**Steel Prices  
Are Still Low**

GOVERNMENT figures show that average wholesale prices of all commodities today are about 110 percent above 1939. By comparison, these figures show that the current price of steel at the mills is only about 47 percent higher, on the average, than it was in 1939. If steel prices had gone up as much as other commodity prices, the pound of steel which today sells at the mill for just over 3¢ would be selling for nearly 5¢.

## Antique Chest Contains Century Old Almanac and Book on Slavery

A small, worn chest is among the antiques owned by Mrs. Leo Crane. Mrs. Crane is a collector of such items, but this in particular is of interest to her, since it contains an almanac which was published in 1848, exactly 100 years ago.

The hand hewn chest is covered with leather, which has become dry with time and is beginning to peel. The almanac, which it preserves has turned yellow and its brittle pages are curling back. The title page states that it is an agricultural English Almanac. It follows much the same style as almanacs of today, giving the time of the full moons, the dates of the eclipses, weather forecast for the year, and the length of the days, to mention a few.

An advertisement on the back page told that the subscribers keep constantly on hand at their drug store in the post office, a general assortment of drugs, medicines, patent medicines, writing and letter paper, dry-stuffs, pencils, quills, wafers, and cheap publications. It further read that they have all other articles generally kept in such establishments, which they will sell cheap for either cash, rags, beeswax, or ginseng.

As in all almanacs, this includes a few anecdotes, philosophical advice, and a smattering of pertinent information of the day. One column on the final page was devoted to witty comebacks to the popular saying of the day, such as "Do you enjoy good health?" answered with "Yes, very much, when I have it." Another was "Don't you think it warm in the sun today?" with the response, "Can't tell, haven't been there." An original remark to "Did you saw a load of wood for me last week?" was "No, but I saw your wife."

Equally as interesting as the almanac was the small book which was kept in the same chest. It is entitled the narrative of "Sojourner Truth," a northern slave. It was published previous to the civil war, in 1857. In an introduction, Harriet Beecher Stowe, author of "Uncle Tom's Cabin," explained that Sojourner's object in publishing the work was to earn enough money to secure a home for her old age. The introduction portion stated that "the kind-hearted cannot do better than to assist her in this effort. Those who have not read the narrative will find it worth the small sum paid to gain so new and original a history of the workings of the human soul under the pressure of slavery, and also to see the benignant care with which our Heavenly Father reveals himself to those whom man has deprived of all ordinary means of obtaining religious knowledge." Sojourner lived in New York where the slave was emancipated from bodily servitude in the year 1828.

Stuck between two of the pages of the yellow paged book was an equally discolored clipping from a newspaper. The date line read November 4, 1904. It was headed "Passing of an Ex-Slave." It read: "Mrs. Diana Corbin, daughter of the famous 'Sojourner Truth,' who enjoyed the distinction of being the only living person born a slave in the state of New York, died in the county house in Battle Creek Tuesday. Mrs. Corbin was bought, when a little girl, by John Dumont and placed at work in his fields with men, doing nothing but hard work, hoeing, plowing and picking up stones. She went to Northampton, Mass., after slavery was abolished, and joined her mother who ran away from her master and became famous as 'Sojourner Truth,' an anti slavery speaker. Later, Mrs. Corbin came to Battle Creek, where she lived many years, and where she married Jacob Corbin, who is now dead. She was the last of the family."

## Northville Man Is Rotary Guest

Plymouth Rotarians were given a New Year's message last Friday by Rev. Harold Fredsell, minister of the Northville Presbyterian church. The speaker urged charity in the hearts of men as they enter a new year besieged with hatred, uncertainty and confusion. He dealt briefly on this country's building of airports in Alaska where he stated the largest airports in the world were now under construction, and asked this question of his listeners. "Is it possible for Russia to not wonder of our intentions when we undertake a program such as this?"

Reverend Fredsell was located in Alaska during the war and is familiar with that area. He said that he corresponded regularly with friends in Alaska and that our mobilization program is greater today than it was during the war years.

In Berlin, Railroad Gatekeeper Walter Lanik failed to close his gate for a train, remorsefully waited for the next one, jumped under it.

Mrs. Vesta Isabel Bricher Vesta Isabel Lomis was born on June 1st, 1886 to Frank W. and Mary Ellen Lomis in Duluth, Minnesota, and came with her parents to Michigan when she was two and a half years old.

Koch's Sausage Is Back They brought to Plymouth a copy of the December 31, Aschinson Daily Globe in which a picture of Mr. Knowles appeared complimenting him on the fine job done under his direction in the recreation department and announcing plans for a wide expansion of their program for the next year.

Blunk Visit Former Director in Kansas Mr. and Mrs. Arthur Blunk returned early this week from Tulsa, Oklahoma, where they spent the holidays with their daughter and her husband, Mr. and Mrs. William Kirkpatrick. On their way back they encountered many miles of icy roads and were forced to stay in Atchinson, Kansas, until roads east were cleared.

While in the Kansas city they were the guests of Mr. and Mrs. Virgil Knowles, former residents of this city. Mr. Knowles served here about a year as city recreation director before going to Atchinson to accept a similar position there.

Here's the News of all the Sports and Other SPORTING EVENTS in PLYMOUTH

Basketball Schedule Changes

The original basketball schedule was made with the understanding that the Detroit House of Correction team could play a few games at the High School in Plymouth. However, the House of Correction Board of Commissioners has since ruled that the team cannot play out of the prison area.

RECREATION LADIES' LEAGUE

Table listing teams and scores for Recreation Ladies' League, including Dunning & Young, Plymouth Coach, and Grams.

DeHoCo Wins First from South Lyon Methodist

In the only game played during the New Year's week, the Detroit House of Correction won their first game of the season. DeHoCo, greatly improved in the last two weeks, scored 33 points in the last half to pull ahead and defeat South Lyon 51-36.

DeHoCo Answers League Problem

As the organization of the city basketball season began this fall, Ralph Johnson, city recreation director, was faced with a grave problem. Namely, lack of adequate gymnasium facilities in Plymouth to carry on a complete competitive basketball program.

Upon requesting the use of the high school gymnasium, the following situation was presented. The high school has varsity, reserve, and freshman basketball teams which must have daily practice and evenings on which to play their scheduled conference games.

These numerous activities allowed the Recreation Commission the use of the school gym for 11 evenings or a total of 33 hours from December 3, 1947, to February 27, 1948.

