

MANY LOCAL BOYS ENTER MODEL AIRPLANE CONTEST

The Contest Is Being Sponsored By The Mack Craft Amphibian Corp.

COMPETITION IS KEEN

Engineers help boys with technical parts.

The Mack-Craft Amphibian airplane model contest looks like it will be a huge success. It was indeed surprising to see the great crowds around the office every morning, either getting also wood, propellers, rubbers, bearings and many other necessary parts they are using to build their models with.

There will be keen competition in this contest as each boy believes his airplane will walk away with the prizes. The boys promise to build some very clever models. Some are building the Tractor, the Baby R. C. G. and the High Climb Biplane type and many others.

By golly! boys, this airplane model contest is sure going to be a huge success. The kids are pouring in like bees. Now, fellows, you have to use the room next door to the engineers' room when you wish to consult and buy parts for your airplanes. It causes too much confusion in the company's office. If you should want to see Mr. McIntosh, just give him the high sign, and go in to the next room, or call him over in the park in the evenings after working hours.

The following list of boys are members of the contest: Norval Ayres, Florid Dicks, Albert Miller, Frazier Wallenmaier, Billy Petz, Homer Tennant, Forbes Smith, James Holloway, James Williams, Steven Horvath, Sheldon Baker, Robert Pinkerton, J. D. McLaren, Burton Tobey, Kenneth Cool, Frank Allison, Melvin Blank, Russell Micol, Marvin Sackett, Emerson Robinson, Sanford Knapp, Donald Bronson, Arvid Burden, Chester Simpson, Clyde Felt, Dan Carmichael, Richard Hewer, Rupert Hadley.

If the merchants desire to offer a prize to the boys, we would be glad to hear from them as we hope to get together ten or fifteen prizes. Some of the prizes will consist of airplane rides, wearing apparel, cash prizes and enough material to build a complete set of models.

Master Forbes Smith has had considerable experience in building airplane models and has offered to help the boys who have had little experience. His model is now being exhibited in the window of the Mack Craft Amphibian Corp. There are a total of twenty-eight boys entering in the model contest and there promises to be many more before the week is over.

ELECTRIC LIGHT 50 YEARS OLD

DISPLAY OF EDISON'S FIRST LAMP FEATURES GOLDEN JUBILEE OBSERVANCE.

During this summer and fall, thousands of replicas of Thomas A. Edison's first incandescent lamp are to be displayed throughout the United States. This quaint, old-fashioned bulb, will be one of the features of Light's Golden Jubilee, the celebration to com-

Replica of Edison's First Lamp.

memorate its production fifty years ago. The replica, an exact duplicate of the original lamp so far as external appearance is concerned, will be seen in every city, town and village from

(Continued on page 16; Col. 5)

Kiwanians Hear About International Bridge and Tunnel

A program, interesting and educational, from start to finish, was furnished the Kiwanis Club at their last Tuesday noon luncheon, through the program chairman, Roy A. Fisher. Kiwanian Roy, first introduced W. G. Laney, a soloist of international repute who gave several vocal solos, with himself at the piano. This part of the program proved a real treat to the members as several of the club had heard Mr. Laney who is on the air every Tuesday evening at 6:30 from station WJR.

Mr. Sidney Beach, the Bridge Terminal Industrial Site expert with the Allan S. McNell & Co. staff was next introduced, and gave to the club a talk pertaining to the business phase involved in the construction of the International bridge expanding over the Detroit river from Detroit to Windsor, termed as the International bridge.

The enormous expenditure of money to build this overhead bridge by one company and the international tunnel project an entirely separate business undertaking, promulgated by another company, is costing these concerns over forty-seven millions of dollars, an amount comparable to the entire cost of the Detroit United Railway system which was bought a few years ago by the cosmopolitan Detroit Municipal Street Railway Company.

For these industrial concerns to launch into a project of these magnitudes, it required a vast amount of expert advice relative to the financial success to be assured from the constructions of such huge international highways.

It was found that the industrial site values surrounding the bridge and tunnel terminals would return to the investors of these international highways, a permanent income, that would prove their gigantic tasks worth while. The program was concluded by a vocal solo, rendered by Kiwanian Alfred, a member who will not disappoint.

Exams For Postmaster at Salem

Postmaster Giles has received the following communication from the postoffice department:

An examination has been announced to be held at Plymouth for the position of fourth-class postmaster at Salem, Mich., and in the event applications are filed you will be expected to conduct the examination. Persons making inquiry should be informed that the application blanks and instructions to applicants may be obtained either at the place of the vacancy or from this commission.

The date for assembling of competitors will be stated on the admission cards which will be mailed to applicants after the close of receipt of applications August 16 and will be about fifteen days after that date.

If applications are filed you will be advised in due time of the number of competitors and the date of examination.

SEVERAL LATE JULY WEDDINGS

MCKINNEY-HILLMAN
Miss Dorothy Hillman, daughter of Mr. and Mrs. Floyd Hillman of this place, and Fred Newman McKinney, son of Mrs. Blanche McKinney of Northville, were united in marriage at 8:00 o'clock Monday evening, July 29, by Rev. Dr. F. A. Lendrum, at the home of the bride's parents.

Mrs. Beatrice Anderson Smith of Muir, accompanied Mrs. Harold Roberts of Royal Oak, for a lovely song number.

The home was exceedingly pretty, being decorated with yellow and white flowers, mixed with a green vine.

As the bride advanced on the arm of her father, wearing a white georgette ruffled dress with a lovely flowing veil held in place by a lace band trimmed in orange blossoms, and carrying a bouquet of white roses, she certainly was attractive.

The maid of honor, Virginia Giles, wore a yellow organdy gown with matching hat. She carried a bouquet of pink roses. John Morton of Chicago, a friend of the groom, was best man. Mrs. Beatrice Anderson Smith played

(Continued on Page 8, Col. 1)

NEW SLOGAN FOR THE FAIR IS ADOPTED

FROM NOW ON IT'S "A BIG FAIR IN A GOOD TOWN," SAY OFFICIALS

"A Big Fair in a Good Town."

That is the new slogan of the Northville Wayne County Fair Association. In the past it has been "The Biggest Little Fair and Growing Every Year."

But President Nelson Schrader and other members of the association have come to the conclusion that the fair is no longer the "biggest little fair" but that it is a real big fair, one of the best that is put on in the country.

Therefore they have deemed it advisable to change the slogan and make it "A BIG FAIR IN A GOOD TOWN."

And good judgement has been used in the selection of the name because in the past few years the fair has come to be one of the big ones of the state.

It far exceeds in size a very great portion of many of the big county fairs. There is no question but what it is much better than most of them and as officials after going over the matter carefully decided that it was best to eliminate the use of the word "small" and substitute the word "Big" as that more correctly defines the actual fair that is held in Northville.

The annual premium book for the association will be out within the next week or so.

Just like the fair, the premium book is bigger and better than ever before. More prizes are listed and necessarily that requires a larger amount of space.

Secretary Floyd Northrop is highly pleased with the prospects for the fair this year. He says he is finding a great amount of interest in the event scheduled for September 17 to 22, a trifle earlier than last year, and that there is every indication of record breaking crowds providing the weather is at all favorable.

Fred Lyke who has charge of the concessions of the association this year, states that the sales of space are greater for this date than they were a year ago at this time. He made a check of the records and he says he is highly pleased with the way the concession people are coming in.

In addition to the tremendous amount of improvement work going on at the fair grounds, the visitors this fall are sure to be pleased with the efforts being made in their behalf.—Northville Record.

Plymouth Man Leases Gravel Pit

Floyd W. Hillman has leased the Foster gravel pit at Milford, and the following item appeared in last week's issue of the Milford Times:

"Activity at the Foster gravel plant is being renewed and the outlook is good for the development of another local industry. The land and equipment has been leased by the owner, E. E. Foster, to Floyd Hillman of Plymouth, who is adding to the present plant a tension drag-line outfit and a Simplicity screen. These facilities will make possible an output of 300 yards per day. Mr. Hillman is experienced in this line of business, and has engaged John Matteson of Highland for his foreman."

Severe Cut

Helen Jane Springer, daughter of Mr. and Mrs. Harvey Springer of 351 West Liberty St., accidentally fell on a piece of glass last Sunday morning, inflicting a deep triangular cut on the upper left thigh. The little child was taken to the office of Dr. Peck and several stitches were taken to close the wound.

PLEASANTLY ENTERTAINED

Mr. and Mrs. Henry P. Lezotte pleasantly entertained twenty-eight relatives and friends last Sunday, the event being the latter's birthday. A delicious dinner was served, and everyone departed at a late hour, wishing the hostess many more happy occasions.

MANUFACTURE NEW ICE CREAM.

On another page of the Mail today the Palace of Sweets have a large ad in which they announce the brand of ice cream which they manufacture. They are making some special prices too. Mr. Vateck has built up a wonderful sale on this ice cream which he manufactures under the most sanitary conditions and with the best and purest of ingredients. Read the ad.

George B. Shafer, 84, Succumbs at Detroit

George B. Shafer, for many years a well known resident of Plymouth, passed away in Detroit, Monday, aged 84 years. Mr. Shafer had been in failing health for several years. Since the death of his wife, he has made his home in Detroit with his son, Claude J. Shafer.

The deceased was born in Plymouth, August 27, 1845, and with the exception of the past few years has always resided here. For a number of years, he and a brother, the late Al. Shafer, conducted a foundry and implement business here. Mr. Shafer was married to Emma P. Johnson on June 3, 1870, and she preceded him in death January 25, 1917. To this union two sons were born, Fred, who died in 1904, and Claude, who survives. He is also survived by one brother, Edward Shafer of Northville, and one sister, Mrs. Elizabeth Wills of this place.

The deceased was one of the early residents of Plymouth, and saw the village grow from a very small beginning to what it is today.

Funeral services were held from the Schrader Bros. Funeral Home, Wednesday afternoon at 3:00 o'clock, Dr. F. A. Lendrum officiating. Interment took place in Riverside cemetery.

Death of J. E. Johnston

John E. Johnston passed away Saturday, July 27, aged sixty-two years. He leaves two daughters, Mrs. David Downing of New York, and Mrs. Albert Williams of this place.

Funeral services were held from the Schrader Bros. Funeral Home, Monday afternoon at four o'clock, Dr. F. A. Lendrum officiating. Interment took place in Riverside cemetery.

WIND DAMAGES NEW FACTORY PLANT

The severe windstorm which swept over Plymouth last Sunday afternoon did considerable damage to the partially constructed plant of the Mack-Craft Amphibian Corporation on the Ann Arbor road. A portion of the brick wall on the east and west sides which were not supported were blown in by the force of the wind. The damage amounted to about \$400.

INDIAN GAS FOR BIG AIRPORT.

The Red Indian Oil Co., of which H. A. Sage & Son are local representatives, have been selected to furnish the gasoline by the City of Detroit, for aviation use at the new City Airport. This is a distinct honor and a splendid tribute to the high quality of Indian gasoline.

Celebrating 7th Anniversary Sale

On another page of the Mail today will be found a half-page advertisement announcing the big anniversary sale of Blunk Bros. This big selling event marks the seventh anniversary of this store. During these years this store has steadily grown until today it is one of the largest department stores in this section of Wayne county. The new basement store, which was recently inaugurated has proven a very popular department with the patrons of the store and many attractive bargains can be found there. The first floor is given over to the dry goods, men's furnishings and ladies ready-to-wear departments,

PROMINENT PLYMOUTH PHYSICIAN MEETS WITH FATAL AUTO ACCIDENT

FIREMEN ON WAY TO BLAZE, STOP TO PUT OUT BLAZING AUTO

The fire department was called out about midnight Wednesday in response to a fire on the Powers road near the Seven Mile road. On the way out the boys stopped and put out a burning automobile. It took just 20 minutes from the time of the alarm for the firemen to reach the scene of the fire. A barn and some out buildings were destroyed, but the house was saved.

New C. of C. Secretary Here

Berg D. Moore, of Indianapolis, Ind., has arrived in Plymouth and has assumed his new duties as full time secretary for the Plymouth Chamber of Commerce, of which full mention was made in last week's Mail. In company with President Perry Rickwine, Mr. Moore was around Thursday morning meeting the business men and getting acquainted. He is a pleasant gentleman to meet and looks like a "five wire." We welcome Mr. Moore to Plymouth.

Celebrated Fiftieth Wedding Anniversary

Mr. and Mrs. Fred Schiffe celebrated their golden wedding anniversary on Wednesday, July 31st. Mrs. Albert Reddeman and Mrs. Walter Schiffe prepared the dinner. There were forty guests and among them were Mr. and Mrs. William Schiffe and son, Robert, of Detroit. The table decorations were in gold and white while the rest of the home was arranged with flowers. Mr. and Mrs. Fred Schiffe were the recipients of many beautiful gold gifts.

UNDERWENT OPERATION.

Dan Wright, son of Mr. and Mrs. Arthur Wright, underwent an operation for acute appendicitis, last Monday evening at the Highland Park General hospital. Dan's many friends wish him a speedy recovery, and a speedy return to his old stamping grounds, the Earl Mastick garage.

Dr. R. E. Cooper Instantly Killed When Cars Collide On The Plymouth Road About Noon Last Saturday July 27th

He Had For More Than Thirty Years Been a Practicing Physician in Plymouth and Had a Host of Friends in The Community

A TRIBUTE TO DR. COOPER

In the passing of Dr. R. E. Cooper Plymouth loses a prominent citizen, known for his big hearted kindness in hundreds of families in this community. His untimely death has come as a personal loss to many. A physician in this community for over thirty years, he has played an important part in the innermost life of the community. His kindly chats after his professional visit was completed, will be missed by many who were afflicted and needed his cheering words of comfort and advice.

One of the things which was dear to the doctor's heart, was the crippled children's work of the local Rotary Club, of which he was chairman, and in which he took a keen interest and to which he gave much of his time and efforts. In this work he will be especially missed. Dr. Cooper stood high in the medical profession, and he will be missed in these circles.

In Dr. Cooper's death, Plymouth has lost a good citizen, kind and sympathetic, and one whose place will be hard to fill in the community. Not often are the citizens of a community shocked as they were last Saturday forenoon, when the news came to town that Dr. R. E. Cooper had met an accidental death on the Plymouth road, at about 11:00 o'clock. The doctor was driving his car, a small coupe, toward Plymouth, and was the third in a line of cars that had slowed down to pass a wagon loaded with hay and moving slowly. He decided to pass the vehicle and overtake the other cars ahead of him. At the same time he turned out Gordon Duncan, a collector for the local credit bureau, who was driving east and about thirty feet west of the horses drawing the hay, noticed the rapidly approaching car, saw that there was no room for it to clear the cars ahead and still get back to the right side of the road. He headed for the ditch to make room for Dr. Cooper's car to pass on the pavement. The doctor evidently saw the impending danger, and also headed for the ditch at the same time, but it was too late, and the front wheels of both cars hit and then came the fatal crash.

Passing motorists quickly came to the assistance of Dr. Cooper, but he was dead before a physician could arrive from Plymouth. Duncan was brought to the village, where he was found to be badly bruised on the right side, thigh and nose. He also lost several of his front teeth. It was lucky that he, too, was not killed or more seriously injured. The fact that his car was equipped with non-shatterable glass no doubt was a great factor in saving his life. Both cars were practically total wrecks.

Dr. Robert E. Cooper was born in Lindsay, Ontario, December 23, 1874. He attended the University of Toronto, where he took degrees in literature and medicine, after which he served an internship in the General Hospital of Toronto, afterward completing his education with a post graduate course in medicine at McGill University in Toronto. In the year of 1897, he went to Highland Park, Michigan, where he began the practice of medicine. Two years later he removed to Plymouth and began his practice here. In years of service he was the oldest practitioner here, and for many years has at one time or another been called to relieve suffering in nearly every family in town. Always of a sympathetic nature, and always ready to listen to whatever his patient might have to say to him, his visits were always looked forward to with eagerness by those whom he had come to administer to.

In 1902, he was united in marriage to Maude Sherwood of this place, and to this union one son was born, Winston Cooper, who, with the widow, is left to mourn the untimely death of husband and father. He is also survived by one brother, Clarence Cooper of Oakland, California.

Dr. Cooper was affiliated with Plymouth Rock Lodge No. 47, F. & A. M., Union Chapter of Royal Arch Masons of Northville, Northville Commandery Knights Templar and Moslem Temple of Detroit. He was a charter member of the Plymouth Rotary Club, and ever since its organization he took a very keen and active interest in the work for crippled children, and assisting in every possible way the work of Boy Scout organizations.

During the world war, Dr. Cooper was chairman of the local examining board, and in this capacity he rendered valuable and conscientious service to his country.

In his daily rounds of service to his patients, the doctor made a host of friends, who were not only shocked but sincerely grieved over his untimely death, and he will be missed in hundreds of homes where he had been the family physician and friend for many years.

One of the saddest features of the doctor's death was the fact that his wife was in Europe, making a tour of that country. She has been communicated with, and is now on her way home.

Funeral services were held from the Schrader Bros. Funeral Home Tues-

day afternoon, and was one of the largest attended here in many years. Dr. F. A. Lendrum, assisted by Rev. Walter Nichol, conducted the services. There were many floral pieces from organizations, friends and fellow physicians. The remains were placed temporarily in the W. O. Allen mausoleum in Riverside cemetery pending the arrival of Mrs. Cooper.

