

NEW SECRETARY OF CHAMBER OF COMMERCE OUTLINES FUTURE ACTIVITIES

ENGINEERS MAKE SURVEY OF PLYMOUTH'S WATER SUPPLY—SHOWS ENORMOUS WASTE

New Pumping Equipment and Concrete Storage Reservoir Submitted In Report

WASTE EQUALS WATER CONSUMED

Acting under instructions of the village of Plymouth, the firm of Hunt, Decker, Shovercraft and Drury, of Ann Arbor, to make a study and survey of Plymouth's water supply, their firm has in part submitted the following report of our present water system:

- (1) An underground water gathering system, consisting of infiltration galleries, driven wells and a large brick receiving well situated on the east side of the Beck Road a half mile north of the Waterford Road.
- (2) Electric motor-driven pumping equipment at the gathering ground for delivering the water to the village.
- (3) A supply line from the gathering ground in the village.
- (4) A reinforced concrete storage reservoir connected with the supply line.
- (5) A booster pumping station at the North village limits by means of which the water brought by the supply line is delivered into the village distribution system at the required pressures.
- (6) A street distribution system and an elevated steel tank.

The first supply line and reservoir from the gathering ground to the village was built in 1881 and 1892 and consisted of a line of 12-in. cast iron and vitrified clay part of which was supplemented by a new line in 1904 and has now been entirely abandoned. For many years the new line carried to supply to the village by gravity until in 1921 a Chippewa pump was installed which delivered the water into the supply line under pressure thereby increasing its carrying capacity. In 1924 another pump was added for the same purpose. The booster station on the Northville Road, just north of the village limits, was built in 1916 to meet the demands of the village at that time. This station is a small brick structure in which are housed two electric motor driven pumping units, each having a rated capacity of 700 gallons per minute against a head of 100 feet. At the time of their installation there were no pumps at the source so that these booster units were designed to impose a suction upon the gravity supply line and to deliver into the discharge system.

On July 28th, a test for leakage was made by the engineers and the results showed that leaks in the water system was wasting at least nearly as much water as was consumed daily. According to the report Plymouth is abundantly supplied with an excellent quality of purest water. At the present time the plant is being worked to nearly its capacity, and should the town grow to any extent, which it is sure to do in the next few years, the present system of pumps, mains, etc., will not be adequate to meet the demands that would be put upon it, unless construction improvements are made and an outline of this new construction is contained in the report as follows:

- (1) Preliminary improvements at the source and in the delivery system, including the construction of an additional infiltration gallery at the gathering ground, the installation of two motor driven centrifugal pumping units in the present collecting well and the repair and adjustment of the booster station pumping units for higher pressures. Estimated cost, \$16,500.
- (2) The construction of feeder and lateral distribution mains necessary to strengthen the present distribution system including a ten inch main in Golden Road from Mill Street to Main Street; an eight inch main in Main Street from Sutherland Ave. to Golden Road and several short lengths of smaller mains needed to reinforce the present gridiron system. Estimated cost, \$40,500.
- (3) The construction of an additional supply line in Beck, Phoenix and Moreland Roads and in Blanche Street from the gathering ground to Adams St., this line to be constructed of 14 inch cast iron pipe as far as Blanche Street and of 12 inch pipe in Blanche Street, estimated cost \$140,000.
- (4) The construction of additional feeder mains to supply the village distribution system from the new supply lines, such feeder mains to consist principally of 12 inch and 10 inch cast iron pipe lines, and the construction of an elevated steel tank in the east-

BLAZE CALLS OUT FIRE DEPARTMENT

A blaze which originated in the cupola on the house owned by Mrs. Kate E. Allen and formerly known as the Frank Park home, called out the fire department Thursday forenoon. Considerable damage was done to the roof and the upper floors by smoke. Just how the blaze started is not known.

DEVELOP NEW ELECTRIC STOVE

Announcement is made by the Detroit Edison company of the development of an electric cooking stove of a revolutionary type. The new range is the result of months of study, experimentation, and research under the auspices of Detroit Edison, devoted to producing an electric stove that would be swift in action, simple to operate, and economical in fuel cost, and that could be manufactured by mass production methods at a price much below that hitherto deemed possible for electric stoves of comparable size and finish.

The reason for undertaking the development of a new type of electric stove, according to Alex Dow, president of Detroit Edison, "was the inability of our company and others to obtain in any other way a low cost and rapid cooking electric machine." His specifications to the designer, Warren Noble, of Detroit, were to the effect that the machine "should be easy to clean, simple to operate, quick to cook, and of such construction that it should be made in quantities at a price that would be attractive and economically possible for a large number of electric light and power customers."

Radical departures are made in heating element design, chief of which is the application of radiant heat. The range uses both reflection and convection from a high speed cooking element. Four electric cones are used for the cooking table. They are placed in the center of a heavy chromium plated steel reflector and become hot almost instantly, since they are above average heating capacity. The reflectors concentrate all the heat on the food to be cooked. The cones, which are identical in size and construction, can be removed for cleaning or removal much in the same manner as an electric lamp.

The oven is so designed that it comes to a cooking temperature in less than five minutes, an improvement of some 300 per cent over other electric ovens.

The stove uses less energy than any of the other ranges tested with it. Its table elements are 15 to 30 per cent faster and its ovens cook in approximately two-thirds the time. Mass production methods similar to those employed in Detroit automobile plants will be used in its manufacture. The new stove is expected to bring electricity into direct competition in economy and efficiency with other fuels for domestic cooking.

PLYMOUTH PASTOR INVITED BACK FOR FIFTH YEAR

The annual meeting of the Methodist Episcopal church was held Tuesday evening. The reports from the various departments of the church were read and each showed the work to be in a first class condition.

Dr. F. A. Lendrum, the pastor, was unanimously invited to remain for another year, after four years of splendid service. The church has grown and prospered under Dr. Lendrum's pastorate, and he has not only won a large place in the hearts of his congregation, but by everybody in the village as well, and all will be pleased to welcome Dr. Lendrum and his estimable family back again for another year.

ern part of the village. Estimated cost \$160,000. The report that has just been submitted will no doubt govern the future action of village officials, in the matter of additions and improvements and will prove of incalculable value.

PLYMOUTH MAY GET ANOTHER INDUSTRY

Of timely interest in view of the public's desire to secure new industries of merit for Plymouth, a Mrs. Holten, representing the Yankee Sheet Tile & Wall Covering Company, 51-57 Selden Ave., Detroit, was present at a meeting of the board of directors Monday evening, August 5th. This company is seeking a new location with room for expansion and is considering Plymouth.

A committee consisting of F. D. Schrader, Geo. H. Robinson, and Edward Gayde was appointed to investigate the company at a meeting of company officials to be arranged by Mrs. Holten. She was also instructed to invite the company officials to fully present their proposition before the board of directors next Monday evening, August 12th.

An inquiry from a well known firm of industrial realtors was received at the chamber of commerce office Saturday, August 3rd. The inquiry was turned over to Mr. Bakewell, chairman of the industrial committee, who upon investigating reports that the industry interested in making the inquiry has merit and that the situation is promising.

Another inquiry from a Detroit manufacturer was received Tuesday. It will also be promptly investigated.

These inquiries, which we hope will increase in number, is evidence of the awakening interest in the industrial possibilities of Plymouth.

TWO MEN VICTIMS OF WHITMORE LAKE WATERS; 20 DROWN IN STATE

Last Sunday, Herman Gembraska, 21 Toledo, was believed to have suffered a heart attack causing him to be thrown in eight feet of water. Mr. Gembraska was a teller for the Commercial Savings and Trust Co. of Toledo.

George Diegel, 23, of Ecorse, was on a raft with his wife and sister, about three o'clock, Sunday, watching

the boat races. Some way or other, they lost their balance and fell into deep water. Mr. Diegel was drowned, while guards rescued the woman.

In Oakland county lakes, the total of deaths by drowning since Decoration Day, is 19.

Over twenty drownings were reported in the state, Sunday.

Chamber of Commerce Is An Organization to Protect and Promote General Welfare of the Community.

ASKS CITIZENS FOR SUGGESTIONS

Success Depends Upon Assistance of Every Citizen.

If you were asked to give a definition of a Chamber of Commerce, you would probably make a general statement such as this: "A Chamber of Commerce is an organization of individuals banded together to do those things to protect and promote the general welfare of the community, which they collectively can do more effectively than they could as individuals."

If you were next asked to specifically state a definite objective for the Plymouth Chamber of Commerce to take up, you might have some difficulties in keeping away from such generalities as "The Chamber of Commerce ought to help Plymouth merchants." "They ought to double—treble the population of Plymouth." "They ought to bring in new industries." "They ought to make Plymouth a better, more prosperous place to live in," etc.

All of the above statements are true, and represent in a general way exactly what we are striving for and what will ultimately come, but a chamber of commerce program to reach its highest point of effectiveness must be definite, tangible, and specific in form. Our purpose in preparing the accompanying chart or diagram of the structure of a typical chamber of commerce is to give you some conception of the many phases of activity properly contained within the scope of a chamber of commerce in the hope that it will start you to thinking along definite lines.

The membership of a chamber of commerce is obviously its governing body, but for the entire membership to have to pass on every problem before the chamber would be an unwieldy method, so a board of directors is elected annually to determine the program of work, receive and pass on general activities of the organization, committee reports, and direct the general secretary follows out the orders of his board.

The board of directors, however, cannot do all the thinking for the organization. They are conscientious men striving for the betterment of your community as a whole, but compare the value of the thought and energy of nine busy men with a united community of hundreds working toward a common goal, and you can see that they need and deserve your assistance.

Any action that helps Plymouth helps you directly or indirectly, so do not think of the Plymouth Chamber of Commerce as something remote from yourself. If busy men, in many cases your neighbors and friends, support YOUR Chamber of Commerce with their time and money, if you have not joined as yet, give these men the benefit of your best thought, ideas, and suggestions.

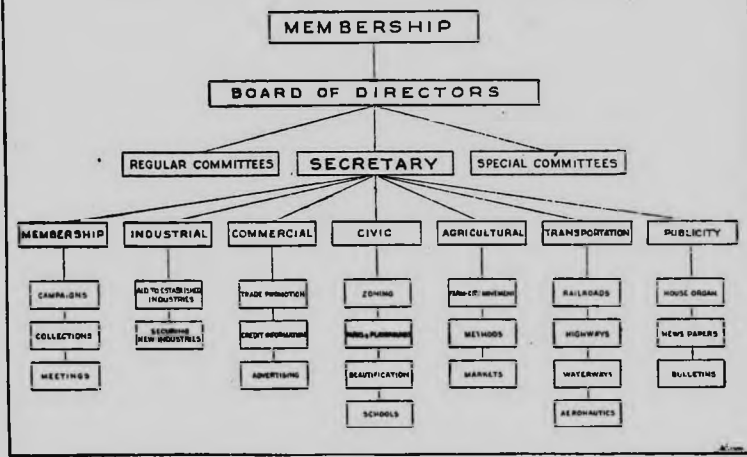

Make your suggestions by letter, by personal calls at the chamber of commerce office, or by being present at meetings of the board of directors. The public is always welcome.

Books for Boys at Plymouth's Library

Books of the year written especially for boys, books with tales of exploration, invention, travel, woodcraft, war, wild animals, imaginary exploits, and search for wealth are to be found at the Plymouth library. A few are mentioned in this list:

- Jinglebob—A True Story of a Real Cowboy—by P. A. Rollins. An excellent picture of cowboy life in the '80's as two young easterners saw and experienced it.
- Boys' Life of Colonel Lawrence—by L. J. Thomas. The account of Lawrence's leadership of the Arabs in their revolt against the Turks.
- Cougars and Cowboys—by D. M. Newell. A collection of western stories.
- Abe Lincoln Grows Up—by Carl Sandburg. Lincoln's boyhood and boyhood at Knob Creek Farm and Pigeon Creek; his games and chores; his life at Gentryville and on the Mississippi until at nineteen, leaving home to make his fortune at New Salem "Abe Lincoln grows up."

STRUCTURE AND FIELDS OF ACTIVITY OF THE PLYMOUTH CHAMBER OF COMMERCE

WAYNE KIWANIANS VISIT PLYMOUTH CLUB TUESDAY

Model Airplane Contest News

Well, boys, due to the fact that so many of the contestants have not completed their models, also many of the boys have cracked their planes up while testing them, that it will be necessary for us to postpone the meeting to be held on the factory site until Wednesday afternoon, August 21st.

Fellows, you must follow the plans that were given you in every detail—do not take too many things for granted, and use too many of your own ideas as these ships have been built and tested as per given specifications.

The "High Climb R. O. G." has established a record of three hundred and forty-two seconds. This is equivalent to five minutes and forty-two seconds. The "Baby R. O. G." seems to be a favorite among the boys. They have made a stampede for five-inch propellers.

We have also had many new contestants enter into the contest during the last few days. The event promises to be a very interesting affair. The prizes are worth working for—they will consist of money orders on some of the leading merchandise stores, airplane rides, material to build several models and also cash prizes. The small investment made by you boys will be more than compensated for should you win but one of the many prizes.

If you boys run short on material come on down to the office and we will fix you up. If you need assistance, consult some of the other boys or come into the office.

Prisoners, With Iron Pipe, Fail In Freedom Attempt

Wayne Home-Coming Today and Saturday

Several prisoners confined in the village jail attempted to break out last Thursday night, but were unsuccessful. They tried to tear down the supports of an overhead radiator in the cell block, and then using a gas pipe, thus obtained in an effort to pry the bars from the doors that led to freedom. Friday morning five men, John Smith, Wm. Ellis, Harry Miller, George Larmer and Albert Wright were taken before Justice Phoebe Patterson on charges of vagrancy and disorderliness and four of them were given a sentence of 15 days in the Detroit House of Correction, Smith getting a 30 day term. When their present terms expire they will probably have to answer to charges of malicious destruction of property.

Meldrum J. Smith was in Justice Phoebe Patterson's court last Monday charged with the theft of some lumber which disappeared from a house being built by Robert S. Todd. He pleaded guilty and was fined \$15 and costs.

Gives Favorable Comment on Amphibian

Perry W. Richwine, president of the local Chamber of Commerce, brought Kenneth M. Ronen, chief engineer of Stinson-Detroit Aircraft Corp. of Wayne, to the offices of the Mack-Craft Amphibian Corp. to give his opinion of the amphibian. Mr. Ronen passed very favorable comments to the effect that the amphibian was designed along conventional lines and had every reason to think that it would be successful. He examined all of the drawings and engineering data, and also made a close examination of the finished ribs that go into the wing, of which he gave compliments on the construction. He made known that Plymouth should do its utmost to help keep and finish the factory that has been started.

Real Opportunity For Plymouth Women

Just how good at canning are Plymouth women and girls?

This question suggested itself today from an announcement in Chicago of a National Canning Contest to find the best jar of canned fruit, vegetables or meat in the country. Twelve hundred and fifty dollars (\$1250) in cold cash awaits the woman or girl in the United States whose entry is selected as the best jar of canned food entered in the contest.