During the summer months the Detroit House of Correction was extremely cooperative in the use of their softball field for recreation league play and their baseball diamond for use by the youngsters trying out for the Briggs Stadium game.

This court is not only used by Plymouth teams but also by the inmates for good, wholesome recreation. The use of this gym allowed the men's division to play 14 games and the girls' nine games before playing for the championship the first week in March.

Through juggling by the competent school executives, a few extra periods a week and the use of the school gym on Saturday mornings has made it possible to begin the boys program as of this Saturday, January 10.

Plymouth should be extremely grateful for the cooperation of the House of Correction, but isn't it a shame that recreation teams and the high school squads must depend upon an institution outside of the city to furnish adequate facilities to carry on a competitive program.

Parkside Bar Team Ties League Scoring Record

Parkside Bar tied Plymouth Sport Shop's record of 87 points as they defeated South Lyon Methodist, Monday evening. Orlan Egloff took the number one position in the league in total points, as he scored 27 points.

Blunk's Pull an Upset on Austin Taxi Team

It seems as though anything can happen in the recreation basketball league this year. Austin, who in their last game pressed Parkside Bar, losing by two points, fell to Blunks Inc. who were in the cellar and had not won a game.

Blunks, greatly improved by two new players, Ronald Micol and Clayton Graham, displayed speed, deception, and fight, to down the giant Austins 45-39. Led by Terry Hitt, Blunks held a 13-7 margin at the quarter and a 25-12 lead at the half.

Standard Oil Drops Again, but Only in City League

No, the price of oil has not gone down, but Fearer's went down to their fourth defeat as Wood's gained a 23-10 victory. Eleanor Wilkins scored 12 points, but not only lead Wood's attack, but also take the scoring lead from Florence Konazeski of Plymouth Mail.

Plymouth Sport Shop Wins Fifth in a Row

Plymouth Sport Shop, although only leading 39-31 at the half, swamped Atchinson Motor Sales of Northville 85-52, Monday evening at the House of Correction. Reynard Heining and Robert Bentley led the Sport Shop attack with 20 and 18 points respectively, while "Elmer" Blako scored 18 for Atchinson.

Daisy-I.D.E.A. Gives Sport Shop Troubles

Plymouth Sport Shop found their sixth straight victory more difficult to obtain than the previous five. Daisy, a thorn in every team's side, trailed 27-18 at the half, but tied the score during the third quarter and trailed at the end of that stanza by two points, 36-34.

**BABSON**

Babson Further Discusses 1948  
Washington, D. C. January 9. In addition to my formal Forecasts which are in this newspaper this week, I now want to add something for readers to think over.

**General Outlook**  
As heretofore stated, 1948 will be much like 1947,—at least up to November 2. With most manufacturing companies enjoying large unfilled orders, there can be no depression in 1948. There, however, will be an increase in war preparations. This will mean the shifting of employment and credits from one industry to another. For instance, we may expect some slackening in industries devoted wholly to unessential peace work. Industries which were booming during World War II, such as aircraft manufacturing, machine tools and shipbuilding, should

pick up again during 1948. If you are undecided as to how some special business will act in 1948, just consider how that business acted in the years 1938 to 1940. If the business prospered during those years, it will probably show increased activity during 1948. If it suffered, it may show a decline in 1948. There will be no World War III in 1948, but there will be marked preparation for it.

**What About Inflation?**  
During 1948 there will be much talk in Washington about "checking inflation," but any attempts will be largely of the eyewash variety and not fundamental cures. It is sound legislation to allocate materials to the more important industries. Doubtless certain allocations will be instituted during 1948. It also would help to reduce taxes so as to force people to leave the government employ and to produce. The only solution for inflation, however, is to discourage consumption and encourage production. Unfortunately, when the Government attempts to decrease consumption, people get panicky and increase their purchases; while controls tend to reduce production.

All Government attempts to interfere with the basic laws of supply and demand fail in their purpose. The only cure for rising prices is to let them rise to a point where production will be so profitable that it will increase to an amount which will be in excess to demand. This causes an abrupt decline in prices and in employment also. This cure is unpopular politically, and we will not see it before November 2, 1948.

Beyond allocating materials and reducing taxes, the only fundamental cures which the Government can provide are: (1) putting an embargo on exports, (2) suspending the agricultural price supports, (3) freezing wages and profits, (4) causing interest rates to rise sharply, and (5) reducing Government expenses. These movements would be unpopular politically, and I doubt whether we shall see them in 1948.

All of us are selfish. We don't want the Federal Government to shut off the exports of OUR goods, to suspend price support of OUR products, to freeze OUR wages or profits, to raise rate of interest which WE are paying,—or to discharge some relative of ours whom we must support,—even although these things would be for the good of the nation as a whole. Hence, I again say,—only a spiritual awakening can prevent another severe bust.

**Political Leaders Lack Courage**  
Members of Congress and the Administration know what to do. Chairman Eccles of the Federal Reserve Board has given Congress excellent advice, as reported in the morning papers of November 26. These recommendations, however, are unpopular. Even Congressmen are putting their own selfish desires ahead of the nation's good.

Congressmen are fearful of labor leaders. They are fearful of veterans, thus, unwilling to take a courageous stand on housing and rents. They are fearful of the bankers, in fact, of all pressure groups in Washington. Hence, 1948 will witness more or less of a do-nothing Congress. I visualize that economic conditions will continue about as at present during 1948; but as a fever is necessary to cure many diseases, so economic distress seems necessary to bring people to their senses and to their knees.

In West Los Angeles, Patricia Winiman was fined \$25 for driving 54 m.p.h. in a 20-mile zone, despite her excuse: "My baby crawled down—and pushed the accelerator."

Fish prices have increased along with those of all the other foods. Yet there are varieties that offer a thrifty source of delicious flavor and excellent food value.

The homemaker who relies on pa's lucky catch or an occasional can of tuna fish or salmon as the only basis of fish dinners is missing a good chance to add pleasing and economical variety to her meals. The lowlier members of the fish family are just as rich in high quality protein and minerals as the more costly ones. Remember that the ones that come from the sea contain iodine which is needed to keep chemical processes in the body functioning normally.

Within the last few years some new varieties of fish have appeared in the market. Rosefish fillets, for example, are another of the low cost fish. They're available in frozen form almost everywhere. The flavor is delicate and they can be served in a great many different ways, several of which are suggested below.

Like all fish they're good only if properly cooked. That means either very quick cooking at high heat to prevent drying, or longer cooking at quite low temperatures.

