety through the open door.

She found herself lying in the center of a crowd of strangers. Her first thought was of Nero. Then, remembering, she began to weep hysterically. Her second was of Goldini. He had slammed the door and left her to die! Goldini's ancient malady had broken out once more. And it was at the turning point of the girl's career. For suddenly she realized that this thing had affectedly answered the question that had tormented her.

She rose to her feet and staggered through the crowd. She meant to go away, right away, she could not see Goldini again; all her love was dead. A gray-haired woman was clasping her to her breast. The girl looked into her face a full minute before she realized who this was. "O, mother!" she sobbed. "O, take me away, take me away!"

Through the silent crowd the gray-haired, black-bonneted woman led the girl in the short skirt with the spangles. (Copyright, 1914, by W. G. Chapman.)

Bad Dinners. Of course, we all know the old saying that wisely admonishes us to eat to live rather than live to eat. But, on the other hand, that is no excuse for the man who invites us to dinner and then gives us a bad one. We are helpless in his hands, condemned by politeness to eat whatever is put before us. Would that in this day and time we could dare to emulate a certain ancient heathen Chinese. The story goes that once upon a time in Ch'ang'an there lived a man who loved giving dinners; unfortunately, atrocious dinners. One day a guest dropped on his knees before him, exclaiming: "You are, indeed, a friend of yours!" "You are, indeed," replied the host. "Then I ask a favor of you," said the guest, "and you must grant it before I rise from my knees." "What is it?" said the host in astonishment. "Never invite me to dinner again," said the guest.

WAITING FOR YOU

160 ACRE FARMS IN WESTERN CANADA FREE

Yes, waiting for every farmer or farmer's son—any industrious American who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is higher but her farm land just as cheap and in the provinces of Manitoba, Saskatchewan and Alberta

160 Acre Homesteads are Actually Free to Settlers and Other Land at From \$15 to \$20 per Acre

The people of European countries as well as the American continent must be fed—thus an ever greater demand for Canadian Wheat will keep up the price. Any farmer who can buy land at \$15.00 to \$30.00 per acre—get a dollar for wheat and raise 20 to 45 bushels to the acre is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming is fully as profitable an industry as grain raising. The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, markets convenient, climate excellent.

Military service is not compulsory in Canada but there is an unusual demand for farm labor to replace the many young men who have volunteered for service in the war. Write for literature and particulars as to reduced railway rates to Superintendent Immigration, Ottawa, Canada; or to

M. V. MacINNIS
176 Jefferson Ave., Detroit, Mich.
Canadian Government Agent.

OBJECTION PLACED ON AGE

But Young Lady's Idea Was Altogether Different From What Corporal Had Feared.

"What pensions, what millions and billions in pensions, this horrible war is going to entail," said Major Fitzgerald of Boston. He added:

"And some of these pensions will go on longer than they should, because some of the pensioners in their old age will marry young girls—for an old pensioner makes a good part, since his pension, you know, falls on his death in his widow.

"I heard the other day about an old Civil War pensioner who proposed to the hired girl next door, a very pretty girl of twenty or so. But she refused him.

"Perhaps," he stammered then, stroking in his embarrassment his long and snow-white beard, "perhaps I am too old."

"No," said the pretty hired girl calmly; "no, corporal, you're too young."

Human Nature.

"Now, Ethel, Harold says he's sorry he broke your doll, so I want you to forgive him."

"I'd feel more like forgivin' him, mother, if I could swat him one first."

—Life.

It takes a lot of confidence to enable a man to enjoy hash.

Mighty Handy.

Some negroes are insatiable "jinners," and their favorite organizations are those which assure an ostentatious funeral.

A mistress was remonstrating with her servant about belonging to one of them.

"Bonniebel, don't you think it is mighty foolish to pay the 'Friends and True Mourners society' twenty-five cents every month?"

"Naw'm, Miss Ma'y, I don't. You see, de ain't like some of de s'cieties; dee acts liberal, and don't skimp on nothin'. Dee gives you de finest kind of coffin, en makes a way for ev'rybody to git to your burial. En den, 'sides dat, dee gives you thirty dollars at the grave, en you know thirty dollars comes in mighty handy."

Likes Sensible Women.

Montague Glass, the author of "Perlmutter and Potash," says that he would not marry a woman who did not have sense enough to want equal rights for her sex. He has a wife who, needless to say, comes up to his expectations of what a sensible woman should be.

Real-Life Romance.

In real life one sometimes gets the whole of a romance and sees it result in the leading lady thereof cooking for boarders.—Athlon Globe.

Few men are wise enough to render one little word sufficient.

With Least Exertion

To do one's best work with comfort, body and brain must be in good condition. That requires proper food—food that contains all the elements that build brain and brawn.

Grape-Nuts

Is that kind of food!

Made of wheat and barley, it contains all the nutriment of these most nourishing grains, including those vital mineral salts—phosphate of potash, etc.—that are discarded in making white flour.

Long baking breaks down the starch cells of the grain and makes this food easily digestible by the most delicate stomach.

Economical, appetizing—

"There's a Reason" for Grape-Nuts

Put That Pain to Use

The network of nerves in your body, like the network of wires in a burglar alarm system, gives quick warning when anything is going wrong inside. Looking at it in this way a pain is a useful alarm. Now, kidney weakness is a dangerous thing—a condition not to be neglected—and it is wise to know and pay attention to the early alarm signals of sick kidneys.

Backache is a common warning of congestion or inflammation in the kidneys. It may be dull, nagging pain, or a sharp twinge when stooping or lifting. There are likely to be disorders of urination, dizziness, headaches, and drowsy, despondent, tired feelings.

It is very hard to strengthen weak kidneys at first, but neglect invites rheumatic or neuralgic attacks, gravel, dropsy, and fatal Bright's disease.

As a special medicine for weak kidneys, Doan's Kidney Pills have been used for years all over the civilized world, and surely are considered reliable. The patient can always help the medicine immensely, however, by dieting lightly, using little or no liquor, tea or coffee, keeping regular hours and drinking lots of pure water.

"I can hardly straighten up."

As to Doan's Kidney Pills, read the following enthusiastic endorsement by one who has tested them.

GAVE UP HOPE Weak and Discouraged with Kidney Ills

William Hough, 514 Alderman St., Detroit, Mich., says: "I think I contracted kidney trouble in 1888 when I was in the army. The secretion from my kidneys contained fat, thick, white sediment and the passages were accompanied by terrible pain. The pain was acute and the pressure too frequent. My back and limbs were stiff and lame and my arms were all crippled up. The joints in my fingers were swollen. I could hardly move my fingers or limbs. I got so bad, I couldn't do any work and was laid up. I decided, but physicians gave me only temporary relief. I didn't think I would ever get better and was discouraged. One day a druggist told me to try Doan's Kidney Pills, and I used that for a week. I soon felt better and by the time I had used two boxes I was able to go back to work. I kept on taking them for years all over the best of health. I have been feeling in good shape ever since and a short time ago when I was examined for an increase in pension the physician said my kidneys were in the best of shape. Doan's Kidney Pills have worked wonders in my case and I am anxious to have others profit by my experience. I shall be pleased to give Doan's Kidney Pills my endorsement whenever a favorable opportunity occurs."