The contest, which is sponsored by

(Continued on page 5, Col. 2.)

Wayne Home-Coming Today and Saturday

VAUDEVILLE, PARADE, AUTO SHOW ARE SOME OF THE FEATURES.

The final arrangements for Wayne's annual home coming which is to be held August 9th and 10th on Sims street between Second and Third streets show the event to present the appearance of all that has been promised by the committee in charge of the affair.

The six acts of vaudeville that will be presented on the platform are of a high character and will provide much interesting entertainment and comedy for the visitors. Aside from this a ten-piece band of exceptional quality has been secured to furnish music both days for the entertainment of the music lovers in the crowd.

An excellent orchestra will furnish music for free dancing both evenings. The attractions along the "midway" will provide much fun and sport for those who make use of them. Several different "stands" will feature different forms of games that are always entered into by a goodly number of the visitors.

The parade Friday evening at seven o'clock will be an event that you will not soon be forgotten. In past years it has been noticed each year that more and more floats have been entered and the quality has been improved also. Many excellent floats are entered from the standpoints of beauty as well as comedy. It is expected by the committee in charge of the parade that the event this year will be larger than it has ever been before. And it is known that there are many who are now planning to enter some very excellent "masterpieces" in the event.

It is understood that all the automobile dealers in Wayne will enter the "auto show" that is an attractive feature of the two days' program.

(Continued on page 4, Col. 4.)

ROTARY AND KIWANIS IN GOLF TOURNAMENT

The Plymouth Country Club was the setting of a tournament in Golf between golfers of Rotary and Kiwanis last Wednesday afternoon. The honors of skill were about equally divided and though at the time this notice was given to the Mail, official scores had not been O. K'd by the committee, the report was given that Kiwanis had a little better edge over Rotary in this tournament which has become to be an annual affair with the two clubs.

The Dodge Drug Co. is installing a handsome new soda fountain this week. It is one of the latest and most improved patterns, with every convenience and device for cleanliness and sanitation. It is certainly a fine addition to the store.

To Our Patrons

The Penniman Allen Theatre at Plymouth will close for the months of July and August. This is made necessary in order to make changes to provide for the installation of sound and talking equipment. We have always tried to give our patrons the best in entertainment and will continue by purchasing the most up-to-the-minute sound equipment on the market.

The Northville theatre will continue its regular policy of three changes a week—Sunday, Wednesday and Saturday.

We will hope to see you all the first of September and expect to have a real treat for you.

"EASY MONEY"

When a Boston boy was arrested a few days ago for embezzling the funds of his employer he made the same explanation thousands have made in the past, and thousands probably will make in the future. He said he saw a chance to beat the stock market and that he "took the money intending to win more and then put it back." Temptations of this kind come to almost every young man. Boys growing up right here in Plymouth will sooner or later, most of them, face conditions where the desire to make a little "easy money" will be hard to resist. But if they will just keep one thing in mind above all others they will emerge safely from the temptation—and that is to always remember that you can't beat the other fellow's game, and that there's no such thing as "easy money."

USING COW'S HAIR

Maybe you've never stopped to think of it, but it's the simpler things in life that make a lot of people rich. Only six years ago, up to 1923, the hair taken from beef cows was regarded as useless. In fact, some tanneries were paying all the way from \$6,000 to \$50,000 a year to get rid of it, usually destroying it with acids. Then a rug-maker, a man named Louis Regensberg, of New York, had an idea. "Why not," he asked himself, "sterilize cow's hair, press it into strips and use it for floor covering under carpets. It would make them feel softer and wear longer." So he tried it out—and it worked. Then he organized a company, and last year his company sold \$3,600,000 worth of this product, made from a waste that was once costly to get rid of. But Louis hasn't a monopoly on brains. Any Plymouth man who can use his head to study the simpler things has just as good a chance of hitting on something equally as profitable.

BETTER FAMILY LIFE

Speaking in Cincinnati the other day a welfare worker told his hearers that the family life in America is growing better and more wholesome, despite the busy divorce courts throughout the land. That is a heartening word to a nation that seems doomed to apartment house homes, golf courses and night club entertainment. Four points that a family should recognize in their responsibility toward their children, he said, are sense of self-support, education, a sense of decency and morality, and a sense of discipline. Parents have a greater problem these days when their children have so many interests distracting them from the old family hearthstone. But the parents are in most instances solving this prob-

lem, the welfare worker says, and that means that we are going to successfully and satisfactorily answer the question we so often hear asked—"What's going to become of the younger generation?"

A CAMPAIGN ON JUNK

Determined to ascertain just what is responsible for most of the auto accidents in the United States, the National Safety Council has started a nation-wide survey of defective, dilapidated cars. They believe fully thirty percent of all accidents are due to a lack of attention to the mechanical needs of a car.

It looks as though Uncle Sam is going to try to bar from the roads machines which, being dangerous to operate, are potential engines of death. What the experts will have to say may have some bearing on the yet unsolved used-car problem. Half of the American demand for autos today is for used cars. And it is significant to note that between 60 and 80 percent of all cars are sold on the installment plan. Good roads have sprung up at such a pace that many states have increased the speed limit; some have abolished it. It is not hard, therefore, for any Plymouth motorist to realize how great is the danger of accidents when one out of every four machines traveling those roads is unfit for service.

There is no question but that our highways are infested by too many machines that have outlived their usefulness, and that have reached the stage where they are unsafe anywhere. Too many cars that are on the road ought to be in the junk-heap, and it now looks as though Uncle Sam is strong enough in the same belief to tackle the job of putting them there.

WHERE DO YOU STAND?

On a billboard in the city of Louisville, Kentucky, are these words: "Just what you think of your home town is your home town's opinion of you."

There's so much truth in that that we want to ask every Plymouth citizen to think it over. Take the men of your acquaintance; look them over. If they are boosters, if they have faith in their home town and love it, what does their home town think of them? On the contrary, if they are knockers, if they have no faith in their town, if they are natural-born or self-made pessimists, what does their home town think of them? When a fellow loses faith in his country, when he gets so he can see nothing but the handicaps of his home town, when he does nothing but knock and kick, and nothing to promote the progress of his home town—how can he expect the love, or even the respect, of its citizens?

If you are not satisfied with your home town, or if you have the idea that it could be made better, then why not make your criticism constructive—why not make public a remedy for the ills you point out? If you want to take the lead in anything in the way of improvement you can always find someone willing to help. But don't find fault without suggesting a remedy. That's unfair to both yourself and your town and will neither help the town to be better nor elevate you in the estimation of its citizens.

Performance Counts

Watch the new Ford on the hills, in traffic, and on the open road, and you will know that it is a truly great car

The minute you see the new Ford car you will be delighted with its low, smart lines and the artistic color combinations. There, you will say, is a truly modern car.

But a still greater thrill awaits you when you slip into the roomy seat behind the wheel and start away for your first ride.

You will like the feeling of power that the new Ford gives you—the comfortable, prideful feeling that comes from having a car worthy of any occasion and equal to every emergency.

You will like the flexibility and safety of the new FORD car as you weave in and out of traffic—its flashing pick-up as the light turns green and the sign says "Go." You will like its smooth, quiet steadiness on the open road where you can lazy along according to your mood, or do 55 and even 65 miles an hour if you desire. The new Ford has unusual speed—no doubt of that!

There are still other reasons why the new Ford car is a great car to own and drive. Three important reasons that mean a great deal to you: RELIABILITY—ECONOMY—LONG LIFE.

New Ford Sport Coupe (with rumble seat)

The New Ford Roadster

The new Ford is made to stand up under thousands of miles of steady running over all kinds of roads, and save you many dollars in repair bills.

Come in and see this great new car. Inspect it carefully—part by part. Then know the thrill of driving it. By its performance you will realize that there is nothing quite like it anywhere in design, quality and price.

All Modern Improvements

Jim and Sally knew what they were doing when they bought the old Jones house. It was hopelessly out of date so far as looks and modern comforts went, but it was staunchly built and had a good sized lot, and they got it for a song.

Jim's salary wasn't very big, so they didn't try to do everything at once. They began with the furnace. That first summer they read the heater advertisements and sent for manufacturer's booklets. In the fall they chose just the equipment they wanted and had it installed. Then they started reading up on bathrooms and plumbing. The following year they studied woodwork advertising, and replaced the old gingerbread porch with a pretty colonial doorway. Of course the house needed painting and they found a dream of a color scheme suggested in an advertisement. Later came new flooring, fresh wall paper, attractive lighting fixtures, shrubbery for the lawn.

Jim and Sally have one of the prettiest homes in town. "Where did you get such wonderful ideas?" their friends ask, and Sally smiles.

"We simply knew what we wanted before we bought it," she replies. "Anyone can, who reads the advertisements."

LOST—Wire auto wheel, with spare tire in Plymouth or vicinity. Liberal reward if returned to H. S. Lee Foundry & Machine Co., Plymouth. 1p

LOST—Ladies' pocket book, Saturday, August 3, on bus that leaves Plymouth at 7:40 p. m. Finder please return pocket book and keys to Chas. McConnell's barber shop. Keep money that is in pocket book. Mrs. O. Weckerle. 3814c

FOUND—A sum of money in the vicinity of the House of Correction. Lessor may obtain same by proper identification and payment of this ad upon inquiry at the Wayne County Training School. 3814c

FOUND—Female police dog, J. Mitchell, Plymouth and Livonia Town Line Road, between Five Mile and Plymouth road. 191c

A CARD—We desire to express our sincere thanks and appreciation to the neighbors and friends for the many acts of kindness extended to us during our recent bereavement; especially do we wish to thank those who sent flowers and furnished automobiles. Children of the late Joseph Hanes.

FRAIN'S LAKE
Mr. and Mrs. Gust Eschels and children, spent Saturday evening in Detroit with relatives.

Mr. and Mrs. Melvin Shoemaker of Detroit, spent the week-end with their parents, Mr. and Mrs. Fred Tackman.

Mr. and Mrs. Asa Wilson and children of Detroit spent Saturday and Sunday with the latter's parents, Mr. and Mrs. Linton Proctor.

The home of Mr. and Mrs. Fred Fishbeck was the scene Sunday of the annual Murray family reunion. The 100th anniversary of the coming of the Murray family to Michigan was celebrated at the same time. A pot-luck dinner was served and a social time was had.

Mr. and Mrs. George Lyke and daughter Marie, Will Lyke and daughter, Mrs. Clarence Sherwood attended the annual Lyke family reunion at the home of Mr. and Mrs. E. C. Lyke, Ypsilanti. Forty-six members assembled for a lovely chicken dinner served under the large oak on the lawn.

Mr. and Mrs. Arthur Radtke and little son of Detroit, were Sunday guests at the Gust Eschel home.

Mr. and Mrs. Reed and sons, Russell and Steward of Detroit, were Sunday callers at the Herman Nankee home. Russell and Steward remained to spend the week.

ALL-IN-ONE DRESS FOR LITTLE GIRL

Child Will Learn How to Manage Garment.

(Prepared by the United States Department of Agriculture.)
The fewer clothes in hot weather, the more comfortable the child. Up to about three or three and a half years old a romper is often the only garment necessary on either a boy or a girl; but as the little girl grows older she looks better in a costume with a skirt of some sort, however abbreviated.

The bureau of home economics of the United States Department of Agriculture has been working for some

Self-Help Idea Runs Through Design Shown in Illustration.

time on various problems connected with dressing children of different ages, but especially those of the preschool years. The self-help idea runs through all the designs shown. Garments that button in front with few and easy-to-find flat buttons or other forms of fastening are preferred. If there must be buttons in back at the waistline two toward the sides are used rather than a single center-back button. Every mother knows how often that center-back button has to be sewed on or the buttonhole mended. Not only can the child reach side-back buttons better, but there is less strain and pull on the shoulders when they are used. Easy making and easy laundering are also points kept constantly in mind in planning children's clothing.

Here is an all-in-one outfit for a little girl to wear on hot days. It eliminates the need for undergarments, yet has the outward appearance of a dress. It is made in two parts, with a detachable plaited skirt for easy laundering. The self-help idea is emphasized, since the dress has an invisible front opening, snapping together under the blue front trimming. The child can also learn very quickly to button the skirt onto the waist before she puts the dress on, if she is once shown how the box plait comes in the middle of the front. The seven buttons on the skirt are arranged so that there are two side-back buttons and none in the center back. The buttonholes are made vertical so the buttons will stay closed.

A kimono style romper pattern was chosen, with a seam on the shoulder, and very short sleeves. Except where the collar-like trimming closes at the center front, it is stitched flat, fitting the outline of the neck. The panty part of the romper has an invisible drop seat, and is made on a fold of the goods to give ample room through the crotch, and the very short legs are bound with plain blue material like the little skirt, the neck and arm-hole trimming and the top of the pocket.

EDGEWATER PARK

A new roadway has been built and a second bridge constructed across the River Rouge at Edgewater Park, on the Seven Mile road, near Grand River, to facilitate further the movement of automobiles into the park.

This change provides free parking space for more than 8,000 cars at the park.

For the rest of the summer there will be two added free attractions each week and the new bridge and roadway are expected to take care of the crowds without congestion.

Every Sunday afternoon at 4:30 "Daredevil" Eddie Baker will leap from an airplane a mile in the air. Each Wednesday evening there will be free fireworks at the park.

One kind of flood control that seems out of the question is the kind that will stop a flood of oratory in the Senate.

While the hero in the novel may get a kick out of kissing the heroine's hair it always makes us feel that his aim was poor.

Lemons Not "Reducers"
"The old idea that lemon juice had a thinning effect has been proved to be quite untrue," said a leading doctor attached to the New Health society. "A lemon taken in the early morning is an excellent habit. It may possibly be an antidote to rheumatism but as a thinning substance—never."

Where Pleasure Lies
Owning the richest treasure in the world is useless unless some one else shares them.—American Magazine.

Wayne Home-Coming Today and Saturday

(Continued from page one)

Many people, young and old, gather around the shiny new speed structures of steel.

All in all, this year's event should be the outstanding home coming of Wayne. Come and see.

Following is a list of the acts of vaudeville:

Six Rainbow Girls, entertaining band.

Frees Brothers, European comedy acrobats.

Doley Sisters, spectacular and artistic dancing.

Edna Rae, soprano and radio star. Figaro and Deland, late features of George White's Scandals.

Bill Smart, that eccentric juggler.

THE KITCHEN CABINET
There are three kinds of people in the world—the will's, the won't's and the can't's. The first accomplish everything, the second oppose everything, and the third fail in everything.—F. T. Davidson.

THE EFFICIENT KITCHEN

Now-a-days with the colorful kitchens and breakfast nooks so common, it seems trite to talk of kitchen conveniences.

But there are thousands of housewife walks miles to prepare and serve a meal, where the kitchen stove, sink and table are hardly within speaking distance. These old fashioned kitchens are still far too common, and they are treasures, too, for remodeling one may have a small kitchen with equipment conveniently placed and a cosy breakfast nook with benches that push under the table when not in use, leaving space for ironing or dressmaking, with good light and every convenience.

