

VILLAGE FIRE TRUCKS COLLIDE SUNDAY NIGHT

What might have proven a very serious accident with attendant injury or loss of life was narrowly averted while the Village fire trucks were responding to a call to the home of Frank S. Wilson, 681 Deer street, Sunday night. The fire alarm was sounded at about 11:30 p. m. and the two trucks were soon, under way, traveling at a high rate of speed southward on South Main street. The chemical truck, driven by LeRoy Jewell, reached the corner of Wing street first and was just making the turn eastward when the pumper, driven by Ernest Wilson, approached the intersection. Due to the presence of several private cars which failed to give the pumper a clear right of way, the attention of the driver was not directed to the chemical truck making the turn until it was too late to avoid a collision with it. The pumper struck the left front hub of the chemical truck with considerable force, then ran over the curb and demolished a boulevard light post at this corner. The pumper suffered a smashed running board and a blown tire. No damage was done to the chemical truck.

In view of the circumstances surrounding the accident, and the chance that either or both of the trucks might have upset, it is indeed fortunate that no one suffered injury as a result of the collision.

This accident again emphasizes the need of some measures being taken to compel motorists to clear the way for fire trucks responding to calls. Such a step would not only be in the interests of public safety but would materially improve our fire protection by speeding up the arrival of apparatus at the scene of the fire.

K. of P. Win

Euclre Game

For the past several weeks, the Knights of Pythias and I. O. O. F. have been engaged in a torrid struggle to determine supremacy in the mummy art of euclre.

Entering the stronghold of their opponents for the final contest, the I. O. O. F. staged a heroic rally, but were not quite able to erase the early advantage gained by the Knights. When the din of battle had died away, the following score was carefully extracted from the wreckage:

Knights of Pythias, grand total 1212
Odd Fellows, grand total 1155

The spirit of friendly rivalry with which both orders entered these contests made them most enjoyable and entertaining, and it is the general wish that the worthy captains may arrange more meetings of a similar nature.

By common consent the gentry in possession of the long score will be the guests of their less fortunate but erstwhile foe, at a 6:30 supper in the Pythian Castle hall, Thursday evening, May 16. Plan to be there. A most agreeable surprise is awaiting you.

MARTIN STORE PLANNING BIG SALE

The Martin Dry Goods store are making plans for a big sale to start next Wednesday, May 8th at 9 a. m. The store will be closed on next Monday and Tuesday, May 6th and 7th to arrange and mark down the merchandise. Watch for further particulars of this big sale.

BASE BALL SEASON OPENS AT THE H. OF C. FARM

Sunday, May 5, will be opening day at De-ho-co Park and the curtain of 1929 will be rung up amid fitting opening-day ceremonies. Old Glory, and the Inter-County League championship pennant, won by De-ho-co last season, will be raised to the top of the flag pole while the Detroit Police Band plays "The Star Spangled Banner."

After these ceremonies, which start at 2:15, the De-ho-coes will swing into action with the strong Buick Majors of Flint as their opponents. On the showing made by the Buicks last year, this should be one of the hardest contests that the home team will be called on to face this year. But Manager Frough, the new leader of the De-ho-coes, believes in starting right out to fill his promise of furnishing the fans with base ball of the highest class obtainable.

He has been active all winter signing up players of a high calibre and this season will find many new names on the roster. Jaska, Donaldson, Bestefano, Howland, Pankratz, Martin Smith, Peery, and Trombley, of last year's team will again wear De-ho-co uniforms, while the new additions will be Hartner, Anderson, Irwin, Keene and Lazar. Hartner is the star left-hand flinger of last year's Holly team, and a winning veteran of many a hard fought contest; Anderson is a hard-hitting outfielder from the Toronto Maple Leafs of the International League. He tips the beam at 204 pounds but carries his weight well and has been one of the fastest men on the field during spring training; Irwin is the fast-going second baseman of Holly and a mighty pretty fielder. He and Martin are having a nice scrap to determine who will be the regular second baseman during the coming season; Keene is a catcher formerly with Flint of the Mtnt League and the Chicago Cubs of the National League and should materially strengthen that position; Lazar will be remembered as the little outfielder who welded the big stick here two years ago. Last year he played Triple A ball in Detroit but decided to come back to his old stamping ground.

What is expected of the De-ho-co team this year can best be attested by the attitude of Steve O'Neill, Manager of the Toronto Maple Leafs, in connection with his handling of "Whitey" Martin. Martin was signed to play with Toronto but after several weeks at their training camp, O'Neill decided "Whitey" needed a little more seasoning before making his appearance in the big show and decided to farm him out for a year. He sent him back to De-ho-co because he believed "Whitey" would get the necessary seasoning with the improved team that will

represent De-ho-co this year. Manager Frough, after giving much thought to the subject, decided to book independent games instead of becoming affiliated with any league, because he believes, in this way, he can furnish the fans with a much better grade of the national pastime. He intends to go into the neighboring states of Ohio, Indiana, and Illinois and secure the best semi-pro teams obtainable as opposition for De-ho-co.

At this writing he has booked the following games:—

May 5—Buick Majors of Flint
May 12—Kelleogs of Battle Creek
May 19—City of Hamtramck
May 26—Sunoco of Jackson 2
All games to be played at De-ho-co park.

June 9 and 9, Sunoco of Jackson, at Lansing.
The admission will be fifty cents, with no reserved seats.

GRINNELL BROS. CONDUCTING LARGE SALE HERE

Grinnell Bros., of Detroit and Ypsilanti, are operating a big introductory sale of fine pianos, players, radios and used phonographs in the vacant building at 828 Penniman avenue, commencing this Friday morning, May 3rd at 9 a. m. Some extraordinary offerings are made on high class merchandise that will surely appeal to those contemplating purchasing. We call your attention to their half page ad in today's Mail.

ANNOUNCE NEW WATER HEATER RATE.

The Michigan Federated Utilities have a full page ad in today's Mail in which they announce a new optional residence water rate available to those who use gas water heaters. This new rate will mean a saving to customers using a 24-hour hot water service. They also call attention to the fact that they are the local representatives for the Handley-Brown and Humphrey water heaters. Be sure you read the big ad.

BIG PICTURE COMING.

The management of the Penniman Allen theatre announce one of Paramount's biggest pictures, "The Carnation Kid" for Sunday and Monday evenings, May 5-6. There will be no advance in prices. Wherever this picture has been shown it has made a tremendous hit and there is no doubt but that it will with Plymouth theatre goers.

Miss May Arrives

Graduation Day Set

DR. ALVIN E. MAGARY, OF DETROIT, WILL BE THE SPEAKER.

The commencement week date for the Plymouth public schools have been set for Thursday, June 20th. Tuesday, June 18th will be class day and Sunday, June 16th, the Baccalaureate sermon. All of the commencement week activities will be held in the High school auditorium.

Dr. Alvin E. Magary, pastor of the Woodward Avenue Presbyterian church of Detroit will give the commencement address. The graduating class this year numbers over sixty and is the largest in the history of the Plymouth schools.

4-H Observe Achievement Day

HELD SATURDAY, APRIL 27,
AT DEARBORN HIGH SCHOOL.

The annual boys' and girls' 4-H Club Achievement Day was held Saturday, at the Dearborn high school. Some of the members began to arrive by 9:00 o'clock, in order not to miss any of the day's activities.

Judging of the hot lunch posters, clothing and handcraft exhibits was done by Miss Lola Belle Green and Nevada Pearson, assistant state club

(Continued on page 4, Col. 3.)

BUY OLD LANDMARK.

The old Newburg school house seemed, until recently, doomed to suffer the fate of so many such buildings throughout Michigan in spite of the tender memories which enshrine it in the hearts of so many former residents of this burg now scattered to the four winds of time. It has been purchased by a number of local citizens who are incorporating under the name of the Newburg Recreation Hall association. It is now undergoing extensive repairs and alterations and when completed will be rented for lodge room purposes. The Ladies Auxiliary of the newly formed hall association will open the new hall with a carnival to be held May 17th. A fine entertainment will be a feature and they extend you a cordial invitation to attend.

O. E. S. TO MEET.

The Order of Eastern Star will meet in the lodge room of the Masonic Temple next Tuesday evening, May 7. As this is the first regular meeting for the new officers, a large attendance would be very encouraging. Members will be delighted with the several changes that have been instituted into the work and order of marches. Your new officers can be successful only in so far as they are backed by every member's presence, interest and enthusiasm throughout the lodge year. Worthy Matron Lucille Buzzard and Worthy Patron Chauncey Rauch desire to make this a beneficial and happy year for all members. Will you assist them?

PLYMOUTH MAY GET AIRPLANE FACTORY

The announcement of the Mack-Craft Amphibian Corporation brings to the Detroit district and possibly to Plymouth, another airplane factory. The first plane will be ready for its flight about August 1st, according to Mr. R. U. McIntosh, president of the company.

The Mack-Craft Amphibian will have many new features incorporated in it, which make for comfort and convenience of its air passenger travelers. The plane will have overstuffed individual mohair chairs, which can be reclined into sleeping position. It will be equipped with hot and cold running water, refrigerator, lavatory, toilet and a buffet where hot lunches can be kept. The Mack-Craft Amphibian is particularly designed for long cross-country cruises. It will be capable of staying in the air about ten hours, or cover about thirteen to fourteen hundred miles. Due to the position of its motors, the cabin is as quiet as an automobile sedan. It will not be necessary to raise the voice above its natural tone to be heard. The interior of the Mack-Craft Amphibian will resemble the interior of a yacht. The wings will be a full cantilever and have a wing-spread of approximately fifty feet. The ship will carry six passengers and two pilots in comfort.

After Mr. McIntosh made a survey of the United States, looking for a logical location, he selected the Detroit district because of its ideal facilities with which to build amphibians. Also because Detroit understands production, due to the numerous other manufacturers centered here. "Taking this into consideration amphibians at less cost, thus a lower purchase price. This will make our particular type of amphibian popular for the sportsman, as well as the transportation company," said Mr. McIntosh.

Michigan has become one of the outstanding tourist states in the Union because of its many physical advantages. Its position on the lakes, its hundreds of inland lakes, its thousands of acres of virgin forest and beautiful streams have attracted the attention of the sportsman and nature loving people of America. The amphibian alone will meet this great demand in Michigan, as it has in California, and

ROTARIANS OBSERVE FIFTH ANNIVERSARY

Open Up-Town Telegraph Office

The Western Union has opened an up-town telegraph office in the Chamber of Commerce room in the Hotel Mayflower block. The office hours are as follows: 8:00 a. m. to 11:30 a. m.; 1:00 p. m. to 5:00 p. m. and 7:00 p. m. to 8:00 p. m. The operator in charge is Mrs. Sheffner of Olivet, Michigan.

The opening of an up-town telegraph office was brought about through the Chamber of Commerce, and will prove a great convenience to our citizens.

Fifth Annual Mother and Daughter Banquet

The fifth annual Mother and Daughter banquet will be held in the High School auditorium, Friday, May 10th. The dinner will be served at 6:30, after which a program will be presented. The speaker for the evening is Miss Florence Anderson, associate general secretary of the Y. W. C. A. of Detroit, whose subject is "Believe and Venture."

Tickets should be purchased at once from the Girl Reserves or Camp Fire girls; no tickets will be sold at the door Friday evening.

Anyone desiring to obtain a daughter for the evening, may call Miss Allen or Mrs. Crumble at the school, and one will be provided. This act is always appreciated, as many girls are unable to attend if they must buy their own tickets.

Mothers, reserve May 10.

Before many months the Mack-Craft Amphibian will operate between Detroit and Petoskey, Charlevoix, Houghton Lake and many other beauty spots of Michigan.

"This company," said Mr. McIntosh, "is being financed and backed by a local group of Detroit business men, some of whom will take an active interest in the corporation when it will undertake an extension program later this summer. Ward B. James, manager of the Hotel Tuller, has taken a great deal of interest in aviation and a great deal of credit is due him in inducing the Mack-Craft Amphibian Corporation to settle near Detroit. Mr. James is the Secretary of the company. Harold A. Sage, the treasurer, is just about ready for his pilot's license. He has been flying for some time.

All of the production for the next three years will be taken by a new transportation company now being formed on the West Coast. This company will be engaged in special charter trip service to the many lakes and summer resorts in the West. They will also act as national distributor for the amphibian.

The Mack-Craft Amphibian is being built after an exhaustive survey of practically every manufacturer of the United States. It is not an experimental ship, but is designed on the highest cruising speed possible to obtain from a Pratt-Whitney four hundred and fifty horsepower motor. The fact that the Amphibian can land on water or land, makes it the safest kind of an aeroplane. Most every course that would be selected to fly over in the United States can be chosen over a route that offers water to land on in case of forced landing. This is the safest way to travel by air.

The boat, or the fuselage, will be of steel tubing, which will be covered with dural. It will be as strong as the hulls of small cruisers. The boat will be capable of standing very rough weather. The Mack-Craft Amphibian has many new patented features that mark a new level for this particular type of airplane. Due to the lack of resistance the ship will be able to obtain approximately 150 miles per hour. It will not have the customary wing struts, wires, or the usual landing wheels hanging on the outside of the boat, offering resistance.

Present plans call for the building of two amphibians in a temporary location and, while they are being built, a permanent factory site will be located, where a plant especially designed will be built.

The Mack-Craft Amphibian Corporation have their temporary offices on the ground floor of the Hotel Tuller, 121 West Adams avenue, across the street from the Oriental Theatre building.

The gentlemen who are at the head of this new concern have met with local business men on several occasions and it is to be hoped that some plan can be worked out to bring the plant to Plymouth.

ROTARIANS AND ROTARY ANNS ENJOY SPLENDID BANQUET AND PROGRAM AT HOTEL MAYFLOWER LAST FRI- DAY EVENING.

The fifth anniversary of the Rotary Club of Plymouth was observed at the Hotel Mayflower, last Friday evening, when about thirty-five of the Rotarians accompanied by the Rotary Anns gathered there for a pleasant evening. Dinner was served in the crystal dining room at six-thirty o'clock. Guests were present from Detroit, Wayne, Northville and Plymouth. During the dinner a beautiful rose was presented to each Rotary Ann, the gift of Rotarian Donald Sutherland. Other souvenirs of the occasion were compacts for the ladies and bill folders for the gentlemen.

Following the dinner, the president of the club, Carl G. Shear, called the meeting to order, and in a few fitting words welcomed the members and guests to the club's fifth birthday party. Mr. Shear then turned the meeting over to Dr. H. E. Champe, past president, who acted as toastmaster, and the following program was presented:

Singing of club songs, led by William Wood and Calvin Whipple, accompanied at the piano by Scott Montgomery of Northville.

Dr. Champe then called on Allan A. Horton, Sergeant at Arms, who in turn called on Harry C. Robinson, who in his genial way made merry in the imposing of several fines. Dances and songs were presented by several boys from the high school, in costume. The boys carried out their parts exceedingly well. This number was under the direction of Miss Virginia Giles, who was at the piano with the orchestra. Violin and saxophone solos were beautifully rendered by Daniel Patterson, accompanied at the piano by Scott Montgomery.

Past President George A. Smith was then called upon for remarks, and spoke very earnestly of the good that had been accomplished through Rotary, during the past five years, especially of the work with the boys and girls of this community.

Miss Gladys Schrader, in her usual pleasing manner, rendered two piano selections. At the conclusion of her number, Miss Schrader was presented with a beautiful bouquet of flowers.

Dr. Ed. Lee of Wayne, who helped to bring Rotary to Plymouth, and who has always been interested in this club, was then called on for remarks.

