SCHEDULE FOR THE WEEK:-

SUNDAY, OCTOBER 7. Rally Day.

Thursday afternoon each one of Thursday afternoon each one of the men was presented with a Gillett military safety razor set, the gift of each township in the district. The Plymouth boys were also presented with comfort hags filled with useful and necessary articles, from a fund subscribed by citizens. These bags, twenty-four in number were made by the following ladies: Mrs. George Hunter, Mrs. B. J. Havershaw, Mrs. Charles following ladies: Mrs. George Hunter, Mrs. Mrs. Charles of Mrs. William Rattenbury.

On Friday morning each one of the Plymouth boys received a most pleasant surprise, when he was handed a bridal couple, accompanied by E. letter from Mrs. Kate E. Allen, stating that the recipient would receive Brown, proceeded to the front parlor,

nated by the local board to have charge of the men until their arrival at Camp Custer, the men formed in line for the march to the depot. The procession to the station was headed by F. D. Schradef carrying the flag. He was followed by the band, the members of the local board and the selected men, while a large contingent of citizens brought up the rear. Arriving at the station there were several hundred people gathered, friends and relatives of the soldiers—for soldiers they were—who had come to say farewell and bid them Godspeed. The mothers and sisters fought bravely to withold their tears until after the train had left, but the struggle was too much for them, and the crowd that packed the station platform was dotted with little groups, the center of which was a young man on whose coat lapel was tied an identification card that marked him a soldier of the sations large. whose coat lapel was tied an identification card that marked him a soldier of the national army.

The departure of these young men last Friday, meant for many of them the leaving of home for the first time in their lives. They were being separated from parents and friends from whom they had never been gone longer than a few days at most. And so last Friday morning when the full realization dawned on them and their parents that the coming separation was to be longer and that they were to be drawn farther apart than ever before, it was not strange that the parting demonstration took a deeper tone.

The few minutes that intervened between the arrival of the men at the citizens of Plymoath for their gener-

resident pupils. Last year the total enrollment for September was 526. This makes à gain of 61 pupils for the past year. This is conclusive evidence that Plymouth is growing. A Eighty-two young men of the Fourth District left over the Pere fully to relieve the tensity of the Marquette at 7:52 o'clock Jast Friday situation. With the arrival of the morning for Camp Custer, where they are to be trained for places in the new national army. Out of the eighty-two men who went, Plymouth contributed twenty of her sons. The boys assembled at the U. S. headquarters at the village hall, where they responded to roll call at seven o'clock.

Thursday afternoon each one of year ago the census list totaled 393, and last spring there were 660 on the list, which shows an increase of 67. The ideal conditions under which

Director Preacott and Mr. Freeman are starting with the campaign for the meatless and wheatless days because they feel that the public must be educated up to the point of not asking for so much foodstuff in order that the commission man, the wholesaler and the retailer can be controlled.

Curtailment of demand for certain foodstuffs which are to be curtailed will help out the men who sell it; consequently the public must be particitically appealed to and asked to make its contribution first—in cutting down on meat and white bread or anything in the bread line made from wheat.

The prices will obtain until January 1, 1918, to be revised then if investigation shows they are inequitable.

The entire output of American steel plants will be distributed under supervision of the war board, which, exercising the powers of priority of transportation given the government by congress, will apportion it in a way best to meet the country's war requirements.

So far as the prices announced could So far as the prices announced could be followed, steel bars, the basic product of the trade, are placed at \$2.90 a hundredweight, which would compare with 34 quoted on the stock exchange and with \$2.60 a year ago. Officials in close touch with the situation said the prices approved by the president are liberal and allow fair profits to all steel plants.

Parcels and boxes taken into the German coassitate at Bucharest with display of great precaution aroused the suspicious of the Roumanian government. On August 27, 1916, the evening prior to the date of Rousania's declaration of war, some of these cases were taken to the German legation, located in a different building from the consoniate.

Onvinced that the boxes were not taken sway from the legation by the German diplomatic mission on its departure from Bucharest, the Romanian authorities later ordered the police to find and examine their contents. The police communicated with American Minister Vopicka, then in charge of German interests, who reluctantly amagned Secretary Andrews as observe the search. DIVERSITY IN ONE-PIECE DRESSES

There is a wonderful diversity in the satian cuffs with overlay in white one-piece dresses, and there must be.

or women will not buy," anys one of those who sells frocks nearly all the days of the year. It is business that makes the world move forward, and so designers call upon the four quarters of the globe for ideas and inspirations. This fall there are Chinese and Russian and American Indian ideas interpreted in new suits and dresses, or discernible in their trimmings, along with clever inventions that are home grown and very modern.