The proper arrangement of kitchen equipment is not a passing fad, but a most serious problem, worthy of thought and planning.

Where the kitchen is small the work table covered with zinc or with a porcelain top stands in the center of the room, over it is arranged a hanging shelf with place for the much used utensils to hang underneath. The shelf may contain the pretty jars for salt, sugar and such condiments used in every day cooking. This table with shelf may be placed against the wall, if it is more convenient in the smaller home; then the sink, stove and table are all within easy reach, saving much walking.

Hang the measuring cups and small things within easy reach and always use them there. When dishwashing, the cupboard is near the sink, the shelves may be wiped and placed on a shelves without another handling, which saves many hours in the space a year.

A large tray or a tea wagon for removing soiled dishes from the table and carrying food to and from the dining table is a great space-saver. The handy boy with his tools can make a very good tea wagon, as many have done in the schools.

The small rubber kneeling pad used for so many things these days, is also a fine thing to stand on when ironing to save the tired feet.

Dog Barking Nuisance

Several complaints have been received at the Mail office of the continued barking of dogs which has reached to a degree of intolerance to those who have been annoyed both night and day by these canines. People have a right to sleep and sick people especially do not feel they should put up with owners' dogs that persist in howling and barking.

The Village has an ordinance which reads under Section 6 of Ordinance 84:

"No person shall harbor or keep any dog which by loud and frequent or habitual barking, yelping or howling shall cause serious annoyance to the neighborhood, etc."

This is a warning to owners of dogs, that a strict enforcement of this ordinance will be carried out by village authorities at once and this notice is given to owners of barking dogs to give the above ordinance their immediate attention.

Minnie Beatrice Huger in Who's Who

Who is who in music, a large volume containing the careers of musicians who are a significant part in the musical life of America today, contains the biography of Nellie Beatrice Huger. This is a very singular honor for so young a woman.

Miss Huger has been a successful Minister of Music for several years and has received recognition by the Musical and Religious Press. The following is a copy from who's who:

Huger—Nellie, Beatrice, soprano director teacher, New York.

Born in New Hudson, Mich., studied at Michigan Cons. of Music; Michigan State Normal College, Ypsilanti, Mich. (Chicago Training School, with Daniel Protheroe (voice); J. Lewis Brown (organ); Detroit Institute of Musical Art; and Union Theological Seminary, Taught, Eastern Baptist Theological Seminary, Philadelphia, Pa., 1926-27. Has been director of music at various churches; 1925-28 Minister of Music Bethel Church Presby-

terian church, Philadelphia, Pa. at present, Minister of Music, Broadway Temple, New York. Teaching in church studio. Member Sigma Alpha Iota, American Guild of Organists, Matinee Musical Club, address 639 W. 173rd street, New York, New York.

The H. Smith Clizbe home at Coldwater was the scene of a lovely wedding when Miss Katherine Irene Clizbe, daughter of Mr. and Mrs. H. Smith Clizbe and Wayne Reed Johnson, son of Mr. and Mrs. B. S. Johnson were united in marriage at four o'clock on the afternoon of August first. The ceremony was officiated by Rev. Charles W. Mackenzie.

Miss Gretchen Schultz sang, "I Love You Truly," by Carrie Jacobs Bond, accompanied by Mrs. Harold Johnson at the piano.

To the strains of Mendelssohn's wedding march played by Mrs. Harold Johnson, the bridal procession descended the stairway, which was trimmed with fern and hydrangeas and caught on the newel posts with large white satin bows.

As they reached the foot of the stairs little Patricia Wright of Jackson, who wore a little white dress made with streamer ribbons, and little Allen Bennett, nephew of the bride wearing a white satin blouse and black satin trousers, stretched the white ribbons to form an aisle for the bridal party. They were followed by Mrs. Carleton Duguid, matron of honor, who was stunning in a gown of yellow satin shimmered at the waist line with a full skirt of yellow tulle. She carried an arm bouquet of yellow roses tied with a huge bow of yellow tulle.

The bridesmaids were beautifully gowned in pastel shades of chiffon being fashioned alike of pink, blue, green and orchid. Each carried a French bouquet of pink roses tied with tulle bows to match her gown.

The little ring bearer, Billy Bennett, another nephew of the bride, presented the bride. He was dressed in a little white satin suit, carrying a small basket in which the ring was placed.

The bride was very beautiful wearing a gown of white satin, fashioned

Johnson-Clizbe

with a tight fitting bodice and full skirt, edged with a deep band of rich white lace, which hung ankle length. The neckline formed a V in front and was round in back and her veil of silk tulle combined with white lace was held cap shape over her head by a row of pearls. Her shower bouquet was of white roses, lilies of the valley and baby's breath.

The best man was Carleton Duguid. Following the ceremony the bridal couple left for a motor trip to Montreal, Quebec and other Canadian cities. On their return they will make their home in Ann Arbor where the groom is affiliated with the Brooks Realty Co.

Miss Katherine Irene Clizbe is a sister of Mrs. J. Merle Bennett of this place and is well known here.

Mr. and Mrs. J. Merle Bennett and children attended the wedding.

Tomato Cheese Whoopie Especially Delicious

A generation ago it was probably called a "rarebit" of Welsh or other descent, but the modern tendency to apply the latest catchword to everything has turned it into "whoopie," which happily gives one a feeling that the dish is sure to be enjoyed. The bureau of home economics says it makes not only a good lunch or supper dish, but an appetizing and quick-made meal after a long all-day motor trip or day on the water.

1 cup finely cut 1 tsp. salt
1/2 cup celery 1/2 lb. tomato pulp
1/2 green pepper 1/2 lb. cheese
1/2 cup chopped fine 1/2 cup butter
1 cup chopped onion 2 eggs beaten
1/2 cup flour 1/2 cup dashen ta-
2 the flour barso

Melt the butter in a heavy skillet, add the celery, pepper and the onion, and cook for about five minutes, stirring frequently. Sprinkle the flour over these seasonings, quickly pour in the tomato and then add the cheese and salt. Cook over low heat until the mixture thickens and the cheese is melted. Pour some of this mixture up to the well-beaten eggs, then pour all back into skillet, and continue to cook over low heat until thickened and creamy. Add the dashen and serve on crisp slices of toast or heated crackers.

The Factor Says:
Some people, like locomotives, pull whole trains; others, like automobiles, propel themselves alone; while still others are mere cars, which have to be hauled.—John Andrew Holmes.

EXTINCT BIRDS IN RARE GROUP

UNIVERSITIES AND MUSEUMS
OFFER COLLECTOR'S DAUGHTER
LARGE SUMS FOR
SPECIMENS.

We take the following from Sunday's Detroit Free Press, which will be of interest to Plymouth people. The article was accompanied by an illustration showing various species of rare birds of which the late James B. Purdy was a collector:

"Unusual legacies have been reported from many parts of the world. But in 1882 when James Britten Purdy of Plymouth, then a young man, began a seemingly useless hobby, he was instrumental in building an unusual legacy which, in later years, was to be sought after by famous researchers and offered princely sums for by institutions of higher learning. When he died in 1926 the product of his unusual work passed into the hands of his only daughter, Nettie Purdy Moore, also of Plymouth, who was her father's chief assistant during his life and the one to carry on his work at his death.

Since the death of Mr. Purdy, a procession of men have visited Mrs. Moore offering great sums of money for her inheritance. Among them has been the University of Michigan. But to Mrs. Moore it is something more than rare birds, eggs, nests, butterflies and antiques from Michigan, North America, and other parts of the world. It is her father's work and her work.

Housed in Closed Room.

If one were to visit Mrs. Moore today, at her quiet home in Plymouth, they would find a woman of exceptional physical and mental ability although she is 61 years old. She always greets her visitors with a smile, and then after a formal word or two, conducts them to a room which is used aside from the rest of the house. And here she imparts to them the history of her father's hobby which in later years gives the world rarities which can no longer be found.

Mr. Purdy was a Michigan pioneer with a love for nature and the outdoors. During the first part of his life he acquired a hobby for studying nature and later this avocation turned to the conservation of birds and small game in Michigan. But all his work seemed to no avail and with the realization that many birds were becoming extinct in spite of work to prevent their slaughter he planned a collection of mounted birds which would bear witness that some birds, now passed from Michigan wild life, once inhabited the state.

In later years this work extended to many parts of North America and remote corners of the world. Added to that was a desire to collect other rarities of the past. Realization of this hobby has left the world much richer through giving to the present things which would otherwise have been lost in the past.

The first unit of the Purdy rarities contains a Passenger pigeon which has become extinct along with the Labrador duck, Carolina Parakeet, the Eskimo Curlew and the Heath Hen. With the Passenger pigeon is a Whooping crane, a great white plumaged North American wading bird, of which very few individuals are now found; a Trumpeter swan, one of the largest swimming birds; an Ivory-billed woodpecker, the largest and handsomest of the woodpeckers, standing 20 inches high with a massive crown of red; and a Golden Plover of the south which are becoming exceedingly rare along with the California Condor, the Flamingo of Florida and the West Indies, the Hudsonian Godwit, the Buff-breasted Sandpiper, and the Upland Plover.

Many Curious Specimens

After concentrating on Michigan and North American birds for many years Mr. Purdy extended his operations to other parts of the world. The result was many curious and interesting specimens.

Mounted on a glass protected twig, a Bird of Paradise, the bird mentioned in the Bible, is to be seen. During the past few years it has become very rare because of the beauty of its plumage which blends in beautiful color harmony and for which it is rapidly giving up its life to bird collectors. With the bird of Bible history is the Australian

ian Bell bird which possesses a fluted horn placed vertically on the upper bill. Through this the Australian bird makes a sound which resembles the tinkle of a tiny bell.

The Wingless bird of the Polynesian Islands and the Kiwi are also included in the collection. The Polynesian bird is a rare sight but the Kiwi is one of the strangest birds ever observed. It is a native of New Zealand and resembles an overgrown woodcock. Wingless, it cannot fly and it is not possessed of feathers, but is covered with fur. However, it is compensated for a lack of wings by being fleet of foot, the feet being used also for protection. The bird is becoming rare in its native haunts and very few can be found in the United States.

Included with the birds is a collection of over 3,000 birds' eggs. In collecting these, as in collecting the birds, Mr. Purdy encountered many difficulties. In Michigan, as in other parts of the United States, it is unlawful to have protected dead birds or birds eggs in personal possession. Therefore, it was necessary for Mr. Purdy to obtain permits for possessing birds which he considered would become extinct within the next few years. Among these birds are the bluebird, the cardinal, the scarlet tanager, and the bald eagle. The egg collection contains eggs from nearly all of the Michigan birds.

Combined with his other activities Mr. Purdy collected butterflies and moths, and at his death his collection was considered one of the finest in Michigan. Untiring effort had given him some very rare specimens of the dipterous insects from many parts of the world.

Includes Freaks of Nature.

Freaks of nature were also included in this wonderful collection. One glass case contains an albino meadow mouse, an albino squirrel, an albino hawk and an albino broadwing sparrow. These strange offsprings of nature are very rare and have been preserved for many years.

As a side issue of his natural science work, Mr. Purdy built up a fine collection of antiques of early American history. The prize items include several revolvers and pistols of ancient vintage. One in particular, a double-barreled pistol, dates back to the beginning of our national history. Crockery and a spinning wheel also had their beginning in revolutionary days.

All of this, although but the product of a hobby, is being sought after for scientific purposes. Last year it was used extensively by the science department of the Michigan State Normal college for observation work with a later offer to buy parts of the collection. The University wishes to buy the collection outright but has been refused several times.

"I do not need the money," Mrs. Moore said. "The work is life to me. It is also my hobby. Sometime I may sell it, but not now."

Mrs. Moore told of her share in the work very briefly. It was through her father's teaching that she became interested in the work. "The fields were our laboratory," she said. "We would spend hours in the fields and woods watching for a new specimen or observing a bird's nest in the progress of being built."

The collection is becoming known far and wide and friends and sympathizers in the cause are sending in many new specimen additions to the already large collection.

Thus far Mrs. Moore has succeeded in not yielding to a persistent purchaser and daily the collection is becoming more valuable to the field of science.

In the meantime scientists who are eager to possess the collection must bide their time and wait.

Maybe the brides of 1929 wouldn't hold their noses so high if they would take a second look at the brides of 1919.

Facts About Furs

The most durable fur is that of the otter, with bear, beaver and seal coming next in order. Natural mink is more durable than Persian lamb, and sable less lasting than either. Coney is the least durable of any fur, and the skin of the mole comes next in lack of lasting power.

Real Opportunity For Plymouth Women

(Continued from page one)

The Sears-Roebuck Agricultural Foundation, seeks to acquaint more housewives with the economy and healthfulness of home canned foods. For years the U. S. department of agriculture and home demonstration agents throughout the country have worked for increased production of native canned foods. It is to further this excellent idea and at the same time to help absorb the threatened surplus of farm products in many sections, that this canning project was conceived.

Two hundred and twenty-two cash prizes, totalling \$5,825, will be disbursed to the winners in the contest, which has three major divisions: fruit, vegetables and meat. The best entry in each division will be awarded \$250, and one of these will also receive the thousand dollar sweepstakes prize, thus bringing the total cash prize for the best jar of canned food in the contest to \$1,250. Second prize in each of the three divisions will be \$200, third prize \$100, and fourth prize, \$50. There will also be five prizes of \$25 each, ten prizes of \$10 each and fifty prizes of \$5 each. In addition, a thousand dollars in cash will be awarded to the home demonstration agent whose county sends in the greatest number of entries, \$500 to the agent whose county has the next largest number, and \$100 to the agent whose county sends in the third largest number of entries. A number of lesser merchandise prizes are also offered.

Contest Closes October 1

According to the rules, the contest is open to every woman and girl in the United States. There are no restrictions as to the nature of the food sent; any fruit, vegetable or meat whether home grown or purchased, is acceptable. Contestants may enter one, two or all three divisions. Entries, regardless of when canned, must not be sent in prior to August 15 nor later than October 1, which is the closing date of the contest. No entries will be returned, but instead these will be sent, with the name and address of the contestant, to an orphanage, hospital, infirmary or other charitable institution to be selected by the Foundation.

Specimens of canned fruits and vegetables in the contest will be judged on the basis of clearness, color, neatness, flavor and texture. Each specimen will be judged in their relation to pack, neatness, texture and flavor. There will be three judges, to be selected by the Foundation from a list of outstanding authorities on home economics, domestic science, and canned food. Their decision will be made known just as soon as possible after October 1.

Gives Hints on Canning.

"Any method of canning may be used for this contest," announces Anne Williams, director of the contest. "The use of a steam pressure cooker, however, is highly recommended by canning experts and by the U. S. Department of Agriculture, especially in canning meats. Not only does this method of canning save time and fuel and assure absolute sterility and preservation, but canned under pressure retains all its natural flavor and texture, which are vital points in any canning contest."