Two vocal numbers, rendered by Master Robert Champe, accompanied by Miss Schrader at the piano, were greatly appreciated.

This was followed by the address of the evening, which was given by Paul H. King of Detroit, chairman of the extension committee of Rotary International. Mr. King is one of the best known and most enthusiastic workers for Rotary in the state. He showed views of foreign countries, and pointed out the various places and told of the number of clubs that had been formed there. He said there were 148,000 Rotarians in forty-eight countries of the world, with a total of 3,120 clubs. At the conclusion of his address, Mr. King was given a rising vote of thanks.

The Rotary Club of Plymouth received its charter on April 17th, 1924, and the same was presented to the club by Paul H. King, then district governor of this district.

Rotarian Dr. Ed. Lee of Wayne, was the governor's special representative, to organize the Rotary Club of Plymouth. The number of the charter of the club is 1677, and at the time of organization it had twenty-three charter members.

The following names compose the charter members of the Rotary Club of Plymouth: George A. Smith, Edward C. Hough, Wm. Wood, Sidney D. Strong, Frank Rambo, Otto Beyer, Fred D. Schrader, Edgar K. Bennett, Fred A. Dibble, Charles M. Mather, Jesse Hake, Carl G. Shear, Harry S. Lee, Calvin Whipple, Dr. R. E. Cooper, Roy R. Parrott, Dr. B. E. Champe, Lawrence B. Sanmen, Paul J. Wiedman, Harry R. Lush, John S. Dayton, Harry C. Robinson and Wm. T. Pettigill.

A RARE CLOCK.

While in New Orleans recently, E. C. Hough had the good fortune to purchase a clock of which there are probably very few remaining in this country. It is a copy of an ancient Greek Clepsydra or water clock made in the year of 1700. It is a real curiosity and probably very few of our citizens have ever seen one. It is on exhibition at the Plymouth United Savings bank and is attracting a great deal of attention.

WATCH FOR THEM.

Within a short time Plymouth citizens who are lucky enough to handle paper money will find themselves in possession of bills of a new size. They will be smaller than the present ones, and since denominations of both sizes will be in circulation for awhile, some confusion may result. But this will be short-lived, and probably by the first of the year we will be so accustomed to the newer and smaller bills that we will have forgotten we once used a larger size. They won't buy any more, unfortunately, than the kind we are now always reaching for. But Uncle Sam is going to save \$2,000,000 yearly in paper. And that is worth while, since it's our money he has to spend in printing more money. But the new size is on the way and our advice to the thrifty is to keep a close watch for them—and get hold of all of them you possibly can.

ANOTHER WORRY VANISHES

Quite a few western newspapers have recently issued editions on paper made of cornstalks. Already one large plant has been established for making paper of this waste material, and since it is said to be of good quality, and can be produced at a satisfactory price as compared with the cost of ordinary wood-pulp paper, it looks like "farm relief" from an unexpected source. On top of that comes a report that the slash-pine areas of the south are being drawn on for paper material, and are meeting every test. With this country able to utilize the millions of tons of cornstalks that come on every season, and the vast supply of slash-pine the south is able to furnish, it appears that Canada's stranglehold on the wood-pulp industry is going to be broken. Not only that, but it looks as though the fellows who have been worrying for fear raw material for the manufacture of paper would soon give out are going to have to hunt up something else to worry about.

SPARE THE FROGS!

It is quite noticeable to those around Plymouth who take motor trips and "camp out" that mosquitoes have increased greatly in numbers in the past few years. This is attributed to so many empty cans being thrown out as breeding places, and to the slaying of frogs. It is to be observed that, even though the water may be stagnant, there are no mosquitoes around ponds well stocked with frogs to eat the larvae of the young mosquitoes. Frogs are a great food delicacy and they bring a fancy price on the big city markets; but they are worth far more as mosquito exterminators, since the mosquito is a carrier of deadly disease. It is well to consider the value of the frog from this standpoint before slaying them. It would also be a good idea for campers addicted to tossing tin cans around to also aid in the extermination of mosquito hordes by puncturing the bottoms of the cans so they will not hold water, or by burying them.

SPREADING A BLESSING

Newspaper reports that some of the biggest electric companies in the nation are linking their lines together and expect eventually to form a complete network covering the entire country, with each city power plant acting as a sub-station, means more to the residents of small towns and rural communities than one is able to grasp at a glance.

There is no question but electricity has done more for the farms of the

Municipal Notes

BY THE MANAGER

As a result of the general clean-up in the village last week, a total of sixty truck loads of rubbish was collected by village trucks and conveyed to the dump. This makes a very good start; but this work must be followed by the removal of ashes, etc., from alleys and back yards, if we are to complete the work so well begun. Work is now well under way along Kellogg Park, where Main street is

being widened and the curb straightened. The completion of this job will materially improve the appearance of both the park and the business section. At the last meeting of the commission, it was voted to remove the band stand, at the park, which is rapidly going to pieces. When all of the proposed improvements have been completed, Kellogg Park will be a real uptown beauty spot.

Daily Thought

The cure for all the ills and wrongs, the cares, the sorrows, and the crimes of humanity, all lie in that one word "love." It is the divine vitality that everywhere produces and restores life. To each and every one of us, it gives the power of working miracles if we will.—Lyola Maria Child.

NINE YEARS OF SUFFERING ENDED BY NEW KONJOLA

GRATEFUL MAN HAD BEEN A VICTIM OF RHEUMATISM AND STOMACH TROUBLE UNTIL NEW MEDICINE RELIEVED HIM.

MR. JOE HOCHINSKI

"Konjola surely is a wonderful medicine," said Mr. Joe Hochinski, 130 Monroe street, Saginaw. "For nine years I searched vainly for relief from stomach trouble and rheumatism. My food did not digest, gas formed and my stomach bloated. Suffering followed every meal. Rheumatism settled in my legs, hips, arms and shoulders. My poor condition worried me."

"What a pleasant surprise Konjola gave me. My stomach was corrected, food digests perfectly, and gas and bloating have vanished. Rheumatism has been relieved wonderfully, and I feel immeasurably better all over. I certainly owe a debt of gratitude to Konjola."

Konjola is sold in Plymouth at Community Pharmacy drug store and by all the best druggists in all towns throughout this entire section.

ESSEX THE CHALLENGER

these important things
CHALLENGE TOO!

Hear the radio program of the "Hudson-Essex Challengers" every Friday evening

EASE OF BUYING

FOR INSTANCE, in this city your first payment, with your present car included, may be as low as \$290 and your monthly payments \$34.65

Your present car will probably cover the entire first payment. The H. M. C. Purchase Plan offers the lowest terms available on the balance.

EASE OF OWNING

On our own streets Essex the Challenger, under competent observation, averages 19 miles per gallon. The average owner in this city can expect 18 to 20 miles and upward. Commercial users operating large fleets of Essex cars say that service and maintenance costs, covering millions of miles of operation, are lowest of any car ever tested.

ESSEX challenges the performance, the style, the luxurious roomy comfort of any car at any price, on the basis that no other gives you back so much for every dollar you put in.

That is why the big buying swing is to Essex. That is why motorists by thousands are switching from past favorites,

and trading in their old cars for the big values Essex the Challenger gives. Essex challenges:

IN SPEED—challenging anything the road offers up to 70 miles an hour. IN FAST GETAWAY—any car regardless of size or price. IN RELIABILITY—60 miles an hour for hour after hour.

Essex offers a completeness of fine car equipment formerly identified only with costly cars, and available, when at all, only as "extras," at extra cost on cars of Essex price.

Check these items when you buy—they represent easily above \$100 additional value in Essex.

Wide Choice of Colors at No Extra Cost. The variety is so great you have almost individual distinction

Standard Equipment Includes: 4 hydraulic shock absorbers—electric gauge for gas and oil—radiator shutters—saddle lamps—windshield wiper—glare proof rear view mirror—electro-lock—controls on steering wheel—all bright parts chromed-plated.

NEWBURG

Preaching service at 11:00 a. m. Sunday-school at 12:00. Epworth League at 7:00 p. m. All invited to these services.

In last Sunday's bulletin, there were some very interesting things about China, India and Africa, that ought to awaken a missionary spirit.

The speaker chosen by the L. A. S. for last Sunday evening, F. P. Leckliter of Detroit, gave a fine temperance talk with excerpts from President Hoover's speech. There was special music by some of the L. A. S. ladies. This will conclude the evening meetings.

Mrs. Ada LeVan visited Mrs. I. Gansolly, last week, and also attended church service at Newburg.

Mrs. Ann Farwell is on the sick list. Miss Emma Arnold is caring for her.

Mrs. Bessie Dunning, Mrs. Taft, Mr. and Mrs. Nat Ryder, Mr. and Mrs. Earl Ryder of Plymouth, and Mr. and Mrs. Frank Ryder and son, Bert of Salem, called at the Ryder homestead Saturday afternoon.

Mr. and Mrs. Wm. Farley of Plymouth, and Mr. and Mrs. Harry Armstrong of Strathmoor, called on C. E. Ryder, Sunday, finding him about the same.

A baby girl arrived at the home of Mr. and Mrs. Leon Merriman, last week Friday.

Mr. and Mrs. Edgar Stevens helped the latter's mother, Mrs. Ransom Lewis, to celebrate her birthday, at her home in Chelsea, Sunday.

Raymond, Ryder of Chicago, came last Thursday to see his father, who is seriously ill. He returned home Sunday.

Mrs. Foster, a former resident, called on Mrs. Clark Mackinder, last week.

Mr. and Mrs. Will Pierson and Mrs. Belva Brown and daughter, Glena, of St. John's, spent Wednesday and Thursday with Mr. and Mrs. Wm. Smith.

Mr. and Mrs. Wm Smith visited their cousin, Mrs. Henry Ebert in Detroit, Tuesday.

Week-end callers at Mr. and Mrs. George Oldenburg's: Mrs. John Jayska and children of Farmington; Mr. and Mrs. Peter Geerling and children of Detroit; Charles Oldenburg of Dearborn; Mr. and Mrs. Walter Ebert, Mrs. Fred Beyer, Mrs. Otto Beyer and daughter, Elizabeth; Mr. and Mrs. Floyd Miller, Mr. and Mrs. Frank Oldenburg, Mr. and Mrs. George Oldenburg and children, Mrs. A. L. Wolfe, John Carr and daughter, Marabelle, Mr. and Mrs. Ralph Carr, Mr. and Mrs. Lee McConnell and son, all of Plymouth; Mr. and Mrs. D. D. Himes and sons of Wixom, and Rev. Oscar J. Peters of Wayne.

Mrs. Minnie Tallman of Detroit, who has been helping take care of her mother, Mrs. John Oldenburg, returned home Saturday.

Mrs. John Oldenburg, who has been sick at the home of her son, George, the past four months, continues about the same.

F. C. Donovan and sons, Richard and Robert, spent Saturday at the farm, getting ready for spring planting.

NEWBURG SCHOOL NOTES

Alice Bakewell

Many of our boys and girls went to Dearborn to celebrate Wayne County Achievement day. Geraldine Schmidt won first place in third grade sewing, third place in style show, and third place in judging. Alice Bakewell won second place in first year sewing, and Clarence Levandowski won second place in handicraft. We are very proud of them.

We are looking forward to May Day, when awards will be given for health work done during the year. It will be held in our school, May 10. We are planning a short program, and hope many of the parents will be with us.

Miss Reid came Monday. She told us that our badges for posture, weight and teeth will be awarded to those who have earned them. Effort badges will be given to those who have tried but did not win.

Miss Reid gave us gold stars for health and hygiene and lunch.

Last month our honor roll was as follows: David Gates, Mary Greaver, Elizabeth Stevens, Dorothy Hearn, Donald Schmidt, Doris Schmidt, Edmund Zielasko and Gerald Cook.

Those who deserve honorable mention, were: Howard Holmes, Lionel Coffin, Wesley Bakewell, George DeJay and Wilma Johnson.

These boys and girls had a perfect attendance record: Donald Schmidt, Corless Allen, Berdina Ballen, Dorothy Schmidt, Elton Bakewell, Edward Bassett, Evelyn McMullen, Francis Scheffer, Wesley Bakewell, Lionel Coffin, Howard Holmes and Gerald Cook.

The primary grades are working on a very interesting project in nutrition. Miss Reid visited our room Monday, and presented us with two gold stars—one for work done in health and hygiene and one for well selected lunches.

Earl Merriman is a proud little boy this week. He has a new baby sister.

Positively Obnoxious

A disagreeable braggart is the fellow who insists that he suffered more with his cold than you do with yours. —Danbury Evening News.

PERRINSVILLE

The play, "Clubbing Your Husband" was well attended, and was a laugh from beginning to end.

Clinton Baehr and mother went to Dearborn, Wednesday night, to see "Able's Irish Rose."

Mrs. Hildred Hjerpe and children spent Sunday at George Buehr's.

Mrs. Wm. Shunk has returned home after spending the winter in Detroit. Clinton Baehr, Sarah Cutler and Ethel Bassett attended the league convention at Manchester, Friday and Saturday.

Burma's Wooden Anchors

From time immemorial the Burmese have employed the wood of Albu baxifolia, a variety of ironwood, for making anchors for their large boats. The wood is dark, hard and very dense, so much so that it readily sinks in water. And as this is what an anchor should do, and it is always cheaper to cut down a tree than smelt iron from the ore, we must applaud the intelligent Burmese practice.

EATS BIG STEAK AND FRIED ONIONS—NO GAS

"Every time I ate I had terrible stomach gas. Now, thanks to Adlerika, I eat steak and fried onions and feel fine." —Mrs. J. Julian.

Just ONE spoonful Adlerika relieves gas and that bloated feeling so that you can eat and sleep well. Acts on BOTH upper and lower bowel and removes old waste matter you never thought was there. No matter what you have tried for your stomach and bowels, Adlerika will surprise you! Beyer Pharmacy and Dodge Drug Co.

Firestone TRACTION MAY SAVE YOUR LIFE

Right now—your car has to hold the road in the worst driving months of the year. You need the sharp-edged, deep-grooved, road-holding grip of the greatest safety tire ever built—Firestone's "Non-Skid" in world-wide mountain climates and unobstructed runs. This tread has proved its safety and toughness. One look shows you that Firestone has the most gripping edges of any tread you ever saw. It's worth many times the cost of a new set of Firestones to feel the safety of this famous tread beneath you. They give the greatest mileage ever built into a tire. See us!

4-H OBSERVE ACHIEVEMENT DAY

(Continued from Page One.)

leaders from Michigan State College. Judging and demonstration contests for clothing girls were held in the morning. Other activities of the forenoon, were the health contest for club members conducted by the Wayne County Nurses and Dr. McFarvey of Dearborn, style show practice for the local club style champions, the music memory contest for 4-11 members and games led by Coach McIntyre of the Dearborn schools, for the entire group not otherwise occupied.

At noon the ladies of the Methodist Episcopal church served a very nice luncheon to the club leaders and friends present. Miss Beatrice McManus directing the high school or- chestra, provided several musical se- lections that added pleasure to the occasion.

