**...The...  
New Edison**

This is the official Laboratory Model, which has been tested before half a million people in direct comparison with its Re-Creation of the voices of Marie Rappold, Anna Case, Margaret Matzenauer, Julia Heinrich, Christine Miller, Giovanni Zenatello, Jacques Chalmers and a dozen other great artists. The result is chronicled in more than four hundred of America's principal newspapers. The verdict was unanimous. This was the verdict:

"The NEW EDISON Re-Creates all forms of music with such literal exactness that the Re-Creation cannot be distinguished from the original, although original and Re-Creation are heard in direct comparison."

**...GRATITUDE...**

Did you ever think of the reason why the Psalms of David have come, like winged angels, down across all the realms and ages—why they made the keynote of grateful piety in every Christian's soul, wherever he lives? Why? Because they are so full of gratitude. "Oh that men would praise the Lord for His goodness and for His wonderful works to the children of men!"

—A. A. Willets.

There will be no morning or evening services in the Presbyterian Church Sunday, May 6th. THE SUNDAY-SCHOOL WILL BE HELD AT THE USUAL HOUR.

**Plymouth in Line With Other Villages**

In every city and village in Michigan preparations have been commenced or are under way to assist the state farm preparedness board in their efforts to have every available foot of producing land under cultivation this coming summer. In every locality the work of organization is being developed, that Michigan may do her share in producing food for consumption at home and abroad. In order to get the desired results complete organization must be the keynote of every community. Personal gain should be laid aside and every patriotic citizen should be willing to do his share in this most vital movement. The success of the Allies depends upon our ability to provide them with food.

In and around Plymouth there are many acres of unused land that can be secured for the growing of produce, when the proper organization to carry on the work has been perfected. At the present time a movement is under way here looking toward the organization of a club to take up the work, and a meeting will be called in a few days, when every citizen will be asked to take some part in this matter. This is not a work for a few to do, but everyone must do their bit.

Already a number of Plymouth citizens have secured land which they will plant to crops, and there is no doubt but what the work can and will be carried on by a larger body on a broader scale.

The Daisy Mfg. Co. have formed a club to assist in this work, which is a most commendable act on the part of the officers of the company and the employees. The company has issued a bulletin to its employees which we are glad to publish.

**Lecture on Trip Around the World**

A real treat for the people of Plymouth, Friday evening, May 11. Rev. A. L. Bell's Sunday-school class has arranged with Rev. R. M. Traver, pastor of the Baptist church of Pontiac, to give his interesting illustrated lecture on his trip around the world. Mr. Traver brings with him a number of young people who will render the following musical program: Two selections by the male quartet; two vocal solos; violin solo; trio—piano, violin, cello; duet—mandolin, guitar. This lecture has been enthusiastically received in the various cities of the state, and the people of Plymouth are heartily invited to attend. Do not forget the time and place, Plymouth Baptist church, Friday evening, May 11, beginning at 7:30 sharp. There will be no admission, but a silver offering will be taken to defray expenses.

**Recruiting Starts in Plymouth**

By authority of the Michigan War Preparedness Board, a committee has been appointed in Plymouth, composed of Representative Edward Gayde, L. B. Samsen and H. F. Allman, to secure recruits for the 33rd Michigan Infantry. Prospective recruits will be given information at any time at their respective places of business by members of the committee. A physical examination is guaranteed free of charge by the following patriotic Plymouth physicians: Dr. R. E. Cooper, Dr. A. E. Patterson, Dr. Luther Peck, Dr. J. H. Kimble, Dr. S. E. Campbell and Dr. W. H. Betts. Recruits who enlist in the 33rd Michigan Infantry are avoiding the operation of a draft. They are joining an experienced organization, which will see as much service as any regular army regiment. Promotion will come more rapidly in a regiment already formed than in the new draft yet to come.

The same committee is already forming a Home Guard Company to which men of any age are eligible. The first meeting will be held at the village hall, Friday evening, May 4, at 7:30 o'clock to which everyone interested is invited to attend.

**Egyptian Pyramids Subject of Lecture By Bay City Pastor**

A. P. Walker to Talk on Great World Wonder at the Village Hall

Is Object of Study by Bible Students; Address to be Illustrated

A. P. Walker of Bay City, will lecture on "Egypt and Its Marvelous Pyramids," Sunday, May 6th, at 8 o'clock at the village hall. The Great Pyramids of Egypt which sheds wonderful light upon scenic, offering corroborative witness to many facts now known to scientists, also is clearly pointing out to the minds of Christian people that it is a like witness to God's glorious plan of salvation as revealed in His word. When we stop to examine its construction, its massive stones, some estimated at 800 tons in weight and placed so one upon the another that by running a penknife over the surface one is unable to discover the breaks in them, and recognizing the fact that no machinery of our day could accomplish this skill-

**Annual Meeting of Baptist Church**

Last Thursday evening occurred the annual meeting of the First Baptist church of this place and a goodly number assembled to listen to the reports of the last year. The treasurers of the various branches of the church work gave very gratifying reports, showing that the church had closed a prosperous year. The church services have been well sustained and the members increasing in the Sunday-school. The prayer meetings are more largely attended than for years previous.

It will soon be four years since Rev. A. L. Bell was settled as pastor of this church, and both spiritual and material progress has been made under his leadership. In fact much of the improvement is the result of his own untiring endeavor. Evidences of this are noticed in the interior finishing of the basement in the way of cement floors all the way through, walks around the property, grading of the grounds, and the improvements around the parsonage, conspicuously the new porch, which has added much to the appearance, and enhances the value considerably. Most gratifying of all is the fact that the church is practically free from debt, and harmony and confidence abounds between pastor and people, and the outlook for this church has never been more hopeful.

**CHANGE IN CAR SERVICE RULES**

Effective May 1st on both state and interstate cars. After the usual 48 hours free time the charge will be \$2.00 per day for the first five days or part of a day, and \$5.00 per day thereafter until released. The old rate was \$1.00 for the first day, \$2.00 for the second day, \$3.00 for the third day and then \$5.00 per day.

**The Big Lot Auction Sale Tomorrow**

Tomorrow, Saturday, will be a sort of a gala day in Plymouth, the occasion being the time of the big auction sale of lots in the Puritan Holm addition, which lies just south of the Wm. Sutherland addition on the pavement on South Main street. The sale will no doubt attract a large number of people from surrounding towns. H. C. Robinson will have charge of the sale, and will be assisted by several other auctioneers. The Ypsilanti band will furnish music all the afternoon. The first 100 ladies on the grounds at the opening of the sale will be given a large granite dish pan free. Forty one dollar bills and one ten dollar bill will be given away. Don't miss the big sale.