**Open-Fried Rosefish Fillets**  
Two pounds rosefish fillets, 1 teaspoon salt, 1 cup milk, 1 cup fine dry bread crumbs, 4 tablespoons melted butter, margarine or vegetable shortening.

Add salt to milk. Dip fillets which have been thawed enough to separate easily into milk, then into fine crumbs. Place on well greased baking sheet. Sprinkle with melted fat. Bake in very hot oven, 500 degrees F., for 8 to 10 minutes or until nicely browned and fish flakes easily. Serve hot. Serves 6.

**ONE DISH MEAL:**  
Fish pie is an excellent meal in a dish for a family dinner. A good tart cabbage slaw or a salad of mixed greens will complete the main course. Top this off with baked apples and cookies.

**Fish Pie**  
One and one-half pounds rosefish fillets or cod or haddock fillets, 1 cup cooked, diced carrots, 2 hard-cooked eggs, 4 tablespoons butter or margarine, 2 tablespoons chopped green pepper, 1/2 cup chopped onion, 1 cup milk, 2 tablespoons lemon juice, 1/2 teaspoon Worcestershire sauce, 1 1/2 teaspoons salt, 1/4 teaspoon pepper, recipe baking powder biscuits, 2 tablespoons chopped parsley.

Add slice of onion, small piece of bayleaf, a few pepper corns and 1 teaspoon salt to 1 quart water. Bring to boil and add the fish fillets. Cover pan and SIMMER fish for 10 to 20 minutes, depending on size of pieces, or until flesh can be flaked easily. Drain, saving liquid, remove skin from fish and flake coarsely. Arrange fish, carrots and sliced hard-cooked eggs in greased casserole. Melt fat, add green pepper and onion and cook over low heat until onion is yellow. Blend in flour, 1 cup of fish liquid and the milk. Cook, stirring constantly, until mixture boils. Add lemon juice, Worcestershire and seasonings. Pour over mixture in casserole.

Make favorite baking powder biscuit dough. Roll dough on floured board to about 1/4-inch thickness. Brush over with melted fat and sprinkle with chopped parsley. Roll up like jelly roll. Cut into 1/2-inch slices. Place on top of fish mixture cut side down. Bake pie in hot oven, 425 degrees F., for about 20 minutes or until biscuits are brown. Serves 6.

**DOWN EAST DINNER:**  
Fish chowder is an old New England standby that is just as

good for Midwestern dinner on a cold blustery night. It's another of those combinations that's almost a meal in itself.

Serve it with a good vegetable salad and squares of golden brown corn bread. Deep-dish apple pie will carry out the down-east flavor of the meal. What's hard about saving meat and wheat?

**Fish Chowder**  
Two pounds lean fish (cod, haddock or rosefish) about 2 cups cold water, 1 teaspoon salt, 2/3 cup diced salt pork, 2/3 cup diced onion, 3 cups sliced potatoes, salt to taste, 1/4 teaspoon black pepper, 2 cups boiling water, fish stock, 2 cups milk, crackers.

Cover fish with cold water to which salt has been added. Bring slowly to boil, cover pan, and simmer for 10 minutes. Drain, reserving stock. Remove skin and bones and flake fish. Fry salt pork in heavy pan until golden brown, add onions and continue cooking over low heat until onions are brown. Stir to cook evenly. Add potatoes, seasonings and boiling water. Cook slowly for about 10 minutes. Add fish stock, and flaked fish and simmer for 15 minutes. Add milk, bring to boiling point and serve at once over split crackers. Serves 6.

In Samalayuca, Mexico, six ingenious prisoners escaped by pushing down the jail walls.

To the 1947 Community Chest drive in Cincinnati, Ohio, chain store employees contributed 125% of their quota—the largest over-subscription made by any business or industrial group. And a Kroger man was in charge of soliciting these contributions. As a company, Kroger also contributed. Indeed, Kroger—always a good citizen—contributes to Community Chests and similar campaigns in every one of the 1,500 cities it serves.

**Minister Warns of Dangers on Skis**

Reverend Henry J. Walch, minister of the Presbyterian church, issues the following warning to adult lovers of outdoor winter sports: "Unless you are actually younger than you are, and unless you know you are physically able to compete with the youth of today in their pleasures of skiing and tobogganing, I advise that you stay indoors."

The reason for the Reverend's advice? It took him less than five minutes to fracture two ribs when he undertook a fancy turn on a pair of skis at a recent party where the "kids" were going to learn some tricks.

**Recruiting Officer Announces New Hours**

M/Sgt. Walter J. Dolbee, Jr., of the U. S. Army and Air Forces Recruiting Service, announces a new schedule for the coming year. M/Sgt. Dolbee will be at the Plymouth city hall every Tuesday, Wednesday, Friday and Saturday from 12 to 4:30 p.m. to accept applications for the Regular Army and Air Forces.

The sergeant states that young men between the ages of 17 and 35 may get above average pay, free food and clothing, a liberal education, and many other advantages by enlisting in today's peace time Army and Air Forces. He wishes to remind veterans that it is still possible for them to re-enlist in grade and advises them to contact him for further information.

Whew! it's all over, and wasn't it fun, and isn't it good to think of future evenings with friends by the fire, with good talk and pleasant games. But—have you an attractive card table set for your entertaining? Blunk's, Inc. is offering sets of four chairs and table of hardwood construction, upholstered chair seats, and attractive wood grained tops reduced from \$29.50 to \$19.85. Another big feature is the all-down bed pillows formerly much higher, priced now at \$8.50 each. Look at their attractive rag rugs—your pick at one third off.

Looking for a new hobby for the long cold evenings ahead? Here's one that not only is lots of fun, but will give you a complete Easter outfit at a minimum expense. What is it? Why Mrs. Humphreys' (1004 Junction) evening sewing classes, beginning Wednesday, January 14. These eight classes, for both beginners and advanced students, teach the main principles of design. Each class will contain not more than eight people, thus giving individual attention to each problem you may run up against. Call now for reservations.

This winter weather, it seems, has a way of bringing disaster to more than transportation. Not that we like to borrow trouble, but here's something to think about. With everyone conserving precious fuel, did you know you will get increased efficiency from your hot water system by using soft water. (The Culligan Way?) Call Mr. Clarke at Soft Water Service, 1376 S. Main street, and order your installation now to insure yourself hot water all winter long. Soft Water also prevents coating in the pipes, thus no stopped-up sinks.