The afternoon program opened about 1:30, with Ewel Roberts of Stark school, acting as chairman. The following program was enjoyed by nearly five hundred club folks:

Th Four Leaf Clover song, led by Miss Clara E. Starr, music supervisor of Detroit schools, pianist, Miss Lueta West, Ypsilanti; club pledge group; Welcome—Supt. Ray Adams of the Dearborn schools; Response—Ewel Roberts; By the Waters of Minnetonka—Miss Helen Dolman, Ypsilanti, accompanist, Miss Evelyn Frisk, Detroit; Negro Spirituals—Boys' Glee Club, Lincoln school, Detroit, leader, Miss Mary Wood; Glee songs—led by Miss Clara E. Starr; Health Results—Miss Georgina Reid, in charge; Music contest, Hot Lunch certificates—Miss Lois Corbett, home demonstration agent; Style show—4-H girls; Results of Girls' Clubs—Miss Lola Belle Green, assistant state club leader; Results of Boys' Clubs—Novels Pearson, assistant state club leader; Honor certificates—County leaders; Club summaries—Ralph Carr, County Agricultural agent.

The musical entertainment completed in a very nice way the music appreciation project of American music used in Wayne county this year. Miss Helen Dolman of Ypsilanti, accompanist by Miss Evelyn Frisk with the visitor of music in Detroit schools, com- posed numbers. The Boys' Glee Club of Lincoln school, Detroit, led by Miss Mary Wood, sang a delightful selec- tion of negro songs, followed by some of their own rhythmic interpretations. With the additional attraction of col- ored slides, Miss Clara Starr, super- visor of music in Detroit schools, con- ducted the two club songs, written by Miss Fannie Buchanan, "The Plo- wing Song" for boys, and "Dreaming" for girls.

Another event which commanded a great deal of interest from the audi- ence was the style show, when thirty- four girls from as many schools walk- ed across the stage, wearing the dress- es they had made. Careful grooming, good posture and simplicity of man- ner added much to the attractiveness of these girls.

The results of the various activities were as follows: Health—Margaret Tuck, Geo. H. Fisher school; Beatrice Wengit, Stark school. Music—Of the eighty contestants, two perfect scores fell to Elaine Evans of Geo. H. Fisher school, and Ethel VanHouten of Smithville school. A final test deter- mined Elaine Evans the winner. Hot Lunch—First place, Cory school; second place, Stark school; third place, Garden city. Style show—First, Mar- garet Holcomb, Kington; second, Mar- garet Hargrave, Cory; third, Gera- ldine Schmidt, Newburg; Surenna Steve, Taylor Center; Honorable men- tion, Mary Mettetal, Hough; Irene Smith, Perrinville; Emily Petoskey, George H. Fisher, Vera Wilkie, Cherry Hill; Dorothy Chizmar, Bone; Ellen Frank, Eureka. Clothing project—First year—first place, Esther Mc- Murtry, Cory; second place, Alice Bakewell, Newburg, third, Harriet Thilston, Hough; Second Year—first place, Vera Wilkie, Cherry Hill; second place, June Newton, Denton; third place, Eugenia Chaney, Taylor Center; fourth place, Madge Smith, Per- rinville; Third Year—first place, Ger- aldine Schmidt, Newburg; second place, Hazel Hunt, Edgewood; fourth year—first place, Betty Burrell, Cherry Hill.

Clothing judging contest—first place team, Surenna Steve, Taylor Center, Eugenia Charney, Taylor Center. Clothing demonstration contest—first place team, Jennie Zbikowski, Texas; Violet Waechter, Texas. Handicraft—First year, first place, Everett A. Webster, Hale; second place, Clarence Levandowski, Newburg; third place, Louis Bakos, Sheldon; second year—first place, Ralph Kropp, Garden City; second place, William Wolfram, Elm; third place, John Thomas, Brainard; third year—first place, Ewel Roberts, Stark; second place, Steve Tatro, Garden City; third place, Edmund New- ton, Denton. 6c

Honor certificates were presented to

the following leaders and schools for a 100% record of finishers: Clothing—Miss Viola Hargrave, Newburg; Mrs. Nellie Jewell, Taylor Center; Mrs. Luella Leonard, Eureka. Music—Miss Gladys McKee, Kington; Miss Rhuea Morgan, Cady; Mrs. Cleo Parsons, Gibraltar; Mrs. John Root, Cherry Hill; Mrs. Frances Schofield, Sheldon; Mrs. John Snyder, Mrs. Faye Sweet, Perrinville; Mrs. Charles Post, Hale; Miss Millie Coughlin, Texas; Miss Viola Garlick, Smithville. Handicraft—Miss Mae Elden, Allen; Miss Rhuea Morgan, Cady; Fred Pierce, Corey; Miss Wanda Bates, Eureka. Mrs. Arlene Plunkel, Miss Hazel Reddeman, Fisher; Miss Lucille Webster, Hale; Miss Sylvia Golin, Hale; Miss Gladys McKee, Kin- gton; Miss Meryl Babel, Newburg; Mrs. Faye Sweet, Perrinville; Miss Viola Garlick, Smithville; Miss Wilhelmina Johnson, Stark; Miss Ellen Emerson, Ypsilanti; Miss Ruth Elden, Deckay; Mrs. Alice McClumpha, Hough; Miss Cora Hicks, Texas.

Chief of Police George Springer and Officer Fred Stanibly arrested a man giving his name as Kenneth Gladwin alias James Stanley, alias George Roberts, at Brightmoor, Thursday morning about four o'clock, driving a Nash car which had been stolen at Lansing, Kansas. The prisoner was turned over to a United States Mar- shal, who came for him yesterday af- ternoon.

World War Hero Dog Still Wire-Fence Shy

Ware, Mass.—Behind the be- whiskered, quizzical face of Captain, veteran war dog, lurk memories of ravaged battlefields that ten years of peace have ap- parently left untouched.

Cap, as his owner, Dennis E. Shea, state game warden, calls him, is a wire-haired grizzle, and a native of France. Cap is more than thirteen years old.

He escorts members of his family to store or church or theater—but does not enter. And he returns afterward to see them home. All this Cap has learned, but he has never learned to forget the war. The horror of barbed wire and gas masks is still upon him.

Although barbed wire is used hereabouts only to confine dairy cattle, Cap refuses to go near a wire fence. He still associates them with sudden death.

A CARD—Palmer and Ursula Hart- ough gratefully acknowledge the kind sympathy and assistance of their many friends in their late bereave- ment.

A CARD—We wish to thank the friends and neighbors for the many acts of kindness shown Lynn E. Bron- son, while at Harper hospital. We also wish to thank them for the kind- ness and sympathy shown at the time of his death. Especially do we thank those who sent the beautiful flowers, those who furnished cars, Rev. Nichol for his consoling words, and the Whip- ple brothers for the beautiful songs.

Mrs. Hester Peterhaus and Daughters.

ARTHUR E. WHIPPLE, Attorney 3261 Barlow Tower 150568

STATE OF MICHIGAN, County of Wayne, SS: At a session of the Probate Court for said County of Wayne, held at the Probate Court Room in the City of Detroit, on the twenty- ninth day of April in the year one thousand nine hundred and twenty-nine.

Present HENRY S. HULBERT, Judge of Probate. In the Matter of the Estate of LYNN E. BRONSON, Deceased. An instrument in writing purporting to be the last will and testament of said deceased having been delivered into this Court for Probate.

It is ordered, That the fifth day of June next at ten o'clock in the forenoon at said Court Room be appointed for Proving said instrument. And it is further Ordered, That a copy of this order be published three successive weeks previous to said time of hearing in the Plym- outh Mail, a newspaper printed and circulated in said County of Wayne.

HENRY S. HULBERT, Judge of Probate. (A True Copy) THEODORE J. BROWN, Deputy Probate Register.

A STONE-SET RING for HIM
—What more appreciated gift could there be

SLIP one of these very beautiful yet masculine stone-set rings on his finger—see the glint of satisfaction in his eyes. Yes, men have vanity, too, but then this type of ring is all the vogue just now—for husband, sweetheart, brother, son.

The stones are cubic, rose, brilliant in their coloring, diversified. And the designing of these rings is along the very latest popular lines. We can recommend W. W. W. stone-set rings, for their manufacturer is sufficiently proud and sure of them to accompany them with—A GUARANTEE.

Elmer Kephart of Bloomfield Hills, spent Monday with his uncle and aunt, Mr. and Mrs. Byron Wilkin.

Mr. and Mrs. Francis Wilkin and son, Wallace, of Onstead, spent Sunday with Mr. and Mrs. Byron Wilkin.

Mr. and Mrs. George Wilcox entertained a small company of friends Tuesday evening, at dinner, after which bridge furnished the entertainment of the evening.

Mr. and Mrs. J. L. Johnson entertained a company of Plymouth and Northville friends at a dinner, at their home on Penniman avenue, Tuesday evening. The evening was pleasantly passed with five hundred.

We want to congratulate Raymond Levandowski for his success in getting a position as junior accountant with the Union Trust Co., of Detroit, and we hope that Raymond continues to do good work, as he is capable of doing.

The Pythian Sisters of Plymouth Temple No. 84, will hold the annual district convention, May 7, at Pythian Hall, 355 West Ann Arbor Street. Morning session will begin at 10:00. Dinner will be served at noon, at the Methodist church.

George H. Robinson has sold to Mr. and Mrs. Dick Fisher, the house and lot in Robinson Subdivision recently vacated by Wm. R. Meuder and family, who have moved to Detroit. Mr. Fisher's daughter and husband will occupy their present home.

South Plymouth Home Economics class will hold their last meeting of this season, Monday, May 6, at 1:30 o'clock, at the home of Mrs. George Kramer, 443 North Harvey street. We hope all members will be present, so we may be able to complete our studies.

Mrs. O. F. Mickle of Leamington, Ontario, and Mrs. Jack Flaherty of Seattle, Washington, spent Wednesday with their aunt, Mrs. H. C. Anderson, and cousin, Mrs. George H. Robinson, Mrs. Mickle remaining for a few days' visit before going to Seattle to spend the summer.

Thirty-five ladies attended the Thimble Party in the basement of the Lutheran church given by Mrs. Streng, Mrs. Springer and Mrs. Sage. After the business meeting, a social hour was enjoyed and a delicious lunch was served. At the close of the meeting, Mrs. Jacob Streng was presented with a gift, the occasion being her wedding anniversary.

Have you purchased your ticket to the Musicales tonight?

Mrs. Florence Webber is visiting at the home of her daughter in Royal Oak.

Mrs. Clark Mackinder, of Newburg, spent Tuesday afternoon with Mrs. C. V. Chambers.

Mr. and Mrs. Scott Jenkins and son Billy, of Detroit, were Sunday guests of Mr. and Mrs. William Powell.

A number of Plymouth Rotarians have been attending the district convention being held in Detroit this week.

Mr. and Mrs. Lloyd Fillmore and son Wellman, were Sunday guests of Mr. and Mrs. Russell Thompson, in Detroit.

The L. A. S. of Livonia will hold their meeting at the home of Mrs. Leo Fendt, Wednesday, May 8. Everyone welcome.

Mrs. J. Miller, Mrs. H. H. Hunt and son of Detroit, Mrs. M. Newell, of Plymouth, were very pleasantly entertained Wednesday at a noonday luncheon at the home of Mrs. Frank Tillerson of North Harvey street.

Local News

George H. Robinson is serving on circuit court jury for the May term.

J. E. Kaper returned Saturday, from a business trip through Kentucky, Missouri and Alabama.

Miss Grace Newton of Grand Rapids, is a guest of Miss Lina Durfee and Mrs. Sarah Armstrong.

Mr. and Mrs. B. J. Holcomb of Chicago, were Plymouth visitors last week Wednesday and Thursday.

Mr. and Mrs. Alton Orvis of Chicago, Illinois, have been visiting Mr. and Mrs. C. H. Rauch, this week.

Mrs. A. J. Kincaide and nephew, Glen Kincaide, of Montgomery, West Virginia, are spending two weeks in the home of the late Mrs. T. P. Sherman.

The Infant Welfare Clinic will be held in the kindergarten room at the high school, Wednesday, May 8. The mothers who have no way of transportation will be called for if they call 489M or 178J.

Rev. Dr. F. A. Lendrum addressed the local Kiwanis Club last Tuesday noon, on the national immigration problem. The doctor has made an exhaustive study of this problem, and his views on the subject provided a most interesting half hour. Kiwanian Russell Roe, introduced the speaker.

Mrs. H. A. Spicer received a most interesting letter this week, from Louisiana, from her granddaughter, Mrs. Hays Powless, who with her husband and party, left Detroit April 1st, for an extended automobile trip. They went to Washington, D. C., and thence down the coast to St. Augustine, across and up the west coast of Florida to Louisiana, and will continue through the states of the south, west and southwest, visiting all points of interest in a leisurely manner, and will return home in September.

Those from out of town who attended the funeral of Lynn E. Bronson, were: George and Fred Reese of Milan; Mrs. Austin White of Salline; Mrs. Samuel Ableson and daughter, Madeline, Mr. and Mrs. Clarence Bullock, Mr. and Mrs. George Tyre and Mrs. Sarah Herr, Mr. and Mrs. Hermann Eichler, Mr. and Mrs. Charles Miller, Mr. and Mrs. Wm. Hines, Arthur Whipple, Mrs. George Grabble and Mr. Mellon, all of Detroit; Mrs. Eva Peterhans and Miss Ruth Slater of Redford, and Mrs. Harold Merithew, Mrs. Fred Gotts and Mrs. Ada Johnson of Northville, and Mr. and Mrs. Paul Lee of Howell.

Christian Science Notes

"Probation after Death" was the subject of the Lesson-Sermon in all Christian Science Churches on Sunday, April 28.

Among the citations which comprise the Lesson-Sermon was the following from the Bible: "That ye put off concerning the former conversation the old man, which is corrupt according to the deceitful lusts; And that ye put on the new man, which after God is created in righteousness and true holiness" (Eph. 4: 22, 24).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "The sin and error which possess us at the instant of death do not cease at that moment, but endure until the death of these errors. To be wholly spiritual, man must be sinless, and he becomes thus only when he reaches perfection." (P. 290.)

CATHOLIC NOTES

Sunday is the first Sunday in May. Report Sunday.

May 12, Sunday night, the Rev. C. Ulenberg, of Grandale, will bring his entertainers to our auditorium, and present a snappy three-act comedy, "Applesauce." All are invited to join in for an evening of fun.

May 12 is Mothers' Day. Flowers for the altar will be appreciated in memory of Mother.

The Nethem team won their ball game last Sunday against the local Merchants team by a score of 10 to 4. Next Sunday the Nethem boys play the fast St. Francis team from Detroit, at Newburg.

Do not forget to send your children to instruction Saturday at 9:30 a. m.

Have you purchased a lot in Holy Sepulcher cemetery? Now is your opportunity to make provisions for that moment that comes to all.

EPISCOPAL NOTES

The regular, first Sunday in the month, celebration of the Holy communion, will be held this Sunday.

Thursday of next week, May 9, is the Feast of the Ascension of Our Lord.

Have you seen the splendid work which was done in cleaning the church last week? Those who helped to do this worked hard and deserve a great deal of credit and appreciation.

Next Sunday, May 12, the annual presentation service for the children's Lenten offering and the birthday thank offering will be held at St. Paul's Cathedral, Detroit, at 4:00 p. m. We hope that many of the children of the church-school will plan to attend this service. We call for volunteers who will drive down and take a few kiddies with them. This is always a great service, attended by all the schools in the Detroit area.

BAPTIST NOTES

A very interesting and instructive service was held Sunday evening by the young people of Highland Park, known as "The League of Nations." There were about twenty-five in the company, and fourteen different nations were represented. Each gave their testimony and a verse of scripture in their native tongue. Special musical features consisting of solos, duets, quartets and string instruments were enjoyed by all.