Rotarians Hear Two Good Talks

The members of the Plymouth Rotary Club listened to an interesting talk by Dr. Robert Haskell, superintendent of the Wayne County Training School, on the work and aims of that institution, last Friday, at the luncheon hour of the club. The doctor is always a welcome speaker at Rotary luncheons.

Rotarian Glenn Jewell also gave a classification talk that was very interesting and instructive as well.

Will Stage Big Pageant at Milford

THE FAIR TAKES PLACE AUGUST 7, 8, 9, 10

Rehearsals for the grand pageant to be given at the fair on Thursday, Friday and Saturday evening is actively under way every other afternoon and evening at the high school gymnasium. On days when not engaged here, Mr. Knowles, the director, is conducting group rehearsals in other communities in the country. The selection of the cast will probably be completed by the end of this week.

An outline of the movement of the pageant as furnished the Times by the director is as follows:

Following the blast of the trumpets, comes the prologue in which Miss Oakland county arrives with her attendants, the latter named for and representing the various communities of the county.

Miss Columbia and her 48 states, represented by ladies from different sections of the country arrive. Miss Oakland County gives a greeting and an address of welcome to which Miss Columbia responds. These all move to the court of honor at the sides of the stage and the scenes of the pageant pass before them.

Following promptly will be such high lights of action as the Creation ballet in which, 60 older girls take part; an effective Indian scene with

To Our Patrons

The Penniman Allen Theatre at Plymouth will close for the months of July and August. This is made necessary in order to make changes to provide for the installation of sound and talking equipment. We have always tried to give our patrons the best in entertainment and will continue by purchasing the most up-to-the-minute sound equipment on the market.

The Northville theatre will continue its regular policy of three changes a week—Sunday, Wednesday and Saturday.

We will hope to see you all the first of September and expect to have a real treat for you.

A COMING ASSET

Laying politics aside, and it had no business being tied up with politics in the first place, the greatest achievement this country has ever undertaken in the field of conservation is the subjugation of the waters of the Colorado river by the erection of Boulder Dam. Great as its cost will be, it is going to create many times that amount of wealth by setting up a new empire of productive lands which will annually add an enormous sum to the coffers of the people.

It will require eight years to build Boulder Dam, and the cost will be approximately \$165,000,000. But hydro-electric power will be sold to a ready market for revenues which will repay the cost in a relatively few years. Behind the dam, 550 feet high, will be erected a lake of water sufficient to cover 40,625 square miles of land one foot deep and to irrigate to full productivity 500,000 acres of rich farm land in Arizona, Nevada and California, which can be brought under its influence. Canals leading from the new high level of water in this lake will bring under productivity enormous areas of land now partially or wholly useless and make them turn an annual harvest of wealth into the national treasury. Indirectly, every citizen of Plymouth will share in the benefits to be derived through this great achievement in conservation.

But best of all, it will be the stepping stone to a long line of such reclamation projects that will eventually make the millions of useless acres now scattered over the Great West blossom like the rose. It won't be many years until the desert wastes west of the Rockies will be rated as Uncle Sam's richest market basket.

JOINING THE CHURCH

Not long ago we asked a minister to tell us the reasons given by some people around Plymouth for not joining church, and here are a few: "I am waiting for my husband to join;" "I don't consider myself good enough;" "I don't have the right kind of clothes to wear;" "I got too much church in my childhood;" "There are too many hypocrites in the church;" "The church is a joy-killer, I want to have a good time;" "I am too tired to go to church on Sunday." Those are the favorite alibis, and it ought to be easy for every non-attendant to pick out the one he uses most. They've been in use since the hills were young, and probably will be used for a long time to come. But, in a country that is generally religious, we wonder how many who use these alibis realize that they are as thin as it is possible for an excuse to be. And we also wonder if the same ones who use them are actually foolish enough to believe that those who do go to church accept them as a sufficient reason for anyone staying away.

"AIR-MINDED" FARMERS

We wonder how many people around Plymouth know that the farmers of the U. S. are among the country's most consistent flyers. Well, they are, if one is to believe figures recently compiled by aircraft makers. Of 4,791 planes sold from March 1928 to March 1929, 1,043 of them were purchased by rural residents. And during the national air races in Los Angeles last September 111 planes were sold, of which 53 went to ranchers and farmers.

In a way, it might be expected that the plane would prove to great value in widely-separated communities and that ranchers and rural business men would find it of more constant service than those whose interests are closely bound up in the compact business circles of cities. But if you tell the average citizen that almost one-fourth of the planes bought in this country last year were purchased by farmers they will be inclined to doubt it. Yet it is true, and it is also accepted as further proof that the fear of airplane travel is gradually being replaced by a spirit of confidence. Remember when folks used to feel they were flirting with death when they entered an auto, and how we looked on it as an agency of destruction? Yet in 20 years we have reached the point where women and children handle a car as safely as they could handle a baby buggy. Who is there to say that in another 20 years the public will be accepting the airplane as a vehicle fully as safe as the auto.

WHAT IT COSTS

Insurance companies have recently been gathering statistics in every state in the union in order to learn how much it costs to rear children. In the average for the entire U. S. it was found that it costs parents about \$10,047 to rear a girl from birth to the age of 18 boys cost slightly less. The average also shows parents spend \$531 to maintain a baby through the first year of its life. By the time the youngster is 10 years old the average parents have spent \$4,253, and this expenditure is increased to \$7,551 by the time the boy or girl is ready for high school at the age of 15. There may be some Plymouth parents who will consider these figures a little high, but it is an average, and if they reared their children for less then someone else spent more on theirs. Even at that the American child is a big bargain, no matter what it costs to raise one.

MORE EGGS PER HEN

The trend toward increased production has hit the egg industry and newspapers are devoting space to the experiments of Dr. R. T. Renwald, Omaha poultry fancier who, after five years, has developed a brood of chickens without wings and toes. Normal hens, he explains, are bothered each year with the moulting of their wing feathers; during this period egg production falls off. The new type hen, having no wings, can keep right on laying the year round, producing on the average, Dr. Renwald hopes, 300 eggs a year. In addition, the new type of chicken will be easier to keep in a yard since she can't fly or scratch. As Will Rogers, the comedian, explains: "They're a fine kind of chicken for egg production, but it's going to be pretty tough on the fellow who is accustomed to eating at the second table and getting nothing but the wings and gizzards."

CEDAR CHESTS PROTECT WOOLEN CLOTHING

Red Cedar Chests Are Excellent for Protecting Wool Clothing from Moth Damage.

(Prepared by the United States Department of Agriculture.)

The unusual tightness of a well-constructed red-cedar chest, when not cracked or warped, makes it of even greater advantage than an ordinary trunk or other household receptacle for storing clothing and preventing moths from getting in to lay their eggs. In addition chests made of the heartwood or red cedar have definite insecticidal value. The aroma of the wood kills any newly hatched or young larvae of the clothes moth, should there chance to be any unscrubbed moth eggs on the articles when put in the chest.

The bureau of entomology of the United States Department of Agriculture recommends, however, that all winter clothing subject to attack by moths should be thoroughly cleaned, brushed, beaten, and if possible, sunned, before being stored during the warm weather. This treatment, if

carefully done with special attention to brushing out pockets, seams, and other places of concealment, will minimize the likelihood of damage, since it will remove those stages of the moths that the chests will not kill. Cedar chests cannot be depended upon to kill the moths or millers, their eggs, or the worms after they are half to full grown, or after they are three or four months old. Neither will the chests kill the pupae or chrysalids. As none of these stages except the larvae are capable of injuring the garments, it is a matter of no practical importance whether or not the cedar chests kill the moths, eggs or pupae. But too much cannot be said about the necessity of making sure that the clothing going into the chests is free from the older larvae or worms; otherwise losses may be sustained due to carelessness, not to the failure of the chest.

ATTRACTIVE SUIT FOR LITTLE GIRL

Combination Outfit Will Appeal to All Mothers.

(Prepared by the United States Department of Agriculture.)
Jane is going to wear one of her sun suits almost all day long while she visits a little friend who has a wonderful back yard with a sand pile in

With the Dress on the Sun Suit Serves for Underwear and Bloomers.

It, and swings and all sorts of other interesting things to play with. However, the automobile ride comes first, and Jane's mother feels that the sun suit, with its open top, is not quite enough protection from the breezes

The Sun Suit.

during the ride, even if Jane herself does not in the least mind appearing in public in her sun suit. So a little matching dress has been designed, made as simply as possible, with the lower part of the sun suit serving as panties. By undoing one button and pulling the dress over her head, Jane is ready for play, and equally quickly, all dressed again to go home.

Little combination outfits like this will appeal to mothers who are obliged to take their children in public conveyances before reaching the beach or park where sun baths are possible, or those who for any other reason wish to be prepared for a quick change in the child's costume. The bureau of home economics of the United States Department of Agriculture has been much interested in designing practical, attractive clothes for little children, with special attention to easy laundering features and simple construction. Soft cotton prints make charming outfits of this kind.

"FRESH" BERRIES ALL YEAR ROUND

Feasible to Pack Soft Fruits in Small Containers.

(Prepared by the United States Department of Agriculture.)

Experimental results with the "frozen-pack method" of storing berries promise to furnish "fresh" strawberries, raspberries, and other soft fruits to the housewife the year round, says the United States Department of Agriculture.

Department investigators have found it feasible to pack these fruits in small containers suitable for domestic use which may be handled by groceries and markets with improved refrigeration facilities.

The preserving of berries by freezing them in barrels, kegs, or cans, commonly called the frozen-pack or cold-pack method, is already an industry of considerable importance in the Pacific coast region, where approximately 100,000 barrels of berries are put up by this method yearly. When good fruit is put into cold storage within a few hours after it is packed in the barrels and is cooled quickly to freezing temperature, it has a quality which compares favorably with the fresh fruit. The berries may be packed with or without sugar, and if enough sugar is used the rich color and the flavor of the berries will be retained.

Although the 50-gallon container is commonly used at present, there is a tendency toward the small package which can be sold direct for domestic use. Experiments indicate the practicability of packing strawberries and raspberries in the smaller package and storing under refrigeration, so they will retain much of their freshness long after picking.

LOCAL NEWS

Mrs. Orton Smith of Pontiac, spent Monday with Mrs. Jesse Hake.
Mrs. C. G. Draper entertained Miss Neva Gattfield of Detroit, Thursday.
Mrs. Jesse Hake spent Wednesday with friends at Silvan Lake, near Pontiac.

A CARD—In loving memory of our dear husband and father who departed this life four years ago, August 8, 1925.

He is gone but not forgotten by his wife and family.
Mrs. Agnes Parrish and family

Michigan State Fair

The first Wild West round-up ever seen in the Middle West has been engaged to appear at the eightieth annual exposition of the Michigan State Fair, Sept. 1 to 7. A performance will be given each afternoon and evening in front of the fair grandstand. Several hundred cowboys, cowgirls and Indians will participate.

The rodeo is of the type and size of the famous annual affairs at Pendleton, Ore., Cheyenne, Wyo., and Calgary, Alberta, attended by thousands of spectators. All the features of those events, chuck-wagon races, the woolliest sport ever devised on the Western plains; bronco-busting, trick and fancy riding; wild-cow milking contests; relay races, steer bull-dogging, wild horse races, roping and Indian squaw and Indian tepee races will be offered.

The rodeo is in no sense a circus, but more nearly approaches the great automobile races in character. The participants receive only expense money, thereby being forced to extend themselves in the competition for the cash prizes to make their efforts profitable. All the cowboys are veterans of the western ranges and winners of the great Western stampedes. Many of the cowgirls are world champions in their own right. The rodeo is being brought to Michigan by a famous character of the Western frontier, Col. C. F. Hatley, a noted law enforcement officer in the California cattle country years ago and a veteran of the Spanish-American war.

Fifteen vaudeville acts, serial fire-works, to be seen here for the first time, and the 41st Highlanders "Kiltie" band of Hamilton, Ont., will be part of the grandstand show each evening of the fair.

Mr. and Mrs. Roger Vaughn attended the wedding, Saturday, of T. Gordon Southwell and Miss Estelle Lamonte, which took place at the People's church in East Lansing.

Subscription for the Mail for 1929 for \$1.50.

TISSUE GINGHAM IS COMFORTABLE

Dress of Simple Style, Cool and Suited to Hot Days.

(Prepared by the United States Department of Agriculture.)

Tissue gingham in an attractive weave of soft orange-yellow and white checks was used for the cool-looking, comfortable, hot weather dress designed by the bureau of home economics of the United States Department of Agriculture. A very simple style, suited as a rattle full figure, was chosen. In fabrics having decided checks or stripes, skirts cut on the straight of the goods often look better than those cut in one piece with the large upper part. So in this case the waist and skirt were cut separately and sewed together. The joint is concealed very neatly by a straight belt at the hip level.

Needed fullness in the waist is absorbed by inverted tucks at the shoulder, darts under the arms, and slight gathers at the belt line. The skirt has a few large plaits at the

Cool, Becoming and Appropriate.

center front to give room for walking, and slight gathers across the back, where the belt and waist are securely attached.

The tailored effect of the collar and front opening is enhanced by the round buttons harmonizing with the dominant color of the material—orange-yellow. Three-quarter sleeves are loose and comfortable, and appropriate for a mature woman to wear on the street. The light-weight, broad-brimmed shade hat is leaf green, adding to the generally cool, summer-like effect of the costume. The slight weight of the hat adds comfort.

Club Atmosphere Best for Little Poker Game

Many of the boys in the city council are not averse to a friendly game of "five and ten," and so a few of them were sitting around a circular table at the home of a friend the other night. The wife thought it would be a kindly and popular thing to give the boys a sandwich or two and she bustled herself like any perfect hostess would do.

The sandwiches came, but the boys hardly knew what the filling was, as they were too occupied looking for the third ace or trying to find the fifth club. The dear lady didn't know it, but it's not ethical to interrupt that kind of a game.

A little later she happened to think that the baby had just reached the cute age and she knew the "game" would only be tickled to death to see him perform. So she toted out the little fellow, who put on his act to an unsympathetic audience.

"I guess we will play the next game at the club," one of the boys remarked, and there was a heartful chorus of "Amen."—Breckton Enterprise.

Englishman First With Idea of Artificial Silk

Most of the credit for the idea of manufacturing artificial silk goes to France, and the honor has usually been given to Reaumur, a French naturalist. Actually, the first known suggestion was made by an Englishman, Dr. Robert Hooke. In 1664 he published a book, "Micrographia," in which he described a microscopic examination of real silk, and suggested the possibility of producing a similar thread by mechanical means. The first machine to produce an artificial thread was made in England, in 1840. Mr. Louis Schwabe took out the first patent and erected his machine, embodying spinnerettes, in Manchester, but the product failed to attract and Schwabe committed suicide three years later. Today the spinnerette is in full use, and \$700,000,000 is invested in the industry in England alone.

Bible Printing Restricted

As Colonial New England rebelled against the tax on tea, so it must have rebelled under the ancient law which gave to the crown a monopoly of the right to print the Bible, for the literary tastes of those hardy pioneers were distinctly religious.

But it was a law with teeth, for it is a matter of history that in 1537 a certain Richard Grafton was imprisoned until he gave bond of \$500 that he would print no more English Bibles until given permission to do so by the king. From that time the right to publish the English Bible was vested with certain printers who were connected with English universities—Detroit News.

Municipal Notes

BY THE MANAGER

All gravel streets in the village are now undergoing grading in preparation for another treatment with calcium chloride for the laying of dust. This treatment should take care of the dust nuisance for the balance of the summer season.

Flower beds in our parks are now at their best, and lend a real touch of color and beauty to the surroundings. This is particularly true of the large circular bed in Kellogg Park.

Notices are now being prepared calling the attention of property owners to the need for repainting or replacing

LOCAL NEWS

Mr. and Mrs. Oscar Freiheit spent Sunday in Lansing with friends.

How do you choose?

Every time you make a purchase you make a choice. Buying a certain product may be so much a matter of habit that you don't realize you are choosing. But the fact remains that in accepting one brand of goods you are always rejecting others; and the satisfaction you get from what you buy depends on the wisdom of your selection.

How do you know which bed-sheets, or which roofing material, or which radio will give you service you require? You can't personally test everything you buy and compare it with all the other products in its class. But there is a way to find out which brand fits your needs.

The people who are most successful in their buying—who achieve the highest percentage of satisfaction from the things they own and use—are those who consistently read the advertising, and buy consistently advertised goods.

Choosing isn't just "guessing" when you follow the guidance of the advertisements.

YOU CAN DEPEND ON GOODS ADVERTISED IN THE MAIL. It pays to read the advertisements.

Will Stage Big Pageant at Milford

(Continued from Page 1, Col. 7)

the tribe in full regalia depicting the life of the Indians in the time of Chief Pontiac; the Wilderness ballet which will be a prologue to the historical scenes which will represent high spots in the history of Oakland county as suggested by the historical committee of the Women's Literary Club.

The scenes will be staged with all the costumes and properties necessary to make them effective and realistic.

The second part of the pageant is the Masque of Nations and is purely a spectacle. Nationalities composing our cosmopolitan population will be represented in native dances and costumes.

The pageant concludes with a grand patriotic finale in which the entire cast participates.

The stage will have special scenic settings, lighting effects and costumes under personal directions of Larry M. Knowles of the John B. Rogers Producing Co. of Fostoria, Ohio.—Milford Times.