**U.S.—Teutonic War News**

That at least a brigade of American troops will be on the fighting line in France by mid-June is the confident prediction being made at Washington.

The American oil tank steamer *Vacuum* has been sunk. The captain and part of the crew and the naval lieutenant and nine American gunners are missing. The *Vacuum* was sunk by a German submarine while it was on the way to the United States, says a statement issued at London.

All of America's enormous power-man, money and economic—must be thrown into the scales of war if the world is to be saved from Prussianism. And it must now be available. Members of the French and British war missions impressed this upon officials of this government at Washington with a persistency that can permit of no doubt of its truth.

The first American contingent to carry the flag overseas will be a mission of mercy. This was officially announced at the war department at Washington in the statement that a large group of Red Cross doctors and nurses would be sent immediately to Europe.

Henry Pabst, nephew of the Milwaukee brewer, was accepted by the recruiting office of the marine corps at Salt Lake City, Utah.

A two-pound bomb was hidden under the coat of Wolf Hirsch of Kiel, Germany, when he and a companion, George Myringer of Regensburg, Germany, were arrested in New York.

No message Theodore Roosevelt ever brought to Chicago stirred a more enthusiastic audience than that which closed the stocks' pavilion. "Put the flag on the firing line" and "repay the debt to France" were the gist of his patriotic sermon.

It was announced at Amsterdam that Berlin newspapers published a police notice stating that citizens of the United States, Cuba and Panama hereafter will be subjected to the ordinances governing enemy aliens.

"France, which has long recognized the valor of the American soldier, cherishes the confident hope that the flag of the United States will soon be unfurled on our firing line." Marshal Joffre, the hero of the Marne, made this statement to a group of newspaper men at Washington.

Leut. Bruce R. Ware, U. S. N., commander of the Mongolla's gun crew, declared at London his belief that the one who shot his men died April 19 at a German submarine did not sink the U-boat.

Reports that the German submarine blockade is becoming more and more efficient were given serious attention at the cabinet meeting at Washington and most of the discussion was directed toward supplying quickly as many ships as possible to carry supplies to the entente.

The president informed M. Rene Viviani, head of the French mission at Washington, that the United States would see the war through to a victorious end. The president also congratulated Marshal Joffre upon his shining military achievements and Vice Admiral Chocheprat upon the splendid work performed by the French navy. M. Viviani made an eloquent address setting forth France's appreciation of the usefulness of the United States in coming to the assistance of the French people.

The destruction without warning by submarine of the American schooner *Percy Birdall* of New York was reported to the state department at Washington.

**Domestic**

Despite the refusal of Mayor Thompson to extend an invitation to the French war mission to visit Chicago, the visit will be made upon a formal invitation by Senator J. Hamilton Lewis at Washington.

All the Choctaws who are eligible to serve in the army under the age limits in the army bill before congress are preparing to enlist. The old members of the tribe will work on the farms.

Charges were filed at Chicago with the department of justice against August Ledera, chairman of the city elected commission, because of alleged unpatriotic remarks made by Ledera in connection with the proposed visit to Chicago of General Joffre and other members of the French commission.

E. C. Smith, a stevedore of Terre Haute, Ind., his wife, his daughter, Elizabeth, eleven years old, and his wife-in-law, Mrs. N. E. Harris were killed when a Big Four passenger train struck an automobile in which they were riding near Indianapolis.

Plans for sending 1,000 American soldiers to Europe for service in the first army were announced by the state department at Washington. The soldiers will be sent to the front by the American Red Cross.

**Mexican Revolt**

Official advices to the state department at Washington said the Mexican government had warned Germans in Mexico that any concentration of Germans near the American border would be followed immediately by their arrest.

**Foreign**

The Cuban electoral college met at Havana to decide the election of president. The vote resulted as follows: Menocal, 87; Zayas, 44.

In an important speech at London Premier Lloyd-George said: "We must convert Ireland from a suspicious, surly, dangerous neighbor to a cheerful, loyal comrade. Settlement of the Irish question is essential for the peace of the world and essential to a speedy victory in the war."

A German Zeppelin of the latest type turned turtle in a heavy gale while on a trial trip in Germany and was completely destroyed, according to an Amsterdam dispatch to the Exchange Telegraph at London. Every member of the crew perished.

**Washington**

Administration food bills were introduced in congress at Washington—in the house by Chairman Lever of the agriculture committee and in the senate by Chairman Gore of the agriculture committee. They do not cover price fixing or control of the use of grains for distilling liquors. These subjects will be covered in a bill to be introduced later.

State aid in the federal trade commission's investigation of high food prices was taken up at Washington at a conference of representatives of state food boards with the commission.

By unanimous vote, the senate at Washington passed a resolution providing for transfer to the American government of title and possession of enemy ships in American ports and their use in commerce under direction of the shipping board.

Abdul Hak Husseln Bey, charge of the Turkish embassy at Washington, has appealed to the state department not to compel him to leave the country, giving as his reason the health of his wife. The government granted his request.

Following an hour's conference between President Wilson and Ethel Root at the White House in Washington it was admitted in official circles that the former secretary of state has accepted the chairmanship of the commission that soon will go to Russia.

Preliminary reports to the treasury department at Washington upon which Secretary McAdoo will base his recommendations to the president as to the size of the first bond issue under the \$7,000,000,000 war finance law, indicate that the United States will be called upon to finance the allies to the extent of at least \$400,000,000 and possibly \$500,000,000 a month.

General Petain, who won fame in his heroic defense of Verdun, has been named chief of staff at the ministry of war of France. The appointment is primarily a quick registration of French disappointment at the comparatively meager results secured by General Nivelle in his recent offensive.

In the first two months of unrestricted submarine warfare, shipping to the amount of more than 1,600,000 tons was sunk by the Germans. Dr. Karl Helfferich, German secretary of the interior, told the reichstag main committee, says a dispatch from Amsterdam.

The British troops captured a German trench system south of Oppy on a front of about a mile, after heavy fighting, says the official report to London from British headquarters in France. The Germans offered strong resistance and delivered several counter-attacks, but these failed.

Allied airmen bombarded Zebrugghe, the German naval base in Belgium, says a dispatch to Amsterdam. The aviators dropped many projectiles despite violent fire against them from German high-angle guns.

The German losses in men in the Alsace fighting are estimated at more than 200,000, with the probability that the total reached 285,000. These figures include killed, wounded and prisoners, and constitute one of the most formidable totals of the present war, says a Paris dispatch.

Twenty-one members of the crews of two French fishing boats, who took refuge in the village after their craft had been attacked by a submarine off Antwerp, were shot to the last man, according to a Nintan dispatch to Paris.