Sunday, May 12, the young people of Wayne will have charge of the young people's service. The purpose of their coming is to present the program of the national B. Y. P. U. convention, which is to be held in Detroit in June. Young people will gather there from all over the United States. It is hoped that there shall be 10,000 young people to represent the various unions from every state in the Union and Canada. Every member of our union is urged to be present.

PRESBYTERIAN NOTES.

The Woman's Auxiliary will hold its May meeting on Wednesday of next week, at 2:30 o'clock. The May division will serve refreshments, and there will be an interesting program. Robert Champie will sing an Indian song, and the Camp Fire Girls from the high school, under the direction of Mrs. Stevens as guardian, will present a ceremonial.

The Busy Women's Bible Class meets on Tuesday, May 8th, at the home of Mrs. J. Renwick, 1224 Ann Arbor street, west. Mrs. Renwick and Mrs. Tillotson will be joint hostesses. There will be the usual pot-luck Monday meal, with business and program meeting following.

The Presbyterian people, particularly the women, have been rejoicing over a fine tile linoleum placed in the church entry, the gift of Schrader Brothers. This is much appreciated by all.

METHODIST NOTES

"O Lord, my God, in Thee do I put my trust."

Tomorrow, Saturday, the junior missionary boys and girls will hold a bake sale at the Wolf store, beginning at 1:00 p. m. Each member is requested to bring some kind of baked goods. We will have pies, cakes, cookies, etc.

The Sunday-school children should note that Sunday-school begins at 11:30, instead of 11:45. Next Sunday being the first Sunday in May, we will have a short program in the general assembly, beginning at 11:30 a. m.

On Wednesday, May 8th, the missionary society will meet at the home of Mrs. Fred Lee, corner of Ann Arbor and Harvey streets. Mrs. Nash will have the devotions, and Mrs. Towle and Mrs. Whitney will have charge of the program, the subject being, "Unwrap Thy Talents." A co-operative luncheon will be served at 12:30, with Mrs. Terry and Mrs. Gould in charge. The women of the church are cordially invited to meet with us.

On Wednesday evening, from 7:15 to 8:00, is our mid-week study-worship period. This is a delightful and inspiring hour, and everyone is welcome to join with us.

Mrs. Wm. Hood entertained the Philathea class at her home, Thursday evening. There were twenty-one members present, and after the usual business session, the following officers were installed for the ensuing year: President, Mrs. Wm. Tait; vice-president, Mrs. Wellman; secretary-treasurer, Mrs. Wm. Farley; teacher, Mrs. I. N. Dickerson; assistant teacher, Mrs. Levi Clemens. A social session followed, and the ladies enjoyed a bible contest which was planned by the committee. Fruit and wafers were served. The next meeting of the class will be held at the home of Mrs. Fred Wolfrom, May 16.

Everyone who enjoys a good entertainment, should plan to see "A Tourist Romance," on Friday evening, May 17th.

All who were present Sunday night, enjoyed the service conducted by the Girl Reserves and H-Y boys.

We should all plan to write to or visit our mothers on Sunday, May 12.

Outlawed Debt?

We owe a great deal to the Pilgrim Fathers, says a Boston editor. All right, let 'em sue.—Crouse, in New York Post.

COMMISSIONER'S NOTICE.

148816
In the Matter of the Estate of DANIEL A. JOLLIFFE (D. JOLLIFFE) Deceased.

We, the undersigned, having been appointed by the Probate Court for the County of Wayne, State of Michigan, Commissioners to receive, examine and adjust all claims and demands of all persons against said deceased, do hereby give notice that we will meet at the Plymouth United Savings Bank, Plymouth, Wayne County, Michigan, in said County, on Tuesday the 18th day of June A. D. 1929, and on Saturday the 17th day of August A. D. 1929, at two o'clock P. M. of each of said days, for the purpose of examining and allowing said claims, and that four months from the 18th day of April A. D. 1929, were allowed by said Court for creditors to present their claims to us for examination and allowance.
Dated April 18, 1929.

ERNEST J. ALLISON,
WILLIAM J. STURGIS,
Commissioners.

**Modern Factory Light
"Better Than Daylight"**

Discussing low automobile production cost, Herbert Chase, writing in the April issue of the S. A. E. Journal, states that interest and depreciation charges continue to accumulate whether production machines are running or idle. Hence it is a recognized fact, but one too often lost sight of, that it pays to keep machines producing 24 hours per day.

This is not overlooked in the Ford plants, he says. It is characteristic of the Ford organization, as of many other progressive concerns, that it does not allow such variables as weather or time of day to interfere with the steady march of production. Daylight, for example, though employed when available and where its use fits in with the production program, is not a primary consideration.

There is no cramping of the program to make it conform to the vagaries of weather. Neither is there a moment's hesitation in building multiple-story structures because a single-story saw-tooth-roof building once was supposed to bring "ideal" lighting conditions for a part of each 24 hours. Ford buildings are designed to conform to production requirements, and provision then is made to assure adequate and good-seeing light without regard to weather, season, or time of day. The perfection of modern lighting-systems has made this policy possible and highly successful.

It is a noteworthy fact, for which physicists and illuminating engineers must be given credit, that they have not been content with providing illumination as good as daylight, but actually have produced light which gives better seeing characteristics. Mr. Chase refers to light composed chiefly of green and yellow rays which are highest in visual value and, because of their relatively low energy content as compared with red rays so prominent in daylight, are easiest on the eyes.

The Ford company is among the oldest and largest users of mercury vapor light in which green and yellow predominate while orange and red are absent.

the American merchant marine. The board, therefore, has a special interest in the design of these vessels and their safety and seaworthiness.

Building at Low Ebb.

American shipbuilding now is at low ebb, according to the Department of Commerce. Merchant ships under construction in American yards now constitute only 2 per cent of current world shipbuilding. This is the last country on the list of maritime nations in new construction. England, of course, stands first and Germany second. These are our two principal competitors in the foreign trade. Then come Holland, France, Japan, Sweden, Russia, Italy and Denmark in the order named. So it is expected that demand will soon bring about a spurt in American shipbuilding. Government officials as well as private owners are anxious that the new ships constructed be safe.

The havoc wrought by wind at sea is great even on steam liners. Wind pressure is a tremendous force. But the waves which toss a vessel about, twist and strain her plates and exert tremendous pressure upon her basic structure are the arch enemies.

A small vessel, while more readily capsized or swamped by heavy seas, is not subject to the same strain as a large liner. The longer the ship, the greater the strain placed upon her.

Let us take the Atlantic, which is the lushest of the oceans in which American ships ply. In such a storm as may be expected at this season, the crests of the waves are some 300 yards apart. The waves average about forty feet high or as high as a three or four story house. A small ship glides up and down these swells with comparative ease if she is well constructed, not overloaded and properly handled. Her pitch will be such as to cause discomfort to landlubbers because she will climb hills of water comparable to a 10 per cent grade on land. Now take a larger ship, say one 500 or 600 feet in length. Her nose will be on the crest while her stern is in the trough. Therefore the steepness of the climb is much less, only about 5 per cent on an average. Proceeding to the big liner, she is long enough to bridge the trough, her bow on one crest and her stern on the other.

Hogging and Sagging.

It is the great liner which feels the most intense strain. It will be seen that a ship becomes a bridge from crest to crest. Bow and stern have plenty of water around them acting as supports, but there is very little water beneath the middle of the ship, not enough to float her. So, then, there is a terrific downward pressure amidships. The ship must be constructed, or this reason, as strongly as a bridge over a stream to counteract this sagging.

Again, as the liner proceeds her middle is upborne by one of the huge crests, while bow and stern are unsupported. In some cases being entirely out of water. Then the pressure is upward in the middle, with downward pressure at either end. This is called hogging. Either pressure will break a ship's back. Therefore, such a ship must be built like a truss bridge across a stream designed to carry a heavy load, but also must be built like a bridge upside down to resist a heavy upward pressure.

Many Ships Vanish.

There are many records of complete disappearances of ships at sea. The most notable case affecting Americans has to do with the utter disappearance of the Cyclops, the great naval collier, which was in touch with the world by radio one hour and utterly gone without a trace the next. No wreckage was ever found. She had not been blown up by a German torpedo. Most naval architects believe that her back was broken by one of these stresses and she sank to the bottom instantly. Several tankers, ships of a type especially susceptible to sagging and hogging strains, have disappeared in the same manner.

Disposition of cargo is another matter which is receiving special attention. Badly disposed cargo will increase these dangerous strains and government inspectors, as well as the marine insurance companies are becoming more insistent concerning this branch of shipping.

Depth of seas makes a great difference in the length of waves. A very deep sea permits tremendous swells to form. Unless they break into combers they are not so dangerous. A ship merely has to climb one long hill and descend another. In the deep Pacific the crest of waves are half a mile high. No ship ever constructed can bridge these swells. A ship which would be seaworthy in one part of the world might not fare so well in another ocean. All these matters are receiving careful technical study and it is hoped that each year will see greater safety at sea.

PRODUCT OF GENERAL MOTORS

**Before you
buy a car it's wise
to compare with
THE NEW
PONTIAC
BIG 6**

Some people make a fundamental mistake when they go to buy a car. They receive a demonstration and they compare the new car only with the car they are about to trade. To help you avoid this mistake we have arranged a special demonstration of the New Pontiac Big Six. See the others, by all means. But see the New Pontiac Big Six, if only for the sake of comparison.

Prices \$745 to \$895, f. o. b. Pontiac, Michigan, plus delivery charges. Bumpers, spring covers and Looney shock absorbers regular equipment at slight extra cost. General Motors Time Payment Plan available at minimum rate.

Consider the delivered price as well as the list price when comparing automobile values. . . . Oakland-Pontiac delivered prices include only reasonable charges for delivery and financing.

**SEA DISASTERS
STIR INTEREST**

**Problem of Greater Safety
on the Ocean One for
Naval Architects.**

Washington. — The world of merchant shipping is attracting attention again. Congress has shown interest in the plans of the United States shipping board to sell the Atlantic fleet to private interests and a number of disasters have focused notice on the shipping business.

It seems quite likely that the winter's toll of ships is not a closed chapter for the late winter and early spring constitute a period of tempestuous weather in the north Atlantic. Then follows the iceberg season. The United States coast guard, in co-operation with other maritime nations, maintains an iceberg patrol, throughout the season during which the great ice islands come floating down on the bosom of the Labrador current to cross the ship lanes and menace navigation. Notices of the whereabouts of such bergs are radioed but fog is an enemy which renders the ship paths far from safe.

Save Safety Problems.

Much has been done, perhaps all that can be done, so far as radio utilization is concerned. Technical experts are more and more turning their attention to the ships themselves. The Vestris mystery is not a forgotten chapter, by any means. It is true that there was difficulty in locating that ship because of wrong radio bearings, but also there was something the matter with the vessel to cause her distress in the first place.

It is thought that the next important step toward safety at sea must be taken by naval architects and have to do with the construction of the vessels themselves. The highest skill already has been expended on ship construction, but still something occasionally goes wrong.

It is a little difficult for the layman to gain a full comprehension of the stresses which a ship must stand in a seaway. The forces of wind and wave are beyond ordinary reckoning. As ships have become larger in size new problems arise which ancient mariners had no cause to consider. The United States shipping board has a fund from which it makes advances to shipbuilders desiring to increase

the American merchant marine. The board, therefore, has a special interest in the design of these vessels and their safety and seaworthiness.

Building at Low Ebb.

American shipbuilding now is at low ebb, according to the Department of Commerce. Merchant ships under construction in American yards now constitute only 2 per cent of current world shipbuilding. This is the last country on the list of maritime nations in new construction. England, of course, stands first and Germany second. These are our two principal competitors in the foreign trade. Then come Holland, France, Japan, Sweden, Russia, Italy and Denmark in the order named. So it is expected that demand will soon bring about a spurt in American shipbuilding. Government officials as well as private owners are anxious that the new ships constructed be safe.

The havoc wrought by wind at sea is great even on steam liners. Wind pressure is a tremendous force. But the waves which toss a vessel about, twist and strain her plates and exert tremendous pressure upon her basic structure are the arch enemies.

A small vessel, while more readily capsized or swamped by heavy seas, is not subject to the same strain as a large liner. The longer the ship, the greater the strain placed upon her.

Let us take the Atlantic, which is the lushest of the oceans in which American ships ply. In such a storm as may be expected at this season, the crests of the waves are some 300 yards apart. The waves average about forty feet high or as high as a three or four story house. A small ship glides up and down these swells with comparative ease if she is well constructed, not overloaded and properly handled. Her pitch will be such as to cause discomfort to landlubbers because she will climb hills of water comparable to a 10 per cent grade on land. Now take a larger ship, say one 500 or 600 feet in length. Her nose will be on the crest while her stern is in the trough. Therefore the steepness of the climb is much less, only about 5 per cent on an average. Proceeding to the big liner, she is long enough to bridge the trough, her bow on one crest and her stern on the other.

Hogging and Sagging.

It is the great liner which feels the most intense strain. It will be seen that a ship becomes a bridge from crest to crest. Bow and stern have plenty of water around them acting as supports, but there is very little water beneath the middle of the ship, not enough to float her. So, then, there is a terrific downward pressure amidships. The ship must be constructed, or this reason, as strongly as a bridge over a stream to counteract this sagging.

Again, as the liner proceeds her middle is upborne by one of the huge crests, while bow and stern are unsupported. In some cases being entirely out of water. Then the pressure is upward in the middle, with downward pressure at either end. This is called hogging. Either pressure will break a ship's back. Therefore, such a ship must be built like a truss bridge across a stream designed to carry a heavy load, but also must be built like a bridge upside down to resist a heavy upward pressure.

Many Ships Vanish.

There are many records of complete disappearances of ships at sea. The most notable case affecting Americans has to do with the utter disappearance of the Cyclops, the great naval collier, which was in touch with the world by radio one hour and utterly gone without a trace the next. No wreckage was ever found. She had not been blown up by a German torpedo. Most naval architects believe that her back was broken by one of these stresses and she sank to the bottom instantly. Several tankers, ships of a type especially susceptible to sagging and hogging strains, have disappeared in the same manner.

Disposition of cargo is another matter which is receiving special attention. Badly disposed cargo will increase these dangerous strains and government inspectors, as well as the marine insurance companies are becoming more insistent concerning this branch of shipping.

Depth of seas makes a great difference in the length of waves. A very deep sea permits tremendous swells to form. Unless they break into combers they are not so dangerous. A ship merely has to climb one long hill and descend another. In the deep Pacific the crest of waves are half a mile high. No ship ever constructed can bridge these swells. A ship which would be seaworthy in one part of the world might not fare so well in another ocean. All these matters are receiving careful technical study and it is hoped that each year will see greater safety at sea.

**Buy Old Schoolhouse
Because of Its Memories**

Pittsburgh, Pa.—The axe that hovered over the old one-room Shawhan schoolhouse in Scott township has been stayed.

While the county superintendent and others looked with pride at the new four-room brick structure one man reflected upon the impending fate of the old school where he had been taught and his five children also.

So George W. Watson bought the old brick building and is having it moved a block and a half to his own property.

WATERFORD

The Get-Together club met Thursday, April 25th, with Mr. and Mrs. Howard Hunt, for pot-luck supper and progressive pot. It was the last evening meeting of the year, twenty-seven members and guests being present. Gertrude Hutchins and Howard Hunt were awarded first honors, while Ada Watson and Oliver Herriek were consoling. The Get-Together ladies will meet next with Mrs. Clarence Ebersole, Thursday afternoon, May 9.