TODD'S INDOOR TEAM SCORES TWO VICTORIES

Todd's indoor team defeated the Robinson Sub. team last Friday evening, 11 to 10, coming from behind in the last inning to put the winning run across. They also defeated Dunn Steel Products Tuesday evening, to the tune of 19 to 4.

Todd's team will play the fast Ford Taps Friday night. A good game is looked for.

Pigskin Bottles

In Spain wine is still carried in leather bottles made of pigskin. The skin is cured all in one piece and made into a bottle holding in some cases as much as 40 gallons.

PLEASANTLY SCREENED PORCH FOR SUMMER

Outside View of Back Yard as Seen From Screened Porch, Maryland Farm Home.

(Prepared by the United States Department of Agriculture.)

What do you see from your kitchen as you work? And have you a restful corner near or in your kitchen where you can relax occasionally? There are times almost every day when you may have a few minutes free, not enough to go all the way to another part of the house, but well worth using, if possible, for sitting down and in the homely phrase, "taking the heft off one's feet."

Here is a glimpse of a screened porch attached to a farm kitchen near New Market, Md. Following suggestions made by the county home demonstration agent, the porch was arranged with a divan and an easy chair where the intervals between the more active kitchen tasks could be passed restfully. During six months of the year at least, and in Maryland some-

times more, the homemaker can sit out here when preparing the vegetables, or chatting with a morning caller, or pick up her darning bag, or otherwise spend the odd minutes that count up in the course of a day. The outlook into the yard is made attractive by shrubs and flowering plants. It can be seen from the kitchen, too.

Home beautification is one of the home-making activities being carried on by a great many farm women under the stimulus of extension workers of the United States Department of Agriculture and the various states. Suggestions are made for improving the existing surroundings, both out of doors and inside, by simple means such as this porch. They may usually be accomplished by the housewife herself with very little assistance or expense.

BETTER APPETITE FOR VEGETABLES

Large Increase Seen in Use of Garden Truck.

(Prepared by the United States Department of Agriculture.)

"Americans like vegetables—and they appear to like them better each year," says E. C. Boree, marketing specialist in the United States Department of Agriculture.

"The annual gain of at least 1,500,000 in population does not explain all the increases in acreage and production of truck crops. Our appetite for vegetables seems to be growing, both because of encouragement from health authorities and because it is now possible to have a wide variety of fresh vegetables the year round."

A great volume of truck is hauled to the city from near-by farms, says Mr. Boree, who also emphasizes developments in carlot movements of vegetables in the last dozen years. In 1918 the United States Department of Agriculture collected reports of the movement of about 145,000 cars of seventeen leading truck crops. Last year shipments of the same products filled 350,000 cars, or more than double the movement ten years ago. This does not include shipments of the important field-crop vegetables such as potatoes and sweet potatoes. Neither does it include much of the green products used by the large canning factories.

"In other words," says Mr. Boree, "while the population increased about 15 per cent, carlot shipments of vegetables increased 140 per cent. Lettuce, green peas, spinach, string beans, celery, and cucumbers have made especially noticeable gains. Shipments of lettuce are now seven times as great as they were ten years ago, and range from 40,000 to 50,000 cars annually. Most of this lettuce originates in the Far Southwest, and ends its journey in the markets of the northeastern coast cities.

Fireworks Display A Feature at Michigan State Fair

An entirely new type of fireworks display will be shown each evening except Sunday of the eightieth annual exposition of the Michigan State Fair, September 1 to 7, according to state officials. The fireworks will be in connection with the daily rodeo and vaudeville shows in front of the grand stand, which with other features will make up, fair officials assert, the finest grandstand show in the fair's history. Aerial pyrotechnics are the latest development in fireworks. With the sky as a background and raised where they can be seen by everyone, the fireworks are highly artistic, spectacular and visible to all.

Many of the finest outdoor vaudeville acts now touring the country have already been engaged for the grandstand show. One troupe, the DeSteyes, have just reached America and are regarded as the finest ever produced in Europe. They are high-wire artists, specializing in hair-raising acrobatics and difficult balancing, and considered the most daring aerial sextet ever brought to the Michigan Fair.

The Hungaria troupe are wonderfully costumed men and women acrobats and tumblers, presenting an entirely new repertoire of acts and tricks, exceptional not only because of their novelty but because of the remarkable precision required in their performance.

John R. Agge, world-famous horse

ROBINSON SUB. TEAM WINS TWO AND LOSES TWO DURING WEEK

The Robinson Subdivision indoor baseball team won two more games during the past week, but they also dropped a couple, thereby breaking even for the week.

Last Friday night, Todd's nine won their first game from the R. S. boys in a close game. The next tilt was a baseball game with Farmington and Five-Mile road outfit, played at Rongh and Ready diamond, the R. S. team winning by one score.

Monday evening the hard hitting team from Ford Taps managed to chalk up another victory in a hard fought and exciting game on the high school diamond. The R. S. boys held the lead from the second inning up to and including the eighth. The Ford Taps had the last chance at bat, and the sun was far below the horizon when the R. S. team took the field in the ninth. With two out in the last inning, the R. S. team still held a comfortable lead. However, darkness was fast creeping on, and hit after hit was made until the Ford Tap boys finally won out. It was a game full of action and excitement from start to finish.

Of the six games played between these two teams, each has won three and lost three, and it is expected the next game on Monday night will be a real contest.

Wednesday evening a team from the high school tried to stop the R. S. boys, but they fell far short. The score was 20 to 7.

Tonight a game will be played with either the Dalsey team, Dunn Steel or some other team.

Ford Taps vs. Todd's play at the high school diamond tonight, also. Come and share in the fun.

Auto-Minded

Bobble, age two and one-half, knows many of his letters and can pick out many words. He is a bit original in naming the letters unfamiliar to him. He was spelling "b-o-o-k," and named the letters "bee-fire-tre-kay, book." The family automobile provided the suggestion for the middle letters.

World War Facts

Wyoming is said to have had the highest per cent of physically fit drafted men during the World war. The percentage was 87.2. The heaviest men in the army during the World war, according to states were Alaska (territory), South Dakota, North Dakota, Minnesota.

WATERFORD

The Get-Together club met last Thursday, with Mrs. Ada Smith and Mrs. Arthur Smith, at Worden. There were twelve members and eight guests present. On August 8th, will be the annual pot-luck picnic and election of

officers at Cass Benton Park. Mr. and Mrs. Albert Ebersole were Sunday guests of Clarence Ebersole and family.

The Waterford school is receiving a new coat of paint.

Irene Balko of Telegraph road, spent the week-end with Elizabeth Matthews.

Mr. and Mrs. Harvey VanValkenburg of Northville, and Mr. and Mrs. Sam Fleming and children and Miss Marion Schubert of Dearborn, were Monday evening callers at the home of Mr. and Mrs. William Matthews.

Mr. and Mrs. Percy H. Gray of Detroit, were Saturday callers at the McKorregan home.

Mr. and Mrs. Robert Bechtel of Hastings, are visiting their daughter, Mrs. Arthur Gotts.

Mrs. James Wilson and children spent Friday with her parents, Mr. and Mrs. Elmer Perkins.

NEATLY ARRANGED SLICES OF COLD LAMB

Cold Lamb Garnished With Lemon.

(Prepared by the United States Department of Agriculture.)

One of the reasons foods in summer time can be made to look so appetizing and attractive is that there are then so many colorful, edible materials to garnish them with. Another reason, perhaps, is that many cold dishes are served: Cold slices of meat, fish and other salads, apple jellies, and hors d'oeuvres of various kinds. Garnishes that would soon lose their crisp shapely appearance on hot foods can be successfully used to decorate cold ones. Only enough of any garnish should be used to give a touch of color.

What a difference there is between this platter, photographed by the bureau of home economics, containing neatly arranged slices of lamb, each topped by a thin slice of lemon, and just a plate of cold lamb! The garnish is not intended, in this case, to be solely ornamental. A few drops of lemon on lamb or veal add surprising-ly to the flavor. Another way of making a plate of cold meat look attractive is to alternate slices of ham with chicken, veal, or lamb, so that the two colors contrast with each other. A sprig of parsley, cross, mint, a few celery tops, or small leaves of lettuce, would also be a good garnish for cold meat. Narrow rings of green pepper, strips of pimento, rounds of tomato, thin slices of cucumber or pickles, and olives, are other suggestions for introducing color. Among the cooked and edible garnishes often used by restaurant chefs are slices of beet or carrot cut in tiny fancy shapes, cubes from bright gelatin molds such as

tomato, mint or jellied stockstock, and hard-cooked eggs, cut in slices or symmetrical pieces. Sweet jelly, too, when stiff enough to hold its form, makes a garnish which tastes as good as it looks.

Dainty slices of orange may be used like lemon to garnish either cold or hot meats, especially chicken or duck. Rings of apple, or jellied red colored apples are often served with pork. Potato salad and sliced ham are a favorite combination, each garnishing the other, as it were. Fried chicken, served on a plate with corn fritters, garnished with a bit of currant jelly, makes its appeal to the eye as well as to the palate. The broiled mushrooms or fried onions served with steak are meant to tempt the beholder through the nose as well as the eye.

Lemon, parsley, cross, and cucumber, are the garnishes commonly used on fish. As the lemon is for flavoring, it is better to cut it in quarters or sixths lengthwise than to slice it. Then each person can squeeze the juice over his own portion. Cucumber garnishes are sometimes given a saw-toothed edge with a fancy cutter.

Among the garnishes for cold drinks, especially iced tea, are sprigs of mint, or geranium, or slices of lemon, orange, or lime, with or without a few whole cloves in each slice. A grape or other large green leaf is often used as a garnish under grapefruit, cantaloupe, orange, or fruit cup when these fruits are served as appetizers for dinner.

What has become of the old-fashioned Plymouth man who wore a ready-made black bow tie that fastened to his collar button with a wire loop?

There comes a time in the life of every Plymouth man when he would give ten dollars if he could read a strange woman's mind when she was sizing him up.

Willour Glenn Voliva of Zion City, reiterates his belief that the world is flat on top. And the world thinks he is, too.

Some of us can still remember when Plymouth merchants sold calico for 5¢ a yard and certain customers could always tell him where they could buy it for 3¢.

Fresh Salmon Cutlets Are Always in Season

Fresh salmon is to be had in a great many parts of the country at all seasons of the year, now that facilities for shipping iced or frozen fish enable dealers to send their wares inland and to points many miles from where the fish are caught. One of the nicest ways of preparing cutlets from fresh salmon is described below by the bureau of home economics.

2 lbs. fresh salmon, 1 inch thick
1 egg
1 1/2 cup. water
3/4 cup. salt

Wipe off the salmon and remove any bones. Cut in portions large enough for serving. Dip the pieces of fish into the egg which has been well beaten and mixed with the water. Roll the crumbs and place on a pan or board to dry for a short while. Heat the fat in a heavy skillet, put in the cutlets and reduce the heat. Cook slowly for ten or fifteen minutes until the fish is done and golden brown on both sides. Drain on absorbent paper and serve garnished with lemon and parsley.

Historic St. Lazare Prison to Be Razed

Paris—Wrecking crews which have swept away many landmarks of old Paris in recent years, are now to wield pick and shovel on historic St. Lazare prison, which dates back to 1110 A. D.

In recent years a woman's penitentiary exclusively, it was a man's prison shortly before the revolution and when the commune came to power many were the aristocrats brought from its dungeons to end their days on the guillotine. Among them was the poet, Chénier. Another literary light was Beaumarchais, who wrote the "Marriage of Figaro," but he was one of the lucky ones to emerge again to freedom.

In its 819 years, the building has been hospital, convent and prison. It was besieged by starving citizens in the revolution who wished to seize the prison's foodstuffs. Another mob almost razed it by fire.

It looks from the amount of writing for the magazine he is doing that Mr. Collidge is doing his whittling with a pencil sharpener.

"For my part," asserts Dad Plymouth, "I'd rather be long on the short green than short on the long green."

"They say the Mediterranean fruit fly is practically blind. Probably got that way eating grape fruit."

Earliest Use of Iron

Spectacular iron have been found in Assyrian and Egyptian ruins. In the British museum there is a piece of iron believed to date from about 4000 B. C. In the Black Pyramid of Abusir, at least 3000 B. C., Gaston Maspero found some pieces of iron, and in the funeral text of Tefi I (about 3400 B. C.) the metal was mentioned. The knowledge of iron spread from the south to the north of Europe, and one theory is that iron first came into use in Africa.

Cyclones and Tornadoes

The weather bureau says that cyclones are storms that cover extensive areas with winds of varying degrees of intensity, but usually not of the force experienced in tornadoes or hurricanes. The term "tornado" is applied to a violent rotating wind which usually covers a narrow area and a comparatively short path. A tornado is distinguished by its funnel-shaped cloud.

Hawaii Possible State

There is no constitutional law which would prohibit the island of Hawaii being given the status of a state. It is already annexed and is a territory of the United States, having the usual territorial degree of self-government, with representation by a delegate in the United States congress.

Long Skirts Back

New York—Long skirts have returned to the ballroom, long trousers to the hench, and cotton fabric into fashion's favor. All of which facilitates that smart society still effects the unusual in its escape from boredom—even if it must retrace the calendar.

Cleaning Silver

To remove tarnish from silver, place three teaspoonfuls of salt, three teaspoonfuls of soda and three quarts of water in a bright aluminum pan with the silver. The solution must cover the silver. Boil three minutes. Remove the silver, rinse in hot water and dry. An old aluminum pan may be kept for this purpose but it should not be used for cooking. A bright piece of aluminum may be used with the solution in an enamel-ware pan, provided each piece of silver touches the metal direct or through another piece.

This method of cleaning is satisfactory with solid or plated silver. It is not successful with German silver, or metal alloys.

Electric Cooking Is Healthier

FOODS cooked with the pure heat of an electric range are untainted by smoke or fumes. Vegetables and meats (even the cheaper cuts) are cooked to a rich and melting tenderness, and all the natural juices are sealed-in. Electrically cooked foods not only taste better but also hold their original nutriment intact.

You can enjoy electric cooking in your kitchen now. Convenient time payments and a liberal allowance for your present cooking equipment make it unusually easy for you to own a modern electric range. Come in and inspect the many attractive models.

The New BUICK

**NEW Fisher styling... NEW 99 Horsepower Valve-in-Head Engine*
NEW Controlled Servo Mechanical Brakes... NEW Steering Gear
NEW Road Shock Eliminator... NEW Double Acting Shock Absorbers
NEW Non Glare Windshield.**

America has taken this new Buick to its heart. Millions have thronged to see it... tens of thousands have already placed orders... other thousands have requested demonstrations... all have found that in the five major elements of motor car appeal—beauty, performance, comfort, safety, value—this new Buick with Body by Fisher strides far ahead of any other car in the entire quality field.

New Fisher Styling

The new Buick Bodies by Fisher are longer, lower, more luxurious. They reveal new Fisher styling—new beauty of line and appointment—new colors—which have won outspoken admiration. And they introduce a host of new features including the new Fisher Non-Glare Windshield for safer night driving; new and richer upholstery; and new fittings and appointments of princely luxury.

Pacemaker of Performance

Moreover, Buick for 1930 reveals this same marked supremacy—this same increased leadership—in fleet,

spirited behavior on the road. Its new and bigger Valve-in-Head engine—developing 99 horsepower—provides matchless new virility, pick-up, swiftness and flexibility. A single drive will prove it the *pacemaker of performance*. And the same drive will disclose marvelous new handling ease, comfort and safety, due to a new and improved steering gear and new road shock eliminator; new double-acting shock absorbers which check both bound and rebound; and new controlled Servo enclosed mechanical brakes, the most effective braking system on any car in the world.

See, Drive and Own This New Buick

Bear in mind, this new Buick with its many advancements is offered at new low prices—in three new series and three new wheelbases, with only one standard of quality throughout—the finest in its field. Come see the new Buicks and arrange to drive one. Among the 14 attractive body types is exactly the Buick for you.

*The new engine in the 132- and 124-inch wheelbase series develops 99 horsepower—and the new engine in the 118-inch series, 80 1/2 horsepower.

William Collins of Detroit, recently visited his sister, Mrs. H. C. McClunpha.

Born to Mr. and Mrs. O. B. Rathbun, a daughter, Corrine Clara, July 25th.

Mr. and Mrs. Orley Wood of Detroit, were last week Friday guests of Mr. and Mrs. Harry Wiseman.

Mr. and Mrs. W. R. Palmer and sons, Russell and Richard, were Sunday callers at the Wisley home.

Mr. and Mrs. Charles Carmichael have returned from a week's visit with relatives in Buffalo, New York.

Miss Lucile Fisher of Charlotte, Mich., is a guest for a short time, at the home of Mr. and Mrs. B. E. Giles.

Charles Dreyour, Harold Stevens and Lynford Fritz have returned home from a week's camping at Walled Lake.

Mr. and Mrs. C. L. Finlan and Mr. and Mrs. E. H. McLeur of Royal Oak, spent last week at Grayling and vicinity.

Mr. and Mrs. M. W. Wisley entertained Mr. and Mrs. L. S. Wisley and family of Ypsilanti, Friday evening of last week.

Miss Alta Fisher, a student at the Michigan State Normal College at Ypsilanti, visited her sister, Mrs. Wm. Kaiser, last week-end.

We are glad to report that Gladys Palmer, who underwent a very serious operation at University Hospital last week, is steadily improving.

Mrs. Wm. Dethloff got word from her son, John, that he is in the hospital with three broken ribs, at U. S. S. Borie, San Francisco, Calif.