You've read about them, seen pictures of them, and probably wondered where you, too, could buy some of those attractive feed sacks that can be made into so many different things. Specialty Feeds, 13919 Haggerty Highway has them in a variety of colors and patterns, including the new strawberry print, for \$5.00 each if bought separately, and 10 cents extra with feed. Here's news for you farmers troubled with chicken lice. Pratt puts out two remedies: the Poultrey Lice Killer, and the Poultrey In-falant.

By now we've broken our new year's resolutions, but here's one that if you haven't made yet, now's the time to do so. Stop in at Jean's Beauty Shop at 861 Penniman, or better yet, call 425-M and ask about the cream oil machine permanent, a special this month at \$8.50, including razor haircut, shampoo, and wave. Jean's new hours will be 9 a.m. to 3:30 p.m. except for permanents—which she will take anytime to accommodate the working girls. Another specialty of the shop is shampoo tints.

Keeping up a good personal appearance is an important part of our daily routine, and one of the things that is so easy to overlook and yet so necessary is the proper care of our shoes. You know, girls, Mike at Fisher Shoe Repair does wonderful repair work using Cats Paw heels and rubber soles. Here's news! If your galoshes need new zippers, or any other garment, for that matter, Mike will fix them for you just as good as new.

HOUSEHOLD MEMOS... by Lynn Chambers

Buy, Prepare Meats Wisely to Help Balance Budget

Now that the holidays are over, give your budget and appetites a rest by serving something simple, like good old-fashioned beef stew with dumplings. Complete the meal with a simple tossed salad and a custard pudding.

Buy economical cuts of meat, prepare them so as to reduce shrinkage to a minimum, and stretch them with dressing, stuffing, vegetables or whatever else goes well with them, and you will have gone a long way toward solving the difficult problem of balancing the food budget.

Fortunately, it doesn't matter much what cut of meat you buy, for they are all nutritious. The cheaper cuts, when prepared with care and properly seasoned, can be just as flavorful as the more expensive items.

Why not try these veal riblets soon? They come from the breast of veal with the breast bone removed and the breast separated into riblets by cutting between the ribs.

Barbecued Veal Riblets. (Serves 6 to 8) 3 pounds veal riblets 1/4 cup lard or drippings Salt and pepper to season 1 medium onion, chopped 2 tablespoons vinegar 2 tablespoons brown sugar 1/2 cup lemon juice 1 cup catsup 3 tablespoons Worcestershire sauce 1 cup water 1 teaspoon salt 1/2 teaspoon red pepper

Brown veal riblets on all sides in lard or drippings. Season with salt and pepper. Add chopped onion and brown lightly. Mix remaining ingredients and pour over riblets. Cover and simmer on top of range or cook in a slow oven (300 degrees) for 1 1/2 hours or until tender.

Ham slices need not prove an expensive meal especially if you are using leftover ham. The fact that you can prepare them with a fruit stuffing helps extend the ham and makes it flavorful, too.

Fruit-Stuffed Ham Slices. (Serves 6) Have two ham slices cut 3/4 to 1/2 inch thick. Spread one slice with a thick layer of stuffing. Place the second slice on top; secure by sticking wooden tooth-picks through one slice to the other. Spread surface of top ham slice with brown sugar or honey. Place on rack in roasting pan and roast in a slow (300 degrees) oven for 1 1/2 hours. Garnish with orange slices.

Fruit Stuffing. 3 cups soft bread crumbs 1 cup diced apples 1/2 cup seedless raisins 1/2 cup orange juice 1/2 cup melted ham or bacon drippings 4 tablespoons sugar Combine all ingredients. Mix lightly.

\*Old Fashioned Beef Stew with Dumplings. (Serves 6) 3 pounds beef shank, neck or flank 1/2 cup flour Salt and pepper 2 tablespoons fat 1 small onion, chopped 1 medium turnip, chopped 6 carrots, diced 5 potatoes, diced

In Sikeston, Mo., firemen enthusiastically trotted to the Palace Cafe, put out the fire among the T-bone steaks, ate them.

In Audubon, N. J. Landlord David Lange, unable to evict a mother of three children, took the roof off the house.

LYNN CHAMBERS' MENU

\*Old-Fashioned Beef Stew with Dumplings Orange, Pineapple, Coconut Salad Maple Custard Butter Cookies Beverage \*Recipe given.

Cut beef into small pieces for stewing. Dredge with flour and seasonings and brown in melted fat. Add chopped onion. Cover meat and onion with water and allow to simmer 2 or 3 hours until meat is tender. Half an hour before serving, add the vegetables; 15 minutes before serving, add dumplings, being careful not to remove cover while dumplings are cooking. When done, thicken gravy with flour.

Dumplings. 2 cups sifted flour 1 1/2 teaspoons baking powder 1/2 teaspoon salt 1 tablespoon butter 1/2 cup milk Sift flour with baking powder and salt. Add butter and work in with fork or pastry blender. Add sufficient milk to make a soft dough. Turn on floured board and roll 1/4 inch thick. Cut into small squares and drop into hot stew. Cover tightly and cook for 15 to 20 minutes.

Veal Birds. (Serves 6) 2 slices veal round, cut 1/4 inch thick 6 slices bacon 1/2 pound ground fresh pork 1 1/2 cups bread crumbs 1 small onion, minced Salt and pepper 1 cup rich milk

Cut veal into pieces for individual serving (6). Chop bacon and brown this with fresh, ground pork in a hot skillet. Combine with bread crumbs; season with onion, salt and pepper. Place a spoonful on each piece of veal. Roll and fasten with wooden toothpicks. Brown in hot lard. Add rich milk and cook in a slow (300 degree) oven until done.

Creole Kidney. (Serves 6) 1 pound beef or lamb kidney Flour 6 slices bacon or smoked jowl sausage 2 small chopped onions Water 1 chopped green pepper 1 cup tomato juice 1/2 teaspoon salt 1/2 teaspoon pepper Bit of bay leaf 1 tablespoon flour

Remove tubes from kidney and cut into 1/2 inch slices. Dredge with flour and brown in diced bacon. Combine kidneys and bacon. Add onions and green pepper. Stir until meat is well browned. Add tomato juice, salt, pepper and bay leaf. Cover closely and simmer for about 1/2 hour. Mix flour and water into a paste. Add small portions at a time to hot mixture to prevent lumping.