Mrs. C. H. Ebersole entertained at luncheon and an old-fashioned quilting bee, last Friday. Mrs. A. Ebersole, Mrs. A. Higrick, Mrs. E. M. Hunt, Mrs. W. J. Markham and Mrs. R. D. Taylor.

Mary and Robert Gotts attended the Mother Jewel party Saturday afternoon, held at the M. E. church house.

Mrs. Clara Rust, of Detroit, is visiting her sister, Mrs. Clayton Cook, for a couple of weeks.

Kathryn and Donald Waterman are on the sick list.

Mr. and Mrs. Carl Wagonschutz of Plymouth, were Monday evening callers on their parents, Mr. and Mrs. Clayton Cook.

Mr. and Mrs. Arthur Johnson and children of Ypsilanti, visited their parents, Mr. and Mrs. W. H. McKereghan, Sunday.

Mrs. Jacob Warren of Northville, spent Wednesday with her daughter, Mrs. Claude Finney.

Mr. and Mrs. Nelson Molette of Marquette, have been visiting their parents, Mr. and Mrs. Clayton Cook.

Mr. and Mrs. Percy H. Gray of Detroit, were Sunday callers at the McKereghan home.

Mr. and Mrs. Claude Finney and family spent Wednesday evening at the home of Mrs. Corinne Dunbar, in Northville.

Claude Finney fractured his right hand, while at work Monday.

Mr. and Mrs. M. Llag of Detroit, spent Sunday with their sister and family, Mr. and Mrs. Elmer Perkins.

BUSINESS LOCALS

Mr. and Mrs. Jesse Hines and family spent Saturday in Detroit.

Spring work in this vicinity is progressing nicely, despite rather backward weather.

Mr. and Mrs. Gus Eschel and family of Superior township; Otto Kaiser and son, Wesley of Plymouth; Ethel Carol and Charles Kaiser, Jr., also of Superior, and Mr. and Mrs. Wm. Kaiser and daughter, Pearl, of Detroit, were Sunday visitors at the home of L. E. Kaiser.

Mr. and Mrs. Myron Sherman and two children of Northville, spent Sunday evening at the home of the latter's parents, Mr. and Mrs. J. M. Swegles.

Several from this locality attended a dance at Livonia Center, Saturday evening. All reported having a fine time.

SALEM

Wm. Baxter, 149 Union street, is now ready to do carpenter work and all kinds of repair work. 23c2p

Some more new hats just in. Yours may be in this lot. Better call and see. Mrs. C. O. Dickerson, 122 North Harvey street. 1p

The Fellowship Chapter, Order of DeMolay will put on both degrees Thursday, May 9th, at Plymouth, Banquet at 6:30; admission 75c; card party for the ladies. All master masons and their families are invited. 1c

LOCAL NEWS

The admission is 25c to the Musicale tonight.

Mrs. Warren C. Hull of Lansing, is spending the week with his sister, Miss Anna McGill.

Mr. and Mrs. J. F. Cuenat, of Detroit and Mr. and Mrs. C. V. Chambers of this place were Sunday callers at the homes of Mr. and Mrs. Melvin Guthrie and Mr. and Mrs. H. C. Schmiele, near King's Corners.

Tonight is the third annual Musicale.

Mrs. Gladys Wendt of Northville, was a Friday night guest of her aunt, Mrs. Laura Smith.

Miss Frances Anderson spent the weekend with friends in Detroit.

Mr. and Mrs. G. C. Burham and daughter, were Detroit visitors Sunday.

Mrs. Henry Whitaker and sister, Mrs. Addie Zoloman, were weekend guests of Mr. and Mrs. Clifford Crockett of Howell. They all motored to Flint, Sunday, and were dinner guests of Mr. and Mrs. Claude Sellars.

A very cordial invitation is extended to all in the community and neighboring towns, by the Ladies' Auxiliary society of Salem Congregational church, to attend their chop suey supper, in the town hall, Friday evening, May 17th. If you do not like chop suey, come anyway, as other meat instead will be served with the delicious menu. Supper starts at 5:30.

A Mother and Daughter banquet will be given May 10, at the Federated church, by the Ladies' Aid Society. Supper will be served at 8:00 o'clock. Tickets, 50c.

Miss Ruth Foreman of Detroit, and Hugh of South Lyon, were weekend guests of their parents. Sunday visitors were Miss Dorothy Foreman and friend of Detroit; Mr. and Mrs. James Dickie and Mr. and Mrs. Merrill Benwick and Meredith of South Lyon.

Mr. and Mrs. A. C. Wheeler and her mother, Mrs. Lydia Bussey of South Lyon, were Monday callers of Mr. and Mrs. Charles Stanbro.

Mr. and Mrs. Emmett Geraghy and family visited friends at Dexter, Sunday.

Mr. and Mrs. Charles Payne and Mr. and Mrs. G. C. Foreman were Friday night dinner guests of Mr and Mrs. Fred Foreman.

Mrs. Jennie Smith and Russell Gale were Sunday visitors of Mrs. Nellie Bird, at Plymouth.

Mr. and Mrs. G. D. Roberts and daughter, were Detroit shoppers, Monday.

NOTICE OF PUBLIC HEARING

Notice is hereby given that a regular meeting of the village commission is to be held at the commission chamber at the village hall, Monday, May 6, 1929, at 7:00 p. m., at which time objections will be heard to the proposed construction of a sanitary sewer in Pine street, from Wing street, a distance of one block south.

The following property is deemed to be particularly benefited by the proposed storm sewer, and is proposed to be included in the special assessment district to be assessed for same:

Parcel of land at the northeast corner of Pine and Joy streets; Lots 35 to 45 inclusive, Reiser and Stellwagen addition.

A. J. KOENIG, Village Clerk.

NOTICE TO THE PUBLIC!

In view of the serious accident which occurred when the Village fire trucks collided while enroute to a fire Monday night, which accident was directly traceable to the failure of certain motorists to give right of way to the fire trucks, it becomes necessary for the Village to strictly enforce the provisions of our traffic ordinance dealing with this situation.

Notice is therefore given that hereafter all motorists failing to give right of way to Village fire trucks or police cars, or who closely follow fire trucks to a fire, or who park their cars within a block of fire trucks on duty at a fire, may expect to be cited for violation of our traffic ordinance and to answer to the charge as in the case of any other traffic violation.

A. J. KOENIG, Village Manager.

Asks \$2,000 for White Alligator; First of Kind

Jacksonville, Fla.—Two thousand dollars for an alligator!

Those who prefer blonds will have to pay that much to W. D. Godfrey, alligator farm owner, for what he believes the only white alligator in existence—rare as the celebrated white elephant of India.

Godfrey and his taxidermist, Oscar Swol, were searching in Florida swamps for turpentine when they saw what looked like a whitewashed fence rail moving. The rail turned out to be a six foot saurian, apparently a yellowish white from trailing through a limpet.

Later, after its capture, the alligator men found they had an albino alligator—the first ever known in Florida.

An offer of \$2,000 from the London Zoo was turned down. The rank and file of dusky alligators sell for \$15 to \$20, but whoever heard of a white one?

Godfrey believes his find is seven-year old, judging by its weight, 90 pounds, and length. This is youth for an alligator, as many live for hundreds of years. The albino is said to be unusually ferocious.

Policeman No Bother to This Ohio Bandit

Cleveland, Ohio.—"So the robber held up the policeman and the drug store with the officer's own gun and escaped with \$158 in cash."

That ends the fourth chapter in the somewhat turbulent history of the Marshall Drug company during these last 28 days. Three times in a month the drug store had been robbed by the same man. The police were lured about it. They detailed Patrolman Leo Honsa to do special duty at the store.

Secretly had Honsa entered the place on his first night on duty when the familiar robber entered. He walked up to the policeman and, while Honsa was not looking, grabbed the gun from his holster.

Floating Mines Menace British Coastal Ships

London.—Mines planted during the great war remain a menace to shipping in certain areas around the British coast.

The admiralty has issued a warning to mariners against trawling where unexploded mines are known to have been sunk. It is stated that off Land's end, the south Devon coast, the Straits of Dover, the Norfolk, Yorkshire and Northumbrian coasts, the Orkneys, and the Heligoland Bight, it is probable some of the mines lying on the bottom may still be dangerous.

Different Viewpoints

Men fear old age and plan for it. Women fear old age and deny it. A man thinks of the rainy days ahead. Women look to more sunshine.—American Magazine.

WANTED—BIDS!

Sealed proposals for carpenter work will be received by Julius Porath & Son, 14501 Fullerton Ave., Detroit, Mich., for the erection of a barn at Salem, Mich., until May 8, 1929, at 10:00 a. m. Specifications and plans can be examined at above address or a deposit of five dollars (\$5.00) will be required for the return of plans in good condition. 1c

PRODUCE TRADE RANKS WITH CITY'S LARGER BUSINESS VENTURE

New Union Terminal at Fort Street and Green Avenue Scheduled For Completion July 1.

One of Detroit's biggest businesses is rarely recognized as such. So common is the merchandising of foodstuffs that not one person in a thousand gives the matter a second thought. If the groceries are delivered of time no questions are asked. Yet the transportation of fruits and vegetables comprise one of the half-dozen principal jobs of American railroads. And under construction on a 38-acre site at Fort street and Green avenue is a terminal market for the handling of foodstuffs, erected at a cost of \$5,000,000 and considered the finest project of its kind in the world.

While rail traffic in carrots and spinach, watermelons and grapes, and a dozen kindred products ranks with the volume of automobiles carried from one coast to another, Detroit has lagged in distributing its proper share of table commodities.

Local Consumption Lagged.

Detroit and the contiguous area has long been the bete noir of the produce trade, or that part of the produce trade termed the "growers." Consumption in the local market has not been within rifle range of the potential demand indicated by the population.

The reason was obvious enough. An archaic system of handling produce in the railroad yards spelled delay and consequent rising costs. Frank N. Isbey, now president of the Union Produce Terminal company, and a group of associates in the produce trade conceived the idea of a modern market, open to all shippers, railroads and buyers, which would dispose of each day's incoming goods in a few hours' time, assuring prompt sale of perishable articles at a fair price. The idea materialized in the

shape of terminal buildings and equipment which the Dwight P. Robinson company is pushing to completion with a staff of 1,300 men.

Months of preparation and investigation preceded ground-breaking for the Detroit Union Produce Terminal, which, on its completion July 1, will make possible for housewives in this city and surrounding territory within a radius of 100 miles a fresher and greater selection of foodstuffs at a lower price than now prevails.

An intimation of the magnitude of the produce business in the local field is given in an outline of the plant necessary to conduct the terminal operations. There is now being built:

Terminal Is Small City.
Building "A," 1,080 feet long and 70 feet wide, which will contain an assembly room for salesmen, a bank sales platform and fruit auction department on the first floor; offices of the terminal company, railroads, sales auditorium, 91 offices for carlot receivers, and space for brokers and telegraph companies on the second floor. Building "B," 610 feet long and 70

feet wide, which will have on the first floor a package sales platform, buyers' assembly room and lockers, and on the second floor a restaurant, clubrooms, and rooms for repacking tomatoes and washing celery.

Inspection and hold yard, with 20 tracks banking 10 covered concrete platforms, car door height, with capacity for 984 cars.

Bulk delivery tracks, with 10-foot platforms paralleled by concrete driveways 40, 60 and 100 feet wide.

Highly perishable platforms, which with bulk delivery platforms, have a capacity of 175 cars.

Fourteen acres for future expansion.

There will be a complete telephone system throughout the buildings and yards, a flood lighting system in the yards, special parking space for trucks with quarters for truck drivers, and modern overhead equipment for reeling cars.

Present Methods Obsolete.

At present buyers of produce are forced to truck their purchases away from cars, spotted many times in far away corners of the railroad yards. They are unable to properly inspect their purchases because they are bought "from the car." Delay and waste have resulted.

George V. Branch, director of the municipal bureau of markets, summarized the condition as follows:

It greatly retards the release of refrigerator cars which, in reality, are used as stores.

Since each dealer's cars cannot all be placed together, it consumes an endless amount of time on the part of his salesmen, and requires an unduly large sales force.

Buyers must spend hours running all over the yard looking at scattered cars to be sure they are getting the

The AUTOMATIC ELECTRIC IRON Has Many Advantages

THE automatic electric iron is unsurpassed in convenience for hand ironing. It is designed to give years of faithful service and make hand ironing as effortless and free from drudgery

as possible. The modern electric iron is attractive as well as serviceable. Sparkling nickel, and several models in color, make it an appliance of beauty.

Automatic heat control is a feature of the utmost value. You need no longer fear overheating; when a maximum temperature is reached, an automatic switch shuts off the current. The automatic feature relieves you of all worry, and does away with the need of continually disconnecting and reconnecting the plug.

AMERICAN BEAUTY

8.95

Convenient payments may be arranged

THE DETROIT EDISON COMPANY

right quality of produce at the right price.

New cars are opened continuously even though there are many cars of the same product with bulk broken on the tracks at the time, which results in a price depreciation of the unsold products in broken cars, slow movement of the whole mass, and a continuous stream into trade channels of old, deteriorated products to interfere with the market on good quality goods.

Because of slowness in cleaning up cars under the car-door-selling method of operation, carlot dealers cannot tell their shippers promptly what a car has sold for, and cannot make prompt remittances on consigned cars. The "buying in" at an estimated price of tag ends of cars by the dealer becomes necessary so he may not have to deny account sales too long.

With no possible regulation on the opening of new cars, prices cannot become stabilized for the day based on the amount of each product available at the time the market opens.

Since all operations are carried on out-of-doors, they are seriously affected by freezing weather and made disagreeable for all concerned in rainy weather.

So slow is the physical movement of goods due to congestion and wasted time in buying and selling that the dealers and their employees must work from 12 to 18 hours a day.

Because of these and many other factors, the overhead costs on the part of carlot dealers are so high that some relief is absolutely essential if the responsible dealers are to continue in business.

The new terminal where all cars with incoming goods will be spotted, where goods will be unpacked and displayed in plain view of buyers and sellers, and where the entire time of transfer from railroads through the terminal to the wholesaler will take but a few hours of the morning, is expected to do an annual business of \$7,000,000.—Free Press.

Wesleyan Coeds List

Qualities for Hubby

Macon, Ga.—Only one Wesleyan college senior wants to marry a minister. Most of them want to get married rather than seek careers, and a majority prefer doctors or business men "of the higher type" as their life companions.

The seniors of the old staid Methodist girl's college, answering a questionnaire about what kind of husband they want, are pretty well set on one qualification. He must love them.

One pretty girl said, "Oh—he can run a hot dog stand—anything as long as he loves me."

"It matters not, anybody will do for me—but heavens, a traveling salesman! Never," said another.

What must a husband have? He must have a sense of humor, a broad outlook, consideration, and intelligence, the seniors declared.

"If my husband plays golf, I'll divorce him," said one Georgia peach. "I already have a boy friend who plays and that is enough to last me a lifetime."

Navy Man Wins Suit

for Old Spanish Fort

San Juan, Porto Rico.—Lieutenant Commander Virgil Baker, United States navy, retired, has come back to enjoy what length he may of his 999-year lease on Fort San Gerónimo.

This tract comprises about 14 acres and a frame house erected on the site of old Spanish fortifications built in 1700.

The government brought suit on the ground that Baker, by repeated misrepresentation to the Navy department, obtained the property for his personal use.

The Supreme court recently sustained Baker, however, and the property was turned over to him.