"When Your Back is Lame—Remember the Name"

SOME TERRIBLE WAR BILLS

That of the United States Government Heads the List in Point of Size.

The wars of Napoleon in 13 years cost France \$1,000,000,000, writes Wendell Phillips Dodge in Leslie's. Our civil war expenditure of the federal government amounted to \$3,400,000,000 or nearly thirteen times as much as a year as Napoleon's. The Franco German war cost France \$1,580,000,000, besides an added war indemnity of \$1,000,000,000. This same great war, which lasted only 190 days, cost Germany \$450,000,000 for an average fighting force of 1,250,000 men. The other big European war of the past half century, the Russo-Turkish war, cost Russia \$785,140,000, but she had two years' fighting for her money. The war in the far East cost Japan \$650,000,000 and Russia \$723,000,000, not counting lost ships. Only toward the end had either side anything like a million men in the field. Italy's little war with Turkey cost \$400,000 a day, allowing for a mere 60,000 fighting men; and the Boer war, in which England's army averaged 200,000, cost \$1,055,000,000 in two and a half years.

Important to Mothers. Examining carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Watson* in Use For Over 30 Years.

Children Cry for Fletcher's Castoria

A Fine Night. Maude Marie was a sentimental miss of twenty summers, who seemed to look on the world with a gentle sigh, relates the Kansas City Star. John Henry, who thought her some sweetest was almost crudely practical. One evening they were leisurely rambling along the country road when John Henry noticed that Maude Marie's thoughts seemed afar off.

"You look like sommabullem, Marie," remarked the young man. "Where are your thoughts?"

"I was thinking of the night, John, dear," tenderly replied the fair one. "Isn't it sublime? Isn't it glorious? Isn't it the most wonderful night you ever saw?"

"Yes," was the startling rejoinder of the practical John. "It is just the kind of a night to shoot cats."

YOUR OWN DRUGGIST WILL TELL YOU. Try Maude Marie's Remedy for Sore Throat, Croup, Hoarseness, Whooping Cough, and all the other ailments of the Throat. Write for Book on the Way to Mail Free. Maude Marie Remedy Co., Chicago.

Leper Asylum. The Kwangju asylum, Korea, has grown from an old tile-ken where the first leper patient was housed five years ago. She had been found on the roadside, almost dead, with worn and bleeding feet, and was taken into the warm tile-ken and fed and taught. Then followed a little wooden building of three rooms which the missionaries paid for from their own pockets. This has been displaced now by a suitable asylum, the gift of the Mission to Lepers. It will care for 100 patients. Doctor Wilson writes: "I am taking them out of the snow every day now, and we shall soon reach the 100 limit."

If you wish beautiful, clear, white clothes, use Red Cross Ball Blue. At all good grocers. Adv.

Unnerved Completely. "Beef eaters usually have steady nerves, do they not?"

"I've always thought so, until fear of a Zeppelin raid doused the lights of London."

If it were not for your memory you would be unable to forget—Omaha World-Herald.

It takes a capable wife to yank the conceit out of a man.

Love that feeds on beauty alone soon starves to death.

Weak Heart

Many people suffer from weak hearts. They may experience shortness of breath on exertion, pain over the heart, or dizzy feelings, oppressed breathing after meals or their eyes become blurred, the heart is not sufficiently strong to pump blood to the extremities, and they have cold hands and feet or poor appetite because of weakened circulation of the blood. A heart tonic and alterative should be taken which has no bad after-effects. Such is

Dr. Pierce's Golden Medical Discovery

which contains no dangerous narcotics or alcohol.

It helps the human system in the constant maintenance of rich red blood. It helps the stomach in eating and digesting, heartburns, and many uncomfortable symptoms, such as indigestion, flatulency, gas, and constipation. It is a powerful purifier of the blood, and a heart tonic and alterative should be taken which has no bad after-effects. Such is

Ancient and Modern Methods of Feed Grinding

The grinding of grain has been of vital importance to man and beast ever since humanity discovered its nutritious value. In ancient times grinding was more of a crushing process, done by hand with crude shaped stones. In Bible times women did most of the grinding. The Indians by their methods simplified this laborious work to a certain extent. Finally came the old-fashioned grist mill—then followed other improvements. As usual, great creations come when the world needs them most and the

LETZ GRINDER

is today recognized as mankind's greatest achievement in the perfection of a grinding mill. It is far superior to other similar machines that there's not the slightest opportunity for comparison. Call at our warehouses and let us show you this grinder. The price is right and no farmer can afford to be without one. We also sell you a good GASOLINE ENGINE to run the Grinder. Come and see us.

Best Cough Medicine for Children.

"Three years ago when I was living in Pittsburgh one of my children had a hard cold and coughed incessantly. Up on the advice of a druggist I purchased a bottle of Chamberlain's Cough Remedy and it benefited him at once. I find it the best cough medicine for children because it is pleasant to take. They do not object to taking it," writes Mrs. Lafayette Luck, Home City, Pa. This remedy contains no opium or other narcotic, and may be given to a child as confidently as to an adult. Sold by all dealers.—Advt.

Mrs. E. L. Riggs has had the barn which she recently purchased of Mrs. O. A. Frazer, moved this week to her lot on South Main street and will convert it into a dwelling house.

Mr. and Mrs. Gus Kaiser, Mr. and Mrs. William Kaiser, Mr. and Mrs. Fred Kaiser, Mr. and Mrs. Fred Rhead and Julius Kaiser were guests of Mr. and Mrs. Robert Pickle at Northville, last Sunday.

Williams Bros. are desirous of a large cucumber acreage in this vicinity next season. They also expect to secure a large tomato acreage again the coming year. There is also an indication that the coming year will see the Williams Bros. plant in this village considerably enlarged.

Piano Instruction

Miss Arbutus M. Wolfe of Detroit, will be in Plymouth on Wednesdays. Those wishing to study with her may call 236 on that day for information.

FOLEY KIDNEY PILLS

Note These Points
That Foley Kidney Pills are successful everywhere with all kidney and bladder troubles, backache, weak back, rheumatism, stiff and aching joints, because they are a true medicine, honestly made, that you cannot take into your system without having good results.
They make your kidneys strong and healthy active, they regulate the bladder. Tonic in action, quick in giving good results. Try them.

For Sale By J. W. Bichenstaff & Company

Fundamental Principles of Health

By ALBERT S. GRAY, M. D.

SIGNIFICANCE OF DECAYED TEETH.