Mrs. Frank Jeffrey of Marlon, N. Y., and Miss Mabel Sanford of Canton, Ohio, are guests at the home of their brother, George Sanford Burr.

Mr. and Mrs. Owen Schrader of Canton, and Mr. and Mrs. Frank Westfall attended the Zoo and Edgewater Park in Detroit, last Sunday afternoon.

Oscar, Henry and Betty Jane, children of Mr. and Mrs. Oscar Sulkowski of Holloway, formerly of Plymouth, have just completed a three weeks' period at the Vacation Bible School at Holloway.

Mr. and Mrs. D. A. Davidson, Mrs. A. Turner and small son, Claude McLellan of Detroit, and Miss Phyllis Losey of this place, were Monday evening callers at the home of Mr. and Mrs. C. V. Chambers.

Mr. and Mrs. Kenneth Wilson and Miss Lillian Williams of Plymouth, and Mrs. Wilson's sister of Detroit, returned home Friday night from a two weeks' vacation visiting the historical points of Tennessee, Georgia and Illinois. Their trip of 2400 miles covered seven states, with good roads and no car trouble.

A number of friends of Mr. and Mrs. Warren Packard came as a surprise to remind Mr. Packard of his birthday, Saturday evening. Five hundred was the amusement of the evening, after which lunch was served. Mr. Packard was the recipient of many gifts. The out of town guests were Mr. and Mrs. Leon Merriman, Mr. and Mrs. Herman Mahke, Mr. and Mrs. Albert Kukhahn and Mr. and Mrs. Charles Deman of Detroit.

Mrs. Albert Tait returned from Niagara Falls, Monday.

Miss Rose Hawthorne is resuming her work at the postoffice after a slight illness.

Miss Ruth Wilkin is spending several days with relatives in Spencerville and Lima, Ohio.

Mr. and Mrs. C. V. Chambers spent last Friday evening with Mr. and Mrs. Luther Losey at Cherry Hill.

Mr. and Mrs. Byron Wilkin motored to Bowling Green, Ohio, to attend the Wilkin reunion last Sunday.

Mr. and Mrs. Alonzo Hanchett of Garden City spent Thursday evening with Mr. and Mrs. Albert Tait.

Miss Sarah Bartlett and Miss Winifred Bartlett have returned to their home in Plymouth, from a vacation in Grand Rapids.

Oscar Larkins and daughter, Marjorie of Cleveland, Ohio, have been visiting at the home of Charles Larkins and family.

Mrs. J. McKeorchy, John Miller and Mrs. George Deville spent last week Friday afternoon with Mr. and Mrs. George Miller of East Plymouth.

Louise Spicer and Etha Wisley drove out to University hospital, Saturday, to see Gladys Palmer, who has been there more than a week.

Drs. D. B. VanOrman, Mr. and Mrs. George E. Humphries and Mr. and Mrs. Edwin G. Humphries and little son, Gerald Keith, attended the Van Orman reunion at Lansing, Sunday.

Sunday morning a very pleasant surprise awaited Mr. and Mrs. L. A. Wisley, when Mr. and Mrs. E. L. Thomas and Mr. and Mrs. G. A. Meyers of Findlay, Ohio, drove in to spend the day.

The O. E. S. will hold a regular business meeting Tuesday evening, August 6. You will find the lunch room a nice cool place to spend an hour. Come, and help transact the business.

Mrs. Irwin T. Pierce and Mrs. John Paul Morrow spent a few days last week visiting Mr. and Mrs. O. M. McCormick and Mrs. Romaine I. Griner at Albany, Indiana. Mrs. Griner and the former were school-mates at Mt. Ida, Newton, Mass.

MAIL LINERS BRING RESULTS

SEVERAL LATE JULY WEDDINGS

(Continued from Page 1, Col. 2.)

the wedding march. Immediately following the ceremony, a reception was given, after which the couple left on a four weeks' honeymoon trip through northern Michigan. On their return, they will make their home in Northville. The bride was a graduate of Plymouth High School in 1927. She attended Michigan State College at Lansing for one year, and the Univer-

sity of Michigan for a year. The groom is a civil engineering graduate of Bucknell University, and is now employed by Wayne County for whom he is doing construction work.

FOREMAN-BERNHARDT

Miss Ella Bernhardt, daughter of Mr. and Mrs. Gustav Bernhardt of Northville, and Earl Foreman of this place, son of Mr. and Mrs. Alfred Foreman of Salem, were united in marriage at a quiet ceremony on July 27, at the Lutheran parsonage at 4:30 p. m. by Rev. Hoenecke of Plymouth. Miss Clara Paukow was the bride's only at-

tendant, and Edward Foreman of Salem, brother of the groom, served as best man.

The bride wore an attractive star-glow chiffon dress, with a lace hat to match, and carried a bouquet of roses and sweet peas.

The happy couple left immediately on their honeymoon. On their return they will make their home in Plymouth.

CLINE-KENYON

The Methodist Episcopal church was the scene of a very pretty wedding Wednesday afternoon at one o'clock, when Miss Gertrude Dorothy Kenyon daughter of M. L. Kenyon, and Clifford M. Cline, son of Mr. and Mrs. F. B. Cline, were united in marriage by Dr. F. A. Lendrum in the presence of relatives and intimate friends from Detroit, Northville, Grand Rapids and Plymouth.

Stuart Barr of Grand Ledge, sang "Because," and to the strains of Lohengrin's Wedding March, played by Miss Winifred Jolliffe, the bridal party took their places before the altar. The bride was beautifully gowned in pink chiffon, and carried a bouquet of pink tea roses. Winifred Draper as maid of honor, wore blue chiffon and carried yellow tea roses, while Bernice Cline, bridesmaid, wore green chiffon and carried pink tea roses. Pierre Kenyon, brother of the bride, acted as best man.

Following the ceremony, Miss Jolliffe played Mendelssohn's Wedding March.

The happy couple left immediately for a two weeks' honeymoon in the east, and will be at home to their many friends after August 15th, at 240 N. Mill street.

EMENS-BRAINERD

A beautiful wedding was solemnized Monday, July 22, at the home of Mr. and Mrs. E. C. Brainerd, when their daughter, Alne Louise was united in marriage with John Richard Emens of Plymouth, Mich.

Mrs. Laverne Ingersoll presided at the piano and as the strains of the wedding march floated through the rooms, the bridal party took their places in the arched window of the living room, which had been transformed into a bower of smilax and ferns. Lighted tapers in tall cathedral candelabra shed a soft glow on the wedding party as Rev. Brashear of the Presbyterian church, performed the impressive ring ceremony.

Mrs. E. J. Proctor, Jr., as matron of honor, wore her own wedding gown of embroidered ivory satin. Miss Ruth Brainerd acted as bridesmaid and wore Nile green chiffon. Both attendants carried roses and maiden hair ferns. E. J. Proctor, Jr., of Flint, and Coe Emens of Dearborn, attended the groom. Winsome little Jean Procter scattered flowers in the pathway of the bride as she advanced with her father, who gave her in marriage

The bride wore a period gown of old ivory satin and tulle, and carried a shower bouquet of Ophelia roses and lily-of-the-valley. Her wedding veil was held in place by a coronet of tulle.

Following congratulations, refreshments were served at small tables, decorated with sweet peas and gypsophiles, while the long table in the dining room was attractive with candles, smilax and the beautifully decorated wedding cake. At this table were seated the bridal party, near relatives and a few intimate friends. Assisting were Mrs. Rex Gunnell, Misses Florence Sherk, Harriet and Janice Emens, Mary Esther Brainerd and a few of the bride's pupils, Misses Betty Amberger, Lela Miller, Dorothy Service, Dorothy Barnes, Marvel Ward and Bessie McIntyre.

The bride is a graduate of the Michigan State Normal College at Ypsilanti, and is a member of Theta Sigma Upsilon Sorority. She has been a member of the faculty of Yassar high school.

Mr. Emens is principal of the high school of Plymouth. He holds a degree from Michigan State Normal College, a Master's degree from the University of Michigan and is a member of Phi Delta Pi and Phi Delta Kappa fraternities. Both young people are held in high esteem by their many friends and have every prospect for a happy life.

The bride chose a green ensemble with hat to match for her going-away costume. They left immediately after the wedding for a motor trip to Yellowstone Park and the Black Hills, and will return by way of northern Michigan.

Guests included Mr. and Mrs. Alfred Emens and family, Mr. and Mrs. Severance and Mr. and Mrs. Coe Emens of Hillsdale; Mr. and Mrs. G. McDonald, Mr. and Mrs. W. K. McNally and Mrs. Edw. Southerland of Detroit; Coe Emens of Dearborn; Harry Haller of Mt. Clemens; Malcolm Ferguson of Ypsilanti; Mr. Case and Leslie T. Clapp of Hartford, Conn.; Miss Dorothy Hostetter of Chicago; Mr. and Mrs. Carl Spittler of Petoskey; Miss Ruth Butts of Lansing; Miss Florence Sherk of Mayville; Mr. and Mrs. Ed. Smith of Fenton; Mr. and Mrs. John Proctor and daughters of Detroit; Mr. and Mrs. E. J. Proctor, Sr., of Mt. Morris, and Mr. and Mrs. E. J. Proctor, Jr., of Flint.—Yassar Pioneer Times.

Dad Plymouth says that one reason why we never have women presidents is because none of them ever reach the required age.

The Plymouth man just back from a vacation always says he feels better, but what he means is that he feels it's better to be back home.

Some women seem to believe that they have sufficient will power to gossip or leave it alone.

Historians ten thousand years from now will probably refer to the race that back in 1929 worshipped a god called Skinny.

Being with people who dislike you isn't the most pleasant thing in the world, but a woman enjoys it if she knows the dislike is due to envy.

"A girl and a car," says Dad Plymouth, "are very much alike. A good paint job conceals the years but the lines tell the story."

A good command of language is a fine thing, but a perfect control over the tongue is better.

Maybe the reason little men marry large women is that they're afraid not to.

Do You Want a Permanent Position?

The Mack Craft Amphibian Corporation offers a business opportunity to a man who has two thousand dollars to invest in a Super Gasoline and Oil Station to be erected on factory site. The Standard Oil Company has a contract to put in five pumps and tanks to gas airplanes and automobiles.

Here are the terms and conditions by which this company and the party who will become interested will operate the same.

First: If you are desirous of resigning you must give ninety days notice to repay you the two thousand dollars.

Second: If we should ask for your resignation we will give you thirty days notice and will pay you at the end of this time two thousand dollars.

This position carries with it a good salary. The Standard Oil Company has estimated a good volume of business will be sold at our factory site. For further information see

HEAVY HITTING WINS FOR DE-HO-CO; LOCALS DEFEAT FAST UTICA TEAM 3-1

Salem Extends Winning Streak; Canton Center Defeats Taystee Team.

Plymouth defeated Utica a very fast baseball team, at Utica, Sunday with a score of 3 to 1.

The Merchants are going good. Smith, a new pitcher, allowed Utica only four hits.

Plymouth will play West Point at Plymouth, August 4th. This will be a good game to see.

Table with 4 columns: Player Name, AB, H, R, E. Rows include Kracht, Dufour, Milliman, Millross, M. Strasen, Quinn, Goss, Wood, Smith.

Table with 4 columns: Player Name, AB, H, R, E. Rows include Total, UTICA, Hofer, Hale, Fink, I. Phippon, Groholki, W. Phippon, Brockman, Cook, Woodbridge.

Total 33 8 27 1. Sacrifice Hits—Kracht, Hale. Two-Base Hits—M. Strasen. Home Runs—Dufour. Hits off Smith, 4 in 9 innings; off Groholki, 8 in 9 innings.

Salem extended its winning streak to four straight victories last Saturday, when the Pontiac Service nine lost to the young amateurs at Heeneey's field, by a low score of 4 to 1.

With a patched-up infield, Salem showed Pontiac that they were determined to keep up the fine reputation that they have built up this season.

Pontiac obtained their run in the first inning, when Atchinson walked the first two batters and the third singled to left center. A number of the Salem runners were left stranded on the bases for the need of hits at the right time.

Salem's starting line-up was: L. Simmons, c. f.; Smith, l. f.; Atchinson, 3b.; Rebitzke, ss.; G. Simmons, 2b.; Sockow, c. f.; Lyke, 1b.; Miller, r. f.; Foster, p.

Sunday, August 4th, Salem will meet the newly organized Novi team for the first time this season. This game will be played on the high school diamond at Novi.

The Detroit House of Correction team went on a batting spree Sunday afternoon, at De-Ho-Co Park, and pounded out sixteen safeties to beat the American Oil Co. of Jackson, 10 to 2.

Rowland was on the mound for the Farmers, and pitched one of his customarily good games. He allowed nine widely scattered hits, only walked one man, and struck out three of the others.

There will be no game at De-Ho-Co Park next Sunday, as the local boys journey to Pine Lake, near Lansing, on that day.

DE-HO-CO—AB H R E. Destefano, r. f., 2b., 4 2 5 0. Denniston, 1b., 4 2 13 0.

Table with 4 columns: Player Name, AB, H, R, E. Rows include Destefano, Denniston, Spencer, Martin, Jaska, Smith, Giles, German, Rowland, Anderson.

Total 37 16 35 2. AMERICAN OIL—AB H R E.

Table with 4 columns: Player Name, AB, H, R, E. Rows include Bauman, Tittle, Hinkley, Hooster, Grosswalte, Smith, DeFay, Taylor, Snow.

Total 36 9 37 3. *Batted for Martin in the third.

American Oil 0 0 1 1 0 0 0 0—2. De-Ho-Co 0 2 4 0 0 1 2 1—10.

Sacrifice Hits—Destefano, Denniston. Two-base Hits—DeFay, Spencer. Three-base Hits—Giles. Home Runs—Anderson, Hinkley.

Stolen Bases—Giles, 2; Anderson, 1. Base on balls off Rowland, 1; off Snow, 3.

Double plays—Tittle to Hinkley to Grosswalte; Hinkley to Tittle to Grosswalte; Jaska to Destefano to Denniston.

Umpires—Richardson and Rollo. Passed Balls—German and Smith. Scorer—Long.

Hit by pitched ball—By Rowland, Bauman.

The Canton Center team defeated the Taystee Bread Co. team of Detroit, on the home grounds, last Sunday, in a fast game, the score being 1 to 0.

Next Sunday, the Canton boys will wait: Jaska to Destefano to Denniston; the Economy Baler team of Ann Arbor, on the home grounds. Game called at 2:30 p. m.

Table with 4 columns: Player Name, AB, H, R, E. Rows include CANTON, VanBoun, Atchinson, E. Rosenbloom, Ruthford, Finnigan, L. Wood, E. Wood, Wisely, G. Rosenbloom.

Table with 4 columns: Player Name, AB, H, R, E. Rows include Total, TAYSTEE BREAD Co., Laughton, Culbert, Martain, Nator, Herbert, Koviack, Heslop, O'Brien, Olsen.

Total 30 4 1 1. Runs—L. Wood. Two-base hits—Olsen, Herbert.

Double Play—E. Wood to L. Wood to Ruthford; Herbert to Heslop to Culbert. Struck out by Wisely, 12; by Olsen, 6.

Walked by Wisely, 0; by Olsen, 1. Umpire—Smith.

NETHEM LOST LAST SUNDAY. The Nethem baseball team lost to the Burns Aviation team last Sunday.

SALEM. Mr. and Mrs. A. C. Van Sickle motored to Ionia Tuesday to spend a few days with relatives.

Mr. and Mrs. Harmon Gale and family spent from Friday until Monday with relatives at Grand Rapids.

Mr. and Mrs. G. W. Roberts and daughter attended the Taylor family reunion at Island Lake last Saturday.

Miss Ruth Foreman, of Detroit, spent the week-end with her parents, Sunday visitors there were: Mr. and Mrs. Harold Foreman and daughter, with friends from Detroit; Mr. and Mrs. Jas. Dickie; and Mr. and Mrs. M. Reuwick and son and friend from South Lyon.

Mr. and Mrs. G. W. Roberts and daughter and Mrs. Mertie Murray and daughter Fern, of Plymouth, motored to Merrill Friday to visit relatives.

Miss Ruth Foreman, of Detroit, came Tuesday to spend a two-weeks' vacation with her parents and sisters in South Lyon.

Mrs. Murray and daughter Fern, of Plymouth, spent a few days at the Glenn Lyke home this week.

Mr. and Mrs. James Boyle and her uncle attended the funeral of a relative in Detroit Monday.

Miss Frances Anderson and friend were Sunday callers of Mr. and Mrs. G. W. Roberts.

There will be an ice cream social on the lawn at the Herman Schepfer residence on the Fishery road, Friday evening, August 2. Home-made cake and pop will also be served.

Mr. and Mrs. Irving Tubbs and family of New Hudson, were Sunday callers at the George Bennett home.

Mr. and Mrs. Joseph Austin, of California, were guests from Thursday until Sunday of Mr. and Mrs. B. E. Stanbro.

Mr. and Mrs. C. E. Kincaid, of Plymouth were Monday visitors of Mr. and Mrs. George Bennett.

English Village Is Ruled by Spinsters

Lawford, England.—Because they believe men are "back numbers" this village is entirely ruled by spinsters. The clerk of the parish council is a woman. She is also rate collector. The post office is run by a woman; her two letter carriers are women. All of the teachers in the village schools are women. There are no policemen.

The oldest Lawford inhabitant is a woman and the youngest is a girl Miss Mary Spooner, who for twenty four years has been clerk of the council, has publicly stated that men are "back numbers."