The London newspaper editorially criticized the admiralty for the losses to shipping last week. Knowledge of the losses was gained through the usual weekly statement issued by the admiralty. They demand that Sir Edward Carson resign.

**STATE EXPECTED TO RAISE 30,000 MEN**

ACCORDING TO PLANS OF WAR DEPARTMENT THIS WILL BE MICHIGAN'S SHARE.

**IS 3% OF NATIONAL FORCE**

Unless Men Volunteer Before Sept. 1 Approximately 25,000 Must Be Raised By Draft.

(From Our Special Correspondent.)

Michigan will be called on to supply 20,000 to 30,000 soldiers in addition to those already enlisted before Sept. 1, according to the present plan of the war department. This is indicated definitely by responsible officials.

The army bill as passed by both branches of congress provides for immediate creation of an army of approximately 1,200,000 men, as follows: Recruiting the regular army to war strength of 287,846 men and 11,942 officers.

Recruiting the national guard to war strength of 326,982 men and 10,866 officers.

An additional unit of 600,000 enlisted men and its recruited complement of officers, to be raised by selective draft.

Each state will be assigned a quota of the total of these forces, based on its population.

It is the intention to have in the field by Sept. 1 at least 1,000,000 men, and it is hoped to have the full quota of about 1,200,000 men.

Michigan's 3,700,000 population requires 4 to raise approximately 3 per cent of the national force, or 30,000 of an army of 1,000,000 and 36,000 of an army of 1,200,000.

But each state is credited with the number of men it now has in the national guard and the number who have enlisted in the regular army since the declaration of war against Germany.

As nearly as can be estimated, Michigan's total credit is now about 5,500 men. The state thus has 24,500 of a total quota of 1,000,000 men and 30,500 of an army of 1,200,000 men still to supply.

By enlisting approximately 14,000 more volunteers in the regular army and national guard, Michigan can avoid any application of the draft so far as its quota for these units is concerned. It may reduce somewhat its share of 15,000 of the first 500,000 men to be raised by selective draft, although it must furnish eventually the full draft quota in any case.

**Soldiers Need Sewing Kits.**

"Housewives' kits," neat little adjuncts to a soldier's outfit containing thread, needles, buttons, pins, etc., are needed by the members of the Michigan National Guard.

Any woman in the state, or any sewing society, wishing to do something patriotic, can get busy on the "housewives," according to the suggestions of the war board. Major Roy C. Vandercok, secretary, believes that the women of the state can do nothing better now than make the "housewives' kits."

"The Thirty-third is in the service now," says Major Vandercok, "and the chances are that the rest of the guard will be in before long. Then will come the recruiting up to full war strength, which will be a total of 7,500 men. The draft will ask Michigan for 15,000 more. That means 22,500 men who will want the kits. They are not hard to make and they will be appreciated. The war board will take all they can get. Send them in, the sooner the better, and we will distribute them."

**Railroad Men Aide War Board.**

The Michigan Railroad Association has "loaned" to the war preparedness board the services of its secretary, Charles E. Webb, and the latter will handle the transportation end of the preparedness work. At the outset he is endeavoring to find adequate means to distribute throughout the state all the seed and fertilizer that can be obtained. Later, when the added forces it is intended to marshal for farm work are ready, the work of placing them about the state also will come up to the transportation department.

Official spending already has been given by the war board to numerous companies of home guards that have been formed in Michigan towns. Home guard service does not obligate any one in it to federal service, but neither does it exempt them from it. It is hoped that the guard will be a nucleus from which regiments of soldiers for federal service will be organized in Michigan.

The war preparedness board decided to grant the petition of Olivet college for a military instructor.

An organized board of business men has been formed in Romeo, Macomb county, to promote food production and committee are being appointed to canvass farms within five or six miles of the village to determine just what is needed to increase crops. Carloads of seed potatoes and beans have already been ordered by the business men.

Representative G. E. McArthur of Easton, Rapids will speak at a big patriotic meeting to be held at Porterville Saturday, May 5.

Top United States secret service men arrested two Germans at Eastern on the charge of having taken the subway from the Chicago & N. W. railway when a large number of recruits left Detroit. The secret service men checked dangerous spies against the list. E. J. said. Twelve spies were removed from the track, but the damage was discovered before the train arrived.

**Michigan Happenings**

Marquette—Because his initials—W. A. R.—spelled "war" Wallace Arthur Rowell signed up and is now at Jefferson Barracks, Mo. Rowell is a former Beloit college football and baseball star.

Ypsilanti—Edwin Bremer, wireless operator of Detroit, is organizing a class at the Michigan State Normal college here for the purpose of training men of the institution for service in war.

Romulus—W. W. Wilsey, of Romulus, was one of seven Americans, including two Michigan men, who were killed during the first day of the battle at Vimy ridge in the European war. Wilsey's parents and one brother live here.

Mt. Clemens—Boys fishing in the Ciliton river brought the body of Amiel Brunel to the surface. Brunel disappeared from the home of his sister, Mrs. Van Veverlooy, Cass avenue, March 21, and it is supposed he fell off the Macomb street bridge, which is in the course of construction.

Houghton—Timothy O'Shea, the oldest miner in the employ of the Calumet & Hecla Mining Co., and whose 51 years of service beneath the surface of the earth since 1866 has made him the best-known miner in Cloverland, is dead after two weeks' illness developing from a cold contracted while going to church.

Adrian—A campaign to increase the Red Cross membership in Lenawee county is on.

Monroe—Work of grading the northern portion of the Dixie highway has commenced near Oldport, six miles north of here.

Cadillac—Ray E. Bostley, Westford county prosecuting attorney for three years, left the office in charge of an assistant and joined the United States cavalry as a private.

Cadillac—More than 100 high school boys will receive credit in school work for working on farms. High school students in Manton will be released one day a week to work on gardens.

Holland—Curly played a conspicious role at the home of Mr. and Mrs. William Kooyers, of Crisp, when their two daughters became brides and their son became a benedict in a triple marriage ceremony.

Monroe—Specifications for improvements of 40 miles of road under contract, for which supervisors had allowed \$1,000 mile, will be changed so that the county can get state awards which will allow \$3,400 or \$6,800 a mile. The Monroe-Toledo road is included.

Cadillac—Charles Gane, 30, and his nine-months-old daughter, Dortha, sustained fractured legs in the same hour. As the father was being brought into his home from a lumber yard, where he fell, the child slipped from her high chair to the floor, sustaining a fractured hip.