Tongue a la Maryland. 1 tongue Water 1/2 cup butter or drippings 1/2 teaspoon salt Bay leaf 1/2 cup brown sugar 1 1/2 cups canned or cooked cherries 1 cup liquid in which tongue was cooked 1/2 slice lemon Wash tongue and cover with water. If using a fresh tongue, add 2 teaspoons salt. Cover and simmer until tender. Trim and remove skin. Place in a pan with the remaining ingredients. Let simmer until liquid thickens.

Silk Scarf is the Thing to Give That New Look to Dress or Suit

Just the thing to give the new look to an old costume is a silk scarf. It may be printed or plain, large or small in almost any color you choose. Elinor Roth, of the textiles, clothing and related arts department at Michigan State college, suggests the 36-inch square which adds much to a costume and is new. Try using it at your throat or waistline. Tied properly, the scarf can become the front of a blouse with a suit. It can be folded into a slender strip, wrapped close about the throat and tied so that the ends fluff out in front to add a dash of color to a suit or dress. It can be used as a belt. Or you can fold it in a triangle and tie it at the waistline. Let the point of triangle fall over one hip and tie the ends over the other. It will give the new look to a basic black dress.

From letters and inquiries received, it seems that nearly every one back home is interested in knowing about the condition in which the hurricanes that swept southern Florida during the early part of the fall left the big city of Miami and surrounding country.

Believe it or not, the residents of this city and most of the surrounding section, by working like Trojans, have so completely wiped out the damage done by the storms that one would find it hard to believe that there had ever been anything here more than a good stiff breeze.

Little damage was done to any of the buildings. The rubbish has been cleared from the streets, and except for a section here and there of washed out concrete abutment along the ocean and sections of hard-surfaced thoroughfares damaged by the waves, there is little to indicate that Florida had two severe hurricanes within a month's time.

But one must not gain the idea that the storms were not severe ones. They were just what the papers said they were—but Miami

knows how to meet these emergencies and as time goes along, even the damage done by recent storms will in some way be prevented in years to come. Building codes in the city are rigid. They have been so written that one cannot erect any kind of a building that is not safe - guarded against violent winds.

Out in the back country it is different. One can see much to indicate storm damage, especially to the trees and shrubbery. Big power lines are still down along some country roads.

While the hurricane damage was not great, the torrential rains that fell during the second hurricane have raised havoc with hundreds of thousands of acres in southern Florida. In driving along Florida highway 25 from this city to Lake Okeechobee, one can see, even this time of the year, thousands and thousands of acres of land that are still flooded.

Desperate efforts are being made to drain the flooded sections, but there is so much water, it will take weeks, if not months before the area is dry again. The difficulty lies in the fact that drainage canals are on almost the same level as the flooded land and while big pumps are being used to raise the water, the process looks like an almost impossible task.

The water cannot soak into the soil as it does in Michigan. The water level is but a few inches under the top of most of this soil, and it must be drained off. One can see the little homes that were formerly occupied by vegetable growers still surrounded by water.

There are some sections where drainage has been sufficient to permit the planting of some winter vegetables, but the most of vegetables Mr. and Mrs. Plymouth will eat during the remainder of the winter will be grown in the fields of Texas, Arizona and California. Maybe late in the spring southern Florida will be able to make some shipments of vegetables, but the amount will be nothing as compared to former years.

Besides the floods due to the terrific rainfall that took place during the second hurricane last fall, the after-effects of the storm were probably more troublesome than the hurricane itself.

October is a hot month down in this country and the hurricane put out of commission the power plants in this entire area.

The result was that Miami was for five days after the last hurricane without electric current. That meant that all of the refrigerators as well as the lights of the city and homes were out of service. Homes were lighted

by candles. Food stored in the electric ice boxes spoiled. The big freezer plants were hit as hard as were the home owners. Nearly all perishable food spoiled as a result.

Drinking water that came out of the taps was hot and there was no way to cool it. The water mains in the cities and towns of Florida are laid but inches under the top of the ground, and as a result water that flows through these mains during hot weather really gets hot.

Then came the plague of snakes. Like St. Patrick, the flood waters drove the snakes out of the marshes to sections of roads and lands that were not flooded. One northerner who was here during the storms, said that he had to make a drive a few days after the second storm out on a country road. He declared that it was littered covered with alive and dead snakes, many of them rattlers. It was the outskirts of the cities and villages which felt this pest the worst. Even at this late date, read in the paper the other day where a resident living on the outskirts of this big city had been bitten by a snake in the yard of his home.

But hurricanes, floods and hot water cannot damage the ideal winter weather of Florida. That is one blessing of nature Florida possesses and cherishes.

Key West, the most southerly city in the United States, has its civic problems too. Right now it is passing a city ordinance levying a three cent cigarette tax, the funds to be used for improvements in the sewer system of the city. Florida cities have a right to levy any sort of a tax they desire, owing to the fact that the state permits local units of government to levy excise taxes. Under this law, the city of Miami has some two or three dozen license laws, among them being one which levies a tax upon every room in a home or hotel that is rented.

Notwithstanding its unlimited use of the so-called excise tax rights that all Florida cities possess, newspapers report that the city of Miami is going to be broke at the end of the present fiscal year in June. The city is planning to borrow money to keep it in operation during the early part of its next fiscal year.

Heard former Ambassador Joseph Kennedy to the Court of St. James make a talk the other night about Americanism. Reared in the land where American history was born one would have thought this super-millionaire of Boston would have had plenty to say of an inspiring nature to a large audience of Americans. His talk reminded me somewhat of some of the type of speeches we used to hear in the house of representatives up in Lansing during the days when New Dealers were sending their out-standing "leaders" to Lansing to make the laws of the state. During the days of the Roosevelt dynasty in America it was freely charged that the size of political contributions had much to do with appointments of ambassadors and foreign ministers.

In Waukesha, Wis., Mrs. Regina Wright won a divorce from husband Russell, who, she complained, made her nervous by getting up at 5 o'clock every morning to scrub floors and do the ironing.

**Defrost Freezer  
Only Once a Year**

Persons owning home freezers need to defrost the units only once a year. The time to do it is when the frost on the freezer sides is one-eighth to one-quarter of an inch thick.

There are, however, three vital musts to keep in mind while defrosting. The freezer should not be washed, the food should be kept frozen, and a smooth dull tool should be used.

The whole job takes no more than 15 to 20 minutes but it does not mean disconnecting the freezer or shutting off the current or washing out the freezer box as you do when you defrost your refrigerator. You scrape the frost off. In fact, the walls of the freezer are so cold that a wet cloth would stick to them. But if you insist on washing, you have to turn the control to OFF and wash after they warm up a bit.