A tooth is a calcified papilla of the mucous membrane. The first evidence of the development of the teeth is to be found in a thickening of the mouth epithelium (mucous membrane) at the site of the future gum and a resulting downward growth of its deeper portion into the substance of the primitive jaw. This epithelial downward growth is continued along the whole length of the gum and is known as the dental lamina or tooth band. The thickening of the epithelium, which is the first sign of the future teeth, begins about the sixth week of foetal life, and the entire dental lamina, or tooth band, is completed by the end of the seventh week.

The development of all the temporary and, with the exception of the eight back molars, also all of the permanent teeth, commences at an early period in intrauterine life.

We have thirty-two permanent teeth and the first of these to erupt are the four first molars, which appear during or soon after the sixth year. These first permanent teeth come out behind the second milk molars without displacing any of the temporary teeth. During the seventh year the central milk incisors fall out and their place is taken by permanent ones. These shed teeth are mere shells of the crown of the teeth, all the roots having been absorbed. The lateral incisors succeed their milk predecessors in about the eighth year; the first premolars succeed the first milk molars at about nine years; the second premolars will succeed the second milk molars at about the tenth year; the canines follow in the eleventh and the second permanent molars come in behind the first at about the twelfth year, and finally the third molars, or what are generally known as the wisdom teeth, the foundations of which we have noted were laid in about the fifth year of life, erupt somewhere between the eighteenth and twentieth years.

Tooth enamel is formed chiefly of calcium phosphate, with small amounts of calcium carbonate, magnesium phosphate and calcium fluoride. The dentine is of the same composition as the enamel, but contains in addition a good deal of organic matter. Worldwide investigations prove that there is a material difference in the average quality of the teeth of primitive and civilized peoples. United States senate document No. 419 states, for example, that "statistically the teeth of Americans are ten times as bad as those of the Igorrotes, while the civilized Filipinos have teeth as bad as those of the Americans," and, for the purpose of pointing out how bad American teeth really are we should repeat a quotation from United States bureau of education bulletin No. 24 that says: "Of our 20,000,000 children enrolled, over 10,000,000 (50 per cent, and in some schools as high as 88 per cent) have defective teeth, which are potentially, if not actually, detrimental to health."

It is definitely proved that the belief that certain foods nourish specific parts or organs of the body and that by the use of these foods it is possible to stimulate the growth or functioning of certain organs is false. There is no such thing as a brain food, or a muscle food, or a bone food. Fish, for instance, is commonly reputed to be a brain food; but it is no more a brain food than is beef, or beans, or cabbage, and when fish is eaten the toe nails and the finger nails, the hair and all other parts and tissues of the body share in the resulting nutritive matter in common with the brain, each part according to its particular needs. Plants and animals in general are made up out of various groupings of some sixteen or more elements, and so long as we eat these plants and animals in reasonable quantity and in their natural combinations we thrive. Our digestive organs are adapted to select from these molecular arrangements such elements as are required and in the amounts necessary to construct and maintain our bodies in normal health and to transform the energy associated therewith to our physical needs. But when in the course of the preparation of foodstuffs constituent elements are for some reason removed, or when for any reason it becomes impossible to secure a sufficient supply of food material and our

nutritive balance is thereby disturbed, then obviously the entire body must also share in and suffer from the lack of necessary material, no single part suffering more than another. Hence it is that decayed teeth in children under fifteen years of age is absolute proof that their entire physical economy is deficient.

Weak, quickly decaying teeth, shortened jawbones, contracted pelvic bones, anæmia and a long line of correlated ills have a common cause, easily removed if we would only awake to the truth and the need for action.

WHY TEETH DECAY.

Caries, or decay of the teeth, is the most prevalent disease known to man. Dr. Marshall asserts that in a practice both civil and military of more than forty years in which he examined many thousands of mouths he has met but four persons who, having reached adult life, were free from every form of dental or oral disease. Decay of the teeth seems to be pre-eminently a disease of higher civilization, as it is most common among those nations which are recognized as having the highest culture.

Tomes reports having examined the mouths of 3,368 English boys and girls at the Hanwell and Sutton schools and at the Exmouth training ship. These boys and girls ranged from three and one-half to seventeen years of age. Of all those examined 77 per cent were affected with decay of the teeth. "Two hundred and five children belonging to high class schools did not compare favorably with those less fortunately placed." Cunningham found that in 10,517 pupils of the age of twelve years in English and Scotch schools 85.8 per cent had dental decay.

"The statistics lately compiled of children six to fourteen and youths twenty to twenty-three years of age in Germany by the recommendation of Rose, are no less lamentable," says the same investigator.

We are in the midst of a strong movement for conservation; waste and loss are measured and carefully considered from every point of view and the gospel of efficiency is being preached in and to every line of business.

All this effort will be lost unless men and women as good and competent as those now being standardized are raised to succeed the present workers. Obviously this is not being done, because the available evidence appears to prove that the teeth of the present generation seem to be inferior to those of their immediate ancestors, while the children of today have, as a rule, even a greater predisposition to dental diseases than their parents.

Decay of the teeth is a symptom of body impoverishment, evidence of the lack of that element or elements in the body juices and tissues which enable the individual to resist the attack of micro-organisms, be they of tooth decay or other disease. The authorities are agreed that decay of the teeth is caused by an agent acting from without, never from within the tooth. "It is something extraneous to the teeth acting upon the surface in the beginning and penetrating little by little into its substance."

The medical profession has given careful attention to practically every organ of the body except the mouth. Here we have an open, moist and warm cavity approximately twenty-three square inches in area, not including the tongue and tonsils, making an ideal incubator. The investigations of Miller, Black, Robin, Goad, Vincent and others show that our mouths at various times and under varying conditions contain more than 100 different species of micro-organisms.

Tests show that these organisms will be found in the mouth of practically everybody. They are as numerous in the mouths of those who pass into old age without ever having had a decayed tooth, and they grow as abundantly in these healthy mouths as in the mouths of those whose teeth have the strongest tendency to decay. Tests also prove the saliva from these healthy mouths to be as acid as that from the mouths predisposed to disease, and cultures taken from them develop bacteria of the same character and virulence as cultures taken from the mouths of one whose teeth are most susceptible to decay. The difference between decay and soundness is one of personal resistance, assisted by cleanliness. This is proved by the fact that a sound set of teeth at twenty years or beyond will frequently disintegrate and decay during an attack of some fever or other enervating acute disease and that lactation frequently costs the mother one or more teeth if she is not very carefully watched and her vitality guarded.

The rapid increase in tooth decay simply means that nature is overtaxed and unable to balance accounts. She is unable to manufacture resistant tissues out of lifeless materials, and unless we intelligently co-operate we shall surely pay the penalty for our stupidity by rearing a race of weaklings for future citizenship.

Alarm Over Water Supply.