Lays Giant Egg

Middletown, N. J.—Joseph Thomas, Jr., of West Brookville, is the possessor of a white Leghorn hen known as Princess Mary, which has laid what is believed to be the largest egg ever produced in this part of the country. The egg tips the scales at 5½ ounces.

NEW LIGHT BUICK CALLED MARQUETTE

"Marquette" will be the name of the new six cylinder motor car which the Buick Motor Company is to introduce into the lower priced field early in the summer, according to an announcement made by E. T. Strong, president and general manager.

Built by Buick, the Marquette will have the tremendous production and sales facilities of that organization at its command. Twenty-five years experience in the building of fine motor cars has placed Buick in a position to manufacture a car of unusual appeal in the lower priced field. Thousands of craftsmen, schooled over a long period of years in the art of quality car manufacturing, have been assigned the task of producing the Marquette.

In addition, the facilities of General Motors, including the research laboratories and proving ground, have been brought into play in planning the new six. The great resources of the Fisher Body Corporation also have been utilized in the development of bodies for the new car.

The intricacies of automotive engineering were given careful study in developing its mechanical parts at both the research laboratories and the Buick engineering division. The cars, in various stages of progress, were put through thousands and thousands of miles of grueling grinds at the General Motors proving grounds in order that a proven product should be offered.

Distribution of the new Marquette through the sales channels already established by Buick makes it unnecessary to pioneer in the matter of delivering the new product to purchasers.—Michigan Manufacturer.

W. C. T. U.

The Woman's Christian Temperance Union held a most enjoyable meeting Thursday, April 25, at the pleasant home of Miss Hattie Hoisington, on Union street.

The leader for the day was Mrs. Clara Patterson Todd, and the topic "The Jones Law." Excellent readings were given by the members and a carefully prepared paper by Mrs. Todd was both instructive and interesting, bringing out many points relative to the working of the Jones Law.

"The Yearly Program of the W. C. T. U. 1929-1930" was given out to the members. The book is very neat, the topics of interest, and great credit should be given the committee, Mrs. Clara Todd, Mrs. E. C. Vealey and Mrs. John Rattenbury for the carefully planned program.

At the close of the meeting, a cooperative tea was served by the committee, and the guests enjoyed a social hour while disposing of the many dainties set before them.

The next meeting will occur May 23 at the home of Mrs. Emma Ruff.

The Michigan Union of March says: Prohibition has taken a decided step forward. President Hoover becomes a great dry leader of the nation. His administration will be dry in principle and practice and appointments to government offices are not being given drinkers.

Society in Washington is falling in line with dry sentiment since it has been pointed out that Mrs. Herbert Hoover is setting an example of how American women may help in the enforcement of prohibition by refusing to take part in social functions where the prohibition law is not observed.

3,000 Pupils Rise With Sun to Save Daylight

Denton, Texas.—An experiment in "daylight saving" education will be tried this summer at North Texas State Teachers' college. More than 3,000 students will get up with the sun five mornings a week to attend classes beginning at six o'clock. Afternoons will be devoted to study and evenings to recreation. Floodlights will light up the athletic field for night sports. Movies will be shown in an open-air theater. The "daylight-saving" program was devised to accommodate what is expected to be the school's largest enrollment.

"It's a happy marriage," contends Dad Plymouth "if when the word insect is mentioned the wife doesn't immediately think of the thing she is married to."

"It has been my experience," says Dad Plymouth "that no man has to hire a detective to find what he missed while walking around in his bare feet."

Dad Plymouth asserts that the average man who laughs at his wife for being afraid of a mouse is just as afraid of a company towel.

MAYAS RETAIN PRIMAL CHARM

White Man Never Able to Convert Yucatan's Ancient Tribes.

Merida, Yucatan.—Life still has charm and romance in the land of the Mayas. There is much that has not changed since the days when Bishop Landa tried his hand at converting the Indians four centuries ago and complained that the Indians instead had converted Gerónimo Agullar, the first white man who lived among them. Gerónimo, the bishop suspected, had become "as idolatrous as they."

Picturesqueness in the modern Maya village is not destroyed, as it so often is in the Mexican villages on the mainland, by dirt and misery, for the Yucatecan Indian is a luckier creature. He is cleaner, healthier and richer.

The town of Ticul, a dozen miles or so from the famous ruined city of Uxmal, is an interesting example of what has grown out of four centuries of European civilization implanted in the heart of the greatest prehistoric American civilization.

Native Blood Predominates. Ticul was a growing town when the white man came, as the native will tell the visitor. Today nearly everyone who speaks Spanish speaks Maya, too, while a large proportion of the people speak the Indian language only. There is no pure-white blood left and native blood far predominates.

In the native sections of the town the Indians still live in their huts of sticks, adobe roofed with sun-palm, much as they did before the conquest. The most notable change is that they use the hammock, introduced from Santo Domingo, instead of the straw rug or "petate," which they used as a bed before, and hammock making has become a Yucatecan art.

Their huts are in gardens, fenced with limestone walls, rich with orange, banana, palm, papaya and sapote trees. Magenta-colored bougainvilleas and fire-red "flamboyan" add startling color to the picture.

Women Carry Burdens.

The handsome Indian or mestiza women, with spotless white cotton gowns, brilliantly embroidered at neck and hem, walk like barefoot queens through the stony streets, swinging jugs of water or naked babies on their hips. Statuesque women, with white-enameled washbasins full of beans or ground corn dough on their heads, stalk out of the spotless market with its crisp green piles of herbs and heaps of seeds and washed vegetables. Maya potters still ply their ancient trade in Ticul, and the town supplies the surrounding region with earthenware dishes, pitchers and pots. The prehistoric disk or "kabal," which was on the verge of becoming a true potter's wheel, is still used. The potter sits on the dirt floor of his hut, turning the "kabal" with his toe and in step while he gouges out the wet mass of clay as it slowly turns and changes into graceful shapes under his strong fingers. Ticul yards are full of pleasant round shapes, drying in the sun, waiting for baking day, when they are burned in primitive ovens, such as were used before America was discovered.

American Girls Help Students in Europe

New London, Conn.—To enable two or three needy European students of merit to attend college in their own country, the student body of Connecticut College for Women has decided to establish a scholarship fund for that purpose.

The accumulation of the fund will be used every other year. The plan heretofore has been for student contributions to be disbursed from New York. The change is due to desire to have more personal contact with students abroad who are aided by the college.

Bob Bounces Back

New York.—Buck bounces the trim bob into favor. Beauty shop owners in convention have agreed that the longish variety, which curls at the back, requires more attention than the average woman can give it.

Couldn't Follow Rule

St. Paul, Minn.—Rule No. 1 for robberies is: Phone the police. It couldn't be done at the J. L. Abschten drug store here even after the robbery was discovered. The stolen object was the pay phone.

1 of Every 79 Deaths in Chicago a Murder

Chicago.—The health department, which is interested in finding out why Chicago people die, has found out that murder sent 498 to the cemeteries last year. The toll of homicide far outranks some of the common diseases and even surpasses influenza, statistics show. The killing rate is 18.1 per 100,000 population. This means that of every 79 persons who died in Chicago one was killed by violence.

Some candidates are so optimistic that they actually expect to go to heaven and find campaign cards tacked all over the place.

Pasteurized Milk has more "kick" in it than any other drink!

Does that sound strange? It may but it is nevertheless true. There is more substantial nourishment in pasteurized milk than in any other food drink. Healthy people drink pasteurized milk because, in addition to its fine taste and its thirst-quenching power, it helps them to keep healthy. Sick persons are advised by physicians to drink pasteurized milk in order to regain their strength.

Yes, pasteurized milk has a "kick" to it; and unlike other drinks with a "kick," builds up the bodily tissues rather than tending to break them down.

Taxpayers Take Notice

The Assessment Roll of the Village of Plymouth for the year 1929 is completed and ready for inspection of the public. Every taxpayer is urged to examine the assessment upon his real estate and personal property. The Assessment Roll may be examined at the office of the Assessor in the Village Hall during office hours between May 1st and 11th to see that assessments are fair and reasonable. Remember that no changes can be made after the Assessment Roll has been confirmed by the Board of Review and the Village Commission. All transfers of property during the last year should be reported to the Assessor at this time.

We are desirous of giving all tax payers an opportunity to register any complaint against unjust or unfair assessments.

GEO. W. RICHWINE,
Village Assessor.

Notice of Board of Review

Notice is hereby given that the Board of Review for the Village of Plymouth will meet at the Village Hall in the Village of Plymouth May 9, 10, and 11, 1929, from 9:00 A. M. until 5:00 P. M., Eastern Standard Time, for the purpose of reviewing the Assessment Roll for the year 1929.

All persons interested will be heard at that time.

GEO. W. RICHWINE,
Village Assessor.

GRAHAM-PAIGE CAR BREAKS INTERNATIONAL SPEED RECORD

Women Hire Children for Effect on Court

Manchester, England.—Widows' "mites" may stir the heart, but they do not always ring true.

A Manchester detective reveals that children who cling to women's skirts at the police court are usually hired for the occasion in order to arouse the sympathy of the court.

"Hiring" and borrowing babies for police court appearances is becoming a lucrative trade in certain sections of England. For a small fee, he said, it is possible for anyone to hire from one to five babies at a time.

41 STATES NOW HAVE LAWS CONTROLLING BILLBOARDS

Roadside Advertising Signs Regarded as Menace to Safe Auto Driving.

Washington, D. C.—Roadside advertising signs, considered by many as a menace to safe driving, now are controlled by law in forty-one states.

South Carolina, Arkansas, Texas, New Mexico, Oklahoma, Kansas and Wyoming are the only states without state regulation of commercial signs and billboards.

Control in states is widely diversified, with some barring all signs from certain sections while others have wide limits within which the billboard operator and sign poster may function.

Connecticut, Massachusetts and Vermont have the most rigid laws. Before any agency can erect commercial advertising signs in these states it must be licensed by state authorities at a certain annual fee or furnish a bond if it is an out-of-state company.

Advertising signs in Connecticut must not be placed within fifteen feet of the right of way on any highway and in Massachusetts within 500 feet. Florida, Georgia, Mississippi, Nebraska, Nevada, North Carolina and Tennessee impose fees for advertising signs. Mississippi collects a fee of 75 cents for each sign from 10 to 100 square feet of area; \$1.50 for an area between 100 and 300 square feet and \$2.50 for an area of more than 300 square feet.

Tennessee forbids erection of signs upon the right of way of any state highway, and prohibits erection of signs resembling railroad crossing symbols on any public highway or street or on private property within one-quarter mile of the road.

In Florida the state road department prohibits advertising signs on state highways and imposes on agencies in the bill-posting business a certain tax on the basis of population in the cities and towns where they seek to operate.

Nebraska requires a state permit for advertising signs with a fee of 25 cents to \$5 for each sign, and no sign may have more than ten square feet.

In nine states no advertising agency may erect or maintain upon any highway or right of way any commercial advertising sign. These states are Minnesota, Colorado, Maine, Iowa, North Dakota, West Virginia, South Dakota, New Hampshire and Illinois.

Sawdust as Fuel Gives Dealers Surprise Profits

Seattle, Wash.—Northwest lumber manufacturing towns formerly boasted "white elephants"—huge piles of sawdust, for which there was no demand. Last year some one invented a burner attachment that could be connected to any furnace, heater or engine and the use of sawdust was urged.

So many people installed sawdust burners that there now exists a famine of the fuel. All the mountainous piles about sawmills have disappeared, and to keep up with the demand for the cheap fuel, sawdust is being brought into the city by scows, auto trucks, trains and electric interurbans. Sawdust for Seattle use has been brought from mills 200 miles distant. There is no dearth of waste material from which to make sawdust or hogged fuel, but few mills are equipped with machinery to grind wood. Many dealers are realizing big and unexpected profits.

City of David Quest Bares Byzantine Wall

Jerusalem.—Excavations on the Mount of Ophel, where it is hoped to lay bare the City of David, have revealed an ancient wall at a depth of 20 feet. It is thought to have formed part of a fortress of the Syrian army stationed by the Greeks in Jerusalem.

One street has been cleared of earth. It is lined with the ruins of houses belonging to the Byzantine period. The buildings have mosaic floors of good design. Much of the pottery dates back to the time of the First Temple.

Scheme Went Awry

Minneapolis, Minn.—Nelson W. Robinson of Little Falls has a good scheme to make money by sending pencils to persons who had died and then trying to collect \$4.50 from their relatives. Federal Judge W. A. Cant sentenced Robinson to 18 months in prison.

A Plymouth wife is a better diplomat than her husband. She will stand around with the neighbor women and brag about her husband's ability even when she knows he hasn't any.

New international speed records for 200 kilometers and for 200 miles have been established by a four-speed Graham-Paige on the famous Brooklands track, England. The car, an eight-cylinder five-passenger sedan, carrying complete equipment, and driven by D. M. K. Marandaz, covered the 200 kilometers (124 miles) in 96 minutes, 51.92 seconds, or an average of 76.07 m. p. h. (old record 62.53 m. p. h.) and the 200 miles in 154 minutes, 17.72 seconds, or 77.77 m. p. h. (old record 58.08 m. p. h.). The last ten laps were covered at an average of 79.25 m. p. h.

The total elapsed time on which the averaged speeds are based included one stop for oil and gasoline.

The records broken (for class B, cars of 305 to 480 cubic inch displacement) were established last year by a Delage (French) sports car.

British writers on motor topics comment on the significance of the Graham-Paige achievement, in that a closed car of stock model, with full touring equipment, including head-lamps, fenders, two spare wheels, and trunk rack, has proved itself capable of surpassing records formerly held by a car designed especially for speed.

"That records are being attacked by fully equipped cars is a healthy sign," says Autocar, a leading English weekly, which relates that the Graham-Paige averaged more than 78 miles per hour on all but 3 of the 73 laps, and achieved 80.72 m. p. h. on the 46th lap, and 80.83 m. p. h. on its 73rd and last lap around the 2.34 mile track.

E. M. Wright, a well-known authority on motoring subjects, in the Sunday Pictorial, London, deems the Graham-Paige achievement "a performance of exceptional interest." He says:

"This is, I understand, the first time a closed car has ever been used for record breaking of this kind at Brooklands, and the result indicates the performance obtainable today in ordinary private cars, such as the man in the street can buy."

The motor editor of Sporting Life, London, commenting on the Graham-Paige feat of covering 70 laps at speed between 78.18 and 80.72 m. p. h., call it "a remarkable performance, both as regards speed and consistency," while Captain E. de Normanville, in the London Daily Chronicle, says "it would be hard to find a more meritorious example of standard car speed capacity than the record just put up at Brooklands by the Graham-Paige."

HONEY BEE IS HIJACKER, OR MAYBE ONLY CANNIBAL

Court Buzzes With Excitement as Experts Testify in Suit Against Railroad.

Chicago.—Dead honey bees, a Superior court jury decided, are worth about .000315 of a cent each.

For a week the court of Judge John Priests had buzzed with this bee business. J. W. Connea and Ezra Ross of Morris, Ill., sued the Rock Island railroad for \$50,000, claiming 175 hives of bees—some 20,000,000 of them—had died on their first railroad trip, a ride from Pike Road, Ala., to Morris.

The railroad did not dispute the demise, but there was much disagreement as to the cause. The complainants said holes in the car roof allowed the rain to come in and the bees were drowned outright or died slow deaths from exposure.

The railroad produced a bevy of bee experts who told of the strange goings on in a bee hive. Bees, said the experts, were not the industrious, peace-loving creatures generally supposed, but often were like gangsters or hijackers.

