Explains New Share Ride Plan

The share-the-riders working in the factories. To make matters a bit easier, the new program has been labeled "Wartime Traveler Service." The idea is that women like to go to Detroit to visit the stores. Well, why drive three automobiles for three women when one will do quite as well. There may be men who wish to go to Chicago. If they are going the same day, why not save the gas and rubber by using one car? The program is designed for persons going only one day now and then to specified points, not regular riders. The program is not a money-making proposition, but a means for saving gas and oil. True politeness is perfect case and freedom. It simply consists in treating others just as you love to be treated yourself.—Chesterfield.

"Travel Service" Not Factory Rides
\*\*\* There seems to have been a misunderstanding about this ride sharing program inaugurated last week by the transportation committee of the Consumers' Council, headed by Mrs. Merle Bennett. The announcement last week brought a flood of telephone calls to Mrs. George Talmage (599-R) but they seem to have been mostly from the wrong people. The program is not intended for war workers, but for persons not engaged in war work who want to be patriotic along with

The air-borne aviation engineers of the army air force give a demonstration of how they transport heavy pieces of mechanized equipment in the fastest possible time through the use of gliders and transport planes, at Westover Field, Mass. Here, with the nose of the glider hinged open, and a crew of four men raising the tail so that the nose will contact the ground, the jeep is driven into the fuselage for the flight.

Fathers and Sons Plan Get-Together

The annual father and son banquet, sponsored jointly by the Ex-Service Men's club and Troop P-2 of the Plymouth Boy Scouts will be held in the high school auditorium April 1, only this year because of the war it will not be a banquet, but an entertainment. The program has not yet been completed, but it was announced that it would consist principally of magicians and escape artists. An admission of 35 cents will be charged. The money obtained from the program will be used for furtherance of boys' work, especially financing of the summer camp for the P-2 troop of scouts.

Swimming Added To Training Work

High School Boys Being "Conditioned"
\*\*\* Swimming has been added to the physical-conditioning course conducted in the high school for those students who are expected to be inducted into the army some time during the coming summer. The course also has been made available to those students who will become 18 during the next school year. The swimming lessons are being given on Monday afternoons by Anthony Matulis, high school director of physical education. The pool at the Wayne County Training school is being used. It was emphasized that the course is not available to all high school students, but only to those whom it will benefit in their preparation for the army. Matulis said the course of instruction offered was designed to protect the soldier or sailor if he would be forced to swim in the course of his duty. The training includes swimming of all kinds, and all strokes, diving, especially in rapid sequence, how to protect themselves in event they are tossed in the midst of flaming oil. The course has been recommended by the armed services for some time, but not until now—and only on Monday afternoons—has the pool been available.

Wanted — List of Crutch Owners

Here is Way to Help in Emergency
If you have an idle set of crutches in your house and are willing to loan them in case of emergency, call the Plymouth hospital and tell them where they can be obtained and what size they are. Last Saturday there wasn't a crutch to be had at any doctor's office or at the hospital in Plymouth. Yet it has since been learned that at least five sets of crutches were available in residents' homes who would have been only too willing to loan them if they had known a need existed. One of our residents severely sprained her ankle last week and not only was caused severe inconvenience and hardship in getting to a car in order to go to the doctor's office to have her ankle X-rayed but this lady's husband had to make an unnecessary trip to Ann Arbor in order to purchase a set so that she could get around. Both the inconvenience and the use of gasoline and wear on the tires would have been saved if "crutch loan bank" had been available for her or her doctor to turn to. Most doctors own one or two sets of crutches to loan their patients in case of emergency but it often happens that for days at a time every known available set is in use. If everybody who owns idle crutches and who is willing to loan them in case of emergency will list them with the hospital, it is felt that much inconvenience and suffering will be eliminated and unnecessary trips to procure crutches in case of an accident will be saved to our citizens. Among other reciprocal aid items, about half a million electric batteries a month have been supplied to American troops in Britain by the British government.