Adequate water supplies in the subject at present engaging the attention of a number of local authorities in Utah cities and towns. The amount of water in storage reservoirs is at present considerably below the amount at the same period last year, and there is a grave risk of the supply running short should there be a prolonged period of dry weather. Already the Utah water commissioners have warned the citizens to waste water as little as possible. In Duganona a limited supply of water is only allowed to the townspeople, and there have been complaints made to the urban council that this is not sufficient to enable the sewage to be properly cleaned. It has been wisely decided to allow the full water supply every Saturday, as the towns commissioners no doubt wish to avoid the risk of fever epidemics.

Good News for Mummies.

A physician in the possession of a cigar box with a thin humidifier along one side so that each cigar it contains will absorb the same amount of moisture.

He Feared the Coffin.

Moving-picture promoters in China are having troubles of their own in getting Chinese actors to take part in film plays. In the coast ports the moving picture shows are making headway, but in the interior of China there is still a vast untouched field, which the moving-picture men hope to tap by getting the Chinese educated to the idea of film shows.

An American producing company worked for two months recently with some Chinese actors at Hangkong on a Chinese story. The main difficulty was that the leading man strongly objected to being placed in a coffin, which was necessary in the development of the plot.

Finally the Chinese star consented to get into the coffin. He was amazed to find himself alive after his adventure, and thereupon proceeded to laugh in expression of his joy, where by he ruined the film in its most tragic part.

But then, those navies and vast spaces must be made use of, we say boys.

MADE PREY OF TIGERS

RAILROAD EMPLOYEES THE VICTIMS OF MAN-EATERS.

Elaborate Precautions Necessary in Nepal to Secure the Safety of Workers Who Dwell in Districts That Are Isolated.

When, for the first time, the long, straight, steel ribbon of rail penetrated the jungle of Nepal an independent kingdom situated at the foot of the Himalayas, the explosions of dynamite cartridges used by the engineers caused the total disappearance of the hordes of man-eating tigers which had hitherto rendered the district absolutely uninhabitable. During the first two years of the railroad construction not a single coolie of the 5,000 employed in the work fell a victim to tigers, and hunters were convinced that there was not a man-eater within a radius of 150 miles.

During the third year 15 workmen disappeared. The engineers surmised that they had been carried off at night by tigers, but were careful not to voice their suspicion, for fear of causing a panic among the coolies. The noise of the dynamite apparently no longer scared the man-eaters.

At last the line was opened, and during the first year everything went smoothly; the whistling of the locomotives filled the tigers with a wholesome fear!

In September, 1909, a train was derailed some miles from Bankpore because the pointman was not at his post. Attacked in the signal-box by a tiger, the unfortunate man had been carried off alive into the jungle, and the peasants heard the poor wretch's cries fade away in the distance. The whistling was no longer terrifying to the tigers.

During the following month four workmen were devoured on the line and five gatekeepers met the same fate. Then came the turn of a stationmaster. For two hours he and his family had to defend themselves against a tiger and his mate. The unfortunate Hindoo telegraphed for help, but it arrived too late—the ferocious beasts had succeeded in entering the house by an insecurely fastened window!

Finally the railroad company decided to rebuild the little isolated stations and to screen the doors and windows. For the signalman and gatekeepers, veritable fortresses in miniature were constructed. These refuges are of masonry; the door is large enough to admit a man, but narrow enough to impede a tiger's head. Inside is the telephone, in communication with the two nearest stations, and the rules insist that these shelters shall always contain a jar of fresh water. Thanks to these measures, the number of victims has considerably decreased during the last five years. But even now, all over India, numbers of railroad employees are caught on the line and killed by these terrible man-eaters.—Wide World Magazine.

Fissures in Steel Rails.

Concerning the prevalence of transverse fissures in steel rails, not referring at this time to those microscopic, of such dimensions as are menacing to the safety of railway travel, they are believed to be numerous. Forty-six transverse fissures of recent occurrence have been reported in 32 rails. Instances have been reported in which five transverse fissures have been found in the same rail within the limits of three feet. They are present in both open-hearth and Bessemer steels.

In their maximum state of development they have been witnessed in 200-pound rails, having attained a superficial area of 3.3 square inches, leaving practically only the web and the base intact. Our investigation shows without question that these hidden fissures in some rails reach such a state of development before discovery as to destroy nearly the entire head of the rail, therefore it is not reassuring that other rails of similar composition, working under similar conditions of service, are not free from these interior defects. The continuance of conditions which have resulted in derailments, attended with loss of life and injury to passengers and employes, places a great responsibility upon all who can in any manner aid in the inauguration of measures which will tend immediately to ameliorate these grave conditions.

Railroad Economy.

The yardmaster and yardmen are responsible for a lot of losses that were formerly overlooked. The cost of a freight car belonging to another railroad is from thirty to thirty-five cents a day when held unduly. Railroad economy as well as railroad efficiency demands that all cars shall be dispatched to their destination as quickly as possible, unloaded, and returned to their owners. The system of handling these foreign cars differs on the various roads. Some apparently have no system, or at best a very clumsy and involved one.

Years ago, through lack of system, many freight cars had the disagreeable habit of disappearing for long periods, and the different roads had to employ car tracers to hunt them up. Some roads, either intentionally or through lack of system, retained borrowed cars indefinitely, and then sent them back home by the longest route.—Sunday Magazine of the Chicago Herald.

Brain Food Needed.

"Fish are brain food," remarked one member of the angling party as they squatted in the rain.

"I need all the brain food I can get," growled the other. "I was an imbecile to come on this trip."—Pittsburgh Post.

Its Style.

"What sort of a costume would you recommend for taking a trip in a dirigible?"

"I'd have it of some airy material, with balloon sleeves."

FIRED ON RAILROAD GUARDS

Unusual Case, Interesting to Men of the Rails, Put Up to Jury for a Decision.

An unusual case of negligence against a railroad company was heard by the United States circuit court of appeals, Sixth circuit, in McCalman vs. Illinois Central Railroad Company. The action was brought for injuries to a railroad guard who was hurt during a strike as a result of collision with a posse of deputy marshals sent to a crossing where the guard was stationed, as the result of a telephone message that there was trouble at that point. The marshals mistook the guards for strikers and fired on them, and the court held that it was a question for the jury as to whether the company was negligent in failing to notify the marshals and guards of the presence of the other. The court said:

"We conclude, upon the whole, that the instant case should have been submitted to the jury under appropriate instructions, and consequently that it was error to grant the motion to direct. Any presumption that the defendants notified the guards at the road crossing was overcome by the clear tendency of the evidence. The telephonic message sent and received for the marshals fails to show any allusion to the railroad guards. The language of the deputy who opened the fire at the crossing was totally inconsistent with the idea that the marshals thought the men found there were railroad guards, and, moreover, it cannot be assumed that deputy marshals would have opened a murderous fire upon men they understood were there to aid them in suppressing trouble at the yards."

EASY TO PLACE TORPEDOES

Fork Enables Person on Rear End of Moving Train to Lay Them Without Slacking Speed.

The device shown in the sketch is known as the torpedo fork. It allows a person standing on the rear end of a train to place torpedoes on the rail while the train is in motion.