That the judging may be thoroughly impartial and the display of canned samples absolutely uniform, contestants are required to submit their entries in standard glass jars of the quart size. All contestants will be furnished with one Ball mason jar and carton for sending in a canned article, but those making entries in more than one division are expected to supply their own jars and shipping cartons. The sample jar and prize entry labels for use in submitting entries may be secured without cost by communicating with the headquarters of the National Canning Contest, 925 S. Homan Ave., Chicago, Illinois.

ASSUMES MANAGERSHIP

Ephriam Partridge has taken over the management of the local branch office of the Greene's dry cleaning business here. Mr. Partridge is well and favorably known in Plymouth, and his many friends will be pleased to see him in his new location.

Popular With Biographers

There are said to have been published over 1,500 books about Lincoln, Lincoln, Christ and Napoleon have been the subject of probably the greatest number of books written in the field of biography.

Farmers Day Draws Record Attendance

THOUSANDS GATHER AT STATE COLLEGE TO HEAR LATEST AGRICULTURAL NEWS.

Out harvest failed to keep 6,500 Michigan farm folks away from Michigan State College Farmers Day and an attendance record for recent years was set.

The visitors gathered at all the demonstrations, and competition for places at the horse breaking demonstration carried the crowd to the tops of all neighboring buildings. H. F. Moxley animal husbandry specialist, showed that it is possible to take an unruly horse and break it to harness and to drive in a team in one day. The exhibition is not as spectacular as is expected by an audience because the system employed is to have complete control of the horse every minute.

President R. S. Shaw welcomed the afternoon audience and spoke of the work necessary to make the few dairy barn an accomplished fact.

A. J. Glover, editor of Hogard's dairymen said the cooperative marketing is one means of increasing dairy profits and cited the Michigan Milk Producers Association as an organization which has assisted its members in obtaining a higher price for their fluid milk than they would have been able to obtain without it.

The new dairy barn, built and equip-

WATERFORD

Mrs. Edith Peck and Wilber Ebersole spent Sunday with the former's uncle and aunt, Mr. and Mrs. George Hull at Goodrich.

Mr. and Mrs. Ernest Layaz attended the motorcycle race at Livonia, Sunday afternoon.

John Joslin of Detroit, spent a few days this week with his aunt, Mrs. Edmond Watson.

Mrs. Ada Watson and Miss Marjorie Peck, have finished the summer school term at Ypsilanti Normal.

Mary Gotts spent last week with her cousin at Ypsilanti.

Robert Gotts is spending this week with Claud Gotts, near Ypsilanti.

Mr. and Mrs. Arthur Johnson and son, Orlin of Ypsilanti, visited their parents, Mr. and Mrs. W. H. McKeerghan, Friday.

Miss Edith Peck was honored with a birthday dinner on Sunday, July 28. Guests from Ortonville and Washington were among those present. The table decorations were in lavender.

Mrs. Arthur Gotts and mother, Mrs. Robert Bechtel, visited friends in Belleville, Saturday.

Elizabeth Matthews spent the weekend with her aunt, Mrs. Harvey Van Valkenburg, in Northville.

ped at a cost of \$100,000, was thrown open for inspection. This new building will provide fine quarters for the breeding and experimental work with the State College dairy herd.

ANXIOUS TO FIND OUT

What Our Customers Think of Our New Kind of Ice Cream

In last week's edition of this paper, we told our customers of the new kind of ICE CREAM which we have been manufacturing since

July 15th, 1929

and we invited everybody to try it at our expense. Many of our patrons tried it and said it was very delicious. We are trying hard to please everybody in every way. Quality and price cannot be duplicated at this time.

Of course, many of our customers have not tried it yet, and as we would like to have everybody test this high grade ICE CREAM, we will give this FREE OFFER for THIS WEEK ONLY, up to

August 11th, 1929

a very generous portion of any flavor ice cream you wish will be served at our soda counter, FREE OF CHARGE.

Cut out the coupon in this ad, print your name and address on it, and bring it to our store and enjoy a very delicious dish of high grade ICE CREAM at our own cost.

PALACE OF SWEETS PLYMOUTH, MICH.

Gentlemen:—

I cannot let this opportunity go by, without trying your new kind of ICE CREAM and telling you whether or not I like it. I am willing to help you in every way, so that you can satisfy more of your customers.

INTERESTING FACTS ON FUTURE OF AVIATION

By R. U. McINTOSH

It is amusing to hear people discuss their ideas as to the future of aviation. I will try to make known to you in this article some ideas that many people have about the future of aviation.

I remember one party telling me that he thought within ten years the air would be as thick with airplanes and as congested as the streets are with automobiles. Also that the airplanes will be so perfected that the pilot could ascend and descend straight up and straight down and would be able to come down in the back yard and put their airplane in a garage similar to the automobile.

The young man who was selected as Mr. Edison's successor made a statement as to his ideas of aviation in the future. He stated that he thought that the larger part of travel would be by air transportation and the automobile would be used only for short trips and the automobile would be run by electricity entirely.

Some people have a better imagination than others. A few years ago if these people would make known their imagination as they do so freely today, they would be the laughing stock of the community. Today their ideas about the future seem to be absorbed with interest and many of the people nod their approval.

I have a fair imagination myself and delight talking with many of our visitors about the outcome and future of air transportation. Living beside this business as I have been doing for the past number of years gives me a pretty good idea of what will take place in the future. It would be necessary to take a great deal of the space of this paper if I was to make known what I think will take place within fifteen years. It is not so much imagination but I make my statements on what I see today. I have operated an airplane line many years ago and I suffered for lack of business. Today that same airline is worth a substantial amount of money. I was criticized severely by my closest friends for starting such a proposition. Capital was very hard to secure and it was necessary for me to finance this project almost by myself. Operating an airline burning twelve to eighteen gallons of gasoline per hour per ship, costing twenty-five cents per air mile

to operate each one was a constant drain on my operating capital. I knew that air transportation was coming. I thought that I would be a pioneer in the business and that I would be well compensated for my efforts. After several crack-ups I was forced to sell the airline at a tremendous loss. Today that airline is operating and is considered to be worth three quarters of a million dollars. My loss I consider a profit. Usually if a man profits by his losses the experience is worth a lot to him. There are two experiences in my life that I consider valuable and that have helped me understand this aviation business. One was the army, during the war, and the airline.

I forgot to mention in the above paragraph that the young man selected by Edison is going to the Massachusetts Institute of Technology. This young man was selected by a number of judges, believes so much in the future of aviation that he intends to follow it up and no doubt he will help to bring about new developments in aircraft that will be another step for safety.

Why don't you, who have read many of these articles, make up your mind to take a flight in an airplane, in other words (as we say in our business) "get the feel of an airplane." I would enjoy conversing with you about a trip by air that would be inexpensive, instructive and safe. It seems like yesterday that if a person contemplated a flight in an airplane they were looked upon as a hero and that they were flirting with danger. Today an airplane flight is just an incidental happening of the day. You would be surprised as to the number of people who have been up in an airplane. Try some day asking your friends—it may surprise you to find out the number who have taken a flight.

Just a word about our ship. I will say that we are making excellent headway. We hope to start the main spars of our wing the early part of next week. The forty-two ribs are about completed. We will be ready to start the hull when the factory is completed. The spars of the wing are fifty-seven feet long. Step this off in your front yard and you will have some idea of the size.

NEWBURG

The Newburg School homecoming will be held on the school grounds, the last Saturday in August. Mrs. Lydia Joy McNabb has charge of the program.

Mr. and Mrs. Vern Mackinder and family of Grand Rapids, spent the week-end at the parental home, after a visit with relatives in Georgia, a trip to the Mammoth Cave of Kentucky, and other points of interest. Harold and Dorothy are spending the week with their grandparents.

Rev. and Mrs. J. Cowan and two sons of Cincinnati and Mrs. Emerson Woods of Plymouth, called on Mrs. Emma Ryder and Mr. and Mrs. I. Gimsolly last Friday afternoon.

Mrs. Ira Carney spent the week-end at Port Huron, her sister and husband, Mr. and Mrs. Caroline and little daughter returning with her.

Mrs. Henry Grimm, Sr., is spending a few days in Jackson, visiting friends. Mr. and Mrs. Glenn Harwich and family of Samaria, Mich., spent the week-end with Mr. and Mrs. Frank at the parsonage.

Rev. Carl Critchett of Nebraska, and E. J. Teskey of Kalamazoo, visited at the Youngs home the latter part of the week.

Miss Martha Britten of West Palm Beach, is the guest of her cousin, Mrs. Emma Ryder.

Jack Horton, accompanied by his father and mother and brother and family of Detroit, motored to Potoski, Harbor Springs and Mackinac last week, returning Sunday night.

A neat little surprise was given Rustling Cutler Tuesday evening, at the home of his parents by the young people of the neighborhood, the occasion being his birthday. Charlotte and Charles Leonard of Lake Orion, were with them. Needless to say, they all spent a delightful evening.

Miss Joy McNabb and roommate, Miss Josephine Fisher of Detroit, were luncheon guests of Miss Dorothy Lombard of Plymouth, Wednesday.

Mrs. N. Ryder and Mrs. Earl Ryder of Plymouth, called on Mrs. Emma Ryder last Thursday.

ROSEDALE GARDENS

Mr. and Mrs. Ed. Reindel and son, Jack, spent the week-end at Mr. Reindel's mother's home on Lake St. Clair.

Rev. Knowles of Northville, will be the speaker through the month of August. Everyone is invited out to church.

Mrs. Fred Wehner is filling Mrs. Hamill's place at the piano for Sunday morning services. Her music is enjoyed by all.

Mrs. M. P. Gardner and son, spent the week-end with her mother in Detroit.

WHITBECK'S CORNERS

Mr. and Mrs. Fred Schille celebrated their golden wedding anniversary on Wednesday, July 31. Dinner was served at six-thirty and all sat down to a well filled table which fairly groaned with good things. There were guests from Detroit, Ann Arbor, Garden City and also friends from Plymouth. They received many pretty and useful gifts, among them being several gold pieces.

Mrs. A. Parrish spent Sunday at the home of her daughter, Mrs. Otto Kaiser and family, on Golden road. George Miller has been feeling quite poorly for a few days.

Mr. and Mrs. Clarence Hix were callers at the home of Mr. and Mrs. Otto Kaiser, Sunday, the former who is suffering with a carbuncle on the back of his neck.

Mr. and Mrs. Otto Roe are spending their vacation with friends and relatives at Sault Ste. Marie.

C. A. Parrish of Ypsilanti, called on his mother the first of the week.

If you fail to see the Canton and Nethem ball game Sunday, August 11 at three o'clock, you will miss something good.

PROBATE NOTICE

No. 151890
STATE OF MICHIGAN, County of Wayne, ss.

At a session of the Probate Court for said County of Wayne, held at the Probate Court Room in the City of Detroit, on the twenty-second day of July in the year one thousand nine hundred and twenty-nine.

Present, ERVIN R. PALMER, Judge of Probate.

In the Matter of the Estate of HARRIET EMMA HARTSOUGH, deceased.

On reading and filing the petition of Palmer Hartsough praying that administration with the will annexed of said estate be granted to the Plymouth United Savings Bank, or some suitable person.

It is ordered, That the twenty-first day of August, next at ten o'clock in the forenoon at said Court Room be appointed for hearing said petition.

And it is further Ordered, That a copy of this order be published three successive weeks previous to said time of hearing, in the Plymouth Mail, a newspaper printed and circulating in said County of Wayne.

(A true copy) ERVIN R. PALMER, Judge of Probate
Theodore J. Brown, Deputy Probate Register.

COMMISSIONER'S NOTICE

In the Matter of the Estate of LYNN E. BRONSON, deceased.

We, the undersigned, having been appointed by the Probate Court for the County of Wayne, State of Michigan, Commissioners to receive, examine and adjust all claims and demands of all persons against said deceased, do hereby give notice that we will meet at Gayle's Store in the Village of Plymouth, in said County, on Wednesday the 7th day of August, A. D. 1929, and on Monday the 7th day of October, A. D. 1929, at 2 o'clock P. M. of each of said days, for the purpose of receiving and allowing said claims, and that four months from the 7th day of June A. D. 1929, were allowed by said Court for creditors to present their claims to us for allowance and payment.

Dated June 7th, 1929.
ERNEST N. PASSAGE,
ALBERT
Commissioners.

OFFICIAL PROCEEDINGS OF THE VILLAGE COMMISSION

Plymouth, Michigan
July 15, 1929

A regular meeting of the Village Commission held in the Commission Chamber at the Village Hall, July 15, 1929, at 7:00 P. M.

Present: President Robinson; Commissioners Kehrl, Shear, and Woodman.

Absent: Commissioner Nutting.

The minutes of the regular meeting held July first were read and approved.

A petition was presented signed by residents in the vicinity of the intersection of So. Harvey and Beech Sts. requesting the installation of a street light at the said intersection. It was moved by Comm. Wiedman supported by Comm. Kehrl that the petition be granted and the light ordered installed. Carried.

A petition was presented signed by residents in the vicinity of So. Harvey St. south of Brush St. requesting that sidewalks be ordered installed upon both sides of So. Harvey St. from Brush St. southward to connect with existing walks, and upon the south side of Brush St. from So. Harvey St. to Forest Ave.; further, that crosswalks be ordered installed across So. Harvey St. on the south side of Brush St. and across Beech St. on the west side of So. Harvey St. The Manager recommended that the sidewalk be ordered installed at present upon the west side of So. Harvey St. from Brush St. southward to connect with the existing walk, and upon the south side of Brush St. from So. Harvey St. to Forest Ave.; further, that a crosswalk be ordered installed across So. Harvey St. on the south side of Brush St.; and that the installation of the other sidewalks and crosswalks be left for future decision of the Commission. It was moved by Comm. Wiedman supported by Comm. Shear that the recommendation of the Manager be approved and that the sidewalks and crosswalks as recommended be ordered installed. Carried.

A petition was presented signed by owners of property in the vicinity of York and E. Liberty Streets requesting that a sidewalk be ordered installed upon the west side of York St. from the corner of Liberty St. northward to connect with an existing sidewalk. Upon motion by Comm. Shear supported by Comm. Kehrl the petition was approved and the sidewalk ordered installed.

Verbal petition was made by a number of taxpayers interested in horse-draw pitching that the Commission make provision for the location of six horse-draw courts, centrally located, to be available to all who may be interested in the sport. The petitioners offered to do the work of constructing the courts. Upon motion by Comm. Kehrl supported by Comm. Wiedman the petition was approved, and the Manager was directed to arrange for the construction of the requested horse-draw courts.

The Manager presented for the consideration of the Commission a tabulation of rates of compensation for Village employees from forty Villages and small Cities in Michigan, which information he was requested to compile by the Commission. Upon motion by Comm. Shear supported by Comm. Wiedman consideration of the tabulated figures was deferred until some future meeting of the Commission. Carried.