Keep food frozen while you defrost. Line cardboard carton with newspapers. Pack frozen packages in carton; wrap papers around them in thick layers. If your freezer has two compartments, just pile all frozen food in one while you scrape frost from other. Then alternate.

Use blunt tool: a butter paddle, bottle opener or wooden spoon. Never a sharp tool; it may mar or scratch freezer lining.

To remove frost: Line freezer bottom with papers to collect scrapped-off frost and absorb moisture as frost melts. Scrap down sides with dull tool. Discard papers when finished.

Tall, thin bottles, such as olive bottles, are ideal for filling with hard candy. Pasting a picture on the outside turns them into nice gifts for children.

My MICHIGAN

BY • ELTON R. EATON

My fish line dangled lifeless on the bottom of the Atlantic ocean on Florida the other day. For some little time there was nothing to indicate that there was a fish of any kind in the ocean.

Naturally when this inactivity prevails on a fishing trip, a fisherman does a lot of thinking.

Of the many, many enactments consumed by the legislature, what, to my way of thinking, was the most outstanding one, the most beneficial one to the state of Michigan and its residents that I had sponsored and brought into being?

Was it the tuberculosis measure that finally gave the state control of this highly contagious disease? Was it the library aid bill, the welfare re-organization measure, or one of a dozen or more other measures?

Or was it the amendment to the general game laws which made it possible for the conservation department to acquire fish-

ing sites on lakes, rivers and streams that were fast being closed to the public?

It all depends upon the point of view—but we believe that our most outstanding accomplishment was the presentation and the adoption of the measure which has already opened to the public 337 lakes and streams to the millions of men, women and children of Michigan who enjoy fishing and boating on the beautiful waters of this beautiful state of ours.

The progressive and wide-awake conservation department of ours recently announced that in the brief decade that has just passed, the people of Michigan now possess 232 public fishing sites on lakes, and 105 on streams. Of this number there are 100 which have been improved and provide parking space for cars and conditions which permit the landing of boats on the lakes. There are an additional 118 public fishing sites which are usable and another 119 which need improvement, such as entrance roads, parking areas and similar conveniences.

As a general rule we have always been opposed to the earmarking of public funds. We do not believe it is good public policy, but sometimes a condition does arise which makes it advisable. We believe that the securing of public fishing sites was one of these conditions, because hundreds of lakes and streams were being closed to the general public unless they paid a price.

The Michigan Conservation department had been planting these lakes and streams for years, in many cases for the benefit of only those who owned property around the lakes. The best near-by example is Orchard Lake. For years and years the state had planted this lake to fish, but unless you were one of the favored few you could not fish on the lake.

Through this measure we are discussing the conservation department has been able to purchase and create a beautiful public fishing site, located near the town hall of Orchard Lake village on the Walled Lake-Pontiac road.

All of this has been made possible because of the provision written into the game law bill which says that a certain amount of each fishing license shall be used in purchasing public fishing sites and in the development of better fishing conditions.

In years to come we believe the importance of this measure will continue to grow and under its wise administration by the outstanding conservation department of Michigan, its value to our state will be unlimited.

While discussing this highly important question we desire to pass along a suggestion to the thousands of fishermen of eastern Michigan who use the public fishing site at the mouth of the Au Sable river in Oscoda.

The department, under this act, was able a few years ago, to buy public access to the south side of the Au Sable where it empties into Lake Huron. Fishermen for years had been trespassing on private lands in order to get out on the wooden pier, which serves as a retaining wall for the river, to enjoy some of the finest perch fishing in the state.

Under the direction of Fred Westerman, chief of the fishing division of the Conservation department, much was done last summer to improve this ideal fishing place. The road to the fishing pier was improved and the parking lot was enlarged and given a coating of gravel, making it possible to park more than 100 automobiles in the area.

Some steps were taken, too, towards improving the planking on the pier, but more needs to be done and probably will be this year.

The suggestion we have in mind for the Oscoda fishermen especially who use this fishing site most extensively, lies in the idea of a little local aid in the expense of the project. The pier will need additional planking in the spring, there is no question about that.

Here is the point we are driving at—fishermen who do all of their fishing in Lake Huron and the other Great Lakes, do not pay a cent into the fishing license funds. In other words, all of the improvements which have been made at Oscoda and the few other public fishing sites on the Great Lakes, have come out of the pockets of fishermen who do nearly all of their fishing on inland lakes and streams.

As a matter of fact the money used to buy the Oscoda fishing site, the money that was first used to make it available, and the money used last summer to improve the road and expand the parking area—all for the benefit of fishermen who pay no fishing licenses—came out of the pockets of inland lake fishermen.

We believe that Mr. Westerman went a long way last summer in doing what he did to greatly improve this fishing site. We believe, too, that the commercial fishermen who operate out of Oscoda have been benefited and will be benefited too by continued maintenance of this fishing site, as the strengthening of the wooden piling by additional planking will serve to lengthen the life of the piling, and thereby keep the river open to navigation of the fishing boats.

The suggestion is something for the many enthusiastic fishermen of Oscoda and vicinity to think about—and we believe—do something about.

Fewer foxes were presented for the \$5 state bounty last week than in any week since bountying began in volume. The 673 bountied, however, brought the 10-week cost to the conservation department to \$46,570, says the department news bureau.

Fox hunting parties that would like to know how their success compares with that of other fox hunting parties are urged by the conservation department's game division to keep hunting records on the standard form it is furnishing. Some 1,500 fox hunting report forms already have been distributed among sportsmen's clubs across the state, and others are available on request.

Michigan's whitefish production in 1947, estimated at 7,000,000 pounds, has been exceeded, since modern records were begun in 1912, only in 1930, 1931, and 1932, when the now restricted "deep sub" trap nets were in use and about 8,000,000 pounds a year were taken. Since 1932, the whitefish catch has averaged about 2,000,000 pounds, according to conservation department records. The commercial lake trout catch, which has averaged about 5,500,000 pounds since 1912, is down this season to a low of about 3,000,000 pounds.

Why hunting accidents? asks the Wisconsin conservation department.

Wisconsin wardens today pointed to one definite reason in citing that in the one month of November there were 86 hunters arrested for violating the law which requires that a gun be unloaded and in a carrying case for legal transportation in a car. Loaded guns in cars produce many accidents. George Hadland, chief conservation warden, points out that the law is designed to protect hunters as well as game.