The tines are spaced wide enough apart and are so shaped that the rail head will pass up between them. The ends of the tines are flattened and

Fork for Holding the Spring of a Torpedo to Place It on a Rail Behind a Train.

bent, as shown, while the whole fork is fastened in a handle of suitable length.

In operation the torpedo spring is opened and slipped over the clips on the tines. The fork is then lowered over the rail. When the torpedo strikes the rail it is knocked off the clips, and the spring grasps the rail head.

These forks can be made single if desired, but the double fork is more convenient where it is required to set two torpedoes close together.—Popular Mechanics.

Locomotive Cab Signals.

At a meeting of the Institution of Mechanical Engineering, at Paris, recently, the subject of locomotive cab signals was discussed, and the opinion was expressed that such signals should always be of the audible kind, as these would not distract the attention of the engine man from the road in front, and the regular road signals. In support of this suggestion, the evidence of an engine driver at an accident inquiry was quoted as follows: "You must realize that when you are rushing along at sixty or seventy miles an hour you are seldom out of sight of signals, and in the daytime there are always men about the road; and but for the vigilance of drivers I think a number of men would be injured, such as linesmen and others, who are absorbed in their work. A touch on the whistle first announces your approach, and I do think that everything that can be done to liberate the driver from anything that takes his attention off the road when he is running should be done. The driver should always be able to devote his sole attention to looking out and to the manipulation of his regulators."—Scientific American.

Railroad Penelope Woman.

A woman who has been in the employ of the Pennsylvania railroad system longer than thirty years—Eileen Grady, a matron, of Chicago—has been placed in the road's "roll of honor," the pension list. She is one of fifty-three employes whom the road has retired.

Heading the list were Henry T. Rambo, a tank repairman, of Philadelphia, in the road's service for 50 years and 6 months, and Cornelius Kennedy, extra gang foreman, of Cleveland, employed for 50 years and 2 months.

Qualified.

"She is a perfect picture!"

"Humph!"

"Do you mean to say she is not?"

"I wouldn't go that far. She may be a perfect picture, but she has a punk frame."

Placing a Limit.

"Is a grand opera impresario supposed to know all about music?"

"Certainly not. He's so busy doing mental arithmetic and keeping books that he can't be expected to study music."

The Popular Redingote Dress

THERE are so many varieties in the development of the redingote dress that the idea prevails in gowns for all sorts of wear. Here is a clever new adaptation for the street that is a sort of compromise between the one-piece garment and a coat suit. It is an excellent design for between-seasons wear, without an outside coat, and, fortified with a heavy outer garment, it is all that is desirable for the coming winter.

It consists of a semifitting basque finished with scallopes at the bottom. The scallopes are bound with braid and the basque as long as the average coat in a coat suit. A box-plaited tunic is set into the basque, stitched by machine along the line of the scallopes. The tunic is finished with a plain hem less than two inches in width, and is very long. It is worn over a plain, straight-line underskirt of either the same material as the dress or of satin. This underskirt, which is short, is not much in evidence. It is narrow, and when made of the same goods as the tunic is often slashed in three or four places to admit of a free stride. When slashed in this way it has the effect of trousers worn under a long skirt, and we must concede that it looks attractive and would seem a startling innovation except that we are already accustomed to slashes in walking skirts.

Redingote models, like or similar to the one pictured here, are often worn over straight underskirts faced up with Roman-striped satin. In this case the collar and vestee and separate cuffs are made of the same satin. This makes a showier and dressier costume, and one may manage this dress by having two underskirts (one of the goods and one of the satin) and two sets of collar and vestee with separate cuffs. One of them is to be of white cotton or linen and the other of satin like that in the underskirt facing. In this way the same dress will furnish a costume for many occasions and a refreshing variety, at least.

With the oncoming of cold weather and the high military collars of outer garments, new vestee and collar combinations have been designed with closed throat and high turnover collars.

The sleeves in this particular gown are the plain coat-sleeve type finished with a soft, flaring cuff. When separate cuffs are to be adjusted an entirely plain sleeve is preferable.

Either of the hats pictured is appropriate with this gown, and it is a wise thing to own both a small and a large hat. But if only one is to be chosen let it be the larger one. For brims are widening and the large hat is more effective for occasions where one wishes to look somewhat "dressed up."

Oliver Twist Suit and Slip-Over Dress

FOR small boys, the Oliver Twist suits seem to suit the little ones and to appeal to the mothers who are always looking about for something new and practical for their restless youngsters. These are two-piece suits combining plain and striped materials or plain material in contrasting colors, in a blouse and pants. They are made up in several different models, the simplest of them consisting of a plain blouse like that shown in the picture, to which a pair of straight pants is buttoned.

The blouses are made of striped or plain material or of equally durable plain materials of other kinds. When the blouse is plain the pants often are made of a narrow stripe, or if the blouse is striped the pants are plain. Plain pants, with striped blouses having round collar and turnback cuffs of the plain material, make the best looking of the Oliver Twist suits. In the better grades of these suits the blouses are box plaited, made with round collars and turnback cuffs. The plaits make the waist a little more dressy and add to its strength. In the cheaper suits the blouse is cut without plaits and the sleeves finished with narrow bands of contrasting material like that in the collar. A small patch pocket on the blouse is finished with a narrow band at the top also. In all the suits the pants are straight.

These suits are made for very tiny boys; little fellows of two years only are put into them, much to their own delight. But they are worn by boys up to ten years, and are thoroughly practical. Clever designers have adapted the Oliver Twist suits to girls, substituting a skirt for pants. Very pretty ones are made with plaid skirts buttoned to plain blouses, the latter having cuffs and collars of the plaid material. These dresses are provided with patch pockets on each side of the skirt, and are made up in serge and other woollen goods for school wear, as well as in wash goods.

A little slip-over dress for a tiny girl is shown in the picture. It is of plain blue gingham with a straight narrow box plait down the middle of the front and back. It is decorated with short bands of white embroidery placed on the plait near the top and bottom and with small pearl buttons and simulated buttonholes.

The sleeves are long, with turn-back cuffs. The neck is plain and bound with a bias strip of the material. A small separate round collar is to be worn when the little dress needs to do other duty than to provide an easily laundered romping outfit for the little girl.

Both these garments are cut with reference to the fact that they must be washed and ironed often, and with that in view they are made easy to iron.

A New Gray.

Sphinx is the name given a new gray which may be likened to gunmetal, or even moleskin, as it has a luster which tones charmingly with the metallic trimmings with which it was designed to blend. In velvet and the softer material, it takes the lights and shades of real skin. A similar shade sometimes confused with sphinx is called catrole, as it is the exact shade of petrolatum, and like that said is dull and lusterless. However, sphinx as a smart shade is pre-

DEFENDS POPULAR

Speaker Says Newspaper Should Investigate Merits of Medicines Before Barring Advertisements.