The attention of the Commission was called to the necessity for the Village laying approximately 500 feet of 36-inch sewer pipe in Park Drive from near Mill St. to connect with the 36-inch sewer recently laid across Plymouth, Riverside Park by the Wayne County Park Board. It was recommended by the Manager that 150 feet of the sewer be ordered installed at this time, the balance to be authorized when funds are available. Upon motion by Comm. Shear supported by Comm. Kehrl recommendation of the Manager was approved and the sewer as recommended ordered installed.

The following bills were approved by the Auditing Committee:

Blank & Smith	\$ 38.76
Comer Hardware	23.90
Detroit Edison Co.	1,322.14

Fire Payroll	120.85

Total \$5,036.25

The following checks written since the last meeting were also approved:

Administration Payroll	\$459.58
Police Payroll	327.20
Cemetery Payroll	189.05

Upon motion by Comm. Kehrl supported by Comm. Wiedman bills and checks were passed as approved by the Auditing Committee.

A plan was submitted by Herald F. Hamill, Engineer, covering the proposed extension of Forest Ave. northward from Wing St. to Ann Arbor St., thence northerly and westerly to intersect So. Harvey St. It was moved by Comm. Shear supported by Comm. Kehrl that the plan as submitted be accepted and approved and that it be ordered placed on file in the office of the Village Clerk. Carried.

Upon motion by Comm. Wiedman supported by Comm. Kehrl the Commission adjourned.

G. H. ROBINSON,
President.

A. J. KOENIG,
Clerk

Had No Case Against Burr

When Aaron Burr, at one time Vice President of the United States, was tried for treason, John Marshall presided at the trial, which ended abruptly as the chief justice declared that an overt act of treason must be first proved and then Burr connected with it. The government was not even able to convict Burr of a misdemeanor.

SALEM

Mr. and Mrs. B. E. Shamba of town, and Mrs. and Mrs. K. B. McKnight of Walled Lake, left Sunday for a motor trip visiting different places of interest in northern Michigan.

Mrs. John Dyer and two children of Ann Arbor, were Wednesday dinner guests at the G. Foreman home, and were callers of Mrs. Laura Smith.

Mrs. W. J. Emery and Margaret of South Lyon, and Mr. and Mrs. Frank Buers and Mr. and Mrs. G. C. Foreman and Shirley, spent Friday at Port Huron.

Sunday dinner guests of Mr. and Mrs. G. C. Foreman were Harry Rooke and friend and Miss Dorothy Foreman of Detroit, and Mr. and Mrs. M. Renwick and son of South Lyon.

Mr. and Mrs. Boardley, formerly of Salem, but now residing at Redford, are spending some time at their cottage at Orr Lake, and have invited the Federated church people to visit them there Sunday, and a pot-luck dinner will be served.

A. Dittlock of South Lyon, was a Sunday guest at the G. Lyke home.

Miss Ruth Foreman of Detroit, and Mr. and Mrs. James Dickie and W. Miller of South Lyon, spent the week-end at the Heart Lake Country Club.

Mr. and Mrs. G. Lyke and family attended the Lyke family reunion at Ypsilanti, Saturday, and the Murray family reunion at F. Fishbeck's, Sunday.

A full account of the Salem-Novi baseball game will be found on the sport section.

Everybody going where? To the ball game Sunday, August 11, at 3 o'clock. Canton vs. Nethem, at Newburg.

FRUIT AND OTHER NICE SUNDAES AT HOME

Ice Cream Makes Fine Foundation for Sundaes.

(Prepared by the United States Department of Agriculture.)

The children enjoy pretending they are having something at home that has first been sampled elsewhere. The idea of a "sundae" at home suggests all the joys of the soda fountain with none of the distraction of nearby trays of candy and chewing gum.

French vanilla or custard ice cream is particularly good as a foundation for any sort of fruit "sundae," with sweetened crushed fresh fruit served over it, such as strawberries, raspberries or fresh peaches, according to the season. Chocolate or butterscotch sauce, maple syrup or honey may also be used with french vanilla ice cream or sundaes. This is a good ice cream, too, to serve with pies "a la mode," which means simply pie with a dip of vanilla ice cream on top. It can be used with sponge cake to make an

"ice cream sandwich." The eggs in a custard ice cream are excellent for the children, supplementing the other nutritious ingredients of the ice cream by adding to the day's supply of vitamins and minerals.

The bureau of home economics gives the following directions for making it:

French Vanilla Ice Cream.
1 quart milk ¼ cup sugar
¼ pint double cream ¼ tsp. salt
4 eggs 1½ tsp. vanilla

Prepare as for custard by pouring some of the heated milk into the lightly beaten eggs and then cooking the milk and eggs with the sugar and salt in a double boiler until the custard coats the spoon. Cool, add the double cream, mix well and freeze.

For the freezing mixture use one part of salt to 4 to 6 parts of ice. Turn the crank slowly during freezing.

Cooling Summer Menus
 —frozen salads and desserts, refreshing iced drinks, are easily prepared with
AUTOMATIC ELECTRIC REFRIGERATION
 Electric refrigeration does more than prevent food spoilage and safeguard health. It enables you to prepare a new variety of menus to tempt summer palates: frozen desserts, frozen salads, chilled whips and beverages, parfaits, mousses, sherbets. You have your choice of dozens of new recipes, all delicious and easy to make;—and especially convenient for summer use, a constant supply of sparkling ice cubes. With the aid of an electric refrigerator, entertaining becomes a simple matter.

INDIAN \$250 Installed The Indian has a capacity of seven cubic feet—twelve square feet of shelf space for food storage—and supplies six trays of ice cubes (more than 10 pounds of ice).	GENERAL ELECTRIC \$221 and up Installed Requires no oiling because of a self-oiling system in an hermetically sealed chamber.	KELVINATOR \$175 and up Installed Kelvinators may be obtained in beautiful pastel shades as well as in white.

ERRORS SPELL DISASTER FOR FARMERS

Errors played a prominent part in determining the winner of Sunday's encounter at Pine Lake...

Although the Farmers made four errors, each resulting in runs, they should not be censured for them...

Hartner, hurling for De-Ho-Co. and Lloyd for Olds, were both trotted in a like manner...

Anderson, for De-Ho-Co. with a triple, double and single, and Harton for Olds, with three doubles...

Table with columns: DE-HO-CO, AB, H, R, E, F. Lists player stats for Destefano, Demiston, Spencer, Jaska, Giles, Anderson, Trombley, Doherty, Hartner, German.

*Batted for Doherty in the seventh.

Table with columns: PINE LAKE, AB, H, R, E, F. Lists player stats for Mahoney, Aten, Strumble, Harton, Martin, Sloght, Plank, Hiberling, Lloyd.

HEAVY HITTING BEATS AMATEURS 12 TO 9

In the first game of the series with Novi, Salem was defeated at Novi by a score of 12 to 9 last Sunday.

The game was featured by heavy hitting on both sides. Novi's hits just seemed to be out of the reach of the young amateurs...

Salem staged a rally in the sixth inning that looked as if they would take the lead and keep it. After they had scored four runs and none out with the bases full...

Foster, starting his first game for Salem was touched for ten runs and sixteen hits in the four innings he was on the mound.

"Dutch" Atchison relieved Foster in the fifth and pitched good baseball only allowing two runs and five scattered hits.

Rebitzke collected four hits and was hit by a pitched ball in four trips to the plate...

De-Ho-Co 11 5 0 0 1 0 0-8 Oldsmobile 10 10 1 4 0 2 2-9

Sacrifice Hits—Demiston, Jaska. Two base hits—Destefano, Anderson, Trombley, Struble, Harton (3).

Three base hits—Anderson. Home runs—Aten. Hits off Hartner, 12 in 8 innings; off Lloyd, 15 in 9 innings.

Struck out by Hartner, 5; by Lloyd, 7.

Stolen Bases—Giles, Anderson. Base on balls off Hartner, 4; off Lloyd, 2.

Double plays—Giles to Destefano to Demiston.

Umpire—Green. Scorer—Long.

fielder, drove a home run over the centerfield fence in the second inning that accounted for three runs.

After playing away from home for the last two weeks, Salem will be back at Heaney's Field next Sunday August 11th.

The Northern Michigan Athletic Club of Detroit will be their opponents. This is the second game of the series with them.

Salem having lost the first 9 to 4. At 2:30 o'clock the game will start and it will be a very interesting game to see.

Table with columns: SALEM, AB, H, R, E, F. Lists player stats for Simmons, Atchison, Smith, G. Simmons, Rebitzke, Herrick, Sockow, Brady, Foster, Lyke.

Table with columns: NOVI, AB, H, R, E, F. Lists player stats for Baity, Martin, Staman, Rogers, Leavenworth, Davidson, Dasher, Ashby, Gow.

Salem 0 10 4 0 4 0 0-9 Novi 3 3 0 4 0 0 2-12

Two-base hits—Rebitzke 3, Sockow, Baity, Rogers, Dasher. Three-base hits—Sockow, Rogers. Home run—Leavenworth. Left on bases—Novi 6, Salem 8.

Bases on balls—Novi 6, Salem 8. Struck out—By Foster 1, Rogers 4, Struck out—By Rogers 5, Foster 2, Atchison 3. Hits off Foster 10 in 4 innings, Atchison 5 in 5 innings, Rogers 14 in 9 innings.

Hit by pitched ball—Rogers; L. Simmons, Rebitzke. Losing pitcher—Foster. Umpire—Hamilton. Time 1:50.

ST. FRANCIS HOME DEFEATS NETHEM

A very interesting and close game of baseball was played on the Nethem ground at Newburg, last Sunday against the working boys of St. Francis Home. The score was tied up until the ninth inning when the St. Francis boys took the lead making the final score 2-3.

Next Sunday Nethem will play Canton Center team on the Nethem diamond at 3:00 o'clock. This will be a good game as each are local teams and a good scrap is assured.

De-Ho-Co To Play Buick Majors Sunday

Next Sunday, August 11, the De-Ho-Co-ites will engage the Buick Motor Co. of Flint, in an encounter at De-Ho-Co Park. The name Buick Motor Co. automatically insures a rapid fire game. Don't miss it.

The Plymouth Merchants trimmed the West Point team last Sunday by a score of 9 to 4. It was the local team's game all the way and had the West Pointers guessing all the time.

Table with columns: PLYMOUTH, AB, H, R, E, F. Lists player stats for Kraich, Millross, Dufoni, Strimpson, Millman, Quinn, Goss, Ward, Smith.

Table with columns: Team, PLYMOUTH, WEST POINT. Lists totals for AB, H, R, E, F.

CANTON WINS FROM ECONOMY BALER NINE

The Canton Center baseball team played havoc with the Economy Baler team from Ann Arbor, last Sunday by winning with a score of 7 to 5.

Next Sunday, August 11, the Canton Center team will meet the Nethem team on the Nethem diamond at Newburg and Plymouth roads. This promises to be a very interesting game as both teams are composed of local talent.

VETERAN SPORT WRITER DIES.

Otto Floto, 66, sports editor of the Denver Post, and nationally known sports writer, died at a hospital in Denver August 4th after a long illness.

"Fio" and "Bit" Floto is a colloquial name in the United States for a five-penny piece it has practically passed out of usage. Bit is also a colloquial Americanism for 12 1/2 cents. Usually it occurs in the expression "two bits" for 25 cents and "four bits" for 50 cents.

Hindoo Vaccination There are authentic records to show that the Hindoos creped a thread in the pustule of a cow and preserved it until smallpox appeared in the community; then a needle was threaded with this same thread and passed under the skin of the upper portion of the arm.

Won Fame in America April 21, 1831, was the birthday of John Muir, who was one of the famous American naturalists, despite the fact that he was born in Scotland. He lived for many years in the Yosemite valley, and wrote extensively of the geological and botanical features of the Sierra Nevada.

All the Advantages You may be driving a pay-by-the-month car but you can make a pedestrian jump just as far as though you had paid cash for it.—American Magazine.

19-Year Engagement Is Too Long for Girl Carlisle, England.—Miss Isabella Starkie thinks that nine teen years of engagement to the same man without marriage is too long. She took her thoughts to court and has just collected \$1,750 for breach of promise.

She told the court she became engaged to Jacob Gialster, contractor, when she was twenty two. Now she is forty-one, and for the last seven years the furniture for their proposed home had been bought and in storage. She said her fiance often came to her home and just sat and read.

Virtue and Vice

Dr. Will Durant says, "Every vice was once a virtue and may become respectable again, just as hatred becomes respectable in wartime." How true is that? A mental search for examples should give you an interesting half hour. And if you examine your own "virtues" and "vices" in this light, as closely as you can, you may find it profitable. The border cases, those habits which seem to be neither vices nor virtues, or to be both, are especially interesting.—New Orleans Item-Tribune.

One Thing Man Can't Make

Doctors in a Nova Scotia city removed the heart from a cat. In its place they put a rubber heart, electrically operated. The artificial heart kept up the blood circulation for several hours, during which time the cat remained alive. Of course, the doctors could make a rubber heart work for a time. But a natural heart, of cat or man, is an engine that human genius can never duplicate or approximate.—Capper's Weekly.

Peep at Valencia

The city of Valencia is on that wonderful bit of Spanish Mediterranean coast where the climate is so much more certain than that of the Italian Riviera or the French Cote d'Azur. It is curious that so many places in this district should be associated with "desert." Valencia and Malaga raisins, Denia oranges, Barcelona nuts—they are all familiar to us. And Tarragona supplies a wine which does duty on many a British dinner table for port.

Going Too Far

The strings have been taken out of ring beans and the warts have been decimated off pickles and now Professor Johnson of the Illinois College of Agriculture threatens us with an odorless onion.—Farm and Fireside.

House of the Future, as Architect Sees It

The house of the future may be seen as a building designed without windows except perhaps a few small ones for the purpose of observing the visitor at the door or determining the state of the weather.

The large wall space will be utilized by the architect as a means of expressing a new type of architectural beauty. Within, we shall have all the comforts we now possess plus others undreamed of.

There will be illumination containing a healthful percentage of ultraviolet light, and there will be a ventilating system supplying fresh, warmed, or cooled air to all parts of the home. Quiet will prevail, no matter how noisy the street may be.

The smoky atmosphere of our cities does immense damage to textiles, furniture and all the trimmings and trappings of the home. The air circulated by the ventilating system can just as easily and readily be made free from dust and corrosion and properly humidified at the same time. The home will become free of the accidental variations of the weather.—Albert Parsons Sachs.

Book Collection Shows

Printer's Art at Best

Among the countless millions of books on the shelves of the library at the British museum, are about 200 volumes considered the acme of the printer's art. They form an exhibition of books illustrating the most beautiful and expensive British and foreign printing during the last ten years. Centuries-old Chinese manuscripts and illuminated books from the monasteries of medieval Europe are exhibited in the same room as these masterpieces of post-war printing which attracted the attention of printers whose names are famous among book collectors in the two hemispheres. Books from the leading presses of England, Scotland, the United States, France, Germany, Holland, Spain, Italy, Poland and Belgium are included in the collection. They have all been printed within the last ten years, and experts are unanimous that the art of the printer has greatly improved since the opening of the Twentieth century.