The month of November produced 519 arrests for conservation law violations, gun hunters

were arrested for shining deer, for taking a gun along in the season limited to bow hunting only, and for carrying a strung bow in a car.

The Wisconsin hunting seasons now drawing to a close resulted in the death of nine men and injury to 44 as a result of accidental discharge of guns or misplacement of shots. Six of the fatalities came in the deer season and three in the seasons for small game.

Sportsmen do not like to be known as law violators but the conservation department pointed out today that all hunters who fail to file their game census cards at the end of a hunting season are in that classification. Filing of the reports is not a matter of option, the department said, but required under a law passed by the legislature. Conservation department records show that Wisconsin still has many thousands of delinquent hunters this year.

The fastest way to get action is to use Plymouth Mail classifieds.

It's a-MAZE-ing!

Husbands, please note! Your wife performs 70 different tasks in her normal day's work! (Frankly, women will think this figure far too low, but it comes from the U. S. Government's Office of Education!)

Yes, home-making is a big job—but time-and-labor-saving electricity helps a housewife skip through her maze of tasks. Electric service saves her steps, lightens her work, gives her more leisure, makes life healthier and happier for her and all her family!

And it costs so little!

Just divide your last 2-month bill by the number of jobs electricity does every day. Then you'll see how little!

Yes, it's a-MAZE-ing!

25 YEARS AGO FROM THE PLYMOUTH MAIL FILES

The fuel situation in Plymouth has become quite a serious problem with many families who have been unable to obtain an adequate supply of coal. Local dealers, who have plenty of coal ordered to meet all demands, are unable to get the cars of coal through, which they have rolling, but they are making every effort to get this coal to Plymouth, and it is to be hoped that the situation will be relieved very shortly.

George W. Springer has been reappointed deputy sheriff for Plymouth by Sheriff George Walters, and was sworn in by that official last Monday. In the re-appointment of Mr. Springer as deputy sheriff for this township, Mr. Walters could not have made a better selection or one that would have better met the general approval of the citizens of Plymouth. For 24 years Mr. Springer has served Plymouth in the capacity of deputy sheriff, and during these years he has made a splendid record as an officer.

Salvation Army Aids Santa Claus

Members of the Plymouth Salvation Army, under the leadership and guidance of Captain William Roberts, set a "good will" record at Christmas time that is hard to beat.

Twenty families in this vicinity enjoyed a Christmas dinner which was made possible by this organization. In addition to this, they distributed approximately 125 gifts. But this is still not all they did to make Christmas a better day than it would otherwise have been for many. They also gave a party for inmates at the House of Correction, and gave each some fruit, candy, and nuts.

Johnson-Campbell Rites Solemnized New Year's

The marriage of Priscilla Johnson and Eugene Lee Campbell was solemnized on New year's morning at eleven in the Congregational parsonage in Salem. Their vows were spoken at a double ring ceremony with Rev. Lucia M. Stroh officiating. The bridegroom's brother and his wife, Mr. and Mrs. Floyd Leslie Campbell attended the couple.

After the ceremony, a double wedding celebration honoring the bridegroom's parents, Mr. and Mrs. William Campbell on their 37th wedding anniversary and the newly married couple, took place at the former's home on Oakville avenue. Mr. and Mrs. Eugene Campbell will make their future home in Plymouth.

**BABSON**

**1948 in a Nutshell**  
**BUSINESS:** Watch out after November 2, 1948.  
**COMMODITIES:** Wholesale price peak in sight.  
**TAXES:** Personal income taxes will be somewhat lower.  
**LABOR:** Wager workers to use Taft-Hartley Bill as check on labor leaders.  
**REAL ESTATE:** Increased suburban building.  
**POLITICS:** Election year propaganda.  
**STOCKS:** A year for switching.  
**BONDS:** Low-coupon rate, long-term bonds will be lower.  
**Business and Financial Outlook for 1948**  
By: Roger W. Babson  
1. 1948 will be, more or less, of a duplicate of 1947. Certainly there will be no "depression" as so many pessimists are talking about, but fundamental conditions will become increasingly less favorable. Watch out after November 2, 1948.

**General Business**  
2. The above paragraph applies mostly to gross business. Certain industries will show smaller net profits. This means that, in some cases, dividends may be less in 1948. Remember some things may be allocated, or rationed again in 1948.  
3. The reconversion from war to peace has been entirely completed; war surpluses are pretty well disposed of; and 1948 will even show a resumption of military purchases.  
4. Inventories, quoted both at their price values and their volumes, will increase during 1948. Both raw material piles and manufactured goods will be in greater supply during 1948.  
**Commodity Prices**  
5. Notwithstanding the above paragraph, some allocations or priorities may be reinstated in 1948. The public is sick of high prices and will make demands for some price controls in the case of certain products in short supply.  
6. The retail price of some goods, other than food products, will be higher during 1948 as the final turn has not yet been reached for all types of goods.  
7. We expect to see the peak in wholesale commodity prices sometime during 1948. We, therefore, advise going easy on inventories, especially on borrowed money.  
8. Retail price changes will lag after wholesale price changes. This explains why we expect retail prices on good quality merchandise to hold up for awhile after wholesale prices begin to decline. BUT 1948 WILL BE A YEAR OF WAR PREPARATIONS.

**Farm Outlook**  
9. The total farm income for 1948 should approximate equal that of 1947; but we forecast lower prices for wheat, corn, and certain other products. Farmers should certainly diversify more in 1948, get out of debt, put money into improvements, and prepare for real trouble someday.  
10. The supply of certain vegeta-

bles, fruits, and fish products should increase during 1948 and the price of these should fall off barring some weather, insect, or blight catastrophes.  
11. Meat will be in shorter supply in 1948 than in 1947. Should the current propaganda to "eat less and have a better figure" gain popularity, upward pressure on meat prices would be greatly reduced.  
12. Farmers will try to get both 1948 Presidential candidates to promise further subsidies.  
The above four Farm Forecasts assume normal weather which we do not attempt to predict.

**Lower Taxes**  
13. The Federal debt will be decreased during 1948.  
14. No personal taxes will be increased during 1948 and there will be some reductions, perhaps 5 per cent to 10 per cent in the upper brackets and the entire elimination of those in the lowest bracket.  
15. We forecast that the new tax bill will enable a man to share his income tax equally with his wife without his income or property.  
16. The 25 per cent tax limit on long-term gains will remain unchanged.