"The 'napper' vote," she says, "is going to make all the difference in the world to woman's status. There are more women than men in this country—they are in the majority in Lawford—and, of course, the possibilities are enormous."

Dog Travels 100 Miles in Finding Way Home

Richmond, Va.—Doc, a deerhound, lost last November in the Dismal Swamp section of Sussex county, 95 miles below Petersburg, Va., reported early the other morning at the family farm of Artie Ford, in Spotsylvania county, where his owner, C. B. Montgomery, always had kept him, and after a welcoming bark stood at the place where he had been used to being fed and wagged his tail while he waited for his breakfast.

Doc strayed from the pack while Montgomery and other Fredericksburg men were hunting. Advertisements in several newspapers failed to bring any news of the valuable dog and Montgomery gave him up for lost. Although evidently having been detained for a time at some home, or maybe taken and kept by several persons along his 100-mile route, the dog had kept in mind his destination and arrived at home in good condition.

Women Architects Rare. Women architects are rare because schools don't favor their admission. It is said. But increasing numbers of women are employed in the drafting rooms of large architectural firms.

MICHIGAN'S LOGGING AND LUMBERING INDUSTRY

Logging and lumbering, the first of Michigan's big industries, were founded on the apparently illimitable stretches of forest reaching across the peninsular state like a great green carpet from the waters of Lake Michigan to Huron and north to the wild shores of Superior.

Michigan's big industries, were founded on the apparently illimitable stretches of forest reaching across the peninsular state like a great green carpet from the waters of Lake Michigan to Huron and north to the wild shores of Superior. As Michigan was one of the first states to see her timber disappearing down the rivers to wards the mills, so has she been one of the first to start the work of reforestation.

The fifty or a hundred years required for the growing of a forest may seem a hopeless distance in the future, but the passing of the years increases the appreciation and the value of the forest. Although this country as yet has probably only begun to utilize its natural resources to the fullest extent, it is well to remember that the forest is one of the few resources which can be replaced.

Wood has over four thousand uses, and while substitutes have been developed to a small degree, and in many cases from wood waste, it is somewhat difficult to envision a home, for example, without the friendly familiarity of richly-grained interior work, floors and furniture. For certain structural purposes, it has been claimed that timber is even better than steel.

Centuries ago when the present structure of the earth was being determined, the great ice sheet moving down across this region deposited many types of soil. Some were to be for agriculture, and many millions of acres, for just one purpose, forests. The pioneers believed the land of the forest to be more valuable for farming, but today it is known that in a large number of cases they were wrong, for when the timber was removed, the land remained barrenly dedicated to the trees. Later came the fires wiping out young growth, laying the land open to erosion, and with each fire a little more of the organic matter was burned from the soil, leaving an almost sterile rock residue, but even those soils would support jack pine and a few other species.

The state of Michigan through its forestry division has made progress in its forestry program despite the many difficulties encountered. Many thousands of acres of new forests are under management, the Higgins Lake nursery supplying the seedling stock has become famous as a model forest nursery, an efficient forest fire unit is functioning, and perhaps most important of all is the foundation which has been built for future expansion, although a huge acreage is yet needed. It is not hard to understand why forestry is one of the essential phases of conservation, because in one way or another forestry is somehow a part of the entire problem of fish and game, of recreation and prosperity.

OFFICIAL PROCEEDINGS OF THE VILLAGE COMMISSION

Plymouth, Michigan. June 17, 1929. A regular meeting of the Village Commission held in the Commission Chamber at the Village Hall, June 17, 1929 at 7:00 P. M.

Present: President Robinson, Commissioners Kehrl, Nutting, Shear, and Wiedman. Absent: None.

The minutes of the regular meeting held June 3rd and of the special meeting held June 7th were read and approved.

The matter of the proposed installation of the six-inch water main in So. Main St. from Sutherland Ave. to Gold St. Road, now upon which was deferred at the last regular meeting of the Commission, was taken up for consideration.

This was the time appointed for the hearing of objections to the proposed installation of a water main in Palmer Avenue from So. Harvey St. to the end of Palmer Ave.

This was the time appointed for the hearing of objections to the proposed installation of a water main in Auburn Ave. from Blanche St. to Junction Ave.

This was the time appointed for the hearing of objections to the proposed installation of a water main in Sunset Ave. from Farmer St. to Junction Ave.

This was the time appointed for the hearing of objections to the proposed installation of an 8-inch sanitary sewer, with appurtenances, in Auburn Ave. from Blanche St. to Junction Ave.

This was the time appointed for the hearing of objections to the proposed extension of Forest Ave. northward from its terminus to Ann Arbor St.

This was the time appointed for the hearing of objections to the proposed extension of Forest Ave. northward from its terminus to Ann Arbor St.

This was the time appointed for the hearing of objections to the proposed extension of Forest Ave. northward from its terminus to Ann Arbor St.

This was the time appointed for the hearing of objections to the proposed extension of Forest Ave. northward from its terminus to Ann Arbor St.

they are paying for similar services. Carried. This was the time appointed for a hearing upon the tentative budget for the Village of Plymouth for the ensuing fiscal year.

Table with columns: Fund, Budget 1928, Budget 1929, Increase, Decrease. Rows include General, Bonds & Interest, Highway, Police, Fire, etc.

The various items of the proposed budget were taken up for consideration by the Commission, and citizens present were given an opportunity to object to any of the appropriations proposed therein.

A petition was presented signed by property owners upon Ann Ave. in the vicinity of Blanche St. requesting the installation of a street light at the intersection of Ann Ave. and Blanche St.

A petition was presented from residents living near the corner of Evergreen and Junction Aves. requesting the installation of a street light at the said intersection.

A petition was presented from residents living near the entrance to the alley opening upon So. Harvey St. just south of Penniman Ave.

The following bills were approved by the Auditing Committee: Corbett Electric Co., Detroit Edison Co., Eckles Coal & Supply, etc.

The following checks written since the last meeting were also approved: Detroit & Security Trust, Administration Pay Roll, Cemetery Pay Roll, etc.

Upon motion by Comm. Kehrl supported by Comm. Wiedman, bills and checks were passed as approved by the auditing committee.

The matter of the proposed extension of Forest Ave. northward from its terminus to Ann Arbor St. was discussed.

Upon motion by Comm. Nutting supported by Comm. Wiedman the Commission approved the proposed installation of an 8-inch sanitary sewer in Auburn Ave.

It was recommended by the Manager that construction of the proposed 7-foot monolithic concrete culvert in the south branch of Toniquish Creek at So. Harvey St. be laid by Contract.

It was recommended by the Manager that a six-inch water main be authorized installed in Junction Ave. from N. Harvey St. to Adams St.

A petition was submitted by Herald F. Hamill, Engineer, on behalf of the owners of Plymouth Gardens Subdivision, requesting permission to connect a proposed water main installation in the said subdivision with the Village water distribution system.

STUDENT DEATH UNSOLVED CASE

Detectives Unable to Clear Up Mystery of Harvard Man's End.

Hartford, Conn.—Despite all efforts of County Detective Edward J. Hickey and his corps of assistants, the death of Walter Treadway Huntington, young Harvard student, appears now as though it will never be solved.

Huntington's body was found May 8 on a lonely road between Windsor and Tarrifville, ten miles north of this city. A bullet had pierced the boy's brain and his shirt and back were saturated with blood.

Hickey explains the fact that there were no powder marks as due to the age of the bullet which killed the boy. Shells identical with that found by Huntington's head were found in a box in the dead boy's home.

He discovered on the boy's right cheek evidences that he had become ill. Nothing was found on the left cheek. On the ground, to the youth's right, were further evidences of his illness.

The course of the bullet also indicates suicide, Hickey said. It entered the left side of the head, back of the temple, two inches above the hair line.

Course of the Bullet. The right hand of the boy was clenched, the detective says, in a manner indicating a "conscious act."

Every available clue has been run down, Hickey says. The detective states he has found no possible motive for murder.

Efforts to link up romance with the death have also failed. Hickey has investigated several "women angles" but all have been fruitless.

Needles by Mile. Bakersfield, Calif.—"The old noodle" is about to bring fame and fortune to W. P. Agnew, Bakersfield machinist.

Geographical. Point Pelee, Ontario, is the most southerly point on the mainland of Canada. The farthest point south in Canada, however, is Pelee Island.

Twins' Lives Alike in Politics and Work

Beloit, Wis.—The Hansen brothers were born twins, but they did not let it stop there.

Both are bankers, Edward F. Hansen is president, and William O. Hansen is teller of the Beloit Savings Bank.

The Hansens were born October 7, 1860. As boys the two were inseparable chums. They had the same tastes in practically everything.

See Fish Clog Brook and Then Dip 'Em Out. Wolfboro, N. H.—Fishing with nets and pails in a brook blackened by thousands of fish, and on property through which the owner offers to trundle the fishermen in his "barrow" is the privilege enjoyed by a throng of sportsmen who come to this town.

Admit Unbobbed Girls Half Price at Dance. Cork.—The following announcement appears in a newspaper published at Fries: "A concert will be held on Sunday at Fries, door opening 7:30 p. m."

MINUTES ANNUAL MEETING SCHOOL DISTRICT NO. 6 LIVONIA TOWNSHIP

July 8, 1929.

The 1929 annual meeting of School District No. 6, Livonia Township, County of Wayne, Michigan, took place at 8:00 P. M., Monday, July 8th, 1929, in the Rosedale Garden School.

The meeting was called to order by Director C. Schaffer. Three officers of the Board were present, viz: Mr. Schaffer, Mr. Snell and Mr. Weinert. A report of the last annual meeting was read and also a report of the special meeting which was held July 23rd, 1928. The minutes of both meetings were accepted as read.

The secretary's report for the past school year was then read, outlining the expenditures in various directions that were authorized and made by the school board. The secretary's report was accepted as read.

The treasurer's report was then made by F. C. Weinert, which included a review of the financial condition of the district insofar as temporary loans, etc., were concerned. The treasurer's report was approved and accepted.

Mr. Walbridge brought before the meeting the advisability of hiring another teacher for the Rosedale Garden school. Director Mr. Schaffer read a letter written by the county commissioner, in which the commissioner expressed the opinion that the number of pupils registered in the various classes at the Rosedale School would not ordinarily require more than the three teachers now employed. Mr. Bentley moved that the question of hiring an additional teacher be left to the board for decision. This motion was seconded and passed.

The meeting then voted to pay the following salaries:

- \$150.00 per year to the director
- \$100.00 per year each to the treasurer and moderator
- \$ 75 per year each to the two trustees.

The election of officers then took place. Mr. F. C. Weinert being elected for three years, Mr. Bentley and Mr. Snell each were elected for one year, and Mr. Sullivan was elected for two years.

The question of changing the present nine months school term to a ten months term was then brought to the floor, and after considerable discussion a motion was made to register the opinion of those present by means of the ballot. Thirty-nine persons voted to retain the nine months school term, while 13 voted to change to a ten months school term. Therefore, the decision of voters was to retain the nine months term.

A motion was also made to continue the payment of tuition for all school children living within the district who were attending high school in some other district.

A motion was also made and passed to hold the next annual meeting at the Elm School on the date and at the time specified by the school law.

The meeting was adjourned at 9:20 P. M. o'clock.

STATE OF MICHIGAN, County of Wayne, ss.
I, C. A. Schaffer, secretary of board of education, Livonia District No. 6, do declare that the report attached hereto is a complete statement of the annual school meeting, and a correct financial statement of the receipts and expenditures of school district No. 6 of Livonia Township, County of Wayne, State of Michigan, for the school year ending July 8th, 1929.

Signed,
C. A. SCHAFFER, Secretary.
Subscribed and sworn to before me, a notary public in and for said county, this 25th day of July, 1929.
A. STANLEY JAMES.
My commission expires October 22, 1929.

SOUTH AMERICA BREATHES EASY

Settlement of Tacna Dispute Ends Fifty-Year War Threat.

Santiago, Chile.—The announcement of the settlement of the long standing boundary dispute over Tacna and Arica, often called the Alsace-Lorraine of South America, ends a fifty year threat of war that many times has imperiled the peace of South America.

The dispute had its beginning in the war of the Pacific, or the nitrate war, as it is more latterly called, which began in 1879 when Chile invaded the Bolivian province of Atacama on the pretext of broken treaty rights.

Prior to this war much Chilean capital was invested in the nitrate plants of Atacama, but Chile never vigorously pressed its doubtful claim to the province as long as Bolivia did not attempt to tax Chilean capital invested there.

Whether, as charged by Chile, for the purpose of inciting war or for revenue, Bolivia broke its treaty with Chile and began taxing Chilean nitrate interests. Without waiting to declare war Chile seized the city of Antofagasta.

Chile Wins.
Two weeks later Bolivia formally declared war and called upon Peru to assist her. The Chileans charge that Bolivia and Peru had an offensive and defensive treaty against Chile. The war ended in 1881 when Chilean troops seized the city of Lima.

The treaty of Ancón was signed in 1881. Bolivia handed over to Chile the province of Atacama, and thereby lost its entire seaboard and a world monopoly of nitrate of soda. Peru ceded the province of Tarapaca and handed over Tacna and Arica for ten years, when a plebiscite was to have been held.

The plebiscite was never held, as the Peruvians will explain, because Chile feared she would not win, and, as the Chileans will explain, because Peru believed she would lose.

The fact of the matter is, the plebiscite was never held for the very good reason that Chile fought two nations in 1879 to obtain the province, and as long as the veterans of that war dominated the politics of the nation she stood ready every minute to fight again to hold it.

Matter of History.
Like the veterans of the American Civil war, the veterans have now passed from the political picture, and for several years Tacna and Arica has been only a matter of the history books for the present generation of Chileans. Thus it was that the way was paved for the announcement of the present settlement.

In recent years the disputed province has been a convenient tool for politicians. If President Leguia became involved in internal dissension he had only to raise the question of Tacna and Arica to divert public attention.

Likewise, in Chile, when the army was going to revolt in 1920 the politicians raised the cry of war with Peru and rushed 20,000 soldiers to the northern frontier to defend the nation against a mythical army of their own fabrication.

Although Bolivia was left out in the cold in the present settlement, there is no doubt that she has not given up her hopes for an outlet to the sea, and many persons believe that Peru will sell her share of the settlement to Bolivia after the completion of the port. The province is worth little or nothing to Peru, outside of the honor involved.

By the treaty of 1903 Bolivia waived all claims against Chile upon the latter's promise to build the Arica-La Paz railroad and upon the payment of a large indemnity. This treaty was definitely discharged last year when Chile turned over the Bolivian section of the railroad to Bolivia.

While it is pointed out in some quarters here that the United States and Great Britain could never have afforded to permit Chile and Peru to go to war, all South America has breathed a sigh of relief over the settlement, because the province was long a potential tinder box of an all South America conflagration.

Calf With Two Heads Reported in Wyoming

Glenrock, Wyo.—A freak calf with two heads, four front feet and two tails was recently born on the Victor Lasko ranch near here. The calf died shortly after birth. With the exception of the two tails the hindquarters of the animal were normal.

He's Wed All Right, But Who's His Wife?

Memphis, Tenn.—Matrimonial problems of Lloyd P. Powell have "stumped" Memphis courts. According to Powell, he was sentenced to prison for bigamy when he was not a bigamist. He is legally married to his second wife, although he is not lawfully divorced from his first and can't have his second marriage annulled until his first divorce decree is set aside, and if set aside he becomes a bigamist.

The Eternal Tarnished
Women do not make men better; they bother them. That is nature; the law of God. Throughout the Bible one finds evidence of the natural friction between men and women. "Wives, obey your husbands," says the Good Book. It is also declared that women must keep silence in the churches; the old saints early had trouble with their women.—E. W. Howe's Monthly.

INTERESTING FACTS ON FUTURE OF AVIATION

By R. U. McINTOSH

Well, Sir: It is an ill wind that blows harm. Last Sunday about 2:30 o'clock, there was a very severe wind that lasted about twenty minutes, and blew over some of the brick piers of our factory. It is more of a loss of time to us than money, as there were only a few thousand bricks that fell over, and they will be back in place by Saturday, but the old proverb that had news travels faster than good news was demonstrated. Upon my return home Sunday afternoon, thanks to the good people who very graciously informed me of the damage. Some of them said that the factory had completely blown over. One party said that a hurricane had struck our building and that there was nothing left. While driving to the factory, I pictured in my mind the entire factory scattered all over the field. You can imagine my happiness to learn that only a few of the piers had blown over.

I remember my father saying that anything worth while usually comes hard, and especially anything new; you are liable to get several bumps. Those who can withstand the bumps and come back for more are those that usually come through. This little bump does not mean anything to us except a little delay. We count on delays, it is a pretty good idea to figure on them.

Anthony Fokker, one of the world's greatest airplane designers and builders, could take up this entire paper or more telling of the many trying experiences that he went through to market his airplanes. It's my understanding that he approached this government to use his airplane for warfare and without success; he went to Europe and approached many countries without avail, but Germany was preparing for war, and looking upon Fokker's airplanes as one of the chief weapons, she naturally availed herself of his services. He built many fast airplanes during the war, that made remarkable records.