One said bees were cannibals and consumed their young. Another testified they were too temperamental to travel on trains. Railroad attorneys advanced the theory that the bees had been hijacked and killed by a swarm of wild bees or had developed cannibal tendencies and eaten one another, or had buzzed about with excitement until they dropped dead.

The jury brought in a verdict of \$6,900 for the complainants.

Montevideo Proves Reno for Unhappy Couples

Buenos Aires.—Divorce is not recognized in Argentina, and consequently many mismatched couples have made a Reno of Montevideo, the capital of Uruguay just across the River Platte. In some ways Montevideo provides a more convenient spot for undoing marital bonds that does even Reno or Paris, because suits can be brought there by power of attorney. "Incompatibility of temperament" is among the accepted grounds.

Procedure in Uruguay is similar to that under French law in that three months are allowed for "conciliation," at the end of which time the would-be divorcees appear, in person or by attorney, to explain that they still want to be legally separated. At the end of three months a decree is given.

Uruguayan divorcees granted to Argentine citizens are recognized by the civil law here if they are registered with the Argentine authorities. But without this registration, an Argentine divorced in Uruguay may, if he marries again in Buenos Aires, be liable to prosecution for bigamy.

NUMBER XXIX

THE CONTEST AT FORDSON

Early Saturday morning at seven o'clock, to be exact, sixteen girls gathered in front of the school house...

When we arrived at Fordson, we did not have the slightest idea about where to go...

And what a building it was! The corridors, floors, walls and ceilings were all slipper as glass...

A white gownned Girl Reserve guide took us around the building. She showed us their trophy room...

Next we went to their auditorium. We were to say the least, astounded at its rows and rows of regular theater seats...

Next we went to the gymnasium. They have four! A girls' and a boys' corrective gym...

This was very, very large, and was fitted up very wonderfully with tiny booths and a great number of chairs...

Then in quick succession, we saw the science rooms, English, mathematics, carpentry, engineering, printing departments and garage...

Well, about this time our poor feet were getting rather tired, and no wonder! Their halls are about six times as long as ours...

During the contests, the curtains of the rooms were pulled down so that the students in the hall would not bother those in the contest...

The library was a great attraction. It was furnished with very attractive black furniture which was very shiny...

I wish we knew the results of the contest. We will not know definitely until the last of the week...

PLYMOUTH TROUNCES YPSI

A fully featured Plymouth's half of the fifth inning which placed them in the lead for the remainder of the game. Ypsi led, 3 to 1.

In the third inning, Herrick scored and Plymouth held the lead. In the first of the fourth and the first of the fifth, Ypsi scored three runs...

Table with columns: AB, R, H, SB, SH, PO, E. Rows for Atkinson, VanBonn, L. Simmons, G. Simmons, Collins, Herrick, DePorter, *Smith.

Home runs—G. Simmons. Two-base hits—VanBonn, 2; L. Simmons, Collins, Smith. Double play—Batterson to Zeck to Miller.

CENTRAL GRADE NOTES

Because they have had all As and Bs, the following children in Mrs. Root's room are on the honor roll: Marie Agreave, Lyvonia Ball, Xorene Blumh, Virginia Brockhurst, Alice Plachta and Phyllis Simonsen.

Six more children from this room are to receive Palmer plus for good writing. In hand work the children are making flower dolls of sweet peas, sweet Williams, wild azaleas and wild roses.

In Miss Weatherhead's room the children of the second grade are studying the violet. The 'grey squirrels' have finished their first readers.

The third graders have been making a study of the hyacinth. The flower pictures of the children in Mrs. Bloxson's room have arrived, and the children will now study the apple blossom, purple violet and lily-of-the-valley.

Group three has finished reading the Elson readers. Group one has begun the reading of 'The Home Folks Geography.' Herman Esch, from Livonia, entered this room last week.

Fifteen people from Miss Dixon's room will receive Palmer buttons for penmanship, and one person will receive a merit pin. In Miss Orr's room, Ruth Redden's side is ahead in the arithmetic contest.

The third grade is studying the hyacinth, and the fourth grade, the goldenrod. In Miss Farrand's room the children have been learning the poem, 'Goldenrod.'

Jessica Goebel has been transferred from the Starkweather school to the Central school. Ireta McLeod had the highest rating in last week's spellingdown.

William Smith and Ina Esch are two new pupils in Mrs. Halliday's room. Thirty-nine penmanship buttons will be given out to the pupils in this room.

Maps of Africa are being made by the children. In Miss Fenner's room the fifth graders have been studying the trail in arbutus, Donald Thrall and Billy Petz brought some real flowers to study. The sixth graders are studying the poppy.

A TRIP TO ANN ARBOR

At nine o'clock, the procession of high school pupils left Plymouth for Ann Arbor, on last Friday. Our first stop was the Michigan Union. Women are very seldom allowed in this building and only by special permission...

The second floor is divided into small rooms devoted to paintings. These and all other pieces of art have been presented by graduates to the Memorial Hall. In the basement, railers unearthed from ruins, have been placed on the walls; some are cracked and in many cases, pieces are missing.

The Clements Library was the next building we visited. This library is composed of first editions, and is the most valuable in the world devoted to Americana. In the room where the most rare books are kept, the walls are recent and the windows have iron shutters over unbreakable glass...

The University of Michigan boasts of over 500,000 books in the general library, and scattered throughout the campus in the buildings, are small libraries housing the total up to nearly 625,000. The general library has seven floors of books, with an attendant on every second floor.

Now, in turning to the relationship with the church, Alvin VanBonn went further into the boys' pledges which they take as members. To live up to their pledge, they must take as a basis—a clean Christian character.

The choir composed of C. Packard, R. Wallace, T. Baughn, R. Smith, Alvin VanBonn, E. V. Katz and H. Rathburn contributed the music for our program. Both organizations enjoyed this opportunity, and hope that in the future they may again have a chance to strengthen the devotional part of their programs.

Initiating the two new concrete tennis courts, Plymouth played their first tennis match with Ypsilanti Central High School, last Saturday. Plymouth won all six matches, two doubles and four singles, thus defeating Ypsi by a score of 6-0.

This year, under the coaching and leadership of Mr. Emens, Plymouth organized their first tennis team. An elimination tournament was held to determine the team. Frank Clemens won the school championship. He was later elected captain, and the team consists of Frank Clemens, Charles Ball, runner-up for the championship, Bill Baker, Elton Knapp, John Randall, Ted Baughn, Linford Fritz, Milton Partridge and Busell Cline.

Plymouth went out to play Ypsi, with the determination to do their best, but they did not expect to win as easily as they did. Ypsi's team next set by the fast service of Mohler and the excellent net playing of Fairbanks; but Plymouth warmed up and took the next set by the consistent driving returns of Baker and Ball. Score—6-2; 5-7; 6-4.

No. 2—Fritz and Cline won from Baker and Handy of Ypsi, in spite of fast returns of Baker and splendid service of Handy. The match being comparatively easy, and the credit was Fritz's due to his uncomprehensible left handed returns. He is, by the way, the only left-hander, and Bill Baker the only senior. Score—6-3; 6-2.

No. 3—Clemens defeated Mohler of Ypsi, in the singles, in two easy sets, due to Clemens' well placed returns. Score—6-2; 6-4.

No. 4—In two sets, Baker had an easy victory over Handy of Ypsi, in the singles, fourteen games being played. Score—4-1; 6-1.

STARWEATHER NOTES

The kindergarten at the Starkweather school has begun work on sewing cards and other handwork for the exhibition in May.

The 1-A grade has finished the Elson reader, and is now reviewing. The 1-B grade is finishing its third booklets about the robin and the crow.

The fourth grade children are learning about wild flowers. They are to study the water lily, wild iris and goldenrod.

In the fifth grade McCall spelling test for April, Helen Daly received the highest T-Score in the room. It was a score of 67, and puts her in the 11-B grade in spelling.

In reading class, the 1st team is ahead with 328 points, while the Purple team has 272.

Some new colored stereoscopes about Egypt are being put up by the 5-A grade. There are twenty of them, and all are very interesting.

Although the Girl Reserves and Hi-Y clubs are usually thought of as social organizations, they resolved to show themselves in their true light last Sunday evening.

Now, in turning to the relationship with the church, Alvin VanBonn went further into the boys' pledges which they take as members.

There were many pictures of him and his family. Theodore Roosevelt had six children—two girls by his first wife and four boys by his second.

It is interesting to note that he favored the same church as did Washington and Lee, two other famous Americans. This was Christ's church, and the one which he attended regularly was in Sagamore Hill.

There were many pictures of him and his family. Theodore Roosevelt had six children—two girls by his first wife and four boys by his second.

In The Theatre

"THE CARNATION KID"

Variety of entertainment has always been a feature of the moving pictures in which Douglas MacLean is the star, and so it is not surprising to find Doug pulling something else new in his latest picture, "The Carnation Kid," which is the feature production at the Penniman Allen theatre, Sunday and Monday, May 5 and 6.

During the last few years Doug has appeared in pictures of a great variety: one time he is a mountain climber; then he's on a lion hunt in Africa; perhaps in a farce comedy of thrills thrown in for good measure. This time he appears in a neater than usual story which includes some very dramatic situations mixed up with love and politics and some amusing comedy as well. Doug going in for a melodramatic story based on underworld life in a big city is something new but this is what the plot is in "The Carnation Kid." The title comes from the name of a famous gunman who gets mixed up with Clarence, an innocent enough typewriter salesman.

Douglas MacLean is the latter, and it is in the mix-up that the entertaining situations develop. Appearing with MacLean in this Paramount-Christie production are Frances Lee, Lorraine Eddy, William R. Davidson, Francis McDonald, Charles Malles and others.

"THE BUTTER AND EGG MAN"

And he learned about actresses from her!

That might apply to the hero of "The Butter and Egg Man," screen version of the famous stage play hit, with the title role and the stage actress enacted by Jack Mulhall and Greta Nissen respectively.

Mulhall is featured in the title role of this First National comedy-drama, which is coming to the Penniman Allen theatre, Wednesday and Thursday, May 8 and 9. Miss Nissen plays opposite him.

Leading lady and heroine are combined in the screen version of "The Butter and Egg Man" with even more intriguing romance, drama and comedy than the stage play. The blond beauty and Scandinavian fire of Miss Nissen makes her an ideal actress for the feminine leading role.

Mulhall portrays the small town boy who spends his last cent on a wild investment in play production on Broadway. Prominent in the supporting cast of the picture are Gertrude Astor, Sam Hardy and William Demarest. Richard Wallace directed the picture.

"OUTLAWED"

Presenting Tom Mix, most popular star of the screen, in a whirlwind picture that compresses within its length more speedy action, gripping suspense and climactic dramatic development than any half-dozen average films, "Outlawed" will be shown at the Penniman Allen theatre, Saturday, May 11.

Dashing riding stunts in which the star's famous horse, Tony, distinguishes himself anew, athletic feats in connection with his enemies and powerful dramatic moments in the development of the absorbing story keep Mix in the forefront of the film's action.

Sally Blane, one of the beauties of filmdom who is rapidly achieving distinction as a leading woman, is seen in the principal feminine role opposite Mix.

Director Eugene Forde, who has been associated with the western star in a similar capacity on several former pictures is to be complimented upon his forceful and convincing depiction of the narrative.

In the capable cast are included Barney Furey, Ethan Laidlaw, Al Smith and Al Ferguson, all seasoned "western" players who handle their roles most acceptably.

Today's Reflections

The Plymouth boy who makes a three-ring circus out of life when he is young isn't going to have much of a show when he grows old.

Divorces are increasing so rapidly it would be a good idea for new bridegrooms to set aside a sinking fund for alimony.

Nowadays when they are made up it's hard to tell a Plymouth mother from her daughter, except that one is impudent.

If the women were as strong for the eight-hour day as the men there would always be a lot of dirty dishes around the house.

We've lived in Plymouth long enough to realize that a girl can be mighty good looking and still not win a beauty prize.

The fellow who knows the fine points about holding a golf club would be somewhat at a loss to know how to grasp a hoe handle.

When a woman can't find anything to worry about she will sit down and worry for fear the laundry will starch her bloomers and forget to put any in the lace curtains.

**STYLES CHANGE
IN SMUGGLING**

**Wops and Booze Replace
Chinks and Dope in Caribbean Sea Trade.**

San Juan, P. R.—Styles in smuggling us in all else change with the years and the conditions governing the business. The heavy traffic in "chinks and dope" that once kept the revenue cutters shooting in and out of obscure Pacific coast bays has given place since the passage of the immigration laws of the United States to a brisk trade in "wops and booze" in the Caribbean sea.

The immigrant, whether he be an Assyrian, Greek, Hungarian or Italian, who is trying to get into the states in violation of the quota regulations, is known in the trade as a "wop," and although he pays from \$150 to \$2,000 to get from a Caribbean island to the mainland neither his life nor his person is respected.

Immigration officials believe the contraband human beings are sometimes thrown overboard when the revenue cutter closes in upon the smuggler. They are forced to this grisly conclusion because of their frequent frustration when they have known to a certainty that they were about to make important arrests.

Cuba Is Junction Point.

Times without number the revenue cutter has put out in pursuit of a boat known to be carrying aliens, only upon overtaking the craft to find neither liquor nor aliens aboard.

That liquor is thrown over the side is an old story. That Chinese coolies in the old days of "chinks and dope" went overboard is frequently discussed. Proof is lacking because the jettisoned cargo is weighted to carry the evidence to the bottom of the sea.

The carriers of "wops and booze" use every known variety of ship. A certain leakage takes place along the line of piers where transatlantic liners dock, but the trained and experienced smuggler has a number of bases of operation in the Antilles.

Cuba is one of the junctions in the system. Haiti and Santo Domingo are believed to serve as way stations, as do scores of the obscure and all but unknown islands of the Lesser Antilles. A better class of immigrants is worked into the United States through South American ports and the regular passenger service. These spend months in Brazil or Argentina, finally migrating northward on purchased or forged birth certificates.

Birth certificates and other credentials, however, are not those of the land of the stopover, but are procured from the states. A Spanish business man of New York was approached this winter with an offer of \$500 for the birth certificate of his daughter, whose death had occurred a month before.

The smuggling lines are carefully worked out, and because the income is high there are agents everywhere to get the contraband human beings into the country.

Seize Steam Yacht.

Recently the steam yacht Calumet, formerly owned by Atwater Kent, was seized in Porto Rico by immigration and customs officials on a "wop and booze" running charge.

The vessel had picked up twelve members of the "crew" at Havana, and two of them deserted to a steamer bound for Florida, where they were detained by the immigration office. The captain and owner of the yacht were arrested. They said they had not intended stopping at Porto Rico, but burned out grazers drove them into the hands of government agents.

There are other craft of equal dignity, though of smaller size, plying in the "wops and booze" lines between the Antilles and gulf and Atlantic bays. Innocent looking fishing schooners carry fishermen who go ashore and "miss" the boat.

And therein lies one of the most attractive features of the alien smuggling business. When asked why he did not go in for the opium trade or some less bulky cargo, a smuggler with his headquarters in Martinique replied, "Well, you see, when you are running wops you put them ashore, point out the lights of the town and say, 'Beat it.' You can't do that with booze and dope. The wops market themselves."

There are "wops" on Caribbean islands who have been waiting four or five years to get into the country. Some have made money while waiting, and a great many have decided that there is a good living to be made in the tropics. They are saving their passage money and possibly their lives as well by not going any farther.