Ron Mountain—The body of an unidentified man with his throat cut, was found in the woods near Ralph, a few miles from here by Joe Shepard, who was engaged in taking up his traps. It is believed he committed suicide. The body was tattooed from head to foot.

Mason—Mr. and Mrs. C. A. Davis narrowly escaped death when the steering gear on their auto broke and ran them into the ditch. The machine turned over and pinned them beneath it. An M. U. R. car which was passing, stopped and the passengers helped rescue the motorists.

Kalamazoo—Michigan is rapidly awakening to the necessity of more and better roads. State Highway commissioner Frank F. Rogers told a meeting of the western district road officials, in session here. Mr. Rogers stated that last year Michigan raised approximately \$11,750,000 for highway purposes.

Grand Rapids—Mrs. W. P. Wolfe died in her husband's arms in an interurban car in Kalamazoo, just as she was ready to return to this city after visiting her daughter, Mrs. Thomas McLennan. She apparently was feeling well when she boarded the car, but was stricken with apoplexy a few minutes later.

Hastings—Farmers who were exasperated because their low lands had been flooded are blamed for the removal of the dam placed temporarily across the Little Torchapple river, at Carlton Center to raise the water high enough to permit the passage of the stream of a large dredge which was digging a ditch from the river to Bump lake. When the dam was built the dredging crew heard of the opposition a guard was stationed to watch it. Nothing more being heard of opposition the guard was relinquished and men with shovels began the work, which the swift current quickly completed.

Port Huron—J. B. Madill fell dead while driving his automobile.

Lansing—Courses in Red Cross work have been adopted in all the normal schools of the state, as the result of a resolution passed by the state board of education.

Lansing—Assurances have been received by the food preparedness committee that all Michigan railroads will facilitate and hurry as much as possible shipments of seed and fertilizer.

Muskegon—Marine men, especially those employed on tugs, are preparing to join the forces which will man submarine chasers being built in eastern shipyards.

Big Rapids—Cecil Bennett, of Emerald, was kicked in the chest by a snafu horse. He landed 12 feet away.

**U.S. READY TO SEND ARMY TO EUROPE**

GOVERNMENT, ON SUGGESTION OF ALLIES, CONSENTS TO SEND SMALL CONTINGENT.

**SENT FOR MORAL EFFECT**

Deemed Necessary to Convince Germany That American Resources Have Been Thrown Into Battle.

Washington—The United States stands ready to send an army to Europe whenever the Allies deem it wise to divert the ships from transporting food to transporting men. This was made known following the repassage by the senate of the draft measure.

The government has offered the Allies troops, but has suggested the alarming shortage of world shipping may make it impractical to send them immediately.

In spite of objections of the general staff to putting any American forces on the firing line before the war army has been raised and trained, the small contingent earnestly desired by France for moral effect shall be sent as soon as possible. The general belief here is the way soon will be found.

The amount of tonnage that would be required for transport is usually put at about 20 tons per man in a fully equipped force. For the regular American unit of 24,000 men, nearly half a million tons, therefore, would be necessary, or ships about equal to the seized German tonnage in American waters. It remains for the Allies to figure out if they can afford to divert that amount of shipping.

Little doubt exists that the French will gladly put up with any sacrifice necessary to have American troops in France, as the great plea of their mission has been for troops, with the American flag. They have pointed out that this is needed to convince the Germans beyond doubt that all America's resources have been thrown into the battle.

**SENATE REPASSES DRAFT**

Difference in Age Limit Makes Compromise Necessary.

Washington—The senate repassed the draft bill to clear up parliamentary tangles, without prolonged discussion and without serious effort to revive the struggle over the volunteer system as opposed to the selective draft feature, which consumed most of the time in last week's debate. Senator La Follette spoke in support of a substitute with a referendum by draft to the people on raising an army by draft to send to Europe, but it was defeated 68 to 4.

Principal points of difference between the senate and house include the so-called Roosevelt volunteer amendment in the senate bill; difference in the ages subject to selective draft, the senate bill specifying those between 21 and 27 and the house 21 and 40; and the senate bill's army prohibition section.

A compromise is expected on the age limit, possibly fixing the minimum at 21 and the maximum at 35.

**ALL U. S. WIRES CENSORED**

Government Takes Over Telegraph Lines As War Move.

Washington—An executive order signed by President Wilson providing for censorship of cables out of the United States and of telegraph and telephone lines into Mexico, together with regulations governing the same, were made public by the committee on public information.

The object of the censorship is to prevent sending of information which might be of value to the enemy. Arrangements have been made to put the executive order into effect immediately.

The order was signed by the president under authority vested in him by the constitution and by the congressional resolution declaring existence of a state of war.

Enforcement is delegated to the war and navy departments.

**LABOR STRIFE HITS GERMANY**

Strict Censorship Prevents Details From Reaching World.

London—"In the Rhine provinces of Germany more than half the munitions workers decided to strike" wires the correspondent at The Hague of the Exchange Telegraph company. "Eisen (home of the great Krupp works) was shut off from the rest of Germany and completely isolated from the world in order to prevent the slightest information about strikes at the Krupp works from leaking out. Strikes are general in small towns near the Dutch frontier."

Constantine—The Constantine Buying and Selling association, composed of 225 citizens, has purchased the elevator and coal yards of the Farmers' Elevator Co.

Grand Rapids—Milton Palmer, 34 of Middleville, was kicked in the face by a horse and died of his wounds.

Escanaba—The 16,000-acre upper peninsula, with a population of less than 400,000, have furnished 30 recruits to the United States army since the declaration of war was made. In addition to this it is estimated that 75 men have been enlisted in militia companies and engineering corps since the war was declared. The majority of the enlisted men have come from Gogebic, Iron, Marquette, Dickinson and Ontonagon counties.

**ARMY TO BE RAISED BY CONSCRIPTION**

HOUSE AND SENATE BY LARGE MAJORITIES PASS SELECTIVE DRAFT MEASURES.

**MANY AMENDMENTS ADOPTED**

All Men Between Prescribed Ages Regardless of Condition Will Be Forced to Register.

Washington—The American army in the war against Germany will be raised by conscription.

The fight in congress for the administration's selective draft measure was won after days of bitter debate when the house passed the bill by a vote of 397 to 24. The bill, in somewhat different form, was passed later by the senate, 81 to 8.

The house bill would draft single men between the ages of 21 and 40 years of age, with the president having authority to designate which shall be called to the colors first. The senate measure provides for conscripting single men between 21 and 27 years of age.

This difference in the provisions will make it necessary for the measure to be sent to a joint conference of house and senate members where the ages prescribed will be decided on finally.