Anthony Fokker built internally braced biplanes, and if engineers examined them today, they would find that his war planes built ten, twelve, fifteen years ago, had incorporated in them engineering features that today seem new. It is often expressed by those who know Mr. Fokker, that he has forgotten more about aviation than the world will know for some time to come. You and I see airplanes flying through the skies that have many of the refinements, such as wing designs, bracing, etc., which have been copied

from Mr. Fokker. His airplanes are not bad airplanes to copy from. Thanks to his past efforts and his determination that he has weathered the conditions, for today he is one of the successful and largest airplane manufacturers. We, in fact, are using many of his ideas. Mr. Fokker has expressed himself. "The world may copy my airplanes, but they cannot copy what I am thinking about."

The aircraft companies today, just like the Mack-Craft Amphibian Corporation, are profiting from the expense of such efforts as Glenn Curtiss, Wright Brothers, Fokker, Sikorsky and many others. We read books and tabulate the engineering data that has been completed by these masters, and incorporate such conclusions into the perfecting of our amphibian. After all, we all profit by mistakes. We are profiting from mistakes made by others.

Glenn Curtiss said to me last winter in Miami, that even the automobile is a very crude form of conveyance. The automobile companies he said, have accomplished nothing except refinement, comfort and possibly perfection of motors but they lack the stream lining that the airplane has taught us to be so valuable for speed.

Glenn Curtiss took a popular make of automobile that was capable of making seventy miles an hour, added about fifteen hundred pounds of weight to the rear-end in the form of a trailer, and stream lined it. It boosted the speed to eighty miles an hour. His trailer is commonly known as the aerocar. This demonstrates to us that we are not getting all of the efficiency of the power that a motor develops. The suction behind the automobile takes a great deal of power because of its fatness and lack of stream line.

The airplane is simply a matter of perfect balance and stream line. Of course, weight is a factor. Within five years, at the present rate that airplane development is taking place, we will be flying in airplanes that have only one wing. The fuselage will be absent and the passengers may walk about freely within these wings. There will be other developments that will be surprising to the masters of aircraft development of yesterday.

It is my opinion that the airplane has surpassed the automobile and getting the greatest efficiency from the motor, for speed, for horse power, and for motor perfection. Motor perfection has been brought about quickly

because of necessity. The airplane stays in the air by the motor, and there is so much depending upon the motor unlike the automobile. As the colored man said, "If the motor of the airplane stops, where is you; but in the automobile if the motor stops, there you are."

They are decreasing the weights of the motor and increasing the horse power, and it would not surprise me to find in a year from now that we will have motors that will have less than one pound to every horse power. I think this will be brought about by the use of the Diesel engine. I also believe that the Diesel engine will revolutionize the airplane industry just as much as the movietone did to the motion picture industry. I will make known in a later article just the advantage that the Diesel motor offers.

I have made many friends since moving to Plymouth, and many of them voluntarily tell me the loss that they have suffered in various enterprises that have come to Plymouth and failed. This, indeed, was unfortunate, but Plymouth has not experienced anything different than most cities in the United States. One cannot expect that everything new should succeed because the percentage runs very high for failures for new companies, but if the company succeeded and you were one of the original investors, you would have no doubt received substantial earnings. One success, provided you are an early investor, will repay you for several losses. If you ate something that made your tummy ache, that's no sign that you will quit eating tomorrow.

I presume you have been reading about Red Jackson and his partner flying the Curtiss Robin over in St. Louis. It would not surprise me to see these boys hit the five hundred hour mark. I know Red Jackson very well; in fact, I raced with him down in Miami. That boy has nerves like iron. He can stand tremendous punishment. Good luck to him. I hope that he hits five hundred hours. This endurance flight should mean a great deal to you in making you air minded. Flying two weeks in the air without coming down, motor humming perfectly, certainly convinces one of the safety and reliability of air traveling.

"About the only thing a bootlegger gets in some courts," asserts Red Plymouth, "is a lot of new customers."

It is all right for a woman to want to hold on to her youth, but she ought not to insist on doing it while he is driving.

Dad Plymouth says that when cotton stockings went out of style the world lost the best lamp chimney cleaner ever invented.

No Proof of Mermaids
According to popular belief a mermaid is an animal in the sea having head and shoulders resembling a human being, and body and tail like a fish. Burnum some years ago faked up a "mermaid" for his show and there have been many sailors' stories of such things, but the reality is unknown to science.

PROBATE NOTICE
No. 151890
STATE OF MICHIGAN, County of Wayne, ss.
At a session of the Probate Court for said County of Wayne, held at the Probate Court Room in the City of Detroit, on the twenty-second day of July in the year one thousand nine hundred and twenty-nine.
Present, ERVIN R. PALMER, Judge of Probate.
In the Matter of the Estate of HARRIET EMMA HARTSOUGH, deceased.
On reading and filing the petition of Palmer Hartsough praying that administration with the will annexed of said estate be granted to the Plymouth United Savings Bank, or some suitable person.
It is ordered, That the twenty-first day of August, next at ten o'clock in the forenoon at said Court Room be appointed for hearing said petition.
And it is further Ordered, That a copy of this order be published three successive weeks previous to said time of hearing, in the Plymouth Mail, a newspaper printed and circulating in said County of Wayne.
ERVIN R. PALMER, Judge of Probate
Theodore J. Brown, Deputy Probate Register.

THE SUGAR MAPLE

Of the hardwood trees in the state perhaps no other so typically represents Michigan as does the sugar or hard maple with its beautiful contour, its deep shade, and its sap which has provided gratification for the sweet-tooth of white man and Indian through the pioneer days of the region. Not many years ago syrup and sugar from maple trees were common commodities, but the price in recent years has soared to the point where they are nearly luxuries. A heavy demand and an increasing scarcity of maple forests have caused the price to rise, and have led to the introduction of various substitutes resembling the genuine product.

It may be that the modern syrup from the latest of sterilized evaporators where the sap is reduced to a thicker consistency is more pure, but to one who has tasted the hot sweet directly from a big black iron kettle protected by a small "sugar-shanty" in the woods in early springs when the first warm breezes come, it seems just a little flat. Perhaps a few sticks, the cinders and smoke from woodfires, really improved the flavor. However, it is probable that when the Indian first tasted the syrup from the white man's iron kettle, he decided that his own birch bark utensils had lent an added tang which metal never could give.

Dies of Oxygen Need on Giant India Peak

Calcutta, India.—Edgar Farmer, an employee of the Standard Oil Company of New York, was killed while attempting to reach the summit of Mount Kinchinjunga, a peak in the Himalayas, 27,815 feet high, one of the highest in the world.

Mr. Farmer came to India six months ago on a leave, working out part of his passage on a cargo boat. He started on the expedition on April 27 from Darjeeling in Bengal, accompanied by ten coolies who had received mountain training with the Everest expedition. He made his fourth camp with them at an altitude of 22,000 feet and went on alone to a height where oxygen is needed, but he had none. His followers saw him make a fifth camp in a snow cave, where he slept despite the danger of falling in. The next morning they saw him climb to an altitude of 25,000 feet and suddenly disappear over a ridge. They waited four days for his return and then returned to Darjeeling.

Mr. Farmer, who was twenty-four, did not make his trip under the auspices of a Himalayan club or any other responsible organization. His mother lives in Florida and his wife in New York.

Paris Society's Dogs Now Have Special Tea

Paris.—The paries of puffed canines provide smart Paris with its latest fad of diversion.

Miss Florence Walton, American dancer, retired from the stage to a modest modiste's shop in the most aristocratic shopping center of Paris, introduced dogs' teas for her prized Pekinese "Chin Chin" and now all smart Paris is entertaining dogs.

Miss Walton served tea for "Chin Chin" and invited Mlle. Cecile Sorel's chow "Chortaw," Princess Fanelle Latour's great dane "Luxury" and the four-legged pets of a dozen other women high in Paris society and stage life.

While the dogs sit on velvet cushions and eat tasty cakes or lap up tea tinted milk, their mistresses sit in an adjoining salon and play bridge. Dogs' teas were to have been expected, for it is years since Paris had its first dogs' bars.

The dogs' bars are generally outside some of the most famous American bars of the capital, and consist of a fountain where water is the only fluid available.

BORN BLIND, DOCTORS MAKE HER SEE AFTER 48 YEARS

Whole World is Miracle to Mrs. Betty Ann Wagoner After Successful Operation.

New Orleans, La.—The whole world is a miracle to Mrs. Betty Ann Wagoner from her bed in a charity hospital ward. After 48 years Mrs. Wagoner can see.

There are only two things Mrs. Wagoner wants that she hasn't got. The first is to see her son and the second is to learn to read.

Mrs. Wagoner was born blind in Montgomery, Ala., 48 years ago. When she married she moved to Colfax, Iowa, where she has lived since. Five months ago Mrs. Wagoner became ill and came to a charity hospital for a minor operation.

While she was there surgeons examined her eyes and became convinced that unless the muscles had atrophied from years of disuse Mrs. Wagoner could be made to see.

The operation was tried on her right eye. Several days ago the bandages were removed.

"I clenched my hands and tried not to scream," Mrs. Wagoner said. "Then I opened my eyes and I saw the doctor's face. It was too wonderful."

The operation was repeated on Mrs. Wagoner's left eye, but the bandages have not yet been removed.

"I stand at the window," continued Mrs. Wagoner, "and I see automobile wheels turning and smoke coming out of chimneys and people walking around and I can't believe it. Think of seeing my son."

Her nurses tell her what things are. "I would not want the long-pointed thing out there, and the curve would say: 'That's a church steeple. I've been going to church all my life and didn't know a church steeple.'"

Few people are not acquainted with the maple to some extent, but there are nine members of the family in Michigan, some of them are easily differentiated from each other, some are not. The hard maple grows to the largest size, a height of from sixty to one hundred feet, and a diameter of 3-4 feet. Its outstanding characteristics are full-foliated, dome-shaped crown, usually very symmetrical, along with a bark which is dark gray and sometimes nearly black in color, roughly furrowed on the trunk but smoother on the younger branches. The leaves are usually five lobed, that is, there are five main "points," while the sinus or space between the lobes is fairly large and rounded at the lower extremity. The seeds are in winged pairs which diverge but slightly, ripening in September or October. They are smooth and about one inch long.

Growing throughout the state preferably on moist rich soil, the sugar maple is the most important hardwood tree in Michigan both for its sap products and lumber. There the several fine stands of virgin maple and mixed hardwood forests yet to be found in the northern part of the lower peninsula and in the upper peninsula, although the bulk of the syrup manufacture is in the small farm woodlots rather than the big woods.

Astronomers to Fire Rocket Toward Moon

Paris.—A rocket to the moon no longer is a fantasy and one may be fired from the earth before another year, according to members of the Societe Astronomique of France. German, American, Austrian and French scientists have been collaborating with such effectness that a voyage by rocket to the moon, to Mars and to Venus at last is considered theoretically practical.

Girl Lands Her Plane Despite Fear of Mice

Longmont, Colo.—When the medals are being passed around save one or two for Miss Blackwell, Longmont aviatrix.

Miss Blackwell, a student flyer, was taking lessons from her brother Clyde, a licensed pilot.

Miss Blackwell was at the controls as the plane skimmed along at about 2,000 feet when Clyde noticed his sister acting queerly, but she kept the ship on an even keel and headed for the landing field.

And, according to Clyde, the faster his sister squirmed the faster the ship traveled until it finally reached the landing field.

Miss Blackwell landed the airplane, almost dived from the pilot's seat and extricated two field mice from her flying costume.

Although having a natural aversion to mice, Miss Blackwell endured the horror of having the creatures crawl over her while she brought the plane to a safe landing.

The mice apparently had built a home in the plane while it was stored in its hangar.

Fortune in Ambergris Found Floating at Beach

London.—The greed of a whale which died from acute indigestion has provided London with the largest lump of ambergris yet seen by dealers.

It weighs about 225 pounds, and is worth nearly \$50,000. For perfumery purposes it is worth anything up to \$25 per ounce.

This record lump was found on a New Zealand beach by two brothers who will make a small fortune by the discovery.

Ambergris is the product of the sperm whale's fondness for cuttlefish. He cannot digest the beak of the cuttlefish, so the beaks accumulate and set up irritation, which causes the ambergris to form. Eventually the whale distends, becomes ill and blows up. The ambergris floats away and it may be years before it is washed ashore.

Waiter Famous as Poet Dies in Genoa

Genoa.—Giovanni Giorgi, the poet-waiter and Dante scholar of Milan who would improvise you a sonnet on the back of your luncheon bill, or quote a page of Dante while serving glasses of beer, is dead.

Giorgi was a well-known figure of Milanese Bohemian life, and for many years the small restaurant where he served as waiter was the rendezvous of students, writers, artists and even professors of Dante studies and literature.

The poet-waiter had an amazing memory as well as an excellent literary taste. He could recite the entire "Divine Comedy" from beginning to end, and make comments on the works of the great Florentine poet which delighted learned professors of the university, who often gathered in the restaurant to hear and see the phenomenon.

"Grand Old Liars"

The young men of today are rude to the girls compared with the great gallantry exercised by men in older times. How elderly women must miss the grand old liars who made love to them!—E. W. Howe's Monthly.

Tourists looking for parking space will be glad to learn that it can always be found around a rural church on Sunday.

NOTICE!—

To Our Customers

Since July 15th, 1929

We have discontinued our old formula, and since then, a new formula has taken its place, and now we are in a position to manufacture a

100% Better Ice Cream

This new kind ICE CREAM is manufactured of PURE CREAM and all the PURE INGREDIENTS that goes with the PURE FOOD LAW. Something remarkable about this new ICE CREAM is that every customer will notice the texture, the smoothness, the flavor, and superior taste with PURE VANILLA or FRUIT FLAVORS. This NEW KIND of ICE CREAM will be manufactured in

Vanilla, Chocolate, Strawberry, Cherry and Maple Walnut

and we will sell all VANILLA CREAM for---

50c per quart

25c per pint

Other Flavors at—

55c per quart

30c per pint

PALACE of SWEETS

A. S. VATECK, Prop.

Plymouth,

Michigan

Rosedale Gardens

Mr. and Mrs. C. E. Metzgar and family returned from a trip through the east, Saturday, July 28.

Mr. and Mrs. Walter Hammill left Saturday, for Philadelphia, where they expect to reside in the future. Mrs. Hammill has been the church organist, and her absence will be felt by the community. The members of the church presented her with a gift

as a token of appreciation of her services.

Mr. and Mrs. James Lynch have as their house guest, Mrs. Elizabeth Lynch of North Tonawanda, N. Y.

The family of Wm. Davis has returned from Chippewa Lake. They have been sojourning for the past few weeks.

Miss Marlon Snel has just returned from summer school at Olivet College.

NEWBURG

There was a very good attendance at church, Sunday, considering the extreme heat. The quartette sang "At the Place of Prayer." Next Sunday the Men's Bible class will have charge of the Sunday-school.

The Sunday-school picnic held in River Rouge Park last Saturday, was well attended. The children especially enjoyed the games and prizes given. They all enjoyed all the ice cream they could eat.

The L. A. S. will hold a regular meeting at the hall, Wednesday, August 7, at four o'clock. A good self-serve supper will be served, consisting of escalloped potatoes, meat loaf salad and other good things. Everyone cordially invited.

Mrs. James McNabb entertained the Excelsior W. C. T. U. of Detroit, at her home, Friday.

Miss Alice Gilbert is taking a trip with an aunt, to Johnson, Tenn., and other points.

Newton Youngs' friends were glad to see him able to attend church Sunday.

Clarence Clemens and friend, Hans Noack, left Saturday morning for a trip to Europe. They are driving by auto to New York, stopping over at

Muncie, Indiana to get the third member of their party, Everett Ronch. They sail on August first, on the steamer Dresden, and will return in October on the Bremen.

Margaret Clemens is spending this week at Crystal Lake, with a party of six girls, some of whom were college friends at Ann Arbor.

A large number of people from here attended the funeral of Dr. Cooper, Tuesday afternoon. John Thompson and Donald Ryder witnessed the dreadful accident, assisting in caring for the doctor. He had been the physician in the family of C. E. Ryder for thirty years, and will be greatly missed in this community.

Mrs. John Campbell of Detroit, visited her son, Jack and family, last week.

Dr. George Herman Derry, president of Mary Grove College, and Rev. Fr. Doly of Massachusetts, were callers at the Donovan home Tuesday evening.

Miss Angeline Roussan finished up a special course in art at the Mary Grove College, this week.

Charles Paddock and Howard Holmes were on the sick list last week, and were unable to attend the Sunday-school picnic.

WHITBECK'S CORNERS

Mr. and Mrs. A. C. Procknow and Mrs. Parrish were calling on Mr. and Mrs. Otto Kaiser Monday evening.

Mr. and Mrs. Ed. Bolton and son, David, Mr. and Mrs. Clyde Smith and family, Mr. and Mrs. George Gorton and daughter, Marion, Mr. and Mrs. Clyde Fisher and family, Mr. and Mrs. Wm. Micoj and son, Russell, and Mr. and Mrs. Wm. Rengert and daughter, Jewell, leave on a vacation at Lake Michigan and other points of interest.

Miss Lillian Kaiser who recently underwent an operation for appendicitis, is at home, and is getting along nicely.

The people of Perrinsville church held their second home-coming last Sunday, and a goodly crowd attended. Rev. Kraycraft, a former pastor, was present, and gave a brief talk which was very interesting. Rev. Davis also spoke, and there were others who at one time were residents, that told of their experiences when they used to attend church there. Not many of the old time members are left; some have moved away and others have passed to the great beyond.

Mr. and Mrs. Walter Schiffe called on Mrs. Harold Cook, who has just undergone a gynec operation. She is at her parents' home, and is getting along nicely.