**Just a Little Mistake
on Part of the Wife**

Chicago.—Mrs. Victoria Tullio didn't mean to shoot at Truant Officer Thomas McCarthy.

"I thought it was my husband," she told the judge recently in explaining her reception of the official who had come to learn why her daughter hadn't been attending school.

Her explanation was accepted.

A man may be awkward when it comes to holding a plate of refreshments on his lap but he finds it easy enough to hold a pretty girl there.

They tell us that a barking dog never bites. Maybe not, but it can certainly keep a fellow in suspense.

An onion a day will keep the doctor away—and a large part of the others in the neighborhood.

OAKLAND TO FOLLOW SPRING SHOWINGS BY DEMONSTRATIONS

Following the close of the highly successful "General Motors Spring Showing" week, Smith Motor Sales, local Oakland-Pontiac dealers, announced today the launching of a vigorous demonstration campaign during May.

This program, Mr. Smith explained, is in response to many requests received from visitors to his showrooms at 1382 South Main street, during the spring showing, asking for demonstrations of the new Oakland All-American Six and the new Pontiac Big Six. "The distinctive appearance, attractive colors, unusual body refinements and advanced engineering features of our two lines of cars created a decidedly favorable impression upon the large number of visitors to our showrooms last week," he stated. "That the new cars are as outstanding in performance as in body distinction, we propose to demonstrate throughout the coming month.

ready made at various sections of the country and at General Motors Proving Ground, at Milford, Mich., which reveal unusual acceleration, deceleration and the high sustained top speed. These same qualities we are going to demonstrate on the hills and highways in our section so that local residents may see for themselves the type of performance which we could only tell them about during the spring showing.

"Reports received from other sections of the country tell how both the new All-American and the Pontiac Big Six have hung up what we believe to be records in their price classes.

"Sustained top speed runs over long distances have been made both with the Oakland and Pontiac cars, and flattering reports of smooth, vibrationless performance at high throttle ranges have been made with recurring frequency to the Oakland factory.

"One of the outstanding endurance tests of the year was made with a new

Pontiac Big Six at Elmira, New York, where the car was run continuously for more than thirteen days and nights, at all speeds, without a single part failing.

"Amateur drivers, two of them non-owners, piloted the car during the test over the streets of the town and surrounding highways at all speed ranges, all under official observation, part of the test including a drive to Pontiac, Michigan, and return. At last reports the test was still continuing, the engine of the car never once having been stopped.

"Hill climbing tests conducted at Cleveland exceeded those attempted by any other car in the Pontiac price class, indicating unusual stamina as well as quick acceleration and high top speed.

"We will conduct similar demonstrations here during May, because we know that the new Oakland and Pontiac lines will show local residents the

same high type of performance revealed elsewhere."

English as Written by Man in West Africa

St. Joseph, Mich.—Any contention that residence in the British empire is prima facie evidence of mastery of the king's English falls on the deaf ears of C. E. Blake, exporter of automobile accessories.

In refutation of what he believes is a commonly erroneous impression, Blake offers the following letter, received from a prospective customer in Accra, British West Africa:

"Sir: 'Will you be kindly allow me to offer myself to you as having knowing me but have kept your kindness through all my health. Yes it was last week I picked up your name and address from my friends table that recommending you so highly, which at once effected my love; I shall be much pleased to have a present catalogue and few Examples of your powers, coming this very mail; in order to order the same. I cannot recommend my self too self too you as an egotist, but my activity will prove itself. 'I beg to remain, I am, 'Yours faithfully, 'E. E. M.'"

"The honeymoon is over," declares Dad Plymouth "when the first thing she asks him when he gets in the house is if he will hang up his hat and coat instead of if he still loves her."

IMAGE IN EYE SOLVES CRIME

Unusual Evidence Convicts Polish Woman of Slaying Her Rival.

Warsaw.—One of the favorite morning picture plots of the vanished nickelodeon days, itself borrowed from a fifty year old French romance, has been re-enacted here, a woman having just been convicted of murder on the evidence of her image photographed on the retina of her victim's eye. What makes the story even more remarkable is the evidence which local scientists are giving to evidence more likely to convince a jury than an eye specialist.

The murder occurred more than a year ago, on October 17, 1927, in the city of Minsk, Mazowiecki, when Adeline Jankowska, twenty-eight, was found dead with 27 knife wounds in her body. The kitchen knife with which the crime was committed was found nearby.

The only clue was a lock of blond hair clutched in the dead woman's hand, from which it was concluded that the killer was another woman. But all efforts to trace her failed until Mary Nowowiejska, thirty, gave her self up in Warsaw several months later.

Admits Killing.

Confessing to the crime, she said that conscience prevented her from keeping silent any longer, although she believed herself safe from detection. She killed the victim because of her husband's infatuation for her.

"My husband and I were happy until he met this woman," Mme. Nowowiejska told the police. "When I married my husband was earning very little money and I had to support him. Then I learned that he had a sweetheart and was giving her part of the money that I supplied him. After he knew that I had learned the truth he left me often, going to Minsk to stay with the other woman and supporting her from my earnings. Finally I learned that the other woman had a child. I visited Jan kowska in Minsk and told her that I would bring my husband to see her and he must choose between us in the presence of both of us.

"When I told Steve, my husband, he was furious. He refused to accompany me. So I went to Minsk again alone to ask Jankowska to return to Warsaw with me to confront my husband. She refused. She said Steve would return to her in any case, insulted me, and ordered me out of her house. I don't know just what happened then. There was a struggle. I picked up the knife and struck three times after time. Then I ran away."

The Warsaw District court condemned Mme. Nowowiejska to six years in prison, but, frightened at the prospect, she appealed, and offered the defense that her statements had been forced from her by third degree methods and that she did not know Jankowska. It was before the Appellate court that the evidence of the image in the victim's eye was presented.

Discover Image in Eye.

In accordance with standard practice a series of pictures of the murdered woman had been taken by the police immediately after the discovery of the body. In enlarging one of them the police believed that they saw an image of the figure of a woman holding a knife in her outstretched hand. The figure was so small that finding a resemblance was practically impossible. Other enlargements produced no better results. But the evidence was nevertheless produced, and how ever deficient it might have appeared to others, it was sufficient to make Mme. Nowowiejska break down and confirm her first confession. The sentence of the lower court was confirmed.

But the most extraordinary part of the story is the belief accorded it by scientists. Prof. Casimir Nolszewski, Warsaw university oculist, told the press that pictures are "very often" fixed in the eyes of murdered persons and may be photographed. He pointed out that such a photograph could not be taken in full daylight when the eyes would be reflecting other images.

Professor Nolszewski based his statement on the theory that the retina of the eye undergoes actual discoloration when light strikes it, referring to the statement of Bull that the retina of many animals and human beings becomes purple in darkness. If a rabbit previously kept in the dark is turned toward a window, the parts of the retina on which the light from the window is reflected lose their purplish coloration.

From this Professor Nolszewski concluded that although images left on the eyes of dead persons would be very small, it might be possible to recognize them from photographs made of such eyes.

Fall Into Hot Water

Causes Boy's Death

Chicago.—Max Rubin, ten years old, a school boy, died of scalds suffered when he slipped on a moist floor and fell into a bathtub of hot water in his home. The boy screamed as he fell and his mother, Mrs. Rebecca Rubin, rushed to his aid. Her hands were severely scalded before she could pull him from the water. Both were taken to Garfield Park hospital, where the boy died.

The average girl never is content to be merely good; her ambition is to be good-looking.

Dad Plymouth says a husband may be as useful around the house as a carpet sweeper, but he is never allowed to make that much noise.

One reason why the flea is so sensitive to noise is that most any noise is bigger than a flea.

ANN ARBOR ROAD, PLYMOUTH, MICH.

Your MODEL T FORD is still a good car.

THE Model T Ford led the motor industry for twenty years because of its sturdy worth, reliability and economy. Those same reasons continue to make it a good car.

As a matter of fact, nearly one-fourth of all the automobiles in use today are Model T Fords. Millions of them can be driven two, three and even five more years with reasonable care and proper replacements. Figures show that the average life is seven years.

Don't sacrifice your Model T, therefore, but take it to the Ford dealer and have him estimate on the cost of putting it in A1 shape. A very small expenditure may be the means of giving you thousands of miles of additional service.

For a labor charge of \$20 to \$25 you can have your motor and transmission completely overhauled. This price includes new bearings, reboring cylinders and any other work necessary. Parts are extra.

Valves can be ground and carbon removed for \$3 to \$4. The cost of tightening all main bearings is only \$6. The labor charge for overhauling the front axle is \$4.50 to \$5—rear axle assembly, \$5.75 to \$7.

New universal joint will be installed for a labor charge of \$3. Brake shoes relined for \$1.50. Rear spring and perches rebushed for \$1.75. The cost of overhauling the starting motor is \$3. A labor charge of approximately \$2.50 covers the overhauling of the generator.

It will pay you, therefore, to see your Ford dealer and have him put your Model T in good running order. By doing so you will protect and maintain the investment you have in your car and get months and years of reliable transportation at a very low cost per mile.

Topping Corn Fails To Stop Corn Borer

REMOVING TOPS OF PLANTS
CAUSES MARKED REDUC-
TION IN YIELDS OF CORN.

The fact that the larvae of the European corn borer establish themselves in the tops of the corn plant has led to the suggestion that topping the corn plant after the ears have set would reduce the damage done by the insect, but experiments performed at the Monroe corn borer station show that such topping fails to stop insect damage and also reduces the yield of the corn.

In the experiments, the plants were topped at four, five and six feet above the ground. At the last height, only the tassels were removed. The topping at four feet removed the stalks just above the ears.

The corn borer larvae present in topped stalks at harvest time were counted and, in 1927, more borers were found in the topped stalks than in those which were left without topping. The yield of corn was materially reduced by the topping.

The results of the same experiment in 1928 were quite similar. There was a slight reduction of the number of borers in the topped stalks, but the decrease in numbers was not sufficient to compensate for decrease in yield of corn.

Pigs Make Good Use Of Alfalfa Pasture

FEEDING TRIALS SHOW THAT
PIGS ON PASTURE MAKE
CHEAPER GAINS.

Alfalfa is worth \$27.87 an acre when the crop is utilized as pasture for pigs and the portion of the crop not used by the animals is cut for hay and appraised at \$7.00 per ton, according to feeding experiments performed by the animal husbandry department at Michigan State College.

This value for the crop is obtained by crediting the alfalfa with the amount of feed saved which would have to be given to obtain equal gains in weight with pigs on a dry lot. In the college trials, alfalfa hay was fed to the pigs which were in the dry lot.

Both groups of pigs in these trials were fed shelled corn, protein supplements, and a mineral mixture. The average daily gains made by the pigs in the dry lot and those on alfalfa pasture were approximately equal.

For each hundredweight of gain, the pigs in the dry lot required 291.7 pounds of shelled corn, while those on pasture needed 300.3 pounds of corn to make the same gain in weight. The dry lot pigs ate 65.5 pounds of protein supplement for each 100 pounds of supplement feed.

The alfalfa pasture replaced 28.3 pounds of protein supplement and, consequently, the pigs on pasture made 100 pounds of gain at a lower cost than those in the dry lot. The feeding trials were repeated and similar results were obtained in the second experiment.

Calves Not Injured By Cottonseed Meal

OVERFEEDING OF CONCENT-
RATES CAUSES INJURIES
BLAMED UPON COTTON-
SEED.

That cottonseed meal contains no substance which is injurious to dairy calves or older cattle is indicated by feeding trials conducted by research workers at Michigan State College.

These trials have been made by members of the dairy department and indicate that injuries to the health of cattle which were formerly attributed to the feeding of cottonseed meal may be caused by the overfeeding of any concentrate feed if a good roughage is not included in the animal's ration.

Calves which received either cottonseed meal or corn distillers grain and gluten meal but which were fed wheat straw for roughage suffered marked physical injuries, but the calves which received the distillers grain and gluten feed showed the same physical defects as those which were fed cottonseed meal.

In one of the feeding experiments, five heifers were fed 2.4 pounds of cottonseed meal daily from the time they were five months old until they were two years old. These animals received timothy hay and all the silage which they would clean up. None of the heifers showed any bad effects from the heavy feeding of cottonseed meal which they received.

Another group of five calves were fed an identical ration except that the cottonseed meal was replaced with old process linseed oil meal. These animals made no better gains and were in no better physical condition than the ones which ate cottonseed meal. Both trials were continued for the same length of time.

Tester Finds Lost Dairy Heard Profit

LAST STRIPPINGS OF MILK CON-
TAIN GREATEST PERCENT-
AGE OF BUTTERFAT.

Dairymen who find that the butterfat content of the milk from their herds is too low may be able to raise the test of the milk by spending more time stripping the cows, if the discovery made by a tester in herd improvement association work is an indication of conditions throughout the state.

Charles Weeks, tester in the Genesee-Otisville association, tested 15 pounds of milk which was stripped from cows which were supposedly milked dry. The test for the strippings was 8.6 per cent butterfat. On this herd, the strippings would contain an average of 40 pounds of butterfat each month.

The herd where this test was made contained 13 cows, so more than three pounds of butterfat per cow per month was lost when the cows were not milked completely dry. An equal loss on all cows in Michigan would materially reduce the profits of the dairymen in this state.

Experiments conducted at Michigan State College show that the keeping quality of the first milk drawn from the cow's udder is lower than that drawn afterwards, so the keeping quality as well as the test of the milk is improved if the cow is milked completely dry.

Oakland Accessories

Tourists this year will travel in greater comfort than heretofore by reason of specialized accessories designed primarily for the motoring vacationist which the various dealer organizations are marketing, according to H. F. Bullock, manager of service sales of the Oakland Motor Car company.

Trunks and trunk racks will move in their greatest volume because of the increasing number of tourists who are utilizing this convenience to relieve space in the tonneau of the car for extra passengers. All-steel trunks, Ducoed in colors to match the body combination, and racks trimmed with the same type of nickel molding as the running board of the car, are now being marketed by the Oakland-Pontiac dealer body, Mr. Bullock said.

Other accessories, applicable especially for summer tourists use, with which the Oakland-Pontiac dealers are stocked, include the new auto watch, which attaches to the leader board beside the rear vision mirror, its rim designed to harmonize with the interior hardware of the car; the thermometer which attaches to the instrument panel and insures additional motor protection on a long drive by indicating instantly the heat of the engine, and spare tire locks as insurance against theft.

Mr. Bullock stated that the policy of his organization was to recommend only such accessories as offered utility to the motorist. By centralizing their merchandising in the home office, only accessories approved for Oakland and Pontiac cars by company engineers are offered, he said. A further advantage, he pointed out, lies in centralized purchasing power which results in a better price both to the dealer and the public.

Picked Up About Town

Nowadays if an Oklahoma man wants to be governor of his state he should try to get himself elected lieutenant-governor.

And also keep this in mind—if you can't set the old world right it's not a good idea to give it a push in the wrong direction.

No man in Plymouth completes his education until after he gets married, and then he complains about the tuition.

Dad Plymouth says that marriage must be heavenly because he has noticed that most married people are always harping at one another.

A Boston man ran his car over a girl and later married her. If all drivers had to do that there'd be a lot less reckless driving.

"The nearest some fellows ever get to being in a train robbery," declares Dad Plymouth "is when they eat in a dining car."

Dad Plymouth says it takes 1500 nuts to hold an auto together but one human nut can scatter it all over the landscape.

We know a few men around Plymouth so suspicious-minded that they actually believe the United States was laid off large so the railroads could collect more fare.