**Soldiers Pay Raised \$15 a Month.**

Provisions were struck out and inserted in the bill in rapid action by the house. By unanimous vote, an amendment was included in the house bill to increase the pay of enlisted men and non-commissioned officers in the army and in the national guard by \$15 a month, making the pay of enlisted men \$30.50 a month. This would add about \$200,000,000 to the army and national guard payroll monthly, if an army of 1,000,000 men is raised.

**Volunteer Amendment Loses.**

In the senate the volunteer amendment by a vote of 69 to 18, and in the house it was 278 to 98, supporters of conscription marshalling a strength which surprised even administration leaders.

Senator Hardings' amendment designed to permit Colonel Roosevelt to raise four infantry divisions (80,000 men) for service in France, was adopted by the senate, 56 to 31. Many Democrats voted for it. A similar amendment was rejected by the house.

An amendment was adopted which not only exempts all ministers from the draft but also all students at theological seminaries.

Washington—The first 500,000 men for America's army to be raised under selective conscription will be called to the colors about Sept. 1 of this year, Secretary Baker announced.

The first national registration day will be about June 1. It will probably be denominated by presidential proclamation.

**All Liable to Service.**

Whatever the age limits fixed by congress there will be no discrimination between men within these limits, on the ground of age, Judge Advocate General Crowder of the war department has told inquiring members of congress.

It is the opinion of Gen. Crowder that if men between 21 and 40 are finally included in the draft, President Wilson must list all men between these ages and pick by lot from all those not otherwise exempted from service, regardless of age.

Under the plan, as the judge advocate general has outlined it, each voting precinct in the country will be assigned its quota based on proportion of its population to the whole population of the nation.

All men between the prescribed ages, regardless of condition, are required to register. Then all of these names will be put in a box and drawn by a board selected for the purpose.

**Possible Exemptions.**

Under rules laid down by the war department and in accordance with the provision of the army bill, making possible exemption of men physically unfit; those needed in manufacture and agriculture at home; those with dependents, etc., the board will decide the eligibility to service of each man as he is drawn. The board will continue to draw out names until it has found the full quota of men not subject to exemption.

The fact that a man is not accepted in the first drawing does not preclude the possibility of his being called on later. For example the first drawing may exclude all married men, whereas married men may be included in a later drawing.

Sault Ste. Marie—"Jimmy" Goldie, for 40 years the janitor in charge of the administration building at St. Mary's Falls canal, died at the Newberry State hospital. He was 34 years old.

Detroit—Isabelle Brown, 10 years old, fell from the side of a dirt wagon on which she had been standing a ride on Mt. Elliott road near the Eight Mile road, North Detroit, and was crushed by a rear wheel. She died three-quarters of an hour after being carried to a neighbor's house.

Owosso—"I have gone to enlist in the navy, because I feel that it is my duty. Don't worry." This note was found by Mrs. George Root, east of this city, soon after her son, Harold, 18, had disappeared.

Montague—Agents for the United States government, buying several carloads of horses for the cavalry, have caused such a demand that the price is rapidly ascending. Only the best horses for this purpose are purchased, and then only after an exhaustive examination of the animals offered.

**Notice to Subscribers**

Many papers throughout Michigan have raised the subscription price, because of the great advance in the cost of materials that go into the making of a newspaper. The Mail has not raised in price, and neither do we want to, if it is possible for us to stick to the old price. But, we have decided that it is absolutely necessary that we adopt the strictly pay in advance plan if we maintain the old subscription price. During the next few days notices will be sent out to every subscriber whose subscription has expired, and if the subscription is not paid by June 1, 1917, we will assume that you do not care for the paper longer, and it will be stopped. Many country papers who have not raised their subscription price have adopted this method, which is the way the large papers conduct their business, to maintain the \$1.00 per year subscription rate. We believe the new plan will be more satisfactory to our subscribers in the end.

**Many Improvements at Lake Orion**

Hundreds of carpenters, landscape gardeners and workmen are now busy making improvements at the Lake Orion Summer Resort. A new waterworks system is being installed, new bath houses erected and many amusement features constructed, making Lake Orion one of Michigan's greatest resorts. A great patriotic demonstration and fireworks display is the timely offering for the opening, Decoration Day. New amusement directors have been engaged and nothing will be left undone to introduce at Lake Orion all the pleasures of land and water.

There are now more than seven-hundred acres of water, clear as crystal, dotted with twenty-one islands; perfect bathing beach; good fishing, boating, dancing, orchestras, high-class entertainers and other amusements of a superior order to be introduced every afternoon and night.

**Co-operate with Committee**

G. W. Dickinson, manager of the Michigan State Fair, will make every effort possible to stimulate a greater crop production among its members and the farmers of the state generally. Earnest co-operation to this end will be given the committee recently appointed by Governor Sleeper to take charge of the state's campaign in this patriotic movement. The State Fair will award substantial cash prizes to the farmers growing the largest crops on a given acreage. Besides this, other plans are under consideration, which it is hoped will prove of assistance in bringing about a most gratifying response to the nation's call. The farmers of the state may be depended upon. They fully appreciate the situation, and with the co-operation that can and will be given them, they will see to it that Michigan will not be found lacking in what may be next to do, on the call for increased crop

Every Savage mileage maker gets full credit for good work because all work is "keyed" to the serial numbers on the tires. We know in every case just who is responsible for "Heap big mileage."

This plan creates a strong sense of personal responsibility and pride among our workmen, and there is keenest rivalry to see who can produce most mileage per tire.

You can help us to produce even greater mileage for you if you will send us full details of all Savages that run over 7000 miles.

Please be sure to give Serial Number, size of tire, date of purchase, name of dealer, and actual number of miles run.

**Ten Reo Models — One Reo Quality**

**REO ENGINEERING** is sound engineering. That is now recognized by buyers generally—conceded by other engineers.

**REO POLICY** is as stable, as sound, and as dependable as is Reo engineering.

**THE GOOD INTENT** which was the foundation of Reo policy, is still the guiding principle.

**REO FACTORY FACILITIES** have increased from year to year until now the total area is nearly forty acres—and the Reo factory has long been known in trade circles as "The model automobile plant."

**WE REO FOLK** make more parts of Reo cars and motor trucks than any other concern in the industry. We believe that statement is 100 per cent true.

**IN THE REO LABORATORIES** we determine what materials shall constitute every part; here the formulas are worked out—here the tests made to ensure that every pound comes up to the Reo specifications.

**THEN WE PUT** "Just a little bit more for safety's sake" in every part.

**"50 PER CENT OVERSIZE"** in every vital part is not a mere catch phrase—compare and you'll find it is a statement of fact.