That an organized attempt has been made to blacken the reputation of the popular family remedies of this country, and to mislead the newspaper publishers into rejecting the advertising of such medicines, was the charge made by Carl J. Balliett, of Buffalo, N. Y., at the convention of the Advertising Association at Detroit.

Mr. Balliett is a director of the Proprietary Association of America, which includes in its membership two hundred firms which make the popular prepared medicines of America.

Mr. Balliett pointed out that it is the duty of the newspaper publisher to refuse the advertising of any false or fraudulent medicine, just as it is his duty to refuse any fake or fraudulent advertising, but it is not right to shut down on all medical advertising because there have been some failures; any more than it would be right to refuse to publish all department store advertising, because certain stores have made a practice of lying about bargain sales.

Disease and death are mysteries. People who are perfectly well are skeptical. They laugh at the time-worn patent medicine joke, just as they laugh again and again over their many variations of the operation joke.

"The operation was a success but the patient died." This so-called humor has perhaps hurt the medicine business with well people, but when the hitherto healthy man feels a severe pain or illness, he immediately wants medicine, and will bless the cure whether it be at the hands of a regular doctor, a homoeopath, an osteopath, a Christian Scientist or patent medicine. There is nothing more deadly than disease; nothing more honorable than to cure it.

Mr. Balliett refuted the idea sought to be spread about that patent medicines are unpoplar by showing that from 1900 to 1912 the amount of prepared medicines consumed in America increased from \$100,000,000 to \$160,000,000 annually. He showed that, although the American Medical Association is trying as an organization to exterminate so-called patent medicines, the family doctor, individually, is not fighting them but prescribing them. He estimated that 40% of the prescriptions written by doctors today include proprietary medicines.

The writings of Dr. Harvey W. Wiley, he said, have also aimed to destroy confidence in proprietary medicines; but that Dr. Wiley's ideas are not infallible is shown by cases where his analyses were entirely wrong. Mr. Balliett mentioned a case where, with all the power of the Government, he fought a preparation as being dangerous to health, and was ingloriously walloped.

There has been spread the idea that a clever faker can mix a few useless ingredients and, by smart advertising, sell tons of it and win sudden wealth; whereas, as a matter of fact, the medicine business is notoriously difficult, and where there has been one success at it, there have been a hundred failures. Any medicine which has no merit cannot live, because persons who are duped into buying it once will not buy it again, and the profit from advertising a medicine can only come from repeat sales to the same satisfied people. Therefore, any medicine which has been on the market for a number of years, and is still advertised, must have merit behind it to account for its success.

In conclusion Mr. Balliett declared that no newspaper is doing justice to its readers in the matter of medical or other advertising, unless it investigates, not only the wording of the advertisement offered for publication, but the merits of the article advertised. He pointed out that the few newspapers who have been deluded into the policy of barring out medical advertising have adopted this general policy, rather than to form an investigation bureau of this kind which could, in a constructive and useful effort, investigate and decide what is a good product and what is a fraud, in not only the medicine business, but in every other business which advertises its wares to the public.

The audience seemed to agree with Mr. Balliett's ideas on the subject, and the chairman decided the question at issue in his favor.

He Does It.

"Pa, what does a censor do?"

"Oh, incenses everybody, my son."—Baltimore American.

Digestive Disorders Yield When

the right help is sought at the right time. Indigestion is a torment. Biliousness causes suffering. Eczema is likely to lead to urticaria and skin-itching sickness. The right help, the best corrective for these conditions of the stomach, liver, kidneys or bowels is now known to be

Beecham's Pills

and the right time to take this famous family remedy is at the first sign of coming troubles. Beecham's Pills have so immediate an effect for good, by cleansing the system and purifying the blood, that you will know after a few doses they

PLYMOUTH, MICH.

OLYMPIC GAMES IN FUTURE

Speculation as to Effects of War Upon Athletic Contests in European Countries.

The possible effect of the gigantic conflict in Europe on international sporting events for some years to come offers no more interesting speculation than the future of the Olympic games, says the Spur. Even though three emperors, as many kings and one president should cease before the snow flies to play millions of men like so many pawns, no treaty of peace will be strong enough to heal racial rancor at once. Berlin may yet be in a position to adhere to the 1916 games, but how about British, French, Russian and Belgian athletes caring to meet German and Austrian competitors there? In the same sense, if to a somewhat less degree, the objection would apply to the Stockholm of the neutral Swedes, which seems to be willing again to hold the games, providing the other nations are agreeable. Notwithstanding the geographical disadvantage to the majority of the contestants, one of the cities of the United States east of the Mississippi would be a better alternative than Stockholm.

ARMY USES THE "WIRELESS"

Telephone and Telegraph Discarded as Being Too Cumbersome for Employment in the Field.

In the German army at least it would appear that the days of field telegraphs have passed and the laborious and lengthy method of laying wires between distant points in order to establish communication is now obsolete. Only along established lines of communication will wires be laid for telegraphic and telephonic purposes; the field equipment consists almost in entirety of portable wireless telegraph outfits. In other countries portable equipments of this character have been cumbersome and far from easily handled. The German engineer has, however, worked hard in glove with the service man, and the Kaiser's forces are now equipped with a means of communication which is so light and portable that a motor-cyclist with a side-car could readily transport one of the smaller outfits some two hundred miles in a day. The short-range instruments will send and receive over an average distance of 25 miles.

Dependency Due to Indigestion.

It is not at all surprising that persons who have indigestion become discouraged and despondent. Here are a few words of hope and cheer for them by Mrs. Blanche Bowers, Indiana, Pa. "For years my digestion was so poor that I could only eat the lightest foods. I tried everything that I heard of to get relief, but not until about a year ago when I saw Chamberlain's Tablets advertised and got a bottle of them, did I find the right treatment. I soon began to improve, and since taking a few bottles of them my digestion is fine." For sale by all dealers.—Adv.

PIKE'S PEAK.

Mrs. George Eldred visited her niece, Mrs. Charles Wright, the forepart of this week.

Mrs. Wentlandt has been at Detroit having her thumb operated on.

Mrs. Chas. Wright and daughter Clara, were Plymouth callers Tuesday.

Mrs. Robert McKee is improving slowly.

Mrs. Cousins entertained Mrs. Howard Cousins and son of Detroit, last week.

Mr. and Mrs. J. F. Brown of Plymouth, called on friends at this place last Wednesday.

It is reported that Mr. Cushman has sold his farm to Detroit parties.

Herbert Smith was a Detroit visitor the latter part of last week.

NEWBURG

There was a very good attendance at the League Sunday evening. Our pastor gave a good talk on "City Missions." Mr. and Mrs. H. Kingsley sang a beautiful duet. Emerson Woods leads next Sunday evening. Everyone invited.