Mr. and Mrs. Walter Detloff and two sons, and Mrs. A. Parrish attended the home-coming at Perrinsville church last Sunday.

Mr. and Mrs. Otto Roe and family expect to start on their vacation trip, Saturday.

Miss Jewell Rengert is spending a few days with a girl friend at Salem.

Sweet Tooth of Male Is Growing Sweeter

Wes Baden Springs, Md.—"Don't forget the men," was the advice given to the candy trade here recently by I. E. Hunt of Denver, president of the National Confectioners' association at the forty-sixth annual convention of that organization.

"There is no doubt," said Hunt, "that the masculine sweet tooth is steadily growing sweeter. If we could take a census of the candy in consumers' hands at this moment, we would find most of it not in the hands of the shopping bag, but in the pockets of overalls and golf coats, in the workman's dinner pail and in the desk of the busy executive."

No Bathing Suit Parades

Cincinnati.—Ladies and lads of this city have been warned by the police that parading streets in bathing suits must stop or fines will be higher than the cost of beach lockers.

Nature Solves Flood Problem for Farmer

Salina, Kan.—Nature has settled the flood control problem of J. R. Jenkins, who owns a large farm twenty-five miles south of Salina.

For years his farm house was almost on the bank of the Smoky Hill river, but now it is a mile away. The stream which formerly passed through the farm does not now touch it. The May flood cut a channel through another man's farm and instead of a large bend in the river the stream now runs straight north across the county, cutting off a neck that makes the river about four miles shorter in its course. Jenkins did not object to the river when it was normal but when it was carrying flood waters it did considerable damage to his land and crops. He says, however, he is satisfied with the present conditions.

Advance in Photography

Daylight screens have been developed to a point where it is possible to project pictures on them in the diffused daylight of a room with thoroughly satisfactory results. To do this requires projection from the rear of the screen. Darkness is required back of the screen between the projector and screen.

"In the Last Ditch"

In the darkest hour of the Dutch war for independence when the duke of Buckingham, an emissary from England, asked him if he did not see that his country was ruined, William replied: "There is one certain means by which I can be sure never to see my country's ruin; I will die in the last ditch."

Turpentine Production

Turpentine is derived from the sap of various trees, and can be made from some which grow in the north-west, but the turpentine of commerce in the United States comes almost entirely from certain pine trees which are distributed throughout the southern states. Georgia is the leading state.

ANNUAL Motor Cycle Rodeo AND Field Meet

OLD DUTCH MILL

(At Middle Belt and Five Mile Roads)

Sunday, Aug. 4th

All events will be run in the afternoon, starting at one o'clock.

FEATURE EVENT

is the Polo game between

Pontiac State Champions & Detroit

This will be played in 15-minute quarters.

CAR LOADING TOTALS INDICATE CITY'S HIGH DEGREE OF ACTIVITY

Detroit Enjoys More Flourishing Six-Month Industrial Period Than Rest of the United States.

BY C. C. MCGILL

Secretary, Public Affairs Bureau, Detroit Board of Commerce.

Study of the carloading and tonnage figures of the United States during the first six months of this year in comparison with the statistics compiled for the railroad serving the Detroit area shows that this community enjoys a more flourishing period of industrial activity than the remainder of the nation. In many quarters the flow of freight tonnage is taken as the best barometer of prosperity.

Revenue freight carloadings for all of the railroads in the United States during the first half of the current year totaled 25,596,938. This is a total that has not been equaled for the past six years and represents an increase of 1,135,165 over the corresponding period of a year ago.

While the national figures show a 4.6 per cent increase over last year, the 457,914 inbound cars to Detroit in 1929 for the first six months represent an increase of 12.8 per cent over 1928, and the 344,583 cars loaded outbound at Detroit in 1929 are 15.6 per cent in excess of those forwarded in the same period last year.

Tonnage figures, which may be called a more accurate barometer of volume of business done, show even a greater increase. Tons received in Detroit were 1,018,592, or 16.9 per cent in excess of those received the first six months of 1928. The outbound tons, which indicate the extent of distribution of products from Detroit, total 5,264,968 for the first six months of this year and this figure is 25.1 per cent greater than for the corresponding period last year.

The following tabulation of figures furnished by the Detroit railroads and compiled by the traffic-transportation department of the board of commerce show a slight decrease for June over the previous month, probably due to summer vacation schedules of Detroit factories; but the comparison with June of 1928 will show a wide margin between the two sets of figures:

| | Inbound Cars | Tons | Outbound Cars | Tons |
|------------|--------------|-----------|---------------|---------|
| June, 1929 | 75,579 | 2,240,223 | 50,947 | 826,188 |
| May, 1929 | 79,941 | 2,314,298 | 59,936 | 891,872 |
| June, 1928 | 70,440 | 2,026,904 | 44,929 | 702,238 |

CHINESE FOSSIL SKULL IS CLEW TO "MISSING LINK"

Eight-Year Search in Limestone Near Peking Bares Jaw and 20 Teeth.

Peking.—From 20 teeth and a portion of skull and jaw the harvest of eight years' gleaning in the limestone deposits near here science may reconstruct the earliest progenitor of man, the so-called link between animal and human.

Since the autumn of 1921 when in a group of important fossils discovered in Pleistocene limestone deposits in vestigators found a tooth undeniably that of a human or unknown mammal, an international group of scientists gathered here have been convinced that not only is the Peking man, so called, the oldest human remnant, but that probably he was the immediate ancestor of man, linking him with the lower animals.

Discovery of the prehistoric human has been so gradual that the findings have not received the publicity scientists believe it deserves. Dr. J. G. Anderson, Swedish archeologist, discovered the original mammal fossil. Dr. Walter Granger, chief paleontologist of the American Museum of Natural History, was visiting Doctor Anderson at the time.

After cursory examination the fossils were shipped to Sweden for study and while undergoing laboratory examination the lone tooth was found. The find was communicated at once to the scientists in China and arrangements were made for exhaustive excavations in the ancient limestone cliffs that held the mammal fossils.

Funds for the project were obtained from the Rockefeller foundation and the China foundation, a Chinese organization formed with funds remitted from the American Boxer indemnity. Davison Black, a Canadian, head of the department of anatomy in the Peking Union Medical college and a comparative anatomist of international reputation, was placed in charge of the work.

During the intervening years scattered teeth were discovered, then parts of the jaw and upper portion of the skull. This year additional teeth and parts of the skull have been unearthed, giving scientists a fairly complete conception of the ancient forebear of man.

The excavations are still under way. Doctor Granger stated his belief that the remnants point to the end of the long scientific search for the "missing link."

Oysters Score

According to H. G. Maurice, of the British ministry of agriculture and fisheries, oysters are the best cure for influenza. He states that when he and his wife both had influenza they dispensed with a doctor and spent the money so saved on oysters, which cured them.

FRANCE RAISES FRONTIER FORTS

Impregnable Barriers Are Being Built on East and Southeast.

Paris.—France's fortified "wall of China," a supposedly impregnable barrier to separate her from her neighbors to the east and southeast, is slowly arising in the form of four-foot thick steel and concrete pill-boxes, unbreakable gun shelters and bomb-proof ammunition stores deep underground.

Work was slowed up by the hard winter, but has been pushed rapidly since good weather allowed a continuation of labor, and before the end of the year the first unit of the defense system will have been completed and the first credit of 250,000,000 francs spent.

The 1930 budget, which the minister of finance, M. Cheron, will place on the desks of parliament, will contain a second great credit, probably between 400,000,000 and 500,000,000 francs. As soon as the sun is fixed and voted the general staff of the army will draw up a definite program of building for 1930.

Use German Materials. In building the great system of fortified defenses along the German frontier, German materials have been used. These were furnished by the German government under the Dawes plan as payment in nature and really represent no actual investment of money by France.

The work now is being centered around three of the greatest strongholds of the German frontier, north of Metz and dividing Alsace from the Palatinate, all of the secondary defenses still to be built will be based on these outstanding strong points. At the same time work is progressing on the defense of the Alpine frontier, where much already has been done and only the linking up of the strongholds remains to be completed.

Despite the development of heavy artillery and aerial bombardment, the French general staff appears to put much confidence in fortifications, basing its judgment on the fact that the Verdun fortress was never taken by the Germans, although the outer forts there were pounded to pieces by gun fire.

Withstand Shelling.

Likewise, the losses suffered by the Germans before the forts of Namur and Liege so weakened them that the Seventh army arrived at the first battle of the Marne greatly shattered. Pompele was another of the old forts almost obsolete at the start of the war, which was put in shape by the French and held the Germans off for two years.

In those forts none of the bomb proof shelters for the famous 75s was pierced and only one of the shelters in the fort of Vaux was destroyed by a mine. Even the great 420 mm. shells of the Germans failed to dent them.

Basing their plans on such thoroughly tested shelters, the French general staff has completely planned the great defense line which will extend from Dunkirk to Pontarlier, a distance of nearly five hundred miles. This fortification is purely defensive and is intended to provide a frontier battlefield to keep enemy troops from ever again destroying the rich in terror of France.

France is not alone to fortify its frontiers, for Germany consecrated the equivalent of 23,000,000 francs in her current budget for the upkeep of fortifications, and Italy, in her 1927-28 budget, had credits of 52,700,000 lire for similar work.

With the completion of the new frontier fortifications, many forts in the interior will be declassified, and there is now a project before parliament to declass such famous old forts as Pompele, Brimont, Witry, and Nogent l'Abbesse at Reims, and the old Roman camp on the Meuse.

Maine Planning to Keep Native Sons at Home

Augusta, Maine.—Maine has taken definite steps to keep its native sons within the state. The Maine development commission has appointed an employment committee to aid young men, through the co-operation of the various industries, in finding jobs. Thus it is hoped to discourage Maine youths from seeking their life work outside the borders of their native state.

Pontoon for Salvage Work New Invention

Stockholm.—An entirely new kind of pontoon, said to be of great importance for marine salvage work and far easier to handle than the old type which is bulky and unwieldy, has just been invented by a Swedish engineer, Ragnar Blomquist. The new device is collapsible and can be folded together and thus easily transported. When submerged, it opens into its natural size and is filled with air through a hose leading from the compressor of the salvage ship. The new invention, which has been patented in all seafaring countries, has aroused great interest among shipping experts in Sweden and abroad.

Big Stretch of Water

The Gulf of Mexico extends approximately 1,000 miles from east to west and approximately 800 miles from north to south. It contains 716,000 square miles. It is bounded on the north by Texas, Louisiana, Mississippi, Alabama and Florida; on the west by Mexico; on the south by the Bay of Campeche, Yucatan, the Channel of Yucatan and Cuba, and on the east by the Straits of Florida and Florida.

FIVE "RADIUM VICTIMS" MAY LIVE ON TO RIPE OLD AGE

Doctors Now Admit They May Have Been Mistaken in Their Diagnosis.

New York.—Five young women, suffering from what was believed to be radium poisoning and told by doctors they had only one year to live, may have endured the agonies of awaiting death for nothing.

The women whose plight attracted nationwide attention received their death sentence on June 1 in 1925. Their work consisted of painting luminous numerals on watch dials. All are still living and the doctors now admit they may have been mistaken in their diagnosis.

They suggest the poisoning may have been due to a substance called mesothorium which is not necessarily fatal, and not to radium. If this is the case it is predicted the sufferers may live to see old age. Mesothorium can be gradually eliminated by the human system.

When they received their death sentence the women sued the United Statesadium corporation for \$250,000 each. The claims were finally settled out of court for a cash bounty of \$10,000 and a pension of \$30 a month as long as they live.

How the women expended the money, in the belief it would be the last they would ever have, is revealed as follows:

Mrs. Quinta Macdonald, the most seriously stricken of the quintet, has been the most unhappy. She quarreled with her husband and separated from him after he quit his job. Her money is invested in a trust fund for the benefit of her two children.

Miss Katherine Schaub bought an automobile and has been spending her time taking long rides in the country. Mrs. Albina Larice bought some small household luxuries and has been traveling with her husband.

Mrs. Edna Hussman bought a player piano and a radio set. Miss Grace Fryer invested all of her \$10,000 and went to work in a bank in Newark.

None of the five can adequately express their feelings at their apparent turn of good fortune. The terrible thing to them, they have said, was not so much the imminence of death, but the fact they had been told they must die within a stipulated time.

Their eyes were glued on the calendar and the fingers of the clock. They felt like a person must do when he is caught in a railroad track and sees the train thunder toward him.

Plane to Rise at 45 Degree Angle Planned

Milwaukee, Wis.—An airplane employing the principle of the helicopter and yet radically different from most vertical lifting contrivances, is under construction here.

The device, admittedly purely an experiment, will be equipped with two propellers, devoted entirely to the job of raising the plane, in addition to the usual screw type propeller at the nose of the craft.

The vertical lifting blades will be located beneath each wing and will be driven by a Hispano Suiza motor in the fuselage through an arrangement of beveled gears.

A tryout of the strange flying machine will be conducted in July by Jess C. Johnson of Delray Beach, Fla., its inventor. The machine is being constructed by the Hamilton Metalplane company here.

Johnson's plane, if it is a success, will not rise vertically but will enable a take-off at approximately a 45 degree angle with all three propellers spinning. Landing also could be accomplished more abruptly than is possible with an ordinary type machine.

Society Gate Crashers Vex London Hostesses

London.—Mayfair hostesses are taking stringent steps against society gate crashers, the finely dressed, well polished type which "drop" into exclusive parties without invitations.

Last year many hostesses complained of the increasing number of gate crashers and as a result many have warned their guests to bring their invitation cards along to the party. At the door there is an official "checker" who verifies their tickets.

But even this system has been found faulty and several hostesses are now considering the advisability of sending their small badges which will distinguish the invited from the uninvited guest.

Clock Runs Six Years Without Being Wound

Lancaster, Ohio.—Police investigating a reported robbery at the old Denman homestead, one of Lancaster's historic residences, once occupied by James G. Blaine, but uninhabited since the death six years ago of John Denman, found a gold self-winding clock, started by Mr. Denman, was still running.

The furnishings of the home, undisturbed since the death of the last resident, were not molested by those who entered the house.

Freak Tidal Wave

Capitola, Calif.—A survey has disclosed that a freak tidal wave, which tossed more than a dozen pleasure and fishing boats high on the beach, caused approximately \$5,000 damage along the waterfront there.

Not Knocking Cities

A mad dream, this snuffing indoor life of great cities. A dream wherein men devise one elaborate insanity to offset another.—Farm and Fireside.

Extra Arms Handy

It is said a man in Catalonia, Spain, has five arms. We are positive we are not to this chap once at a hearing board.—Pittsburgh News.

THOUSANDS TO MEET AT M. S. C. FARM DAY

COLLEGE PLAYS HOST FOR ANNUAL SUMMER FIELD DAY TODAY.

Thousands of Michigan Farmers and their families will gather on the state college campus at East Lansing Friday (today) August 2, for the 12th annual Summer Farmers Day.

With program arrangements completed, the college is prepared to play host for visiting agriculturists from every section state. More than 10,000 have attended some of these gatherings in recent years, and M. S. C. officials are predicting new attendance records if the weather is favorable on Friday.

Dedication of the new college dairy barns headlines a program which includes many new features. In addition to the usual opportunities for inspection of the college herds and flocks and study of the hundreds of acres of experimental work along all lines of agricultural production.

Demonstrations planned especially for the day include weed control, use of the most modern farm machinery, and other subjects of timely value for farmers of the state.

A short general afternoon program will feature music by the national championship band from the Boys Vocational School in Lansing, and talks by A. J. Glover, editor of Hoard's Dairyman, and other farm leaders.

The usual picnic and entertainment features have prompted the college authorities once more to urge visitors to "bring the family."

NEW PICTURE OF MICHIGAN WILD LIFE

"Wild Wings," the conservation department's motion picture film of Michigan bird life, is to have a companion in the form of a three-reel release of Michigan animals, according to the educational division. Various studies of deer and fawns, raccoon, black bear, moose, woodchuck, weasel, red fox, squirrels, and other animals will be included.

There will also be a short feature reel of Michigan logging operations. The department's wild life and scenic pictures have proved to be popular with sportsmen and nature-lovers alike throughout the state. Walter Hartz, department photographer, left last week for Isle Royale to obtain additional scenic pictures of Michigan's farthest north and photographs of the moose herd on the island.

Out of Fuel? Use Your Head, Skipper Advised

Washington.—The navy bulletin of engineering information said today that one of the navy's ships during recent fleet maneuvers encountered heavy weather, with the result that her fuel ran low. Uncertain of making port, the warcraft sent the following message to the flagship: "Am running low on fuel; would you advise burning ward room furniture?" "Don't burn ward room furniture," the answer came back. "Use your head."

Big Dipper
The names of the seven stars in the Big Dipper are Alkaid, Mizar, Althor, Megrez, Phecda, Merak and Dubhe.

MAY POINT WAY TO PIRATE LOOT

Finding of Ancient Cannon Off Cuba Excites Treasure Hunters.

Havana.—Four more antique cannons have been discovered at Cayo Coco, a small key off the south coast of Cuba, submerged in the ocean. The discovery has caused treasure hunters of that vicinity to start out with renewed hope of uncovering hidden treasure deposited in that region by the pirates who roamed the Spanish Main several hundred years ago. New expeditions are being fitted out with this end in view, it is announced. The cannon bear the English crown with the initials "J. A." and the date 1523, and are thought to have belonged to a unit of the fleet of English private craft that was sunk in an engagement with an enemy vessel. A number of discoverer of cannon have been made along various parts of the Cuban coast, and it is known that years ago the West Indies were practically the headquarters of a number of pirate craft. Tradition states that the Isle of Pines was the "Treasure Island," of which Robert Louis Stevenson wrote.