**Retail Sales**  
17. Goods on counters will be of better grade in 1948, even if retail prices hold up.  
18. There will be many "mark-down sales" of goods of inferior quality and curbs on installment buying may return.  
19. The dollar value of all retail sales in 1948 should at least equal 1947.  
20. The unit value of retail sales will be less in 1948 than in 1947; there will be fewer customer purchases in most stores, although each customer may visit more stores to "shop around."

**Foreign Trade**  
21. Our foreign trade will be less in 1948 than in 1947. We shall help Europe; but it will be on a more economical and efficient scale.  
22. More foreign loans will be made during 1948; but many of these will be direct to business concerns rather than to political governments.  
23. There will be considerable competition from other countries in legitimate foreign trade where the credit is good. Other countries will not compete with us in our "charities"; but they certainly will compete for all profitable business.  
24. Throughout 1948 war talk and uprisings will continue but no World War III will start in 1948. **WAR PREPARATIONS WILL ACCELERATE.**

**Labor Outlook**  
25. 1948 will see an average hourly wage rise of 5 per cent to 7 per cent. Lower income taxes should increase buying power, but this will be about offset by further rises in the cost of living.  
26. There need be no more unemployment in 1948 than in 1947; but "unemployment insurance" will be taken advantage of by too many unprincipled people.  
27. Wager workers will gradually see that the Taft-Hartley Bill puts a checkrein only on their labor leaders, but not on Union membership. Hence, the bitter hatred against this Bill will gradually subside. The Bill is merely an "SEC" for labor leaders who need it today as much as investment bankers needed the SEC which was started ten years ago.  
28. Any labor legislation during 1948 will be to amend the Taft-Hartley Bill and to raise minimum wages.

**Inflation**  
29. The Inflation Era which we have forecast for several years will remain at this stage until November 2, 1948. There will be no reckless printing of currency or government borrowing in 1948.  
30. 1948 will be a public reaction against "feather bedding," "workless" jobs, and union rules which result in slow-ups. More labor-saving machinery will be installed. The public is gradually realizing that inflation can be beaten only by increased production.  
31. Sometime during 1948 production in many lines will have caught up with consumption which will prevent further price increases in such lines.  
32. There will be many inflation and price investigations during 1948. Both the Democrats and Republicans will try to lay the blame for high prices on the other party.  
**Stock Market**  
33. We believe that 1948 will be a year of switching, for various reasons. One of these will be an attempt to get out of stocks of companies which have most of their assets in big "vulnerable-in-cases-of-war" cities into companies whose assets are well distributed and safe from attack.  
34. The Administration will try to keep the Dow-Jones Industrial Averages between an upper ceiling of around 185 and a floor of 165. Commodity speculators will be curbed.  
35. The wisest will not try to pick any special "winners" in 1948; but will diversify broadly and those who have too many stocks will gradually build up good reserves, in cash or Governments, for the big break which will come someday.  
36. Careful buyers of stocks will insist on making full payment and avoid borrowing during

**Bonds**

37. We are definitely bearish on low-coupon rate, long-term bonds. Many of these will sell at even lower prices in 1948 than in 1947. Money rates will gradually increase.  
38. If Congress gives a good reduction in Federal taxes to investors in high brackets, 1948 will see a further falling off in the prices of most municipals and other tax-exempt bonds. As indicated above, however, we do not expect such a desired tax reduction.  
39. In view of the large decline in many preferred stocks during 1947, this rate of decline should begin to level off during 1948.  
40. Investors will give much more attention to diversification in 1948 and not become too heavily interested in railroad securities, telephone issues and other public utilities, many of which are now selling too high.

**Real Estate**  
41. City real estate will continue to hold firm through 1948, due to less available space caused by pulling down structures to save taxes, to provide parking spaces, etc. There also is a disinclination to build city property in view of the present high inflationary building costs.  
42. Suburban real estate will continue in greater demand with still higher prices during 1948.  
43. Big commercial farm acreage may sell for less during 1948; but subsistence farms located close to established communities will hold up in price.  
44. General building should increase during 1948. Young people are gradually getting accustomed to high building costs and tired of living with their mothers-in-law.  
45. Both office and residential rents will be higher in 1948. Property owners are entitled to receive higher rentals. Only as such are granted will there be as much building as there should be.  
46. Mortgage rates during 1948 will continue about the same as in 1947. These rates are very favorable for those who have the courage to build. However, in 1948, it will be harder to obtain mortgage loans.

**Politics**  
47. Both President Truman and the Republican leaders will be playing politics up to November 2, 1948. It is now too early to forecast the outcome of the Presidential election. The Republicans, however, have so bungled the price controversy that Mr. Truman has a fair chance of re-election.  
48. Congressmen returning from Europe will determine our foreign policy and take it out of the hands of the State Department, the Brass Hats, and even the President himself.  
49. Unless illness or accident interfere, Mr. Truman will be the Democratic candidate, with the possibility of Mr. Marshall being on the ticket with him.  
50. We forecast a greater interest in some religion, temperance, and civic righteousness during 1948, with continued reaction against denominationalism, intolerance and dogma.

Dear Mr. Eaton:

It was my privilege some weeks ago to attend with other Northville folks your community presentation of Handel's "The Messiah" and the symphony program. In a day of pagan materialism how important it is to encourage the things of the spirit. Plymouth can establish a beautiful tradition in the yearly presentation of great music built around the one theme necessary for our day. The chorus, symphony and Directors are to be commended. I am certain your community will increasingly support fine projects of this nature.  
Sincerely,  
Harold F. Fredsell, pastor

**Happy Birthdays, Anniversaries on Christmas Day**

Although most people don't know it, the initial of Hiram Clark's last name stands for Christmas.  
To begin with, his own birthday falls on this day. Plus this, his two brothers, who are not triplets, also have birthdays on this same date. One brother, named Earl, lives in Royal Oak, while the other, Alfred, lives in Wyandotte. All three met at the latter's home for an hours birthday celebration on Christmas.  
Not to be outdone by all this, Hiram's two sons, Gerald and Hiram, Jr., of Garden City, were married on Christmas day. They, however, were not the first ones in the family to get this idea. Hiram's parents, the late Mr. and Mrs. Henry Clark, were married on December 25.

In Philadelphia, when Lorenzo Brokenbough admitted that he had four wives, Judge Raymond MacNeille gave him 9 to 18 months and a piece of his legal mind: "You're setting a bad example for those of us who have only one wife."