In the Same Boat

Two friends met one day and began to discuss the various events which had taken place in their lives since last they met—a year ago.

"I've not done anything much at my job," said one. "I took a job as groom, and I've not had a minute's peace since!—on the go, day and night, and ordered about—"

"That's just how I've been treated!" broke in the other.

"You!" said the first, surprised. "How can you be putting up with my sort of life?—you never took on as a groom!"

"I did," said the other, gloomily. "I took on as a bridegroom!"

Freak of Striking Clock

The bell on the house of parliament in London may be heard for a distance of four miles and within that radius there are points where it is possible to hear the clock strike 22, through the combined utilization of the wireless and the sound waves. This is at eleven o'clock each day when the time signals are sent out from Daventry. There is an interval of 4 1/2 seconds between the strikes and at a distance of four miles, five or six strokes are heard by wireless before the first of the sound waves and then five or six afterwards so that under these conditions it is possible to hear the bell, "Big Ben," give off 22 strokes.

Mysterious Crows

Crows which talk have been found near Weesen in Natal. Their remarks are libelous. They say to the natives of the district: "There will be no rain; you have killed your chief." They have started a first class scandal about the death of Muzelwayo, once chief of the Mennu, who died of dropsy. The natives are flocking from all the surrounding districts to hear them. The key to the mystery, suggests a Natal paper, is the fact that the crows only speak when a certain head boy is present. There is nothing to prove that they have been corrupted by a Maritzburg parrot.

Bokhara Tea Drinkers

The manner of drinking tea varies from country to country. In Bokhara every man carries a small bag of tea about with him and, when assailed by thirst, hunts up the nearest tea booth and has the boothkeeper brew a pot of tea. The Bokhara breakfast beverage is Schirrecha—tea in which bread is soaked and which is flavored with milk, cream or mutton fat. During the day the drinker takes tea with cakes of flour and mutton suet. After drinking he eats the tea leaves, which are considered a great delicacy.

Cruel

Johnson never dared ask anyone to his home. His wife was unpopular with visitors.

"Aren't you going to ask your friend Tompkins and his fiancée to our home?" she asked one evening.

"Not much!" replied the husband, who preferred to entertain his friends at restaurants.

"You dislike him, don't you?" was Mrs. Johnson's next query.

"A little," answered the husband, "but not enough for that."

Synonymous Terms

The terms insurance and assurance (used in connection with insurance) are practically synonymous. Assurance is the word generally used in Great Britain for life insurance companies.

The honeymoon is still on if she laughs out loud when he turns over a catsup bottle on the new tablecloth.

GAS HEATING INCREASES

Automatic house heating with gas which in the past has seemed a fairy book dream of luxury so far as Michigan is concerned is rapidly becoming a reality in this state according to reports received by the Michigan Public Utility Information Bureau at Ann Arbor, from the statistical department of the American Gas Association.

These reports show that in the five months of 1929 ending June 1, close to half a billion cubic feet of gas was used in Michigan for house-heating, a gain of 61 per cent over the corresponding five months in 1928. A total of 1,028 homes in the state had gas heating plants in May, as compared to 670 in May of 1928, a gain of 53.4 per cent.

Gas used for house heating during the five months ending June 1, was more than ten per cent of the amount of gas used for industrial and commercial purposes in the state.

Among the factors contributing to the growth of house-heating by gas are modern methods of insulating houses against cold and heat, the evolution of efficient burners, and the development among persons who can afford it of a disposition to put freedom from furnace fuel costs in arm's reach for the eight-months-year struggle against low temperature discomfort.

The reports for the five month period, ending June 1, show a gain of 14.6 per cent in volume of gas used for all purposes in Michigan, over the corresponding period in 1928. Gas used for domestic purposes increased 10.8 per cent.

Historic Date

The Right Rev. and the Right Hon. the Lord Bishop of London, in his book, "Holiday Recollections of a World Tour," says that the first time the Prayer book was used in America was on June 24, 1570. The clergyman who officiated was Rev. Francis Fletcher, chaplain to Sir Francis Drake. In San Francisco a huge Ionic cross has been erected in memory of the event.

"KONJOLA IS JUST WHAT I ALWAYS NEEDED"

TELLS HOW SIX BOTTLES OF NEW MEDICINE SOLVED ALL HER HEALTH PROBLEMS.

MRS. MARY PEREZ

"I was sick all over, tired out and rundown with long suffering from indigestion and kidney trouble," said Mrs. Mary Perez, 2008 Chene street, Detroit, Mich. "My back ached so that every day was made up of hours of pain. I could not sleep well at night, and to eat caused no end of pain."

"Konjola went right to the source of my troubles. I took six bottles in six weeks—the digestion has improved and the kidney condition has cleared up, and the backache has faded from me. Konjola is the medicine that I always needed. I am better generally than in years; eat three meals a day and sleep like a child."

Konjola is sold in Plymouth at Community drug store and by all the best druggists in all towns throughout this entire section.

cent, and for industrial and economical purposes 21.2 per cent. The reports are based on figures from companies supplying 90 per cent of Michigan's gas.

There has been much said of late in various newspapers concerning deaths

due to leaks in various types of mechanical refrigerators. Those deaths have been due to the refrigerant gas used, known as Nuthyl Chloride. Outstanding among those refrigerators which are perfectly safe is the gas-fired refrigerator, the Electrolux, sold

through gas companies. The refrigerant used in the Electrolux is hydrogen and household ammonia. This is sealed in by a welding process making leaks as near impossible as can be done, but should a leak occur, the gases are not poisonous

in any way. There are no pumps or gaskets of any kind to wear and allow leakage to occur. There are no motors as the theory of this refrigerator depends upon a tiny flame to bring about the refrigerating action. The Electrolux is perfectly safe.

Announcing Two New Models of the CHEVROLET SIX

Broadening the appeal of a line of cars which has already won over 950,000 buyers since January 1st, Chevrolet presents two distinguished new enclosed models of the Chevrolet Six—the Imperial Sedan and the Sport Coupe. With beautiful new Bodies by Fisher available in a variety of striking color combinations and with numerous advanced convenience features—these new models provide, in abundant measure, those elements of distinction ordinarily associated with more expensive automobiles.

you will be impressed by their individuality and completeness. But you cannot fully realize what an achievement they represent until you get behind the wheel and drive! For here are all the qualities of six-cylinder smoothness, power and acceleration which Chevrolet alone provides in the price range of the four—combined with economy of better than twenty miles to the gallon of gasoline!

When you examine the new Imperial Sedan and Sport Coupe,

Come in today. Learn for yourself the new standards of quality and luxury that Chevrolet has made available in six-cylinder cars—at prices within the reach of all!

The Roadster, \$525; The Phaeton, \$525; The Coupe, \$595; The Coach, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$695; The Sedan Delivery, \$595; The Light Delivery Chassis, \$400; The 1 1/2 Ton Chassis, \$545; The 1 1/2 Ton Chassis with Cab, \$650. All prices f.o.b. factory, Flint, Mich.

COMPARE the delivered price as well as the list price in considering automobile values. Chevrolet's delivered prices include only reasonable charges for delivery and financing.

CANTON CENTER

Canton Club will leave their grounds for the first time this season, and journey to Newburg, where they will meet the fast Northern Club. Canton has fourteen victories to their credit, and Northern has equally as many, so a real game is expected. Canton and Plymouth fans are requested to attend this game and give the clubs your hearty support.

Dad Plymouth wants to know what has become of the old-fashioned girl who used to put her hair in newspaper curlers before going to bed.

"No matter how warm it gets," says Dad Plymouth "you never see a fly so forgetful that he sits down on a cake of ice."

Dairy Banquet Held At Barn Dedication

MICHIGAN DAIRYMEN HEAR SPEAKERS COMPARE PAST AND PRESENT AT COLLEGE.

Two hundred Michigan dairymen attended the dedication banquet in the hay mow of the new dairy barn at Michigan State College.

Professor E. L. Anthony in introducing the toastmaster, Martin Seidel, Saginaw, said that the barn was the culmination of the efforts of Professor O. E. Reeg, formerly head of the dairy department at the college and now chief of the bureau of dairying at Washington, D. C., and of the breed-

ers of dairy cattle in the state who look to the college for leadership in experimental work.

Professor Reed told the audience that dairy products now make up 20 per cent of the total value of all farm products and that there is room for a same expansion of the dairy industry.

Professor A. C. Anderson, Detroit, spoke of the differences between the college as it was in 1904 and as it is now. At that time, five teachers made up the faculty of the agricultural division; many of the students were working their way through college on a wage of eight cents an hour, and it was necessary for the members of the faculty to perform tasks for which there was no money available to hire laborers.

Dr. M. E. Van Orman, New York City, said that good leaders and better business principles would aid agriculture. Group efforts were recommended by the speaker as a means of progress.

John Elicott, Detroit, president of the State Guernsey Breeders Association, promised the continued cooperation of the organized dairymen with the college.

Dean J. F. Cox explained the necessity for the new dairy barn facilities and promised that a forward looking program of breeding experimental work, nutrition trials, and production studies would be made with the new equipment.

Meeting of Board of Review

Notice is hereby given that a meeting of the Board of Review will be held in the Commission Chamber at the Village Hall in the Village of Plymouth

Saturday, August 17, 1929

AT

1:00 o'clock P. M.

to review Special Assessment rolls covering the following public improvements:

Roll No. 26—Sanitary Sewer main in Pine St. from Wing St. one block southward.

Roll No. 27—Sanitary Sewer main in Auburn Ave. from Blanche St. to Junction Ave.

Roll No. 28—Lateral Storm Sewer in Palmer Ave. from So. Harvey St. westward to end of street and Palmer Ave. from So. Harvey St. to So. Main St.

Roll No. 29—Lateral Storm Sewer in Sutherland Ave. from So. Harvey St. to So. Main St.

Roll No. 30—Water main in Palmer Ave. from So. Main St. westward over its entire length.

Roll No. 31—Water main in Sunset Ave. from Farmer St. to Junction Ave.

All persons interested will be given an opportunity to be heard relative to the above special assessment rolls.

GEO. W. RICHWINE,
VILLAGE ASSESSOR.

Bidders Set Own Prices on Rare First Editions

There is a recent story of a man who took his old copy of "Alice in Wonderland" to a Boston bookstore to be rebound. The bookstore clerk, who recognized the book as a first edition, is reported to have told the customer that the book was worth \$6,500.

The value of first editions fluctuates with the condition of the copy, and in particular with the person bidding for the volume. The first edition of "Alice in Wonderland," London, 1865, is very rare and consequently much sought by collectors. Its value is approximately \$3,500; a presentation copy might be worth more. This is because the author withdrew the book from circulation shortly after it was published, as he did not think the illustrations came out well. They were by John Tenniel, who was also reported to be dissatisfied with them.

The next edition came out in London in 1866 and its worth about \$350 to \$500. The third valuable edition is the American, printed in New York, 1866, and brought out by Appleton and company. This edition was bound up from the English sheets of the 1865 edition. Its value is about \$250.

Rare Varieties of Fox

Mere Freaks of Nature

The silver fox is not a separate species. It is merely a variety of the red fox, says the Pathfinder Magazine. The black fox and the so-called cross fox also belong to the same species. Typical silver foxes have a silvery appearance, due to the white tips on many of the hairs. The bushy tail is black with the exception of a white tip. Black, silver and cross foxes are found in the northern part of North America and in Siberia. Totally black specimens of this species are seldom found except in the Far North. As a rule, the fur of the cross fox has a yellowish or orange tone with some silver points and dark cross markings on the shoulders. Delts of silver foxes vary in color from black with a slight dusting of silver on the head and shoulders to half black and half silver mixed. All these varieties are rare in the wild state and it is believed that they are usually born in litters of normally red cubs.

Much to Learn About Heart

It is only 300 years since William Harvey published his discovery of the circulation of the blood. In 1628, in these three centuries we have learned that its operation is that of a pump. Each expansion draws into the left ventricle, one of the four chambers of the heart, about four table-spoonfuls of blood, which has completed its seven-minute circuit of the body and has been supplied with fresh oxygen by the lungs. The blood passes through the four chambers, being forced out into the arteries through the right auricle. And that is about all we really know about the heart. There is still much to learn why and how infections and nervous diseases affect its muscles and its valves, throw it out of rhythm and tend to shorten its usefulness.

Instruction Points

The teaching load refers to four factors conditioning the efficiency of instruction and are: (1) The pupil-teacher ratio, as shown by the average daily attendance; (2) the number of classes taught by the teachers; (3) The number of student hours per teacher; (4) The number of students in a class. The North Central Association of Colleges and Secondary Schools recommends the following as normal: (1) Pupil-Teacher ratio, 25; (2) The number of classes taught by the teacher, 5 daily; (3) The number of student hours per teacher, 150 per day; (4) the number of students in a class, 25.

Stone Revealed History

The famous Moabite stone, set up by Mesha, king of Moab, to commemorate his name and his victory over Israel, has thrown light on Bible history. And until not long before the World war, the name of Hezekiah outlasted well-nigh twenty-six centuries, unseen and unsuspected, upon the wall of the wonderful tunnel, one-third of a mile in length, that be carved through the rock beneath Jerusalem to connect the Virgin's spring with the pool of Siloam within his city walls.

Chains of Habit

Steamboat men say, "Once a riverman, always a riverman." Sailors never are immune to the lure of the sea. Railroad men like to be near the railroads, to smell the smoke and hear the trains, even after years of retirement. Newspaper men, in the same way, yearn for the smell of printer's ink.

Time Out

The brothers and their families were spending an evening together. Brother A's four-year-old was strutting his stuff. Finally Brother B, remembering that his baby, age two, always called time "8 o'clock," slipped into the next room, noted the clock said 7:40, and pushed the hand up seventeen or eighteen minutes.

Of course the clock soon struck. "What time's that, Junior?" asked Brother B.

"Eight o'clock," cooed the baby.

Lightning's Freak

Strange pranks are often played by forked lightning. It recently wrote its signature upon a Middletown (N. Y.) man who was struck by a bolt. His skin bore a pattern of bright pink lines, the burns of the electric current that had flashed through his body. After a day or two they faded out and disappeared. The same rare freak has been reported before, writes Robert E. Martin in Popular Science Monthly.

HOMEMAKERS GIVEN MEDALS

PUBLIC CEREMONY GIVES RECOGNITION TO PART WOMEN PLAY IN RURAL LIFE.

The presentation of medals to the five Master Homemakers chosen in Michigan this year concluded the events of Farm Women's Week.

The women chosen this year are Mrs. Lottie Criddle, Middleville; Mrs. Morris H. Belford, Holly; Mrs. Maude L. Shull, Hart; Mrs. Floyd M. Barden, South Haven; and Mrs. Gerritt Holleman, Byron Center.

Mrs. Criddle and Mrs. Shull manage their home farm as well as the home itself. Mrs. Shull has 12 children.

All of the women are actively identified with all forward movements in their communities. They are active members of such organizations as the church, Sunday-schools, home economics extension clubs, women's work in the farm bureau, farmers' clubs, the Grange, the Red Cross, and some of the women act as leaders for boys and girls clubs.