But with all this casting about for new inspirations there are almost no freakish dresses. Everything must how to the decrees of the mode and manage to arrive at simplicity in effect, no matter how much elaborated in details of trimming or finish. The result is the prettiest and most wearable frocks that can be imagined, with the straight line models in great favor and the smart Russian blouse winning its way to the straight line dress has no

Making a joke of deprivations is one phase of French fortitude in these times of trial. The Partisience makes light of the scarcity of coal and says she will rely upon furs and exercise in the open air to keep herself warm this winter. This prediction seems to have influenced the mode, and fursience everywhere. On suits and frocks they appear in hands, sometimes continuous and more often in sections, on the bottom of skirts and coats. Collars and cuffs, fur-covered buttons, and narrow fur bands and fringes of furified a place on all outer garments.

Deep cuffs, both close-fitting and finring, and narrow collars that widen into broad revers are among the newest phases of fur trimmings. But with the broadest collars saft the most generous cuffs are coupled very narrow bandings in pockets and about the bottom of coats. Collars are as luxurious and enveloping as those introduced last whiter, those on suits of the convertible variety that may be brought up about the throat at will.

Marking the Auto Routes

The Detroit Automobile club and associated clubs are marking all the main highways in Michigan.

The Marking the Automobile club and associated cl greatest gathering of its kind ever staged in the central west. A great parade of more than 1,000 automobiles over a part of the route is contemplated. The guests from outside the city and state will gather at noon in Cadillac Square. From this point, headed by a police escort, they will be whisked in several hundred automobiles north of Woodward avenue. They will be joined by thousands of other road enthusiasts who will park their cars east and west

comparable to Wayne county's Outer Belt Drive, which is approximately 120 miles in length and all concret very doors a road sufficient ja length for a day's trip, all of which is paved.

Arrangements are to be made with the citizens of Northville to turn out in force for the dedication of the road. When this event is finished the citizens of Northville to turn out in force for the dedication of the road. When this event is finished all those participating will be furnished with lunch at Northville. The boosters will then turn south to Plymouth and Canton Center, turning east at the latter point and ceming through Wayne, Dearborn and H. Williams, Stanley, N. Y.—Advf.

these points. Different colors have been designated for each route. This is so that there will be no confusion in following a route.

Two six-inch white bands, with a colored band of 18 inches painted between is placed on the four poles nearest a cross road or jurn. The colors decided on are: Jackson, Kalamazoo and Chicago, blue; Lansing and Grand Rapids, orange; Pontiac and Grand Rapids, orange; Politics, Flint, Saginaw and Bay City, red; To-ledo, green; Mt. Clemens and Port Huron, via lake shore, brown.

Well Known Resident

Efforts are being made to have the citizens of each town through which the procession passes to turn out and make the day one of celebration. Those in the towns along Michigan avenue are expected to give their hearty support because it was these towns which first benefitted by the comprehensive road system that Wayne county has been building for the past eight years.

Several novel features which are not yet ready to be divulged are being planned by the committee having the affair in charge. Governor Albert E. Sleeper and Mayor Marx of Detroit, are to be invited to participate in the exercises. In addition to these men there will be other state and county officials.

The Cloves of Zanzibar.

In an interesting review of the clov industry of the sultanate of Zanzibar including the Islands of Zanzibar and Pemba, Consul Henry P. Starrett, re-fers to it as a unique example of a valuable economic plant, not indigenous to the country, having been introduced from abroad and developed until it became not only the most important ag-ricultural endeavor of its adopted coun-try, but enjoyed an expansion which gave it the premier place in the world's production of this article. It is stated on good authority that Zanzihar is the source of over 90 per cent of the world's supply of cloves, the balance being furnished by the Molucca islands of the Dutch East Indies and by the French island of Madagascar.

Cheese Sauce for Rice.

To increase the food value of rice the following sauce, made with a generous amount of cheese, may be served: Take a half cupful of cold milk and mix with it a tablespoonful and a half of flour d a generous half-teaspoonful of salt. minutes and then set aside while grat-ing a cupful and a half of American cheese. Add the grated cheese to the hot mixture, set again over the fire and let come to boil, stirring steadily. Add seasoning of cayenne, paprika or white

....... FLASHLIGHTS

It's easier to start right than to make a fresh start.

The trouble with most of us is that as a general rule the ideals we have are for the other fellow

to live up to.

There's one thing every young man should be sure of: if the plan he has in mind isn't honest,

it isn't wise, either. Everyone has his faults, but some folks insist on making theirs more prominent than oth-

:....... Milk Soup for Children.

From an English household comes this milk soup that is very nice for children. Pour a quart of milk in a double boiler with a half-teaspoonful or clonamon, a wee pinch of sait and one and a half teaspoonfuls of sugar. Have ready two slices of toast cut in long strips in the bottom of a soup tureen. Now heat up the yolks of two eggs, add them to the milk and stir over the fire for a few minutes. As soon as it thickens even slightly pour it out on the toast. This is a very ample supper dish for children.