The G. A. R. and W. R. C. dinner at the hall Tuesday was well attended. Mr. and Mrs. L. Davey and Mrs. Peterson, also Mrs. Crane and son of Detroit, and a delegation of 18 ladies from Northville, 52 in all, partaking of dinner. The Northville ladies are noted for their beautiful flag drill and they contributed largely to the afternoon's entertainment by giving a part of their drill. Come again ladies. Mr. Showers very kindly brought his phonograph, which, by the way, is a very fine one. Mrs. C. R. Carson gave a fine violin solo. A good deal of fun was created by Miss Hattie Hoisington furnishing a cake and having a guessing contest on it. As there was no one lucky enough to guess the article in the cake it was sold to the highest bidder. A nice little sum was added to the treasury from the sale of guesses. And so ended a very pleasant occasion.

The Sunlight Arbor will give a box social at the hall Friday evening, Nov. 20th. Ladies requested to bring lunch in box for two. All invited.

We are glad to note that little Ellen Stevens is improving at this writing. Perry Woodruff holds his head high these days, as he is papa to a fine baby girl, born Saturday, Nov. 1. Mrs. Ina Pickett of Northville, is caring for Mrs. Woodruff.

Mrs. Sylvia Bassett has gone to Jackson to visit her son, Harry and wife.

Mrs. Mackender spent two days in Detroit last week with her daughter, Mrs. J. Norris.

Mrs. Wm. Farley spent two weeks visiting relatives and friends in Detroit, returning home Wednesday.

Mrs. Mark Joy spent last week Thursday at Dearborn with Rev. Geo. Davey and family.

Mrs. Hattie Ostrander returned to her home near Fenton Wednesday.

Mrs. C. E. Mitchell, who has been spending most of the summer on the farm here, is very sick in a Detroit hospital.

LIVONIA CENTER.

Mr. and Mrs. Carl Peck of Greenfield called on Frank Peck's people last Saturday.

Several old friends and relatives of this place helped Mrs. Minnie Cort celebrate her birthday last Sunday in the city.

Mr. and Mrs. Fred Lee visited friends in Toledo last Sunday.

Miss Eva Jepson visited Mrs. Harry Peck last Thursday night.

Mr. McCuller of Pontiac, is making great improvements at his farm here. He is also putting a new cellar and cement wall under the house.

Mrs. Frank Peck called on Mrs. Nina Smith Monday.

Mrs. Fred Lee and Mrs. Palmer Chilson called on Mrs. Chas. Wolf last Friday.

Little Carl Peck was on the sick list last Saturday.

Everyone is busy drawing tubers to the city just now.

Leona Garchow is on the sick list and unable to attend school.

IMPORTANT TERM IN FINANCE

Amortization Means the Providing for the Payment of Certain Sum Borrowed.

The financial world has its very own slang. Generally speaking, it is useful and exceedingly applied, which is not invariably the case with all slang.

Take the curious word amortization, for instance.

"Amortization" means simply the method of providing for the repayment of a loan. If you lend me \$10,000, which I promise to repay in ten years, you have a right to be interested in my plans for meeting the demand for the \$10,000 which you expect to make upon me ten years hence.

So I say to you:

"I am going to amortize that \$10,000 debt in this way: Out of my earnings every year I'm going to set aside \$900. Each year I will set the \$900 to work earning something too. At the end of ten years the fund will amount to just enough to discharge my debt."

You will find that specialists in bonds use the word a great deal. They know better than anybody else its importance. They realize that a borrower of money for a long term of years is very apt to forget to make provision for repayment.

Certain lenders of money on long terms insist upon the borrower's taking out a life insurance policy big enough to meet the debt in case of death before the debt becomes due. Generally the longer a debt has to run the more important becomes the question of "amortization."

PERRINSVILLE.

Mrs. Peter Kubik and daughter have been spending the past week in Detroit, visiting friends and relatives.

The dance and oyster supper held at the home of John Shotta was well attended and a good time had by all present.

Mr. and Mrs. H. E. Meldrum spent Sunday in Detroit.

Mrs. Effie Caughell will move to Detroit this week instead of to Newburg as was reported in this paper some time ago. Sorry to lose you Effie.

W. R. Parmelee was in Detroit Monday on business.

Wm. Herschleib went to Bellville and Wyandotte Monday, in the interests of the Gleaner organization.

Mrs. Robert McKee is no better at this writing.

The dance held at the home of Chas. Book Saturday evening was well attended and a good time had by all.

Roy and Wm. Badelt were Detroit visitors Sunday.

Mrs. Wm. McKinney and two daughters, Irene and Eva spent Saturday and Sunday with Wm. Schunk and wife.

Charles Beyer, wife and daughter spent Monday afternoon in Wayne.

Geo. Cooper has gone up north on his annual hunting trip.

Mr. and Mrs. Asa Shaw and children of Detroit, spent Friday at Wm. Schunk's.

Pikes Peak's not far away, but there are quite a few miles between Perrinsville and Detroit. How about it Emery?

Remarkable Cure of Croup.

"Last winter when my little boy had croup I got him a bottle of Chamberlain's Cough Remedy. I honestly believe it saved his life," writes Mrs. J. B. Cook, Indiana, Pa. "It cuts the phlegm and relieves his coughing spells. I am most grateful for what this remedy has done for him." For sale by all dealers.—Adv.

STARK.

Miss Emogene McLean of Toronto, is spending a while with Mrs. C. C. Chapman.

The old Starks place is sold to Detroit parties who intend to make great improvements on it.

Mrs. Hoisington has returned from Otter Lake where she has visited for three weeks.

John Higgins has gone to Plymouth to work in the shops.

Mr. Walker has come to spend the winter at Mr. Lardon's.

Will Sherman spent from Saturday until Tuesday at Rose Lawn, also attending the G. A. R. and W. R. C. banquet at Newburg, where all had a good time.

Mrs. Dick Fisher entertained twelve little girls at tea last Saturday in honor of her little daughter's birthday. Mrs. Coats, Mrs. Bell, Mrs. Lardon and Miss Hoisington were asked to assist in serving. The twelve sat down to a dainty tea after which they returned to their homes wishing their little friend many happy returns of the day, and declaring they had been nicely entertained.

Foley Cathartic Tablets.

Are wholesome, thoroughly cleansing and have a stimulating effect on the stomach, liver and bowels. Regulate you with no gripping and no unpleasant after-effects. Stout people find they give immense relief and comfort. Anti-Bilious. Sold by J. W. Blickenstaff & Co.—Adv.

EAST PLYMOUTH

Mr. and Mrs. Geo. Ash and two children from Plymouth have moved into Sidney Ashtops house.

Two men with a big auto truck came from Detroit to this neighborhood Monday to buy potatoes of the farmers, offering forty cents a bushel.

John M. Cool was called to Northville the first of the week on business.

Mr. and Mrs. Bert Wilme are entertaining her mother from Canada this week.

Mr. and Mrs. Julius Miller entertained company from Detroit over Sunday.