Mrs. Belford sold \$1,500 dollars worth of butter, poultry, garden produce, and fruit last year. She computed that this took 75 extra days but stated that it was not necessary to neglect her home to do the additional tasks.

The movement for the recognition of the homemakers part in a prosperous agriculture is sponsored by the Farmer's Wife, St. Paul, Minnesota, and groups of women have been awarded the gold medals in 21 states.

Age Not Determined by Number of Years Lived

The following bit of philosophy, written by a contributor who signs it "Author Unknown," has been received by the Detroit Free Press:

"Youth is not a time of life—it is a state of mind. It is a temper of the will, a quality of the imagination, a vigor of the emotions. It is a freshness of the deep springs of life. Youth means a predominance of courage over timidity, of the appetite of adventure over love of ease. This often exists in a boy of twenty. Nobody grows old by merely living a number of years. People grow old by deserting their ideals.

"Whether seventy or sixteen, there is in every being's heart the love of wonder, the amazement at the stars and the starlike things and thoughts, the undimmed challenge of events, the unfulfilling childlike appetite for what next, and the joy and the game of life. You are as young as your faith, as old as your doubts; as young as your self-confidence, as old as your fear; as young as your hope, as old as your despair. In the central place of your heart there is a wireless station. As long as it receives messages of beauty, hope, cheer, grandeur, courage and power from the earth, from men, and from the infinite, so long are you young."

Black Ox Always the Symbol of Misfortune

The black ox symbolizes old age, ill luck, adversity, or trouble in general, according to an article in the Pathfinder Magazine. "The black ox has trod on his foot," is a proverbial expression recorded already in 1546 by John Heywood. It means that one knows the meaning of sorrow and misfortune, such as having been visited by death.

The phrase alludes to the black cattle sacrificed by the ancient pagans to the infernal deities, especially to Pluto, supreme judge and lord of the underworld. White cattle were sacrificed to Jupiter.

At Rome the altar on which the black oxen were sacrificed was 20 feet below the level of the ground and was never exposed to public view except when the sacrifices were being made. Among the Arabs the black camel is the symbol of murder and death by violence.

Defending Thirteen

One of the arguments against reforming the calendar is the coincidence that the thirteenth of each of the thirteen months of the proposed year would fall on a Friday. One of its defenders answered this opposition by saying that the United States "grew great on thirteen" and, incidentally, on Friday.

America was discovered on a Friday, the Pilgrims landed on Friday, there were thirteen American colonies, thirteen stripes and stars on the American flag, and thirteen feathers on the American eagle's tail. The motto, E Pluribus Unum, contains thirteen letters.

Preserve Historic Spot

Maine Daughters of the American Revolution have voted that Pemaquid is the most historic spot in the Pine Tree state. An act of the Maine legislature made a state park of the area surrounding the fort. In all there have been four forts at Pemaquid; the blackhouse called Fort Pemaquid, erected in 1630; Fort Charles, 1667; Fort William Henry, 1692, and Fort Frederick, 1720.

It was at Pemaquid that English people are said to have landed 13 years earlier than the Pilgrims at Plymouth. Pemaquid is a part of the old town of Bristol, which was named for Bristol, England.

Age Brings Penalties

The penalties of old age, it is evident, are not confined to those which Byron enumerated—pout and the stone. Loneliness must also be considered, and when we call the roll of the friends of our youth and there is not a whisper in reply, then, perhaps, we shall feel the full burden of our years.

Sir Oliver Lodge stated that science had made possible the extension of life to a hundred years. If such a gift is universally bestowed, it will be well. But there are few of us, perhaps, who would accept it as a particular favor.—Exchange.

Famous Rum Quay

Rum quay, the most jealously guarded spot in the London West India docks, is inclosed by an immense glass roof that originally formed a covered way to the Crystal palace when that building was erected in Hyde park in 1851, to house the great exhibition. Here, isolated behind iron doors, puncheons of rum, each holding 100 gallons of spirit many degrees over proof, are laid before being rolled into the vaults which extend to the water's edge, and afford accommodation for 40,000 of these gigantic casks.

Camp Meetings Protected

Back in 1838 the General court of Massachusetts gave protection to camp meetings by creating what was known as "The camp meeting mile." Within that distance of "a field meeting for religious purposes," it was decreed to be unlawful to hawk or peddle goods, to sell goods in tent or other structure, and to take care of horses for pay, unless the officers of the religious meeting gave their consent.—Detroit News.

Our One Triumph

Women's sports clothes are peculiarly an American idea. It has been said that this is the only authority in fashion originated in this country.—Woman's Home Companion.

Easybodies

Before we try to run other folks' lives we should be sure that we rate 100 in running our own.—American Magazine.

The fourth annual reunion of the Giegler family was held at Island Lake, recently, with ninety-nine present from California, Milwaukee, St. John's, Highland, Hartland, Birmingham, Detroit, Ann Arbor, Romulus, New Boston, Walled Lake, Farmington and Plymouth.

Mr. and Mrs. M. S. Litsberger and Anne and Lloyd Gates have returned from their trip through Colorado, Estes Park, Fall River Drive, Berthoud Park, and then back through Denver, Kansas and Indianapolis, and home. They drove over 1400 miles in 48 hours from here to Greeley, Colo.

PERRINSVILLE

John Dethloff spent Sunday at C. Watta's.

Grandma Mielbeck is quite sick at this writing.

Ruslin Cutler spent Sunday evening with Clinton Baehr.

The Ladies' Aid will meet with Mrs. Robinson in Garden City, August 13.

Ruslin Cutler and sister, Sarah Lilian, and Clinton Baehr spent Sunday afternoon at Cass Lake.

Mr. and Mrs. A. B. Walonger's sister, Mrs. Charles Irge and daughter, Ruth, spent last week here with Mrs. Walonger.

Mrs. Effie Baird of Utica, who has been spending a few days with her sister, Mrs. Belle Baehr, has returned to her home.

Mrs. Belle Baehr, Mrs. Effie Baird, Mrs. Charlotte Noll and Mrs. Fletcher and grandchildren, attended the electric picnic at Bobo Saturday.

Calves at George Baehr's, Sunday, were Mr. and Mrs. Howard Baehr, Daisy O'Dell and girl friend; also Mr. Member and boy friend of Detroit.

Mrs. Charlotte Noll of Detroit, who has been spending a week with her parents, Mr. and Mrs. George Baehr, has returned to her work at General Motors.

Mrs. Belle Baehr and daughter, Charlotte, and Mrs. Effie Baird called on Mrs. Johnson at Stark, finding her in as comfortable condition as could be expected under her affliction. Her many friends hope for her recovery soon.

Highest Capital

La Paz, Bolivia, is the loftiest capital in the world, for it stands on a mountain top 12,470 feet above sea level. This is 2,000 feet higher than Quito, in Ecuador, and 5,000 feet higher than Mexico City. Its nearest rival for height is the far distant Lhasa, which stands at an altitude of 11,830 feet. The mean temperature of La Paz is 50 degrees Fahrenheit. But the cold nights are unrelieved by freside comforts, as the folk have nothing to burn, there being neither coal nor trees in the desolate mountainous regions around the city.

Plant Heart Beat Doubled

Plants have no beating pulse that propels the sap upward, and such pulsations as have been recorded are due to the trembling of improperly adjusted instruments and not to the beating of the plant, experiments recently performed by several American and European plant physiologists indicate. The findings are directly in conflict with those of Sir Jagadis Chunder Bose, who announced some time ago the "beating heart" theory in regard to plants.—Popular Mechanics Magazine.

Fair Enough

Phil Falkins joshed Sam Sellers' father day for wearin' gray pants with his dinner jacket at Mrs. Olsen's reception. "The pants," grinned Phil, "is what you might call breeches of etiquette."—Farm and Fireside.

Dad Plymouth asserts that horsepower under the hood is a dangerous thing unless there is horse sense under the hat.

An eastern editor says the difference between a chef and a cook is that the chef costs more. Not if you marry the cook.

Coal By-Products

Some of the by-products of coal include coke, gas, light, medium and heavy oils, tar, pitch, ammonia and the nitrogen contents of ammonia known as ammonium sulphate. The crude gas can be used as the starting point for a number of other products and the crude oils and tars as the starting point for a long list of dyes, medicines, explosives and other chemicals.

CITY NOW IN MIDST OF MOST FLOURISHING INDUSTRIAL PERIOD

NEW HIGH RECORDS FOR ACTIVITY DURING YEAR ARE PRESAGED BY PAST PERFORMANCES.

By C. C. McGILL, Secretary, Public Affairs Bureau, Detroit Board of Commerce.

There is every indication that Detroit is in the midst of the most flourishing period of manufacturing activity in its history. Previous records established by Detroit have astounded the rest of the world and this year's record will undoubtedly bring added recognition to this community.

At the beginning of the year the industrial department of the Board of Commerce predicted that the value of manufactured products in the Detroit area would exceed three billion dollars for the year 1929. This would represent an increase of \$500,000,000 over Detroit's best previous year.

With six months of the current year already elapsed there is no reason to revamp previous estimates unless it would be to increase them. During the first half of the year motor car production exceeded 3,000,000 units, showing an increase of 45 per cent over any similar period in the history of the automobile industry. The fact has a tremendous bearing on Detroit's progress, as this city is credited by the industry which produced eighty per cent of the total motor car output.

The Ford Motor Company, the largest factor locally in motor car production, is now equalling its peak production records with the Model A Ford.

The other industries in Detroit, practically without exception, are enjoying a better than average volume of business and the majority report the outlook for the coming fall season to be good. Many plants in the non-automotive industries now have greater production schedules than they had in any previous year at this season. Reports are made that orders are still arriving in good volume.

The clear and tobacco producers of this area, certain textile plants, chemical and pharmaceutical manufacturers, producers of household appliances and equipment and other diversified lines report business at better than an average volume. In others, such as brass goods, for example, conditions are rather spotty.

It is true that at present there is a seasonal recession in manufacturing operations, but taking it by and large conditions are better than average and the outlook is entirely favorable.—Detroit Free Press.

GAS "THREAD" RUNS CARS

A statistician of the automotive engineering fraternity has been doing some research on the size of the thread of gasoline required to keep automobiles and airplanes running. According to Chester S. Ricker, Waukesha, Wis., who directs the timing and scoring in the annual 500-mile race on the Indianapolis Speedway, if you drive a Packard, Cadillac or Lincoln you are pushed along by a thread of fuel twenty-one-thousandths of an inch in diameter.

If you drive a Chevrolet or Ford it need only be fifteen-thousandths of an inch. But if you drive a single cylinder motorcycle which runs eighty miles on a gallon the stream is only seven thousandths of an inch wide, the thickness of two human hairs. Lindbergh, according to Mr. Ricker, crossed the Atlantic on a thread of fuel which when stretched continuously from Roosevelt Field to Le Bourget would have been less than one thirty-second of an inch thick.

What this means is brought home by Major Kuhala's tragic account of his attempted trans-Atlantic flight. With his engine running smoothly his only anxiety was the gasoline supply. As he said, "we still had in our tanks 1,140 gallons of gasoline. That supply would last about thirty-eight hours"—equivalent to 3,800 miles.

"Whether it is automobile, airplane or other gasoline driven vehicle," Mr. Ricker says, "gasoline is the vitalizing element. On a slender thread the Californian visits New York, and in time the distance between the coasts may be traveled in two days or less.

"Science is daily welding this nation together by gasoline-propelled vehicles traveling over scientifically built roads and through the air on scientifically built wings, guided by the invisible hand of the radio compass and by weather information. "Truly the age is built on the slender foundation of gasoline fuel."

Four years ago there were 186 telephones in Connecticut for each thousand of its population. The ratio now increased to 189 telephones per population unit of 1,000.

Flavor of First Wife's Cooking Found at Last

A middle-aged spinster married a widower, who had lost his first wife after a marriage of 15 years.

The spinster, who lived for years with her aged mother, was brought up in the spirit of immaculate house-keeping. An old-fashioned house-keeper, the mother excelled in cooking and her daughter kept fairly well in her footsteps.

Yet, despite her efforts and her skill in culinary arts, the new bride never succeeded in quite satisfying her husband.

"It's fine, Sadie," he told her often, "but there is just something amiss. My poor Mary could give the food a flavor I never had anywhere else. I don't know just how she did it."

Then came a day when housecleaning kept Sadie on her toes all day. In a rush to have everything clean and in order by the time her hubby arrived, she forgot to look after the meal. When she remembered, it was too late. There was a burned meal.

Asnaturally she watched her husband taste the food, but now surprised was she, when he exclaimed:

"Now, Sadie, that's really fine. It has that delightful flavor which distinguished Mary's cooking."—Philadelphia Public Ledger.

Snakes Not Aggressive; Called Lazy and Timid

"Contrary to lore, snakes do not attack humans wantonly," reads an article in the news magazine Time.

"They are lazy and timid and do not strike unless hurt or threatened with hurt," the article continues.

"Exceptions are the African mannikin, the Malayan king, the bushmaster of the tropics, and cascavel, a rattler of Central America. A coachwhip will sometimes follow a man. But it is only curious, and will speed away if threatened."

Other facts about snakes are given in Time as follows: "Identifying poisonous snakes is easy. Most of them belong to the pit-viper family. They have a deep depression between eye and nostril. Heads are flat and triangular, necks thin, bodies stout; tails short, eyes with elliptical pupils like a cat's. Fangs fold back against the roof of the mouth. A single row of scales runs along the belly. The biggest United States snake is the eastern diamond-back rattler, which grows to nine feet."—Philadelphia Inquirer.

When Teeth Were Weapons

Most of us, from our earliest days, are at intervals gravely troubled by our teeth. It was not always so.

The jawbone of the Heidelberg man, who walked this earth about 50,000 years ago, is placed alongside that of modern man. We realize that our underkneels, as the Germans call them, are but as toys when compared with those of our earliest ancestors.

The jawbones of still more ancient people than the Heidelberg race were even more formidable as they were provided with projecting teeth, which, without much doubt, were used in fighting and in other manly sports of those days.

Value of Mental Training

Mental training, both in reading and in special study, does much to keep the individual happy, wide-awake and healthy. Much of the trouble in the world comes from worry; if a man or woman is busy with his own interests and retains the ambitions of earlier years his chances of a happy, profitable life seem greater.

The plight of the unhappy individual who never reads or who has no special hobbies is not a pleasant one. The practice of mental thrift, of utilizing the brain through later years, makes a richer, fuller life.—Thrift Magazine.

To Strengthen Eyes

Eye exercise to strengthen the muscles are advised by certain physicalists, and these should be done before breakfast. Keep the head still and roll the eyes upwards as far as possible, then right downwards, with a steady and unjerky motion. Continue rolling the eyes right, then left. Now lift them upwards and inwards, then upwards and outwards; and finally downwards and inwards, and downwards and outwards. Do this five times at first and gradually increase to twelve a day.

