UP TO THE WOMEN
In too many towns the size of Plymouth, the belief exists that public improvements and municipal affairs are not of interest to the fair sex. And this belief has prevailed too long. The same thing prevailed in an Ohio town up to a few weeks ago, and when a heavy rain came and sewers and gulleys that had been allowed to clog up and become filled with refuse failed to carry off surface water cellars suffered. The women of the town got busy, because they quickly saw they would have to take a hand if they hoped to prevent similar damage in the future. They met at a church, organized a civic club and waited on the town officials. With the result that they secured permission to have the streets cleaned, sewers looked after and sidewalks repaired. They hired the labor and the town paid the bill. All that was needed was for the women to show that they do not propose to live amid unsatisfactory conditions. They organized and they did in a few minutes what the men have been neglecting for years. Not only that, but they are finding many improvements necessary as they go over the town, and they are not going to quit until they look after them.

Who is more interested in your house than you are, who has a greater interest in your city, state or nation? Well that depends upon you. If you have not an absorbing interest in these things that affect you most vitally, there surely must be something wrong in your thinking apparatus.

If you waste a little and I waste a little every day, and all of our neighbors follow our example, how long will it take to bring on a general waste and greatly increase the cost of living. If this is worth thinking about, just stop and think what your particular method of wasting is, and then think some more for the remedy.

An Interesting Story

The evolution of the telephone pole, once a seedling, then a towering tree in the wilderness and now bearing the wires that carry the messages of millions, is material for more than an every-day story. The cutting, the trimming, the hauling, ridding and drifting over the white rapids and across still lakes, all this is unusually interesting.

This year we will use thousands of these towering trees—straight cedar poles—and thousands of crossarms to help maintain and expand your telephone service. Does the lifting of the receiver bring to you the thought of what all this means in money and effort? In 1915 these poles cost \$5.45 each and today they cost \$15.00.

The hire of the woodman and white-water burler, the tools they use, the hauling to the railroad, the freight charges, the setting up and equipping of the pole for your service, all cost greatly more now than in 1915.

These poles, the crossarms, the wire and the labor by the way, are Michigan products and your service is operated by a Michigan company, headed by Michigan men. Michigan business is largely dependent upon the telephone.

The Most Welcome Tire That Ever Came to Market

Men Who Appreciate Superlative Values Prefer The Brunswick

In every great tire factory, the chief question is: "How much can we give for the money?" And the product depends on the policy adopted.

Every man who has become acquainted with Brunswick Tires knows that Brunswick standards are again evident. This famous concern—noted as a leader in every line it entered since 1845—has once more proved that its policy is right.

A perfect tire is simply a matter of knowledge and standards and skill. No secrets nor patents prevent making an ideal tire.

But standards come first. For in tire making there is vast room for skimping, for subtle economies, for hidden shortcomings. Makers without the highest standards don't build high-grade tires.

The Brunswick organization of the makers includes a brilliant staff of technical experts. Not a man

among them has spent less than 20 years in handling rubber.

Each is a master of his craft. And the new ideas they bring to the attention of Brunswick directors receive sincere consideration.

Every proved betterment is adopted unanimously.

The Brunswick Tire is a combination of acknowledged features—plus Brunswick standards of manufacture.

The result is a super-tire, the like of which you have never known before. The kind of a tire you will gladly join in welcoming.

Yet Brunswicks cost no more than like-type tires.

Try ONE Brunswick. We promise a surprise. And we feel certain that you will want ALL Brunswicks.

Then good tires will have a new meaning to you.

Bay City—Bay City patrolmen are deserting their jobs for higher wages and the force is considerably under its regular quota. Patrolmen are paid \$120 a month.

Constantine—The Farm Bureau drive in St. Joseph County has been concluded with nearly 1,200 members. Some districts are organized 100 per cent for the bureau.

Detroit—Garbage wagon drivers—60 of them—were granted a new wage scale of \$8.50 a day, an advance of \$1 a day. The men asked \$7 a day but say they are satisfied.

Pontiac—It is proposed to establish a traffic department in the Board of Commerce to facilitate freight handling. A traffic manager will be obtained if the plan materializes.

Albion—Albion College students plan a political convention with speeches for the various candidates. Lee Merriman, of Chicago, editor of the college weekly, is sponsor of the plan.

Lansing—A movement was launched here at the closing sessions of the annual convention of the Michigan Anti-Tuberculosis association for a health crusade, to be conducted in the schools of the state.

Lake City—Jay Taylor, county clerk and register of deeds of Missaukee County, is seeking a third term. He will be opposed at the Republican primaries by his deputy, Miss W. Louise Wolcott.

Caro—The Caro School Board has made contracts with all necessary teachers for next year. The minimum salary is \$1,000 and the maximum, to be paid to the principal of the high school, is \$2,000.

Saginaw—Andrew Frost, 11 years old, played with dynamite caps. He lost four fingers and one eye and is a patient in the same hospital room with his father, whose right arm was cut off by a buzz saw.

Cadillac—Nearly a score of local residences have been entered, return of families who wintered in Florida and California reveals. Only cellars and garrets were rummaged. Liquor was sought in most cases.

Bay City—The Junior class at Eastern High School has organized an overall and calico club. Members threaten to start a boycott on shoes by going barefoot during warmer weather if footwear prices continue to soar.

Ypsilanti—Hundreds of residents are out of coal and unable to procure any from dealers. The city gas plant will be forced to close soon unless coal billed for the plant, and now sidetracked at Toledo, can be brought here.