Seven cannon were recently dug up at Cayo Largo, off Batabano, 30 miles from Havana, and are thought to contain pirate treasure, and public speculation will be satisfied within a few days when the seals that plug the mouths of the cannon are removed. Legend has it that the pirate Latrobe, after seizing a Spanish galleon, stripped her of her guns, filled their barrels with treasure in gold and other valuables, and after sealing the mouths and firing holes, hid the cannon on Cayo Largo. The cannon discovered there were so sealed.

The question of ownership has been discussed between the Fisherman Cortes, who made the find, and the customs house authorities at Batabano, the latter insisting that the government, as in all cases of hidden treasure, is entitled to one-half of the proceeds of the sale of the cannon.

Four More to Be Raised. The finder, while admitting that this rule might apply to anything found inside the cannon, held that should the cannon be empty they could not be considered "treasure."

His view was not taken seriously by the authorities, who claim that the cannon cannot be considered as "ordinary goods" as this association and their age put them outside this category and added greatly to their value as historical relics.

There are seven pieces in all in the Batabano find, three of which have been raised and taken to Batabano, where they are being held by the customs house authorities.

Bag, Out for Stroll, Gives Cop a Shock

Detroit, Mich.—In the gray light of the misty dawn a paper bag proceeded slowly across Dubois street in front of the Hunt street police station.

Lieut. Henry R. Taube, somewhat fatigued by a night trick, saw it Taube looked again. The bag continued to move at a sedate gait. Going to the drinking fountain, the lieutenant dashed a little cold water in his face and then went back to the window. The bag had reached the other side of the street and was heading for Gratiot avenue.

Taube trailed the bag to Dubois street. When he overtook it, the lieutenant warily knocked it aside with the toe of his shoe. The bag had been doing duty as a sedan for an eight pound turtle.

"Bad Boy of Brazil" Thumbs Nose at Law

Rio De Janeiro.—Virgolino Ferreira da Silva, spectacled, gayly accoutred bad boy of the Brazilian hinterland, who has enough charges against him to fill a docket book, continues to provide cause for the existence of police.

The bandit, better known as Lampiao, Portuguese for lamp post, is roaming through the thinly inhabited sections of the states of Bahia and Sergipe in the northeast, surrounded by a band which has left a bloody trail.

Lampiao is young in appearance. He is blind in one eye, and wears shell-rimmed glasses. Lampiao and his men, sometimes numbering 150, use hardy little mules to evade the police, even though the notorious bandit leader has virtually thumbed his nose at the law and its agents.

Horse Routs Bear From His Pasture

Middletown, N. Y.—While a horse was feeding in a pasture near Hortonville, Sullivan county, a big black bear came leaping into the field.

The moment the horse caught sight of Bruin he decided the newcomer was not one with whom he desired to associate and forthwith went for the bear, kicking and biting the animal. When last seen the bear was making haste for the woods.

Sure
The man who sings while he shaves himself probably has only three whiskers.—Aitchison Globe.

Purpose for Baldness
A new drug called thallium acetate will enable you to experience complete baldness for a week. You drink it; three weeks later your head is bare; a week after that your hair begins to grow again. During that week doctors can treat various scalp complaints.—Exchange.

FRISCO'S TELEGRAPH HILL SOON WILL BE BEAUTIFIED

Famous Place Played Important Part in Early History of California.

San Francisco.—Telegraph hill, which played an important part in California's early history and in its latter days became a retreat of the intelligentsia, is about to dress up and be formal.

Looking over San Francisco bay from its lofty perch above the Italian district, Telegraph Hill long has been a spot of intense local interest. It was from the crest of the hill, years ago, that the then new "whispering wires" of telegraph carried the first message across the continent. But before that—back in the pioneer days when gun totting editors wrote of local happenings—Telegraph Hill was the signal point from which ships were guided through Golden Gate.

In latter years, because of its seclusion, writers, artists and the intelligentsia in general selected the bayward side of the hill for their tiny cabin abodes.

Now the hill is to become formal, carrying with the change the danger that another of old San Francisco's distinctions is to pass. The North Beach Business Men's association is sponsoring a beautification contest and improvements, long spurred, are likely to be made.

This beautification idea, following the construction of a winding road up the hill, is in recognition of the lure the old hill has for tourists. Already boys in the Italian district line the streets and for a dime show motorists up the winding roadway to the crest of the hill and point down the side where, in the heart of a great city, nestle numerous cabins of the mountain type.

Through the years Telegraph hill has defied the age of stucco and retained much of its natural beauty. The Italian district has crowded around the base on three sides while on the other ships tie up and commerce flourishes. A memorial to the first cross country telegraph line adorns the peak and between it and the bay are the artistic cabins, wild flowers, trees and a profusion of natural bush growth, almost burying the small homes with their rocky steps, ledges and winding paths.

The beautification and improvement plan is generally accepted as a threat that the city, hemmed in by water on three sides, at last is going to swell up over the sides of the hill, wiping out a unique mountain-like fastness which is within sight and hearing of the noisy roar of Market street.

"Slangage," New Game for Parisian Society

Paris.—Ever anxious to find new means of amusing themselves when there is nothing better to do, French society folk have taken to a new game which might be termed "Slangage" in English.

The idea of the game is based on the increasing number of English words which are currently used by French people, thanks largely to the influence of American films as well as radio. This influence of the English language on the French has resulted in a jargon and the young society set keeps entertained for hours talking the new language, while old fashioned elders sit by in bewilderment.

Here is an example of this new conversation: "Le leading star chant tres bien; aussi elle est very beautiful." "Oui mais Je n'aime pas her gags. Ils me donnent a pain in the neck," which might be translated as: "The leading star sings very nicely and is very beautiful," to which the other replies: "Yes, but I don't like her gags; they give me a pain in the neck."

Stupid though the game seems, it is becoming a really serious pastime. The player who finally lacks an answer, that is to say, who cannot reply with a phrase in which there are two or more English words understandable to the company present, is fined—usually the price of a round of cocktails.

Keep Animals Alive With Electric Heart

Halifax, Nova Scotia.—An electrically operated "heart" has been used to keep animals alive. Dr. O. S. Gibbs, professor of pharmacology at Dalhousie university revealed that success of experiments in a lecture to the Nova Scotia Institute of Science and said it had been possible to sustain life for hours with the new device. He explained that the operation, taking about five minutes, consisted of removing the heart from a cat and attaching the electric heart, a double action pump operated automatically by electricity. The cat then revived and remained alive for hours, Doctor Gibbs stated.

Hay Drying Invention Would Surpass Nature

Genesee, Wis.—Arthur W. Koon has nearly completed work here on an invention with which he expects to shorten the normal period of time required to dry hay. Koon's machine, which is 200 feet long and 50 feet high to accommodate large quantities of hay, is expected to complete in two minutes the hay drying process that takes nature several weeks. Aside from additional speed in drying the hay the new device is said to retain the original green color in the forage.

Oregon Sawmills in 1844
The first commercial sawmills were built in Oregon in 1844 and on Puget sound in 1845. By 1883 there were more than 228 mills in Oregon alone, says the American Tree association.

Needs All of It
Every girl baby has an expectation of life four years longer than that of a boy baby. This is only fair, because she has much more to say.—London Opinion

TREES AID IN FIGHT TO STOP SAND DUNES

EXPERTS STUDY BEST METHODS TO CHECK LAKE MICHIGAN'S SHIFTING FRINGES.

Trees are playing a leading role in man's fight to keep the shifting sand dunes of the Lake Michigan shore from spreading disaster over farm lands, roads, and drainage ditches of the state's western border.

That many of the dunes are traveling "landward," often at the rate of several feet a year, is an established fact. Effective ways of checking the wandering tendencies of the errant dunes have become a real problem, and the usefulness or artificial tree plantings in this work is being determined this summer through a survey by forestry officials of Michigan State College.

Several hundred thousand trees were planted on the dunes 15 years ago, all the way from Holland to Petoskey, and the college foresters are checking this summer to see how much these trees have grown and how effective they have proved in slowing the relentless march of the sand.

Carolina poplar, box elder, and some of the pines give evidence of being best suited for the shifting sand plantings, according to Prof. A. K. Chittenden, head of the M. S. C. forest service. Methods of establishing plantations must vary with the character of the dunes and the exposure.

The dunes themselves are said to have increased greatly in value and importance with the development of Michigan for summer resort purposes.

Seal on Christ's Tomb

The seal at the tomb of Christ was a clay seal bearing the arms of Caesar placed at each end of a cord stretched across a stone which barred the entrance.

COMPLICATION FINDS FOE IN NEW KONJOLA

MAN SO ILL HE COULD SLEEP BUT LITTLE FOR THREE WEEKS—NEW MEDICINE TRIUMPHS.

MR. WILLIAM MCGINNIS

"For three weeks, I slept only a few hours, so great were the pains I suffered from rheumatism," said Mr. William McGinnis, 4230 Fourteenth street, Detroit, Mich. "I was barely able to walk, and kept getting worse. To add to my troubles, my liver was badly out of order, and dizzy spells were frequent."

"At last I found the medicine that I needed. The second bottle of Konjola practically put an end to all my pain, and my liver has been restored to a healthy condition. I shall go right ahead with Konjola, knowing that it will build up my entire system, and bring back the strength and vitality I lost during that terrible siege of rheumatism."

Konjola is sold in Plymouth at Community drug store and by all the best druggists in all towns throughout this entire section.

AN INVITATION

is Extended to All the People of

PLYMOUTH and Vicinity to Attend the Oakland County Fair August 7-8-9-10

AT MILFORD - DAY and NIGHT

Exhibits Are Offered in Cattle, Sheep, Swine, Poultry, Farm and Garden Crops, Boys' and Girls' Club Work, Home Economics, School Work, Antiques and other lines.

The Entertainment Features Include

- FOUR-DAY RACING PROGRAM, Wolverine Circuit, Eight Events.
- AUTOMOBILE SHOW. See the New Offerings.
- PLATFORM AND AERIAL ACTS, Six Separate Shows.
- THE HORSE SHOW, On Saturday Afternoon
- 3 BALL GAMES, Pontiac, Northville, Holly and Milford Competing.
- THE NIGHT FAIR with all features going except ball games and races.
- BAND CONCERTS by bands from Flint and Yassar.

Grand Historical Pageant

will be the feature of the evening program. In addition to scenes representing events in Oakland County History will be many spectacular scenes and dances. Several people from this locality will have part in the pageant which will be staged by the John B. Rogers Producing Co., of Fostoria, Ohio. About 300 people from all over Oakland County have part in the production.

See Miss Columbia and here 48 States Miss Oakland County and her attendants.

The Date is Next Week! Don't Miss The County Fair!

You May Never Have Thought of it but it's a fact nevertheless—Business positions are two to one in favor of the home-owner. We can build you just the home you should own.

CATHOLIC NOTES

Sunday is finance Sunday, the July report will be read.
 Nethem lost to Burns Aviation last Sunday 1 to 6. Next Sunday, Nethem vs. Highland Park, at Newburg, 3:00 p. m.
 We were very sorry to learn of the accidental death of Dr. R. E. Cooper, and our sympathy is hereby publicly extended to the family.
 The Rev. R. Neuman of Henlock, Mich.; B. Felsecker of Milwaukee, Wis., and A. Babcock of Ann Arbor, called at the rectory during the past week.

Christian Science Notes

"Truth" was the subject of the lesson-sermon in all Christian Science churches on Sunday, July 28.
 Among the citations which comprised the lesson-sermon was the following from the Bible: "Then said Jesus to those Jews which believed on Him, If ye continue in my word, then are ye my disciples indeed; And ye shall know the truth, and the truth shall make you free" (John 8:31-32).
 The lesson-sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Truth brings the elements of liberty. On its banner is the soul-inspiring motto, 'Slavery is abolished.' The power of God brings deliverance to the captive. No power can stand divine Love" (p. 224).
 The lesson-sermon for next Sunday, August 4, "Love."

METHODIST NOTES

The Fourth Quarterly Conference will be held in the church parlors Tuesday evening, August 6th. The Rev. Dr. J. E. Martin, of Ann Arbor, will be present. There will be reports from each department of church work.

Toil, Trouble Come to Pair Even in Prayer

Red Bluff, Calif.—Mr. and Mrs. H. H. Bishop, ranchers of the Los Robles section near here, feel that they have had more than their share of trouble.
 Two years ago Mrs. Bishop sprained her ankle and was forced to use crutches for a year. Then her husband cut a deep gash in his foot with an ax while cutting wood. Before he had recovered from this injury he was severely hurt when his machine skidded off the Dibble creek bridge and was wrecked. The frost recently wiped out the Bishop's prune crop, and now Mrs. Bishop has been forced to bed with a broken rib as a result of falling while rising from prayer at the Cone church.

Latest Fad in Paris

Is Gambling Dance
 Paris.—The gambling dance has arrived as the latest Parisian fad. The floor of the dance hall is marked out in numbered squares, like a roulette table. A roulette wheel spins on the wall. When it stops spinning the dance ends and the dancer who happens to be standing on the square corresponding to the number on the wheel wins. Money, dolls and other souvenirs are given as prizes.

Save Tinfoil
 Kansas City, Mo.—Redcaps at the Union depot here are out to pass their record made last year of picking up more than \$300 worth of tin foil. The tin foil is saved for charity, the amount last year having been equally divided between two Roman Catholic and two Protestant orphanages.

ELECTRIC LIGHT 50 YEARS OLD

(Continued from page One)

constant to coast. A few minor changes in construction have been made in order to adapt it for use on modern electrical circuits.
 Modern lighting owes its being to this feeble lamp, which on October 21, 1879, delighted Mr. Edison and his assistants by burning for forty hours. This was the culmination of 13 months of experiment and an expenditure of \$40,000, carried on in face of public ridicule. Few believed Mr. Edison could "subdivide the electric light," which was one of the problems to be solved. Such unpleasant epithets as "fool" and "boaster" were freely applied to him. There were some, however, who did have faith in Mr. Edison's ideas. Such financiers as J. P. Morgan and Henry Villard were interested in the Edison Electric Light company, capitalized at \$300,000 to develop incandescent lighting.

Worked Night and Day.
 In his Menlo Park (N. J.) laboratories, Mr. Edison gathered a group of talented, earnest young men to assist in his search for a practical incandescent lamp. They worked tirelessly. Sleep was doled out in minimum allotments. Mr. Edison himself at this time was on the job day and night. His laboratory notes during this period filled more than 200 notebooks. In discussing this long campaign in later years, Mr. Edison said that the electric light caused him the greatest amount of study and required the most elaborate experiments.

"Although I was never discouraged," he said, "I cannot say the same for all my associates. And yet through all those years of experimenting and research, I never once made a discovery. All my work was deductive and the results I achieved were those of invention pure and simple. I would construct a theory and work on its lines until I found it untenable, then it would be discarded at once and another theory evolved. This was the only possible way for me to work out the problem."

In his first lamp, Mr. Edison used a piece of carbonized sewing thread as the incandescent filament. That lamp is today known as the "sewing-thread lamp." Next, looped filaments of carbonized paper were used with comparative success. Still seeking a more serviceable filament, Mr. Edison chanced to try a bit of fiber from a palm-leaf fan.

This chance experiment started one of the most romantic adventures in the history of the incandescent lamp—a world-wide fiber hunt. Such promising results were obtained from the bit of fiber from the palm-leaf fan, that before long, scouts were sent to many far-off lands to find the species of bamboo best suited to carry Mr. Edison's new lamp to success. More than 6,000 specimens were shipped back to the Menlo Park laboratory. Of these, a Japanese bamboo was selected and for nine years it was grown by a Japanese farmer for Mr. Edison and used in all the incandescent lamps. The Edison electric light system was introduced and the incandescent lamp won its laurels with the filaments of this Japanese fiber.

Later other materials were used—cellulose, then tantalum and finally tungsten which is in use today.

Not Perfect, Says Inventor.
 Some years ago, in commenting on his invention, Mr. Edison said, "No invention is perfect and the incandescent lamp of today is not an exception. Light without heat is the ideal, and that is still far off. The electric incandescent lamp of today is the cheapest form of luminant that has ever been produced, but some day it will be cheaper and colder than it is. There is a good deal of truth in the saying that the firefly is the ideal. It is, so far as coldness goes. But the color is against it. You couldn't use a thousand-candle firefly to match colors, and you wouldn't want the insect to light up a street, because the light would be a hideous greenish yellow. But some day we will get reasonably near the firefly for efficiency without copying his disagreeable color. The task needs much investigation, much research of the kind we did in 1879."

Venezuela Has City of Nameless Streets

Caracas, Venezuela.—This city of 100,000 is in effect a town of nameless streets, although the officials long ago decreed a modern system of North First, East Second and similar titles. In practice nobody uses them.
 Addresses in Caracas are all given with reference to street corners. Each street intersection is named, and house numbers start new in every block.
 For instance, if you live at 507 East Fifth, your real address will be something like "Little Birds to Green Cross, 97," and nobody will understand if you say anything else.
 The corner names are centuries old, and some of them are expressive. They include Torre (of the cathedral), Father Tierra, the Palm Tree, Drugs (where they were sold), and Physician.