To Much Face

You feel as if you had one face too many when you have neuralgia, don't you? Save the face, you may need it, but get rid of the neuralgia, by applying RENNE'S PAIN-KILLING MAGIC OIL. Finest thing in the world for rheumatism, neuralgia, burns, cuts, cramp colic, diarrhoea, sore throat and pleurisy. Price 25 cts. per bottle. Sold by J. W. Blickenstaff & Co. and Beyer's Pharmacy.—Adv.

FRANK'S LAKE

The Arbor Farmers' club was pleasantly entertained Wednesday at the home of Mr. and Mrs. Wm. Tait.

Miss Margaret Smith spent Thursday night at the home of Master Ralph and Lloyd Lyke.

The annual chicken-pie dinner given by the Free church L. A. S. will be held at the home of Mr. and Mrs. Fredson Knaggs, Saturday, November 14. Everybody come and enjoy the feast.

Mr. and Mrs. Ed. Lyke attended the Ypsilanti Grange meeting held at the home of Ehnis Twist, Saturday.

Miss Anna Nanry is visiting friends in Ann Arbor.

The annual chicken-pie dinner given by the Dirboro L. A. S. will be held at the home of Mr. and Mrs. Ed. Lyke next Thursday, November 19th. Everybody welcome. The G. O. orchestra will furnish music during the dinner.

Mr. and Mrs. Fred Judson spent Sunday with John Braun at Webster.

WEST PLYMOUTH.

Chas. Tiffin and daughter Erna, went to Jackson Saturday to see Mr. Tiffin's brother, Adelbert, who was critically ill. Mr. Tiffin died Saturday night and Mr. Chas. Tiffin attended the funeral Tuesday.

Mrs. Don Packard and little Cecil were in Wayne Sunday to visit Mrs. Darfee.

Mrs. Dan Murray entertains the "Helping Hand" society at a dinner next Wednesday. The topic of the previous meeting, "The Care and Management of Children," will be continued as everyone was so much interested in its discussion.

Ralph Gibson and bride are visiting at the parental home.

Mr. and Mrs. Gus Gates will celebrate their fifth wedding anniversary Sunday and will entertain a large company of friends and relatives from Detroit.

Don Packard is making trips to Detroit, hauling apples with his new Alter motor car. Mr. Packard has a short tongue in his wagon and carries 40 bu. of apples each trip, getting home from market in time for dinner. Mr. Packard is a progressive farmer.

D. W. Packard's new bungalow is nearing completion and presents a fine appearance.

Mrs. Ellen Woodard and Mrs. Maud Andrews are making extensive repairs on their farm property.

Mrs. Albert Van Voorhis of Superior, visited Mrs. C. F. Smith, Tuesday.

Mr. and Mrs. D. Murray and Elizabeth visited Mr. and Mrs. F. King at Ypsilanti, Saturday and Sunday.

Miss Helen Smith attended the "Michigan—Pensacola" game at Ann Arbor, Saturday.

KING OSCAR REVERED

Sweden and Norway honor the memory of Monarch Who kept Country Free from Warfare.

On the Norwegian frontier the other day there was celebrated in the presence of 10,000 persons a Swedish-Norwegian monument to peace. Strange happenings when almost while bearing cannon were roaring, musketry volleying, men dying in agonies, nations wrestling in fratricidal hate. Yet not so strange after all, but in wonderfully striking contrast.

Only a few years ago Norway seceded from union with Sweden. King Oscar of the Bernadotte dynasty, a man of gentle soul, patron of religion and art and peace, sat on the throne. It was in his power to launch the army of Sweden against the Norsemen, numerically inferior. With a word of command he might have drrenched two countries in blood and tears. There were not wanting those who counseled the shedding of blood, the arbitrament of brute force, the rending of families, the wrecking of homes, the heaping of miseries on women and children. For these are the meanings of war.

But the gentle old man kept the peace. Norway became a separate kingdom in 1905. Haakon VII was elected ruler of Norway. In 1907 Oscar I died and Gustaf V became monarch of Sweden. No word of war or hate has divided the two countries. They separated on political lines. They parted in peace. They have kept the peace. And now they have erected a peace monument to commemorate the peaceful parting made possible by the heroism of Oscar I. For it took genuine heroism to face the division of his kingdoms, the humiliation of dethronement by half his subjects, and to resist the entreaties of men to whom force and bloodshed are standards of right.

The man who could thus keep the peace deserves to be held in grateful remembrance by the entire world.—Detroit Free Press.

Looking Backward.

Certainly we get sense as we grow older. Every man can remember when he wanted a revolver and a mandolin.

Women Suffer Terribly from Kidney Trouble.

Around on her feet all day no wonder a woman has backache, headache, stiff swollen joints, weakness, poor sleep and kidney trouble. Foley Kidney Pills give quick relief for these troubles. They strengthen the kidneys, take away the ache, pain and weakness. Make life worth living again. Try Foley Kidney Pills and see how much better you feel. Sold by J. W. Blickenstaff & Co.—Adv.

Most remarkable Watch offer ever made in this city

Join our South Bend Watch Club and buy on easy terms at the lowest cash price.

You have always wanted to own a high grade watch—a watch you could absolutely depend upon for accuracy—a watch that would be the envy of your friends—Here is your opportunity. Plans have just been completed that permit us to sell high grade South Bend watches on easy payments at the cash rock bottom price.

"South Bend" Watch

on \$1.00 a week terms

We propose to sell these watches in clubs. By combining the purchases of several people we can sell a number of watches at no greater cost than the cost to sell one watch.

That's why we call it our club plan. A watch will be delivered to each member upon his making the first payment.

The amount each member will pay in each week will be so small that it will never be noticed and at the end of a few weeks the watch is entirely paid for.

The South Bend Watch which we are offering on this club plan is a watch you will always be proud to carry.

It is guaranteed to give absolute satisfaction by both ourselves and the makers. You will surely like its trim shapely build.

Don't let this splendid chance slip by—this offer is made for a limited time only—come in this evening and let us give you more complete information on this money saving plan. This offer is open to both ladies and gentlemen.

Wear The Watch While You Pay.

C. G. DRAPER,

Jeweler and Optician
148 Main Street Phone 247

WHEN we say NEW, we mean not only are they fresh from the maker, but that the styles, the fabrics, the colorings—every detail—is in strict accordance with the latest decree of Fashion.

There are many little style features, which in the hands of the skilled designer produce charming and individual effects. Gladstone, Norman, and Murat collars; Directoire and Flare Cuffs. Girdles, Shirrings, Plaits, Yokes, Ruffles—afford unlimited opportunity for original expression.

We know that good style exists in both extreme and conservative models, and we have brought both here for you.

We want you to look at the new Fall garments—buy or not as you please—but come and look.

No less important than the style of the garment you select, is the character of the garment. In other words—who made it? If it bears the name REDFERN it has the makers' and our own assurance of highest quality in materials and workmanship.

Plymouth Cash Outfitter **E. L. RIGGS**