**50% EXTRA STRENGTH** is the aim—and we achieve that by using the best of materials and more of them.

**NOTHING** is left to chance. The Reo guarantee is based not on a guess but on the certainty that the quality is there—determined by the most rigid and painstaking tests.

**WE HAVE NEVER BEEN** ambitious to make all the automobiles—only the best.

**MAKING FEWER WE CAN** be more certain of making them better—provided of course, we make enough to enable us to avail ourselves of modern automatic machine tools and the most efficient methods.

**THE REO VOLUME** long since passed that point.

**OUR CHIEF CONCERN** now is to see that it does not pass the point where quality gives way to mere quantity considerations—that point where personal supervision gives way to a "system."

**BECAUSE OF THAT POLICY** there is at this moment, and always has been, an over-demand for Reos of all models.

**THAT IS WHY** the Reo line is so prized—so coveted—by dealers.

**TEN MODELS**, comprising the most complete range of touring cars, roadsters, enclosed cars (fours and sixes) and motor trucks; and every model the embodiment of Reo quality and Reo care in the making.

**IT PAYS** to handle such a line—it costs less to keep Reo owners happy than it does with any other line, bar none.

## W. C. T. U.

The W. C. T. U. held a very inter-  
esting meeting at the home of Mrs.  
Ammon Brown, Thursday evening,  
April 26th, with a good attendance.  
This being the first one after the an-  
nual meeting, the superintendents of  
the different divisions were appointed  
by the president, Miss Cora Pelham:  
Health and Heredity—Mrs. Charles  
Riggs

Scientific Temperance Instruction—  
Mrs. Chas. Draper  
Medical Temperance—Mrs. Floyd  
Hillman

Sunday-school Work—Mrs. Arthur  
White.  
Anti-Narcotics—Mrs. Chas. Curtis

Purity and Mothers' Meetings—Mrs.  
Wyman Bartlett  
Legislation and Petition—Mrs. Har-  
mon Kingsley.

Franchise—Miss Ada Safford  
Press—Mrs. W. B. Greenleaf  
Flowers—Mrs. Rose Tiltonson.

Mrs. W. B. Greenleaf was chosen as  
delegate to the state convention at  
Kalamazoo the last of May, with Mrs.  
S. E. Campbell as alternate.

After the usual business was transac-  
ted, the Belgian Relief fund and the  
Red Cross membership were put before  
the ladies present. It resulted in a  
subscription being given to the former  
and many members to the latter.

The afternoon was then given into  
the hands of the leaders for the day,  
Mrs. Chas. Reeds and Mrs. Floyd Hill-  
man. The program was certainly an  
interesting one. The subjects of the  
papers read were: "Should the Social  
System be Adjusted to the Child or  
Vice Versa?" "The Mother and the  
Public School;" "The School House as  
a Social Center." There was good ad-  
vice given to parent, child and teacher,  
in everyone of them, and it is to be re-  
gretted that many more did not hear  
them.

The next meeting, to be held at the  
home of the Misses Pelham, will be a  
break all past records, and it can be  
done if every member will come and  
bring a friend, or every friend come  
and bring a member, or all friends  
just come without a member. Let us  
honor our president by breaking all  
records at her home. Bring cup, spoon  
and fork.

There are still some dues unpaid, and  
it would be greatly appreciated if all  
who can would pay them at this time.

Beef the "Scrubs"  
and "Boarders"

With this slogan Hatch Herd will  
present to the public a choice array  
of pure bred Holstein-Friesian cattle  
in a sale on May 9th, as will be seen  
by the advertisement elsewhere in this  
issue.

William B. Hatch, proprietor, re-  
ports that the prospect for a large  
attendance is good and that F. G.  
Johnston of Columbus, Ohio, the pe-  
digree expert, will act as sales manager.

He says further that a former  
prominent breeder of Shorthorns now  
in search of foundation stock Hol-  
stein-Friesians looked at the offerings  
last week and said: "I would like to  
buy every female you are offering at  
private sale. But no one has been  
permitted to buy an animal at private  
sale since our last annual auction.  
Every buyer will have a chance at  
every animal offered this year in the  
sale ring next Wednesday. advt.

Coughing increases toward nightfall.

## RESOLUTIONS

To Mrs. William Smitherman and  
family, from Tonquish Lodge No.  
32, I. O. F.

As it has pleased God in His wis-  
dom to remove from our midst our  
worthy brother and friend William  
Smitherman, be it

Resolved, That we, as a lodge of  
Odd Fellows, tender our heartfelt  
sympathy to the bereaved family in  
this their hour of affliction. We feel  
that in the loss of our brother we  
have lost a friend, indeed. He was  
an active, hardworking member of our  
order, filling the important positions  
to which he was selected with fidelity  
and satisfaction to the brotherhood.

His devotion to Odd Fellowship was  
attested by an exhibition of zeal  
commencing with the date of his  
initiation and continuing unabated  
until his death. His record is that  
of a devoted Odd Fellow, a firm  
friend and an ardent advocate of  
the principles of Friendship, Love  
and Truth. In his death the order  
has lost one of its most honored and  
worthy members and his memory  
will live long in the hearts of his  
brethren.

An honored one from us has gone,  
A voice we loved is stilled,  
A place is vacant in our lodge,  
Which cannot well be filled.

Be it also further  
Resolved, That a copy of these  
resolutions be placed on the records  
of our lodge and one be sent to the  
family and also published in the  
Plymouth Mail.

Signed in behalf of the Lodge,  
Geo. Knapp,  
Geo. E. Humphries,  
Fred Hetsler,  
Committee

## Every Dollar Expended For Lumber Is Well Invested

The buildings you construct with the lumber you buy, mean not only  
economy in the conservation of crops, machinery and stock, but add to  
equipment and value of the farm.

Lumber purchased for repairs, is an especially wise purchase, as its use  
prevents the buildings from deteriorating in value and usefulness.

University of Michigan officials estimate that by the end of the school year 400 students would have left school to go to war. The nearness of conscription is what has hurried the students into the ranks. Monday more than 200 boys applied to the military bureau for application blanks with which to enter the officers training camp at Fort Sheridan. Only forty-eight had been supplied by the war department.

A thrilling mystery story about a man who lost his courage and the girl who helped him to find it again

By MARY ROBERTS RINEHART

The Mutual Friend By Katherine Howe

influenced by the little legacy, and she must have some proof of his real devotion. It was so easy to make protestations.

NOTICE TO SICK WOMEN Positive Proof That Lydia E. Pinkham's Vegetable Compound Relieves Suffering.

SIDNEY IS WARNED ABOUT DR. MAX WILSON AND "K" RECEIVES AN APPEAL TO HELP HER

A mysterious stranger, K. LeMoine, takes a room at the Page house, presided over by Sidney, her mother, Anna, and her aunt, Harriet, a fashionable dressmaker. Through the influence of Dr. Max Wilson, a brilliant young surgeon...