Adrian—Forty-six men from various Adrian factories have been sent into the Lanawee cyclone district to work on the erection of new buildings. All receive regular pay from the firms employing them. On Friday 150 men from this city will assist in clearing away the wreckage.

Flint—Stricken with "sleeping sickness" several days ago, after an illness due to a nervous breakdown, August La Berque, 52, a Flint factory worker, cannot be aroused. Numerous physicians, attracted by the news of the case, have tried without success to arouse the sleeping man.

Muskegon—Marjorie A. Vandermolen, two-year-old child of Mr. and Mrs. Garret Vandermolen, died from strangulation when a small piece of tin, a part of a toy shovel with which she was playing, lodged in her throat. A physician was unable to remove the obstacle before the child died.

Grand Rapids—Organization of stock companies, the grouping of farms under one management, elimination of duplication of machinery and implements, united effort for greater production and the revision of existing corporation laws to encourage and bring about this end are urged by Lyman A. Lilly, president and general manager of the West Michigan State Fair association. President corporation laws would have to be changed to facilitate organization of stock companies among farmers, Lilly points out.

The Sanitarium grounds are now equipped with a nicely painted, rubber-tire fire engine, and hook and ladder. Two men remain at the temporary building, where the Sanitarium is situated, to be ready for instant action in case of a blaze.

Revelation 12 for May 9th, at 2:00 p. m. A very interesting chapter. Is its prophetic utterances of the past or future? Who was the woman clothed with the sun? Who was the man child of verses 2 and 3? If a virgin represents the true church II Cor. 11:2) and a woman an apostle church (Rev. 17:3) would this woman's son be true or false? Is it any wonder that such a son "ruling (for long centuries) with a rod of iron" (verse 5) could cause the legitimate virgin to "flie into the wilderness" for safety 1260 days (years) or in other words—a time, times and a half a time (verse 14)? Today's Reflections

If the ice companies of this country keep on raising prices, they'll make winter the most popular season of the year.

When a Plymouth woman really has to buy something, she wastes very little time in shopping.

Notwithstanding the high cost of living there are just as many girls in Plymouth willing to be June brides as there ever was.

Maybe they're organizing overall clubs so the salaried man can disguise himself and thereby escape the profiteers.

If everybody had the kind of times he wanted who would there be left to do the work in this country?

The old-fashioned Plymouth man who used to eat all he could at one sitting now has a son who eats all he can pay for.

One Plymouth man who has been looking around for "cut" prices says he hasn't been able to find one that was even scratched.

About the only result we can figure out in this widespread demand for overalls is that it's going to make the man who works pay more for his from now on.

One of the things that worry us as little as anything else in the world is to read that the ex-Kaiser worries all the time.

A Plymouth girl can't always judge whether or not a man is a good catch or not merely by throwing a kiss at him.

Reading our daily papers, we conclude that this country is missing a whole lot of good chances to get in trouble in Europe.

Now that the Russian "Reds" are insisting upon their members going to work, Bolshevism will soon begin to wane in this country.

Most Plymouth men's idea of good memory is being able to forget certain things that have happened to them.

They can change the English language all they please, but they'll never be able to take away the sweetness of those three little words, "Enclosed find check."

One thing that has never been made plain to us is how some Plymouth women can boast of their husbands to their neighbors all day, and then find so much fault with them when they get home in the evening.

And maybe the fellow who was refused by a Plymouth girl is envied by the fellow who married her.

They are making stockings in Paris that retail at \$200 a pair. Ought to be a mileage guarantee with 'em when they cost so much.

Our idea of the meanest man in Plymouth is the one who will snore in church and keep others from enjoying the sermon.

It's hard to get the farmers out to political meetings. They'd rather stay at home and think and work, than to come to town and listen and applaud.

There are still in this country a few fellows who are optimistic enough to regard alimony as a luxury tax.

What profiteth it a Plymouth housewife if this season's fruit crop turns out to be the biggest on record, and she hasn't sugar enough in the house to sweeten a cookie?

Business methods may change, but as we understand it a poker game is still conducted on a strictly cash basis.

By this time any presidential candidate is in a position to tell you that the most difficult part of the whole job is getting the nomination.

Wealth does not always bring happiness. Many a rich girl has a poor complexion.

For a Weak Stomach As a general rule all you need to do is to adopt a diet suited to your age and occupation and to keep your bowels regular. When you feel that you have eaten too much and when constipated, take one of Chamberlain's Tablets. Adv.

Hear this unique TEST of Edison's history-making phonograph

Do you want your own proof of the marvelous art of Edison's new phonograph—the phonograph that achieved such a dramatic triumph at Albany, when, on November 25th, it perfectly matched Mario Laurenti's voice in a test before 6,000 teachers? Let us give you the Realism Test. Takes only 5 minutes. A delightful experiment. It determines whether you experience the same emotions in listening to the New Edison as when you hear a human artist.

The NEW EDISON

The instrument, with which Mr. Edison developed the RE-CREATOR of music, cost him three million dollars for research work. This phonograph, the original Official Laboratory Model, and the duplicates of this original that Mr. Edison makes, are the only musical instruments which compete with the human voice. Edison's faith in his Official Laboratory Model is so complete that he dares such drastic tests as that given in Albany before 6,000 teachers, principals and officials of the New York State public schools. He had the New Edison match its RE-CREATOR of Mario Laurenti's voice against Laurenti's living voice. The human ear found itself unable to find any difference between the two voices. Come in and experience the Realism Test.
