TAKE CARE OF IT AND MAKE IT DO!

Every farmer knows the vital importance of farm machines in the winning of this war. The need for increased food production is urgent. So is the demand for machines to help plant, cultivate, and harvest your crops. But because of the urgent demands of war production, new farm machines are going to be harder to get. This simply means that farmers must take the best of care of the farm machines they have. They must make their present equipment last longer. They must take care of everything until we win the Victory. LET US KEEP YOUR MACHINERY IN REPAIR A. R. West 507 S. Main St. Plymouth Phone 136

OFFICIAL U. S. TREASURY WAR BOND QUOTAS FOR SEPTEMBER

Washington, D. C., Sept. 8.—September War Bond Quotas for the 3,070 counties in the nation were announced today by Henry Morgenthau, Jr., Secretary of the Treasury, to make up the national September total of \$775,000,000.

The September quota for the State of Michigan is \$35,000,000.

In fixing the county quotas, the Treasury has continued its announced policy of setting the monthly quotas in line with the seasonal distribution of income with the billion-dollar monthly national average as the annual goal.

The national quota for May, when the nation went on the billion-a-month annual basis, was \$600,000,000. For June the quota was \$800,000,000 and for July it jumped to \$1,000,000,000. The August quota was \$815,000,000, so to maintain the billion-dollar annual monthly average, the quotas for the Fall and Winter months must necessarily be stepped up considerably to reach the objective set.

On Monday evening Mrs. Francis Halstead, an aunt of Robert's, entertained at dinner in his honor at her home in Farmington when his parents and brother, Douglas and Betty Knowles were present.

Phone Plays Big Part in The War

Rotary Speaker Tells of Advances

Michigan has more telephones users than any other state in the nation, Frank Curtis, director of customer relations of the Michigan Bell Telephone company of Detroit, told Plymouth members of the Rotary club last Friday.

Not only did he tell them that Michigan was the ace-high user of telephones, but that there is now being used a device in the army and navy whereby a soldier can talk over the telephone without speaking into a transmitter. "All he has to do is strap this little device around his throat, with these two little things which look like overcoat buttons, pressing against his throat, and he can talk over the phone or radio just as easily as if he was

speaking into a telephone," said Mr. Curtis.

"The sound is picked up directly from the throat instead of from the mouth," he said.

"In this way all other noise is eliminated. There is no motor sound from the plane from which he might be speaking or interference of any kind," he said.

The telephone and radio have become vital factors in war operations, he added. By taking over control of all communications in Holland and France even before these countries had been captured, Hitler was able to break down all resistance to his armies, said Mr. Curtis. His talk was one of the most interesting heard by the club in some time.