CHAPTER XVI—Continued.

"That would be foolish, wouldn't it when you have done so well? And besides, since you are not guilty, Sidney..."

The next instant the door had closed behind her, and K. was left alone to sulk in her room and brood as the evening brought him.

She was sorry the next moment. But her words seemed, surprisingly enough, to steady him. For the first time, he sat down.

CHAPTER XVII. Winter relaxed its clutch slowly that year. March was bitterly cold; even April found the roads still frozen and the hedgerows clustered with ice.

She checked herself abruptly and sat down. After a moment: "Has it ever occurred to you how terribly mixed up things are? Take this Street, for instance. Can you think of anybody who it that—that things have gone entirely right with?"

He tried to leave the conversation with a little fan. "If you're going to ask me to interfere between Mrs. McKee and the deaf-and-dumb book and insurance agent, I shall do nothing of the sort."

"Bert Fleming never would have looked at Grace Perry if she hadn't some money." "Well, he's rushing around there pretty steadily. They go everywhere together."

A Girl Had Come Up Behind Them.

"There!" he broke in. "You're getting morbid! That cat of a woman has got you waxy. Cut it out!"

"Well, he's rushing around there pretty steadily. They go everywhere together." "I don't know what he can see in her. Oh, I suppose it's the money! And she hasn't got it yet, either. It's a year now since it was left to her, and that will not settled yet."

Such testimony should be accepted by all women as convincing evidence of the excellence of Lydia E. Pinkham's Vegetable Compound as a remedy for the distressing ills of women such as displacement, inflammation, ulceration, backache, painful periods, nervousness and kindred ailments.

### Kidney & Co.

(BY DR. J. H. WATSON)

The kidneys and the skin work in harmony. They're companions, the skin being the second partner. If we are anxious to keep well and preserve the vitality of the kidneys and, also, free the blood from noxious elements, we must pay special attention to a good action of the skin and to see that the kidneys are flushed so as to eliminate the poisons from the blood. Sweating, by hard work or in a bath, at least once a week, helps to keep the skin and kidneys in good condition. Wash the kidneys by drinking plenty of pure water with meals and between meals. Occasionally obtain at the drug store Anurie, double strength, which will help flush the kidneys and the intestines. You will find that Anurie is many times more active than lithia and that it dissolves uric acid as hot water does sugar.

# HOW UNCLE SAM TRAINS MEN FOR THE AVIATION CORPS

### Army Schools Are Speeding Up Work to Supply Fliers for New Army.

### SCHOOLING MOST THOROUGH

Pick of the Land Intellectually and Physically is the Raw Material of the Field—First Taught Mechanics and Work Gradually Up to Difficult Feats in Flying.

New York.—Uncle Sam's new army must have the best aviators in the world. This is the order that has come from Washington, and the army schools throughout the country are striving to carry it out.

There are many obstacles and discouragements, but scout planes are almost non-existent this side of the Atlantic, but the standard already reached means vast advance.

A trip out to the big government flying school on Hempstead Plains, near Mineola, L. I., shows a scene of bustling activity, a beehive of industry, which has speeded up even over its former strenuous pace in the last few days.

At the entrance to the field a stalwart private, an automatic on his hip, challenges the visitor and scrutinizes closely the papers shown. A step through the gate discloses inside the fence a scene to rejoice the heart of the small boy—a vast expanse, on which great mechanical falcons purr and skip; now rising into the clouds and now descending swiftly and gracefully to the level turf.

Framing the picture are rows of airplane sheds, or hangars, barracks, machine shops, offices and other rough buildings which have mostly been knocked into shape in the last few weeks.

Scores of students and mechanics hustle around and over the winged monsters, oiling, plying the wrench, making tests and seeking the slightest flaw, for every flying machine must always be in the top notch of condition.

### Pick of the Land There.

War will probably soon change the conditions here in many ways—indeed, some differences are already noticeable from peace days. But most of the students are still paying their way—and not a small price either. After passing his flying test a student must turn over a \$500 tuition fee and \$300 more is due on final examination. The student must weigh not more than 100 pounds stripped and "must furnish evidence of having a college education and be of good moral character."

The pick of the land intellectually and physically is the raw material of the field. Out of such promising novices Uncle Sam makes finished fliers in three months—and now even this brief training period may be cut down.

The captain in command of the

### THE FLAG

By KENNETH MAC DOUGAL.

The die is cast, the time has come. The eagle screams once more, The Stars and Stripes again shall wave Upon a foreign shore.

Behind the flag of freedom, Sweep on our fighting men, To crush the Prussian eagle, The peace dove bring again.

Regiment, brigade, division And corps pass armably by: Pressing to crush oppression, That the flag of right may fly.

Men who were known as hyphen, Russian, Frenchmen, lads from Spain, Germans, Austrians, Italians, Are Americans again.

To the flag, then! To the president! A toast: We're in the right! Forward, march! We'll show the Prussian That we're not too proud to fight.

field explains the course of instruction:

"After the student has passed his preliminary physical examination and has had the mechanism of the machine drilled into him, we turn him over to an instructor, who takes him on a joy ride as a passenger. He goes up about 3,000 feet the first time. When he becomes, during successive flights, accustomed to the

Where Aviation is Taught.

swift rush of the air aloft, so disconcerting to the novice, he is permitted to handle the controls himself, but the instructor is there to correct any errors very promptly.

In turn he is passed from one to another of the instructors until four have had him, and then they make four separate reports on him. After that we begin his training in real earnest, as we have learned then whether he is cut out to be an aviator.

### Training is Thorough.

"We have found that a student cannot assimilate more than half an hour's lesson aloft in a day; that is, he does not profit by a longer lesson. So when he comes down he is put to work at the mechanics of the job, dismantling and assembling his en-

gine, detecting trouble, making such repairs as he might be called on to make if he had to descend for cause during a flight. We give him textbooks on motors, too, and something about aero-dynamics, and teach him how to observe the earth as it flies under him.

When the young aviator is competent to handle his machine he is introduced into more complicated work, scouting and maneuvering.

For instance, on a recent day a motorcar was sent on a devious ten-mile journey over little frequented Long Island roads. Its top was broadly striped in black and white, but otherwise it could not be told from the tens of thousands of other cars which are constantly on the move over the island.

"Twenty-four army airplanes went up to seek the car. Twenty-one left here and three came from the government school at Governors Island, New York city.