Daily Thought

From the lowest depths, there is a path to the loftiest heights. The tendency to persevere, to persist in spite of hindrances, discouragements, and impossibilities—it is this in all things that distinguishes the strong soul from the weak. The man without a purpose is like a ship without a rudder—a waif, a nothing, a no man. Have a purpose in life, and, having it, throw such strength of mind and muscle into your work as God has given you.—Thomas Carlyle.

Church Communion

The Encyclopedia of Church History defines "open communion" as the service of the holy communion of saints which is open to all who apply, irrespective of creed. In "closed communion" the service is confined to the members of a single society or at least to the members of a denomination who are baptized. By "communion of place" is meant the administration of the sacrament in a consecrated building. It also refers to the retention of the Host.

Simple Code

There is but one virtue; to help human beings to free and useful life; but one sin; to do them indifferent or cruel hurt; the love of humanity is the whole of morality. This is goodness, this is Humanism, this is the Social Conscience.—J. William Lloyd.

The Plymouth woman who wants to hide a family skeleton might try making her daughter wear her skirts a little longer.

THE New BUICK

New FISHER styling

in the most colorful and captivating motor car bodies of the year . . .

Reflecting the matchless genius of Fisher's artist-craftsmen, as well as the unparalleled resources of the Buick and Fisher organizations, the magnificent new Buick Bodies by Fisher incorporate beauty and charm obviously superior to any other car in the Buick field.

Longer—lower and more luxurious, these new bodies reveal entirely new harmony of color and grace of line. They are replete with extra features of utility, luxury and convenience, including new Non-Glare Windshield for safe night driving—new and richer upholstery—new fittings and appointments of princely luxury.

In addition, this new Buick embodies other wonderful new elements of value—a new and mightier valve-in-head engine—new Controlled Servo Enclosed Brakes—four new double-acting Lovejoy Duodraulic Shock Absorbers, and new longer rear springs, new frictionless steering gear and new Steering Shock Eliminator.

And what is more, this new Buick, with all of these vital superiorities, is offered at new low prices—prices that make Buick for 1930 the greatest value Buick has ever offered in 26 years of building extra value into each series of Buick cars!

**HOME OWNERS
LEARN TO SAVE**

HERBERT NELSON URGES MORE FAMILIES TO ACQUIRE PROPERTY.

POINTS TO ADVANTAGES

Leaving all sentimental reasons aside, there remain many practical considerations why the average family of small means should strive to own a home, says Herbert U. Nelson, executive secretary of the National Association of Real Estate Boards.

While some of life's joys may be attained in rented quarters, he says, the one big reason why people should own their domiciles is because it makes them save money they would never accumulate otherwise.

Pointing out that fair financing plans make it possible for people of small income to become their own landlords, Mr. Nelson says:

"There are two good reasons, devoid of any glamor, why home ownership is a good thing for small salaried folks.

"The first is, that in acquiring a home, such people are forced to save funds that would not be saved in any other way. In other words, through and by means of their home, these people build up a capital and credit standing that nothing but the goal of home ownership could bring about. Nothing but the thought of eventually owning the home they have so fondly selected would make such people continue denials and economies necessary to achieve this end. For once started to save for a home, the average family will make every sacrifice to keep up the payments. Nothing short of actual disaster will cause them to give up. It is certain that they would not save for anything else with the same ardor.

"If hard times fall on the renter he can pack up the children and move to cheaper quarters. He often does this rather than change his other living standards. But unless the family working to save for a home is practically wiped out financially, the payments go on. That family will cut down in some other way. They will not lose their home.

Leads To Prosperity.

"On the capital built up in homes, thousands of families have borrowed money to make additional investments and to go into businesses that have brought them prosperity—and often great wealth.

"The second practical reason why home ownership is advisable for the family of small income is, that with very little additional expenditure per month, the average family can have a much better home by owning than by renting. In the beginning, the home a family purchases may not be better than the home they might have rented; but the owned domicile constantly inspires its occupants to improve it. Put a woman into a structure that pleases her and in which she knows she is to reside forevermore, and she will find a thousand ways to make it more convenient and attractive.

"Every home owner works on his property, but the renter seldom does anything to improve his quarters. He knows he may be packing his bags the first of May and he argues that it would be foolish to spend money on a place that is not his own."

Little More Than Rent.

Mr. Nelson states that in most communities, homes can be bought (after a small down payment is made) for little more per month than it would cost to rent them. He points out that the following items properly appear in any budget made up by a landlord in fixing the rent of a home:

Taxes. Repairs and decorations. Insurance. Possible vacancy allowance. Interest on the investment represented in the house or the landlord's profit, usually from 8 to 10 per cent.

Total. Rent figure.

Now the family purchasing a home makes up a budget like this:

Taxes. Repairs and decorations. Insurance. Interest payments and payments on the mortgages.

Total. Cost of buying a home.

"The home-owner's table does not contain the items for vacancy allowances and landlord's profit that are figured in the renter's rent bill," he says.

"The total of these items, in many cases, allows sufficient funds with which to purchase a home. For example, on a property worth \$7,500 (house and lot), the landlord's profit would be computed at probably not less than 8 per cent of this amount; certainly he should receive this much return on his money for the time and trouble entailed in being a landlord. Eight per cent of \$7,500 is \$600 a year. This is an amount the renter pays for occupying his rented quarters in addition to all other charges for keeping up the house listed above. The landlord of such a home, probably also will add another \$100, in making up his rent figure to protect himself in case this property stands vacant a month or so during the year. This makes \$700 the renter pays aside from the carrying charges for the house. That \$700 would be sufficient in many local-

ities to purchase a home on installment payments.

Pays Charges Anyway.

"Of course the home-buyer also will have the charges for taxes, repairs, and decorations, insurance, etc., but he pays these charges, too, as a renter.

"Moreover, it has been demonstrated that charges for repairs and decorations in an owned home are lower, by a considerable amount, than in rented structures. In other words, a landlord, making up a rent bill as described above, necessarily will have to place a higher figure opposite the items for repairs and decorations than the home owner. This is because the renter is harder on a home than an owner. Moreover the changing of tenants is wearing on rented structures.

"In attaining home ownership many American families require some financial assistance; and home buyers and builders who borrow funds with which to accomplish their purpose may be divided into three groups as follows:

1. Those who can supply in cash 30 per cent or more of the price of the home and who can secure the balance on first mortgage from several different sources.

2. Those whose cash resources are within the approximate limits of from 25 to 40 per cent of the price of the home and who borrow the amount needed either on first mortgage or through the use of a first and second mortgage.

3. The third group includes the large number of people who have but 10 to 15 per cent of the price of the home, who sometimes finance through mortgage agencies, but more frequently now by means of an installment purchase agreement or land contract.

The Land Contract

"The land contract, which is used widely in the Middle West, and is popular in practically all other parts of the country, is simply an agreement between buyer and seller of property under the terms of which the buyer usually makes a small down payment and agrees to pay the full purchase price in installments, usually monthly over a period of years.

"The seller does not immediately pass the legal ownership of the property to the buyer, but agrees to convey the title to him when a certain percentage, say 50 per cent, has been paid, at which time the buyer gives a mortgage to the seller, or to some third party supplying a loan for the unpaid balance.

"The land contract sales method makes home ownership possible for a large class of people who would be unable to buy homes in any other way. In localities where the land contract is not in use the home buyer with but 10 to 15 per cent down payment can obtain mortgage loans to bridge up the gap between the initial payment and the selling price.

"Even if you are cold to the sentimental reasons that make home ownership desirable, being your own landlord is a good business proposition."—The Detroit News.

COTTON FABRICS FOR MANY USES

Favored Because of So Many Patterns and Colors.

(Prepared by the United States Department of Agriculture.)

Cotton dress fabrics are now considered suitable on a great many kinds of occasions where they were not formerly worn. The great variety of finishes, patterns, and colors have also made cotton more popular than ever.

Cotton is favored for sports wear because it stands frequent tubbing, the bureau of home economics of the United States Department of Agriculture points out. Plaques, broadcloths, suitings, and other closely woven, substantial fabrics are made up into sleeveless tennis or boating dresses for "active sports wear." Dressy coats and ensembles in plain colors or gay prints, or interesting combinations of both, are designed for those who look on at the tennis meet or golf tournament—"spectator sports wear." Cretonnes and cotton eponges are used for "water sports wear"—beach pajamas and coats.

Both decorative lounging pajamas and practical sleeping pajamas are made by preference of cotton fabrics—cotton broadcloth, gingham, soft cambric and muslins, often printed in delightful geometric and flowered patterns. Informal evening dresses and formal afternoon frocks are made of plain and flowered organdy and lawn, dimity, voile, dotted swiss, and other dainty materials.

A good many of us around Plymouth can remember when a man was considered in league with the devil if he spoke a good word for John D. Rockefeller.

Scientists have found germs increase their speed under a red light. Yes, and some of them are driving automobiles.

When a man is prominent in a number of lodges he has to attend so many functions that he doesn't look natural without a strip of ribbon pinned on his coat.

Felt is the best known material to keep oil or grease from working out along a revolving shaft.

Polarine MOTOR OIL
STURDY AND RICH

ISO-VIS STANDARD OIL COMPANY MOTOR OIL
SERVICE (INDIANA)

Dependable Motor Oils— POLARINE and ISO-VIS

You can depend on either of these two motor oils to lubricate your car as it needs to be lubricated. They are both sturdy, rich oils.

Because they are sturdy they will hold up under the trying conditions of country driving.

Because they are rich they will keep a cushioning film over every bearing surface.

ISO-VIS, the most sensational advance in motor oil, maintains a constant body—wears and wears and WEARS, lubricating at highest efficiency all the time. Many motorists run 1000 miles and more without draining the crankcase.

Polarine needs no introduction—for 20 years this dependable motor oil has been giving satisfactory service in millions of cars. If you want dependable lubrication for the least money, buy Polarine and drain the crankcase every 500 miles.

Polarine and ISO-VIS are made in different grades—use the grade made for your car.

Capt. and Mrs. F. W. Wright, officers in charge.

CATHOLIC NOTES

Sunday is general communion Sunday for all the men of the parish.

Next week Thursday, August 15th, is a Holy day of obligation. Assumption of the Blessed Virgin Mary. Masses at 6 and 7:30 a. m.

Wednesday, August 14th, the vigil is a fast and abstinence day.

John Britcher of this parish is to be married to Margaret Coveleske of Wayne, August 21st.

Josephine Louise, daughter of Mr. and Mrs. S. Donovan, was baptized last Sunday.

A very interesting and close game of baseball was played on the Nethem grounds last Sunday, against the working boys of St. Francis Home. Three to two was the score. St. Francis taking the lead in the ninth inning. Next Sunday Nethem vs. Canton Center at Newburg at 3:00 o'clock. This ought to be a cracking good game and a large crowd will be at the grounds to witness the local boys as each team are Plymouth's sons. Nethem and Canton Center—follow the rooters to the pleasant grounds at Newburg—a treat is in store for all.

Christian Science Notes

"Love" was the subject of the Lesson-Sermon in all Christian Science Churches on Sunday, August 4th.

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Behold, happy is the man whom God correcteth: therefore despise not thou the chastening of the Almighty" (John, 5:17).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "He that touches the hem of Christ's robe and masters his mortal beliefs, animality, and hate, rejoices in the proof of healing.—In a sweet and certain sense that God is Love." (p. 589).
Sunday, August 11th—"Spirit."

Lutheran Doctrine

Martin Luther's "Little Catechism" is the creedal foundation of the doctrines of the Lutheran church, and was written by Martin Luther in 1529. It begins with the ten commandments, and deals with the usual doctrines of creation, salvation and faith in Jesus Christ.

Prolific Hymn Writers

Upwards of seven thousand hymns Charles Wesley is known to have written. John Wesley translated many from the German, especially from the Moravian books. Some of their followers Olivera, Perronet and others also wrote hymns.

Gothic Leader Interred Under Calabrian River

Most regions have their buried treasure stories. Cosenza, chief city of Calabria, has one of the oldest and best, according to a writer in the Washington Star. It is at Cosenza that Alaric, first Gothic leader to conquer Imperial Rome, was buried along with priceless treasures captured in Rome. Laden with the riches of the dying empire, Alaric and his barbarian hosts marched south to conquer Africa and the grain which abounded there. In Calabria Alaric died of the fever. His followers buried his treasure with him in the fashion of the day, but they made sure that the dead chieftain's repose would not be disturbed, either by avenging enemies or covetous treasure hunters. They diverted the course of the River Busento and buried Alaric far below the river bed. Then they restored the river to its channel. For security's sake they put to death every one of the prisoners who had helped bury Alaric, and marched on. The grave has never been discovered, though Alaric died 1,500 years ago. Legend has it that the grave is near the confluences of the Crati and the Busento rivers at Cosenza. When I saw this spot it was mostly a dry gravel bed with a narrow stream at which the village women washed their clothes. During the rainy season it is a large river. Its secret holds the same fascination for Calabria that the Neam galleys hold for Romans.

Recreation Time Must

Be Used to Advantage

Work is healthful but it must not have depressing associations. Pauses or changes in monotonous work will cut down boredom and monotony. Rest periods should not necessarily be used for rest, but for relaxations in diversion and recreation. But unless our play actually gives us relaxation, there is no benefit. American life at present is so arranged that play is not relaxation, but hard work, says Dr. Lauren H. Smith in Hygeia Magazine. "Evening used to fall with a hush and tired men came home to rest in contentment. Evening now falls like a ton of bricks. If the house is quiet before midnight the evening is considered a failure. Are we going to give ourselves play, or is it to be frenzy?" he asks. "In order to gain play and rest we must use our time-savers to get ourselves more peaceful leisure than more excitement."

Method in It

At the dinner party one man caused a mild sensation. He was seen to be smoking cigarettes with a silk handkerchief tied tightly around his eyes. One of the guests found the sight more than his curiosity could stand, and asked another diner the meaning of the phenomenon. "Oh, haven't you seen him before?" exclaimed his fellow guest. "That's old Tightwad. I thought everybody knew him."
"But I still don't understand," said the other.
"Well," exclaimed the knowing one, "he's rather an artful sort of chap. He tells people he can name any cigarette just by smoking it, and so he never has to buy any."

Ants' Skyscrapers

Compared with the structure built by the termite and the great skyscrapers of our cities are insignificant achievements. Man, who is five or six feet tall, has built or plans to build to a height of 1,208 feet. The termite, only three-sixteenths of an inch from end to end, erects apartments rising twenty feet into the air.

Therefore man's buildings are only about one-seventh as high as the dwellings of the ant, relatively—that is considering the great difference in their respective sizes. The cubic space in an ant hill will contain a million times more inhabitants than the largest human habitation.—Pathfinder Magazine.

No Good for Substitutes

An English physician claims that crying is good for one's complexion—provided, of course, that one's complexion is one's complexion.—Humorist.

Ancient Battleground

Stellians are a mixture of many nationalities, as in early days Sicily was the battleground of all countries. People came from all the northern African and eastern Mediterranean ports as well as all those of Europe to fight.