A Delicious Pear Dessert.

Pour one and one-half cupfuls of sugar over two cupfuls of finely sliced pears and let stand overnight. In the morning chop finely the peel of half s lemon and a small piece of green gin

ce the half-lemon in thin slices Mix all ingredients and boil until thick.

Straw Mattings.

A good way to use up old straw mat-tings that are torn up from floors is to use the best part to make rugs. Fringe out about four inches both rringe our about four inches both ends and tie. That will keep them from raveling, and they won't kick up. They look nice on hardwood floors.

Experience the Best Teacher

Experience the Heat Teacher
It is generally admitted that experience is the beat teacher, but should we not make use of the experience of others as well as our own! The experience of a thousand persons is more to be depended upon than that of one individual. Many thousands of persons have used Chamberlain's Cough Ramedy for coughs and colds with the beat results, which shows it to be a thoroughly reliable preparation for those diseases. Try it. It is prompt and effectual and pleasant to take.—Adv.

SUGGEST CAST-STEEL SHIPS

Could Be Built More Cheaply and Would Be Stronger Than Present Type, It is Claimed.

The cast-steel ship is suggested as getting an opportunity to furnish a large supply of ships without further straining the steel rolling capacity of the country and that the direct cost in well-organized shippard foundries would be less than the cost of fabri-cated ships in times of peace.

Emphasis is placed on the minimum resistance to fraction of the ship's hull owing to the absence of riveted points and to the fact that the higher silicon content of cast steel is calculated to give maximum resistance to surface corrosion. Emphasis is also nuced or the fact that the welded joints are stronger than the average section of the steel casting, while with riveted structures the weakest points are the riveted joints. It is mentioned to point out the feasibility of the scheme that German submarines are built of caststeel sections. The casting of the sec tions is regarded as no greater prob-lem, being a standard commercial prod-uct, nor the electric welding, being merely the application of a standard commercial process on a large scale

A consulting engineer on request has recommended that the shipping hoard spend \$10,000 in experiments and a marine architect has approved an expenditure of \$50,000 for trying out the scheme.—Iron Age.

How to Cut One Burden.

Much has been done to reduce pre-ventable waste by fire in Portland, but much more can be done and must be done by the individual citizen rather than by any official. A reduction of one-fourth in fire losses, as sustained, would warrant a proportionate reduc-Heat à cupful of milk and two table one-fourth in fire losses, as sustained, spoonfuls of butter in a frying pan and to this add the cold milk and flour. It is not the said the cold milk and flour. Let thicken and boil together for five panies might boil out for a few years but they would be obliged to yield by threats of competition. Fire preven-tion is bound to result finally in reduction of premiums, so that the property owners get the ultimate benefit.

Comfort and Facility.

Young people who work—in fact, any person who works—should have a good, nourishing breakfast, and the wife or mother should see to it that they have such a meal before they leave the house. We are, indeed, all human. We oversleep, we mislay things and we forget to order things, and as a result pay the penalties attached to all these slips, but the busy girl who anticipates her morning needs the evening before, the mother who arranges tomorrow's breakfast requirements tonight, will make that meal most satisfying for herself and all concerned.

"Both day and night I'm on the go," The tired chauffeur protested, never get a rest, although I often get arrested."

Tempting Dessert.

Did you know that one delicious way of cooking rice for dessert is to use fruit juice to cook it in, such as you have left over from a can of fruit, or stewed fruit, instead of water? Rice cooked in raspberry juice or strup left from canned or stewed raspberries is delicious and at tractive, as it takes up the color as well as the flavor. Served with cream, it makes a dainty dessert. Cook it in the proportions of one tablespoonful of the raw rice to one-third or slightly m of a cupful of the juice

She turned and looked into his face, her eyes searching it as his were searching hers, luminously and with a swiftly kindling fire. Her lips parted a little, trembling. There was a sort of hloom on her skin that became more visible as the blood, wave on wave, come flushing in behind it.

As for Rodney, he was the same man who, an bour ago, in the theater, had raged and writhed under what he felt to be an invasion of his proprietary rights in her.

He wouldn't have defined it that way, to be sure, in a talk with Barry Lake; would have denied, with the best of them, that a husband had any proprietary rights in his wife. But the intolerable sense of having become an object of derision or contemptuous pity, of being disgraced and of her being degraded, couldn't derive from anything else but just that.

"Have you anything here," he asked

"I mean you're going to get out of this beastly place now—tonight. We're going home. We can leave an address for the trunk. If it never comes, so much the better."