"The car with the striped top represented the head of an enemy convoy. The aviators were to detect the head of the supposed column while the latter was still far from its objective, the aviation field, for there must be time to make the imaginary artillery attack upon it effective.

### Problems Easily Solved.

For the problem the map of Long Island near the flying field was divided into 24 sectors, one being given to each scout. The lucky man who found the car whirled back to the field

in short order and Mineola was "saved."

In another problem three Fast L. W. F. tractors were sent to a far distant point, which was not disclosed to the students, and there sent up as scouts of an enemy band upon taking photographs of the Mineola field. The students were to locate these machines and drive them back by heading them off. They did this with ease.

Not all the feats attempted work out well, because real swift machines are lacking. The slower machines do not stand up so well in a gale, although otherwise easier to manage. It is understood the fastest machines now at the field are the L. W. F. tractors, capable of 95 miles an hour. British and French scouts make 135 and 138 miles an hour. The new Moraine-Saulnier, according to Miss Ruth Law, the flying woman, makes 150 miles an hour. Airplanes much slower are useless on the western European battle front.

Students start learning to fly at Mineola on the poky J. N. 4 Curtiss biplanes, which go at the snail's pace of 75 miles an hour.

However, it is taken for granted that the deficiency in fast machines will soon be remedied. All the art of airplane building the French and British have learned in nearly three years of warfare will be placed at the disposal of the new ally. Commissions of Anglo-French flying men and huddlers will assist the United States army in manufacturing and teach the latest tricks of the trade to our aviators.

### What They Must Do.

The Mineola school is officially an aviation section of the signal officers reserve corps. Civilian volunteers enter as sergeants and become lieutenants in the reserve on passing their examinations. These "exams" are not to be sniffed at. Here are some of the things the young collegian must do:

He must climb out of a field 2,000 feet square and attain an altitude of 500 feet while keeping all parts of his machine within the square; he must cut off his motor at a height of 1,000 feet and land within 200 feet of a designated point; he must land over an assumed obstacle ten feet high and come to rest within 1,500 feet of it; he must fly for 45 minutes at an altitude of 4,000 feet.

"The psychology of this flying business so far as the students are concerned," says the commandant of the field, "is a singular thing. In considering it you must put fear out of the reckoning. The students are never frightened. The fact of the matter is that they go into it thinking that it's a daredevil job. Then they go up and they're disappointed—it isn't the daredevilery they thought at all. So what do they do? They tend to go to the other extreme right away and we have to keep them from killing themselves with sheer recklessness. We have to teach them with every ounce of ability we possess that if they make the one slip they've been determined to make it will be the very last slip they'll ever make."

### Bible Stops a Bullet.

Follansbee, W. Va.—Rev. Arthur C. Palmer, Free Methodist minister here, owes his life to his Bible. This developed when he turned over to the police several threatening communications pertaining to "get him out" if he does not leave his efforts to reform the city. Rev. Mr. Palmer was shot from ambush as a result of these threats, the bullet lodging in his chest, which he carried under his arm.

## FOOD SHORTAGE MENACES THE ALLIES

### Great Britain Asks Them and Also Her Own People to Eat Less.

London.—England has issued a call to all the allied peoples, not only her own, to help obviate a food shortage. The call solemnly warns them that famine conditions may exist throughout the world before the next harvest is reaped.

Since Lloyd George declared "Our stocks of food are low, alarmingly lower than within recollection," scores of public leaders have repeatedly warned the people to place themselves on voluntary rations.

The public absolutely refuses to recognize the government's position, and such conditions have resulted evidently in the issuance of the appeal, apparently from an official source, which outlines clearly the world's deficiency in wheat and other agricultural products, while the war is disorganizing the supplies of food staples to nearly every civilized country.

So serious is the food situation that England has completely cast off the cloak of secrecy. At the beginning of the war Germany deliberately required the slaughter of a large proportion of the live stock in order to save food, and now finds out her mistake. Conversely England at the outset insisted that live stock be conserved—neither exported nor slaughtered needlessly. Now England, possessing a big stock of animals, orders that they be slaughtered in order to provide food and save feeding them.

### Food Supply Diminishes.

Commenting, the Evening News says that Lloyd George issued his warning seven weeks ago. Since then the consuming island, which imports four-fifths of its ample cereal supply, makes an important bite in the store. Meanwhile the submarines are sinking ships and cutting down the rate of re-shipment.

### 7,000 IN CELLARS TWO YEARS

All the cellars in the town. M. Reunman says, have been armored with cement by the Germans, so that they constitute so many little fortresses. The entire civilian population is obliged to work at road mending and railroad building.

The coal mines of Lens, which are among the most important of the region of the Pas de Calais and produced 20,000,000 tons a year before the war, have been idle since the invasion and have suffered immense damage.

### Paris—Between 7,000 and 8,000 of the inhabitants of Lens, which is in the occupied territory of France, have remained there and lived in their cellars for more than two years, says Edie Reunman, manager of the coal mines there, who has just arrived in Paris. The former population of Lens was 40,000.

### With the Fingers! Says Corns Lift Out Without Any Pain

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of frezone, says a Cincinnati authority.

At little cost one can get a small bottle of frezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound, and dries the moment it is applied and does not inflame or even irritate the surrounding skin. Just think! You can lift off your corns and calluses now without a bit of pain or soreness. If your druggist hasn't frezone he can easily get a small bottle for you from his wholesale drug house.—Adv.

Proper Food for Weak Stomachs. The proper food for one man may be all wrong for another. Everyone should adopt a diet suited to his age and occupation. Those who have weak stomachs need to be especially careful and should eat slowly and masticate their food thoroughly. It is also important that they keep their bowels regular. When they become constipated or when they feel dull and stupid after eating, they should take Chamberlain's Tablets to strengthen the stomach and move the bowels. They are easy to take and pleasant in effect.—Adv.

# Special Machinery and Scientific Methods Make Greater Motor Car Values Possible

On a visit to the Willys-Overland factory in Toledo you would quickly see how "quantity production" makes "quality" production certain. Countless automatic lathes, presses, forging hammers, etc., operated under highly specialized methods, enable this factory to turn out more high class cars in one day than could be built in a year ten years ago. You would see one machine bore 81 holes in an aluminum crank case in one operation with unvarying accuracy. —a large lathe performs 20 different operations on a fly-wheel in less than 15 minutes; the tool for each operation being set so that the workmen can make no mistake. —a huge press stamps two side rails from cold steel under 1000 tons pressure in three seconds. Such a trip would enable you to fully understand why "size" constitutes an opportunity for the Willys-Overland Company to establish new values in high-class motor cars. Each car in the comprehensive Willys-Overland line is, we believe, the dominant value among cars in its price class.
